Realistic responsive design

by **Inayaili de León Persson** makingWeb_2.15, Oslo, 2015

1. Define a project leader

2. Buy lots of sticky notes

3. Involve all the right people

https://flic.kr/p/dMpken

4. Make a wishlist and plan from there

https://flic.kr/p/oRsPbM

5. Add deadlines for other projects to the calendar first

Show the calendar list			< April 2014 >	Today

experience

Users can surface their content naturally and industry can customise endlessly

Learn more about scopes >

Feature complete

Run all of your favourite apps from the launcher and swipe effortlessly between them using Ubuntu's magic edges. Use the home scope to search phone and web, and keep your life and content organised with the brilliance of the Ubuntu's scopes.

Learn more about Ubuntu's features >

With all-native core apps and no Java overhead, Ubuntu runs well on entry-level smartphones ---- yet it uses the same drivers as Android. So now it's easy to bring a better experience to customers all over the world.

Learn about working with us x

Ready for your phone

All developers need

Create gorgeous native apps or lightweight HTML5 apps easily, with our SDK. Repurpose web apps fast, so they look and work like their native cousins. With one OS for all form factors, one app can have interfaces for phone and desktop in just one upload.

Learn more about developing apps >

23. Evolve instead of change

24. Don't be afraid to copy

Global CSS settings, fundamental HTML elements styled and enhanced with extensible classes, and an advanced grid system.

Overview

Get the lowdown on the key pieces of Bootstrap's infrastructure, including our approach to better, faster, stronger web development.

HTML5 doctype

Bootstrap makes use of certain HTML elements and CSS properties that require the use of the HTML5 doctype. Include it at the beginning of all your projects.

```
<!DOCTYPE html>
<html lang="en">
