Azure Static Web Apps

Globally-distributed hosting

Streamlined build and deployment

Custom domains and free SSL certificates

Built-in authentication and routing rules

Generated Staging Environments

CLI Support

@meliss_houghton

Generally Available

Azure Static Web Apps and .NET 7

@meliss_houghton

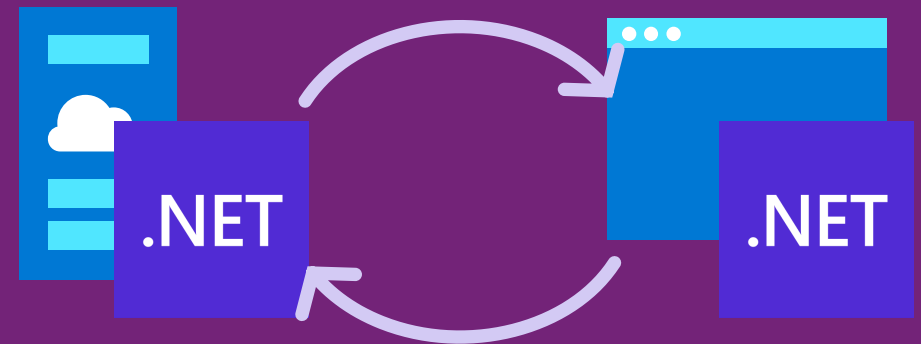

Blazor WebAssembly

Full-featured frontend framework

Runs .NET client-side on
WebAssembly

Shared component model across
the server and client browser

Full stack .NET Web Applications

Azure Functions and .NET

Serverless solution with .NET option

Run code blocks based on triggers

Event-driven automated scaling

No infrastructure management

Flexible pricing options

Isolated Worker Model

@meliss_houghton

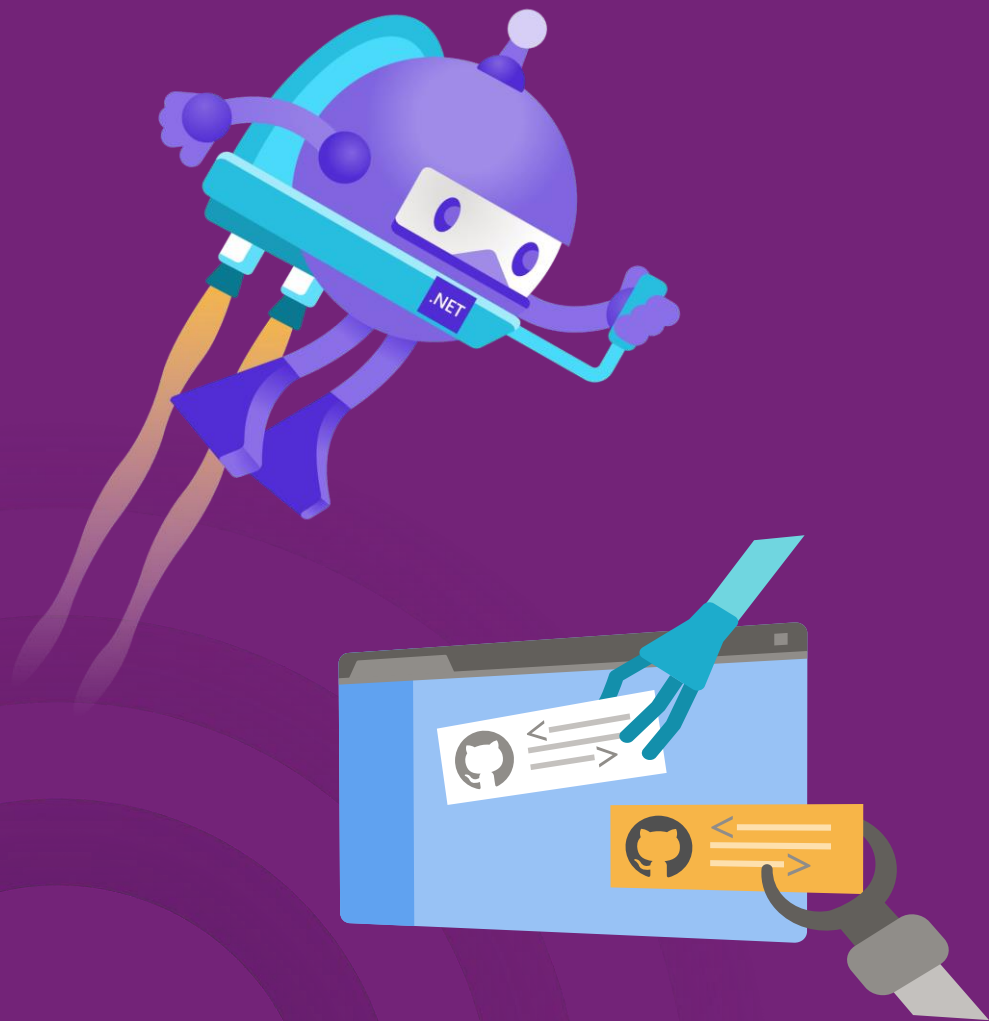

.NET

Demo

@meliss_houghton

Deployment

First class GitHub and Azure DevOps integration

Automatically build and deploy on code change

Staging versions based on Pull Requests

Globally Distributed Static Hosting

Now GA: GitLab and BitBucket Support

Static Web Apps CLI

All-in-One Local Development Tool For Azure Static Web Apps

[Get Started →](#)

Install

Install the Azure Static Web Apps CLI using **yarn** or **npm**.

Init

Setup your project using **swa init**

Login

Authenticate with Azure services using **swa login**

Start

Preview and debug your static web app using **swa start**.

Deploy SWA (cloud)

