Quick—
What Time Is It!?

Time:
It's complicated

Definition:

Chronos & Kairos

The background of the slide features a dark, textured image. On the left, a sword with a detailed hilt is visible. In the center, there is a shield with a circular emblem containing a dragon or similar mythical creature. The overall color palette is dark with some lighter, textured areas.

Noumena & Phenomena

Definition:

Space & Time?

The background of the slide is a Cosmic Microwave Background (CMB) radiation map, showing a complex pattern of red and orange filaments against a dark blue background, representing the early universe's temperature fluctuations.

Space-Time

Definition

Forget definitions

Let's try abstractions!

Abstraction: Clocks

Abstraction: Calendars

A map of Australia is shown in the background, divided into vertical color bands representing different time zones. The bands are labeled with offsets from UTC: +7 (dark teal), +8 (maroon), +9 (dark blue), +9½ (medium blue), +10 (olive green), +10½ (light green), +11 (purple), and +13 (dark purple). The map also features vertical lines for longitude at 105°, 120°, 135°, 150°, and 165°. Overlaid on this map is the text 'Abstraction: Time zones' in a large, bold, yellow font.

Abstraction: Time zones

Abstraction: Datetime libraries

**Do not
write your own
datetime library**

"I wonder if this is by design or by accident."

– R. David Murray

**Do not
assume that the
network is reliable**

Electricity: Like the Internet but worse

The background of the slide is a dark blue-grey color. It features a faint, large clock face with Roman numerals, centered behind the text. To the left of the clock, there is a pile of small, multi-colored triangular confetti or paper shreds, also in shades of blue and grey.

Distortions?

In *my* space- time field?

It's more common than you think.
