

What DevOps is **NOT**

Leon Fayer
[@papa_fire](#)

What is that **DevOps**
you speak of?

It's
DevOps!

It's
DevOps!

It's
DevOps

It's
DevOps!

It's
DevOps!

It's
DevOps!

NOT a thing

NOT a product

can **NOT** buy it

☞ By using **Agile** techniques,
which at heart is about
working and talking
together to achieve
common goals, **DevOps**
can help you make most
out of your **Cloud**.

Huh?

does **NOT** equal
other buzzword

what if I told you

that devops and agile are
NOT the same thing

HIRING

Sr DevOps Engineer/ DevOps Manager

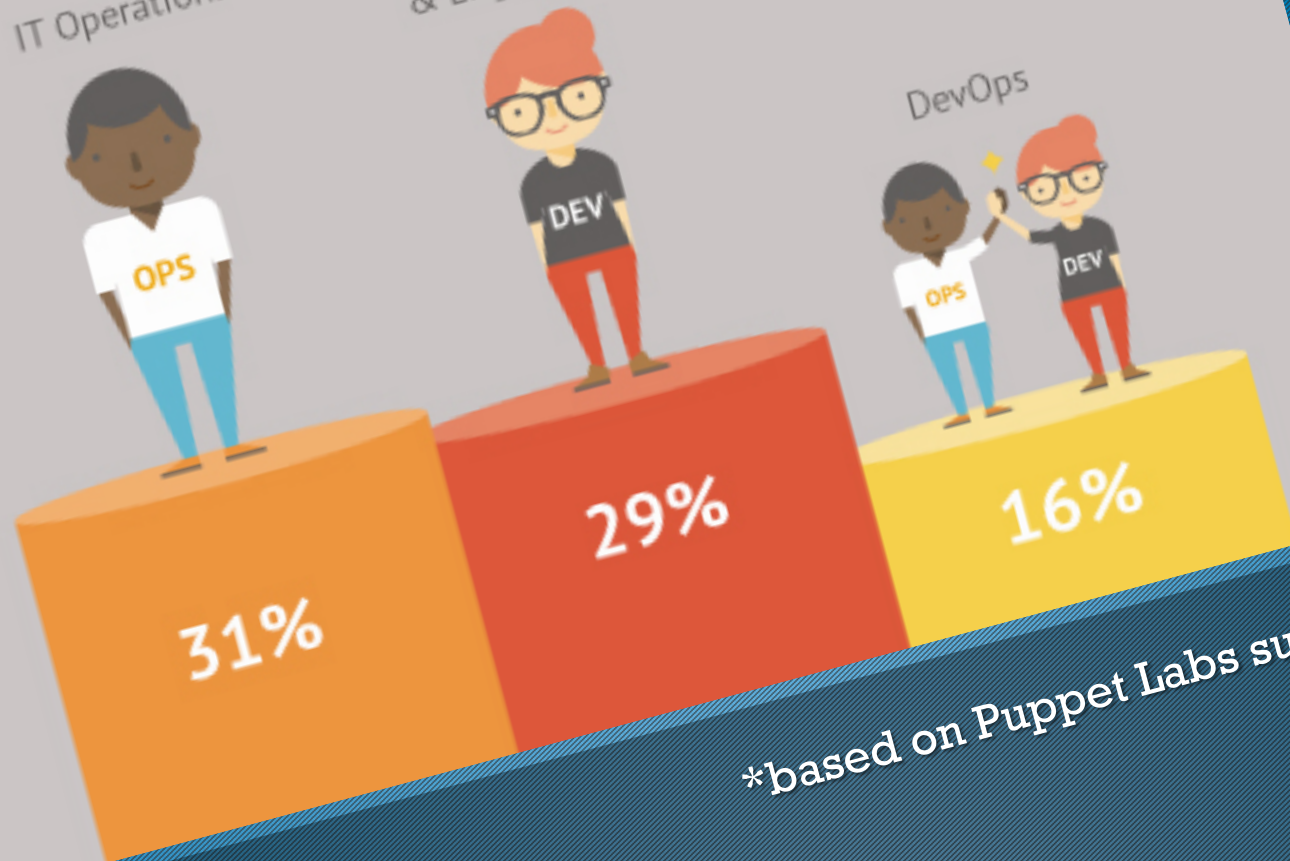

Apply NOW

What department do you work in?