Build/deploy to multiple environments using **swa deploy**

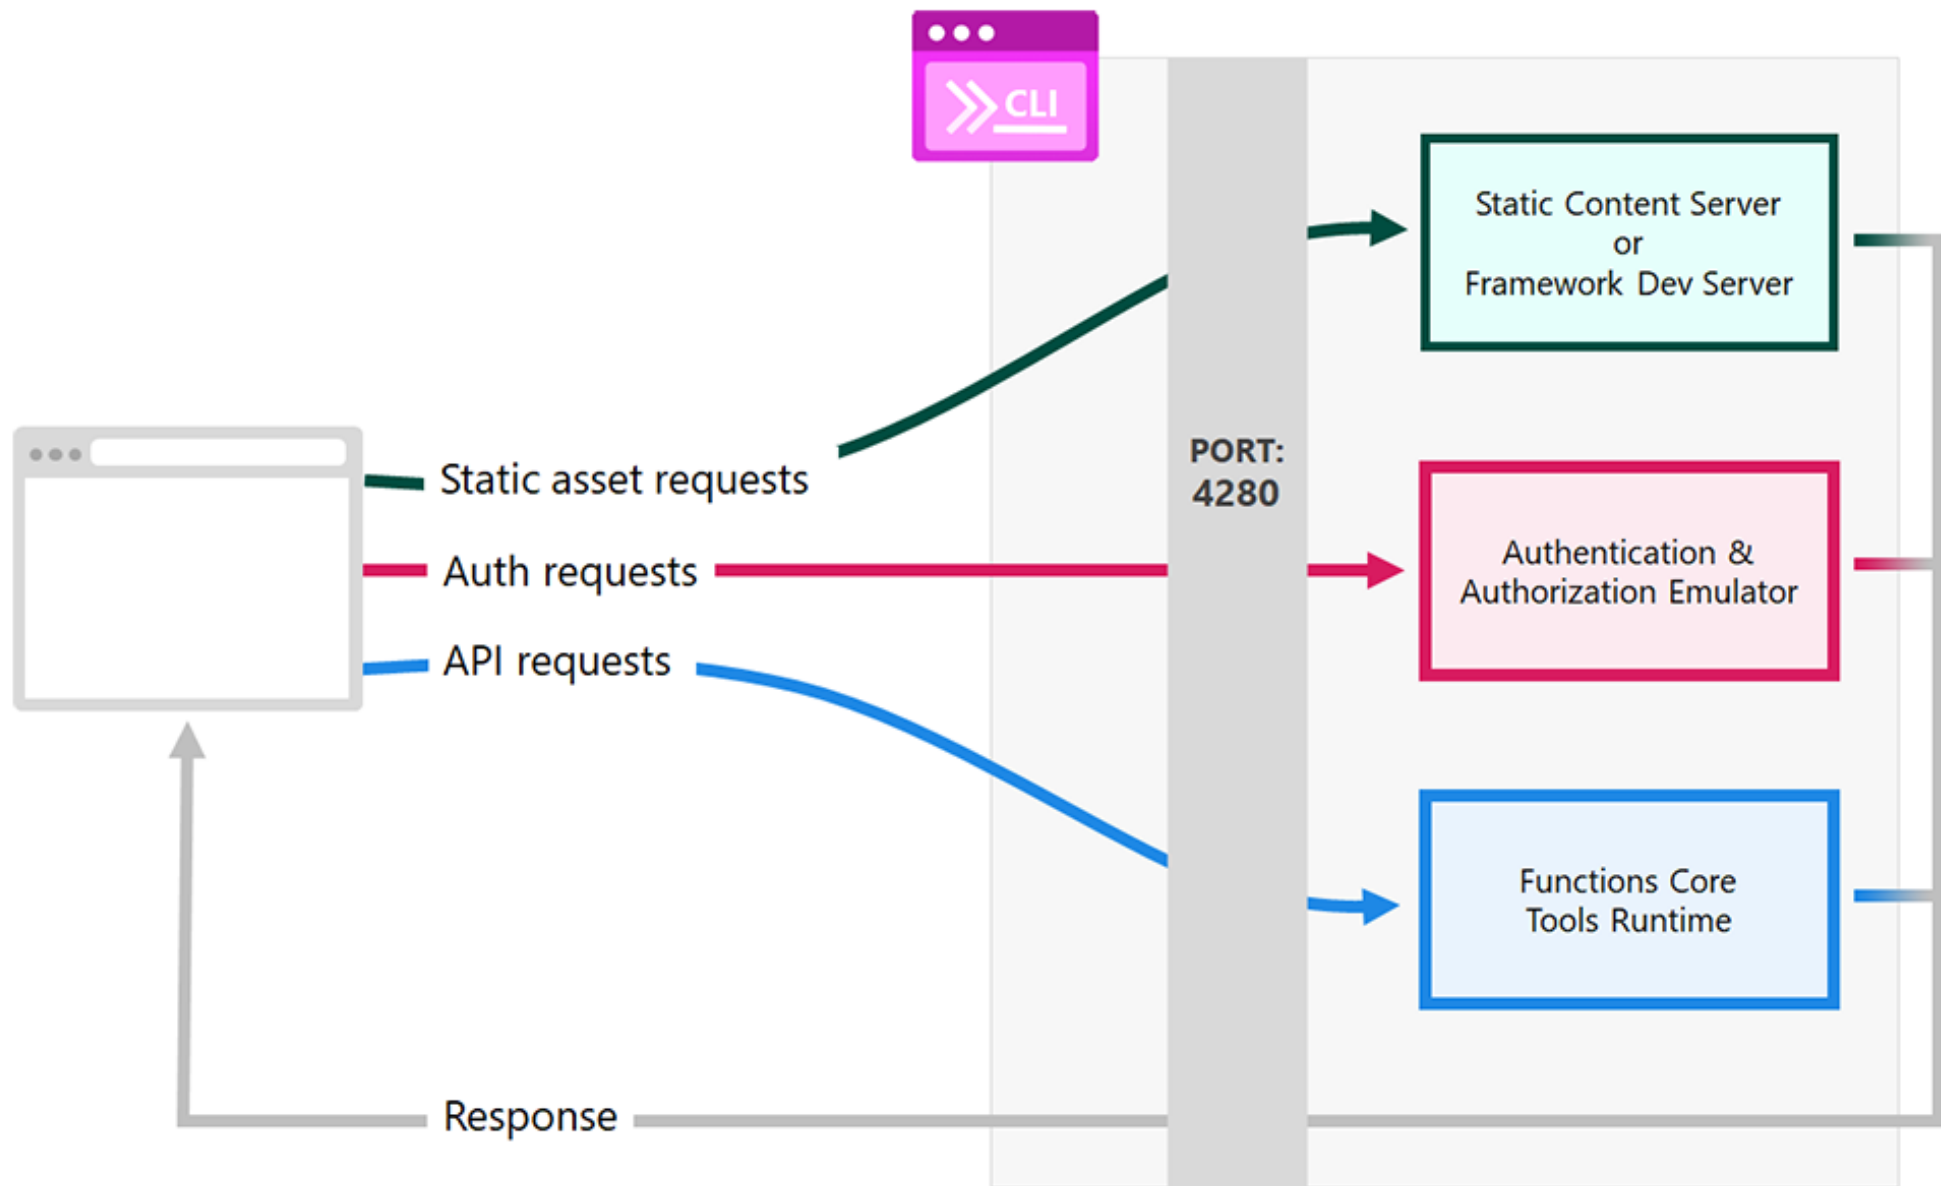

Configure

Setup **environment variables** and **config settings**.

