Adding a gmail rule to filter out all Mother's Day spam. One-click-trigger-stopping should really be a thing nowadays.

@sazzy *big hugs*

Amy Mattingly @amerz · Mar 15

@sazzy good idea!!

Steve Emlund @stemlund · Mar 15

@sazzy Also whoever sent those Mother's Day emails could maybe read one of @meyerweb's books.

“There’s actually a much deeper level of [empathy] that you would call compassion. What that means is that you have genuine emotional feeling for the struggles that someone is going through and you are spontaneously moved to help them because you feel them.”

Karen McGrane

To really be of help to others we need to be guided by compassion.

when automated systems are STUPID

Hi Juliana Hatfield,

Our automatic content protection system has detected that one of your tracks might contain copyrighted content.

As a result, your track has been removed from your profile for the time being. Please have a look at the details below and get in touch with us if you believe there's been a mistake.

Here's what our system has found:

It looks like your track

"Impossible Song"

might contain or be a copy of

"Impossible Song" by Juliana Hatfield in certain territories.

Description

I've sen this infamous error msg more times than I wanted, in my own site where I'm admin.

That happens with more frequency when adding a new comment, but some times also inside admin pages.

I understand it's generally capability and permission tests that fail, and that happens in pages that ppl without permission to access them shouldn't see links to them, therefore they probably tried direct access to somewhere they shouldn't be going.

***It never ceases to annoy me
to be unjustly accused of
something I am not doing.***

Inclusive Design at Microsoft

It's in our mission statement: empower **every person on the planet** to achieve more.
Designing for inclusivity opens up our experiences and reflects how people adapt to the world around them.

Our inclusive design principles

It's in our mission statement: empower **every person on the planet** to achieve more.
Designing for inclusivity opens up our experiences and reflects how people adapt to the world around them.

Our inclusive design principles

Recognize exclusion

Exclusion happens when we solve problems using our own biases. As Microsoft designers, we seek out those exclusions, and use them as opportunities to create new ideas and inclusive designs.