IT Operations

Development
& Engineering

DevOps

*based on Puppet Labs survey

NOT a separate
department

NOT a plot to make
employees do more work

NOT a way of a webmaster

NOT "jack of all
trades, master of
none"

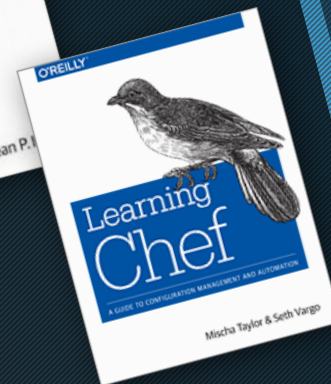

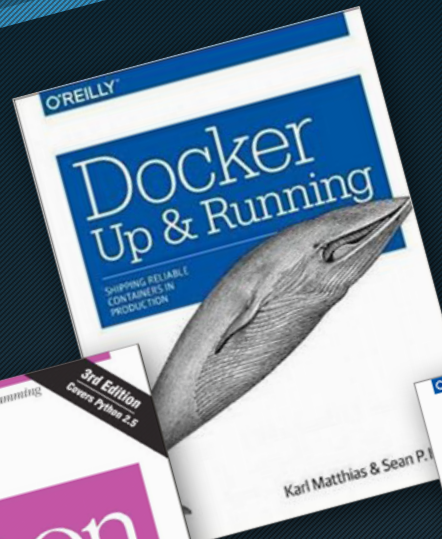

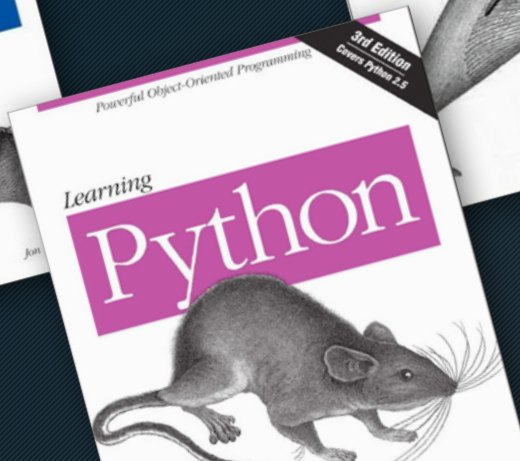

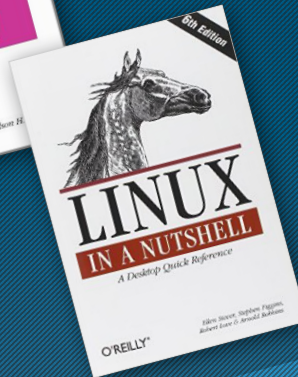

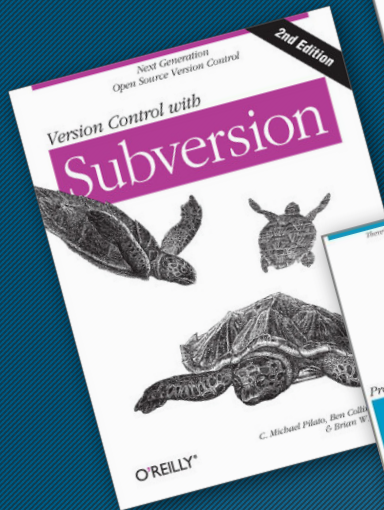

NOT a call for
mediocrity

NOT new

old
mən

A close-up, high-angle photograph of a computer keyboard. The central focus is a single, large, white, rectangular key with rounded corners. This key is slightly raised above the others and features the word "DevOps" printed in a bold, black, sans-serif font, angled upwards from left to right. The key is surrounded by other white keys, some of which are partially visible in the background, showing symbols like a bracket and a dash. The keyboard has a light gray, textured surface. The lighting is soft and even, highlighting the three-dimensional shape of the key and the texture of the keyboard's frame.

DevOps

**KEEP
CALM
AND
EMBRACE
DEVOPS**
