

JavaScript on Microcontrollers

JavaScript on Microcontrollers

I am Niels Leenheer

I am Niels Leenheer

I tweet at @html5test

I  electronics

JavaScript on Microcontrollers

but...

Microcontrollers are slow.

Microcontrollers are slow.

Microcontrollers are slow.

Raspberry Pi Zero W

1 GHz CPU and 512MB RAM

micro:bit

16 MHz CPU and 16KB RAM

60 x faster

30.000 x memory

**Microcontrollers are
very power efficient.**

**Microcontrollers are
very power efficient.**

**Microcontrollers only
need to be fast enough
to solve the problem.**

**Microcontrollers only
need to be fast enough
to solve the problem.**

how?

Espruino

**Espruino is a JavaScript
interpreter for
microcontrollers.**

demo

Experimental technology

Setting low expectations

#1

Connected lightbulb

neopixel
ring

neopixel
ring

3 wires

ESP32

#2

Remote controlled car

LEGO

#42095