Azure Container Apps

Serverless containers for
microservices

ASP.NET Web APIs and Minimal APIs

Worker Service for background
services

Focus on apps, not infrastructure

Demo

@meliss_houghton

Enterprise-Grade Edge

Combines capabilities of Azure SWA, Azure Front Door, and Azure CDN

Caching assets at the edge

Global presence

Faster Page Loads

Enhanced Security

Authentication

Azure Active
Directory

GitHub

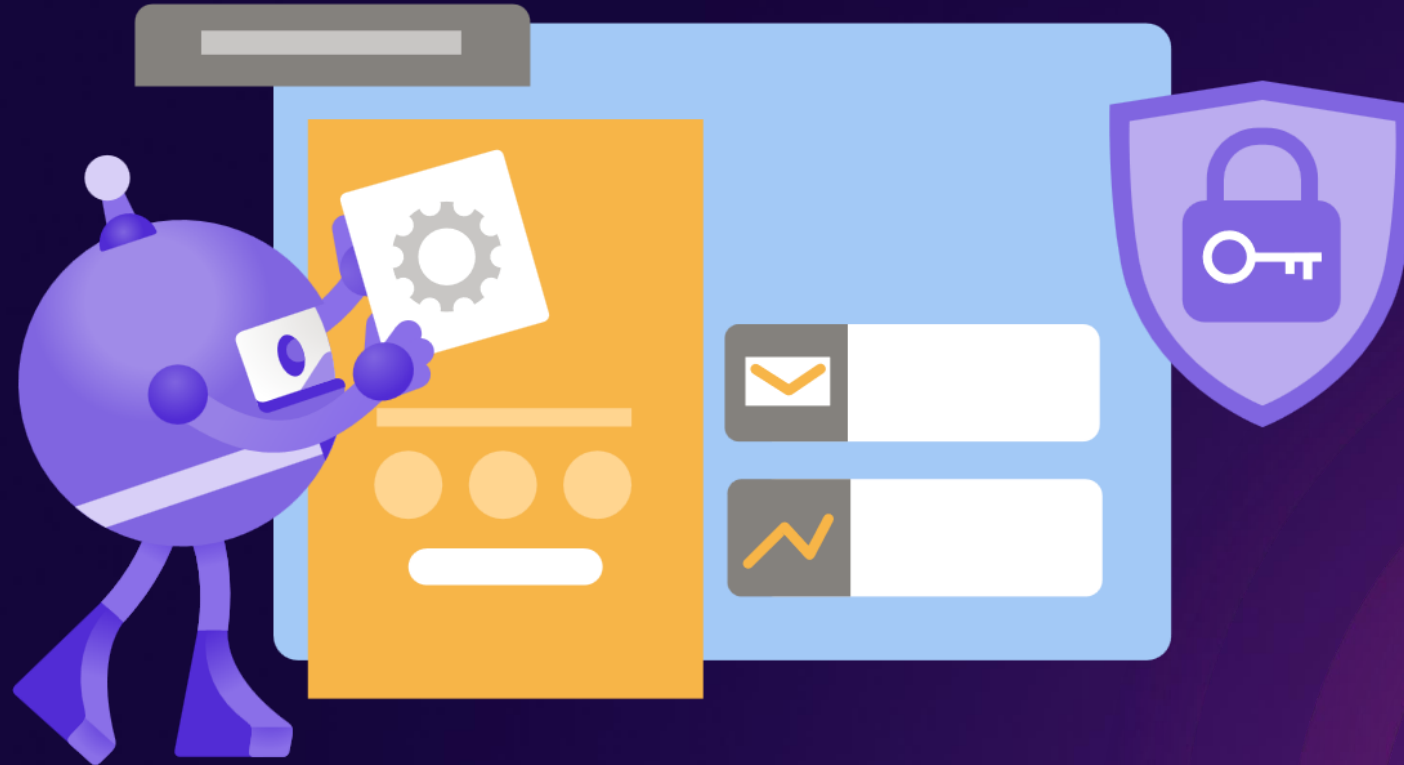

Twitter

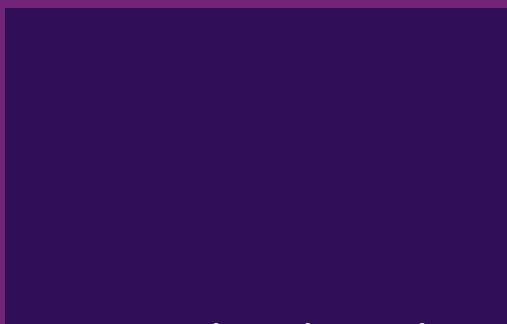

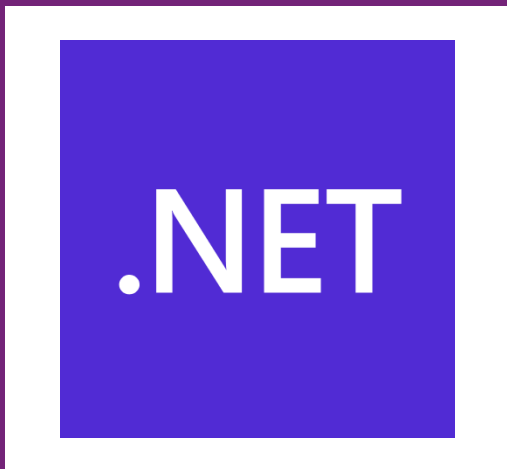

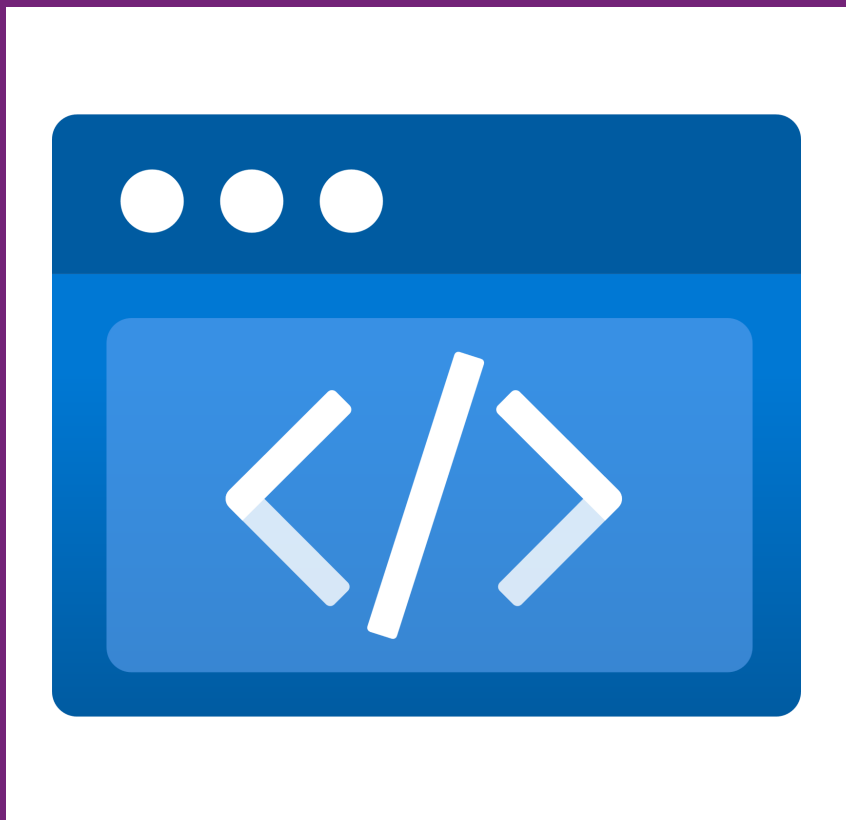

Custom
Providers

Demo
