

Why contribute to open source?

*The strategic benefits of contributing to open source for
businesses & individuals*

Tobie Langel (@tobie)
Principal, UnlockOpen

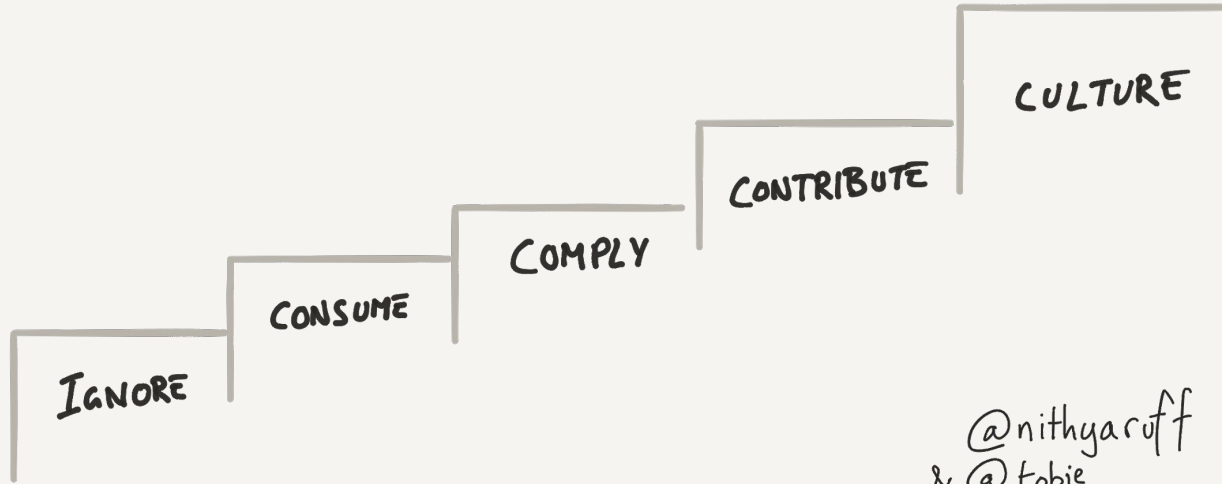

Original motivations

- Intrinsic motivations.
- “Scratching your own itch.”
- Hobbyist and hacker culture.
- Focused on building tools for their personal usage.
- Reputation as a currency (for sharing).
- Practitioners are a somewhat homogeneous group.

What changed?

- Massive growth of tech.
- Massive adoption of open source.

The open source journey

@nithyaruff
& @tobie

Which basically translates to

- **Ignore:** *“Open source is for hippies, we’re doing real business here.”*
- **Consume:** *“Open source is ‘free.’ Let’s use it!”*
- **Comply:** *“Oh, there’s a license? Let’s get a lawyer.”*
- **Contribute:** *“Might as well upstream that fix so we don’t have to maintain a fork.”*
- **Culture:** *“Wow, the model of building open source software works better! Let’s adopt that, too.”*

**OK... but concretely, what does
this mean?**

A very different context

- Software is everywhere.
- Open source is mainstream.
- Widely adopted and used by corporations.
- Comparatively huge and diverse population of developers (~20+ million and growing).
- Open source is increasingly professionalized (e.g. 93% of contributions to Linux are done on the job).

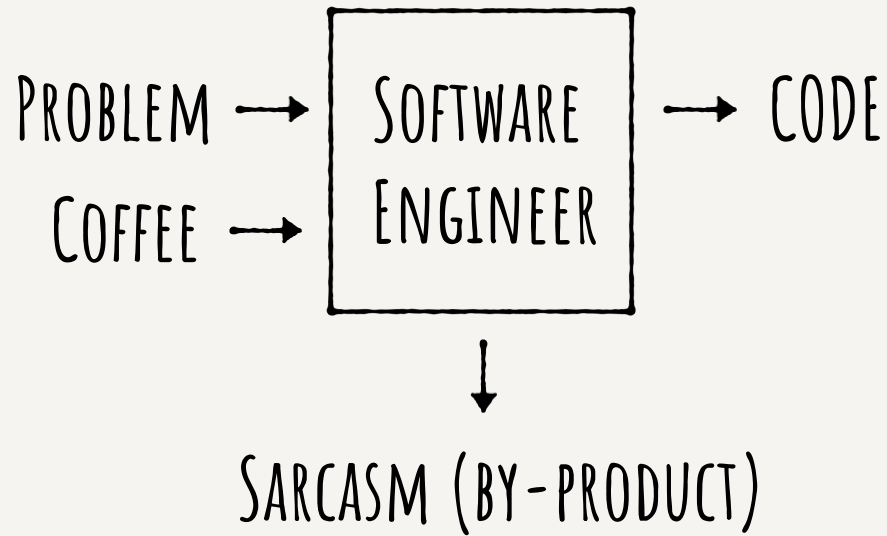

-> Motivations have changed

And that's OK!

Understand today's motivations

For both individuals & corporations.

Open source is a career booster

- Your Github profile is your resume.*
- Great way to kickstart or level up a career.
 - *Over half of the respondents to GitHub's 2017 survey claimed open source was somewhat or very important in getting their current role.*
- You have to commit (pun intended).
- Don't be opportunistic.
- **Problem:** inherently favors the privileged.

** Yes this is a problem, we'll get back to it!*

How companies can help with this

- Professionalize open source.
- Proactively help underrepresented minorities contribute.
- Have their back. Invest in proper policy to protect them when they contribute.

What companies get out of helping

- Increased diversity *at every rung* of the career ladder.
- Decrease wage gap.
- A stronger open source culture.

Benefits for companies

- Second-order benefits
- Operational benefits
- Strategic benefits

“But we also noticed some effect that we didn’t expect. All the public visibility [sponsoring Webpack] have given us lead to a situation where we suddenly became one of the most interesting companies to work for as a JavaScript developer. [...]”

“We’ve hired a lot of really great engineers who mentioned during their job interview that our sponsoring for Webpack was one of their primary motivations for applying, [...]”

—Patrick Gotthardt, Lead JavaScript Architect,
Trivago, 9 July 2018.
