Inclusive Design

Inclusive design: A design methodology that enables and draws on the full range of human diversity.

Most importantly, this means including and learning from people with a range of perspectives.

Designing inclusively doesn't mean you're making one thing for all people. You're designing a diversity of ways for everyone to participate in an experience with a sense of belonging.

Many people are unable to participate in aspects of society, both physical and digital. Understanding why and how people are excluded gives us actionable steps to take towards inclusive design.