Learn from diversity

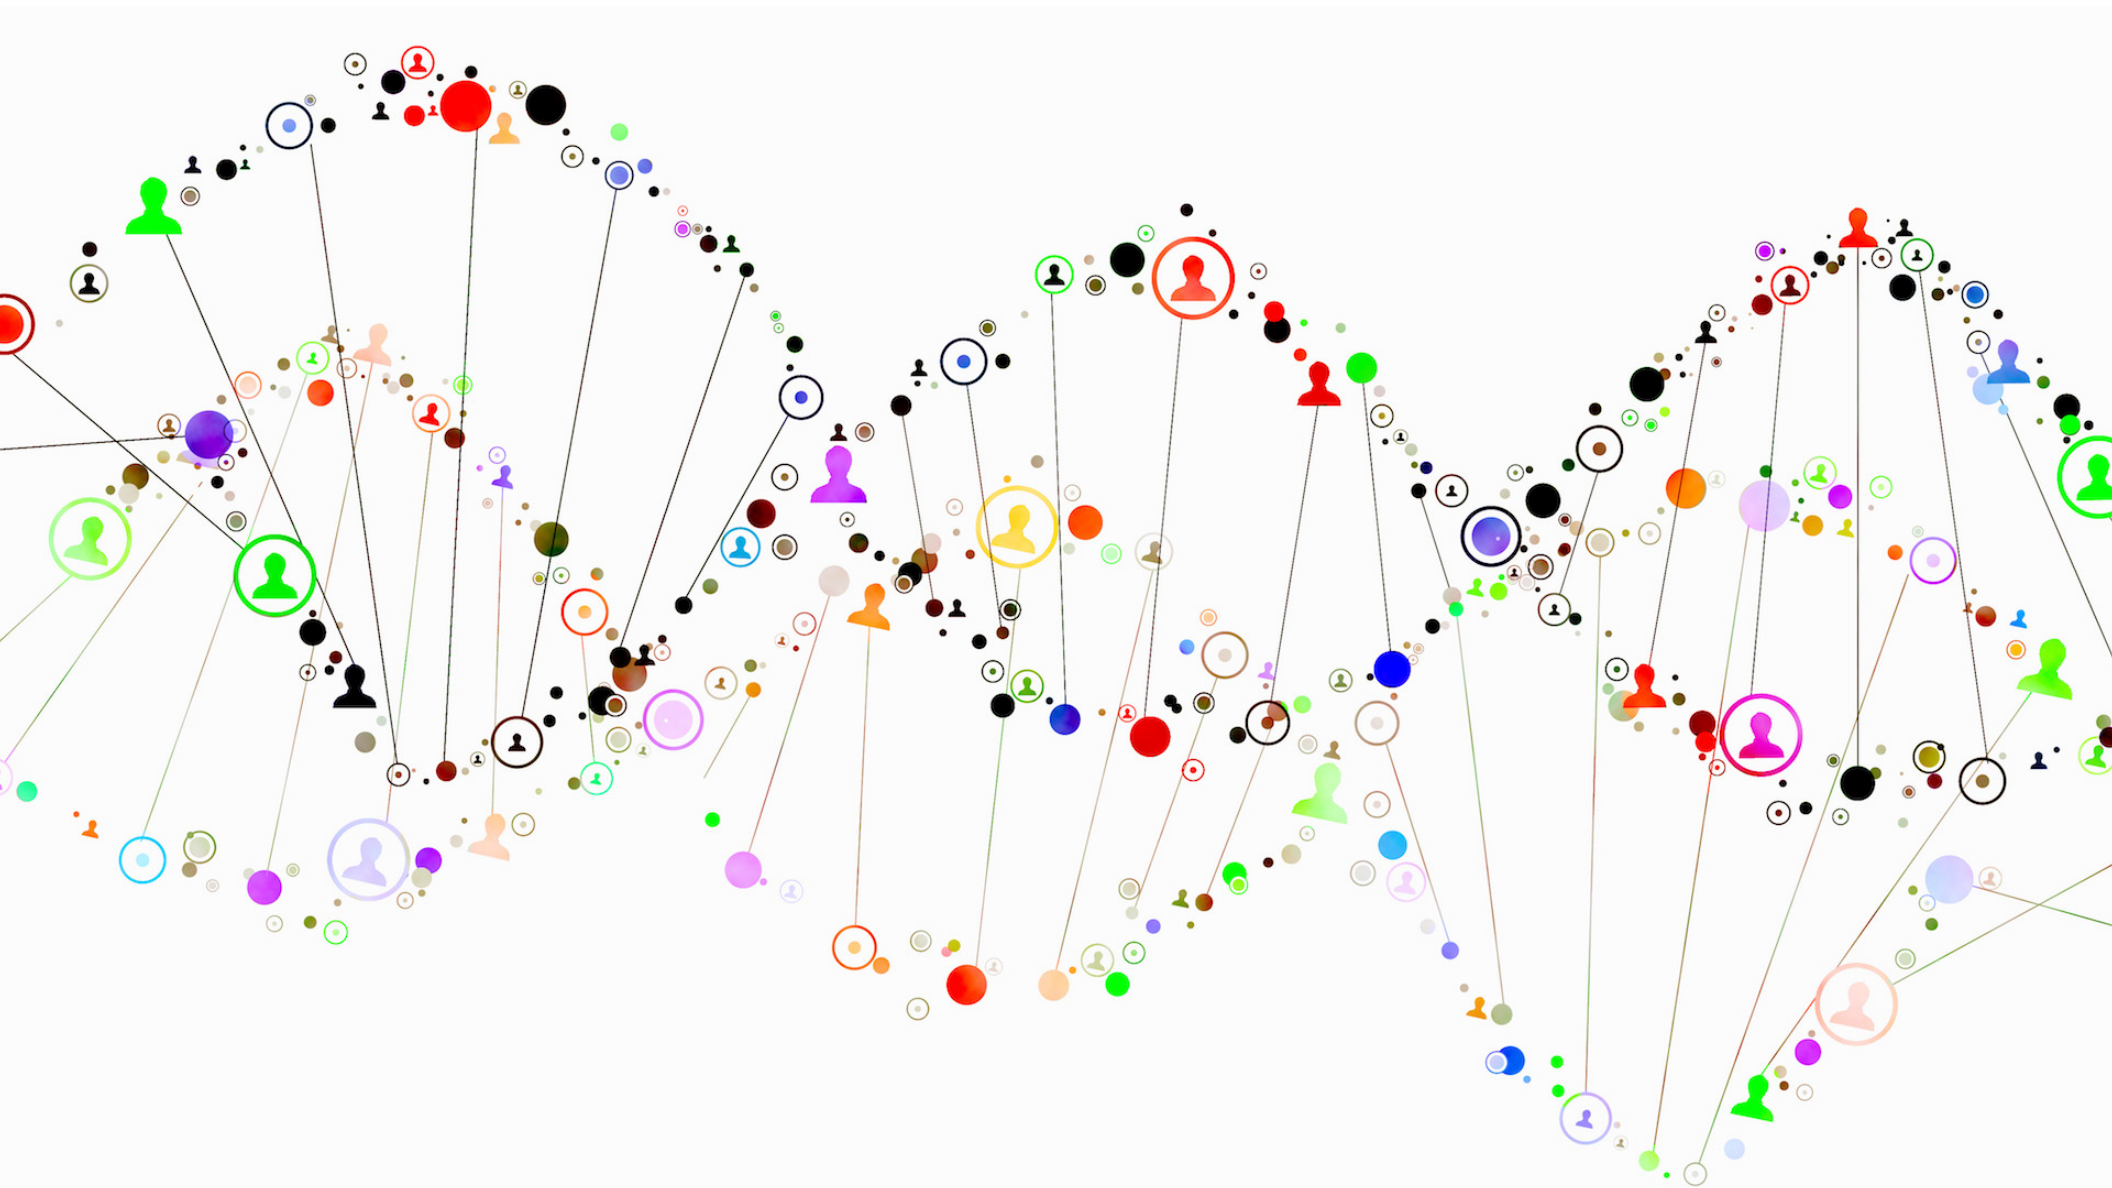

Human beings are the real experts in adapting to diversity. Inclusive design puts people in the center from the very start of the process, and those fresh, diverse perspectives are the key to true insight.

Solve for one, extend to many

Everyone has abilities, and limits to those abilities. Designing for people with permanent disabilities actually results in designs that benefit people universally. Constraints are a beautiful thing.

Inclusive: A Microsoft design toolkit

The toolkit is a comprehensive resource for any inclusive session you want to lead. Practice new skills, develop new concepts, or create a prototype – the toolkit is made to be retrofitted to your design team's goals. Download everything here, and start exploring!

Thank you.
