Illinois Workers' Compensation Act

The workers' compensation commission in Illinois is a no-fault system of benefits that are offered to employees who have diseases and injuries at work.

The Illinois Workers' Compensation Act outlines employers' and employees' rights and responsibilities. The Act covers both occupational diseases and injuries.

Medical Benefits

WORK INJURY CLAIM FORM

The employer must cover any reasonable medical expenses required to treat an employee's suffering. The Act's medical benefits coverage covers doctor visits, prescription medications, and prescribed medical equipment.

Total Temporary Disability Benefits

Payments that wounded workers receive when unable to return to work are referred to as temporary total disability benefits. The employee will receive these benefits until maximal medical recovery or when they return to work.
