Gluttony

is the overindulgence and overconsumption of anything to the point of waste.

Memory, Disk, Network

Windows 95 was 30Mb. Today we have web pages heavier than that! Windows 10 is 4Gb, which is 133 times as big. But is it 133 times as superior?

Google keyboard app routinely eats 150 Mb. Is an app that draws 30 keys on a screen really five times more complex than the whole Windows 95?

— http://tonsky.me/blog/disenchantment/

"Windows 95 was 30 MB" is such an ignorant, obnoxious, trite take.

a triple buffered framebuffer (which you want for smooth scrolling) for my 4K display is 70 MB in pixels alone. Obviously a complete webpage with precomposed textures would take more.

— https://twitter.com/whitequark/status/1043747987342671872

640K ought to be enough for anybody

Microservices

Nano, Pico, Femto, Atto, Yocto

VISIBILITY Peak of Inflated Expectations Plateau of Productivity Slope of Enlightenment Trough of Disillusionment Technology Trigger TIME

Don't forget - having legacy software is often a sign of success. Your business was successful to last long enough for your software to become legacy.

— https://twitter.com/samnewman/status/ 929622273065136130

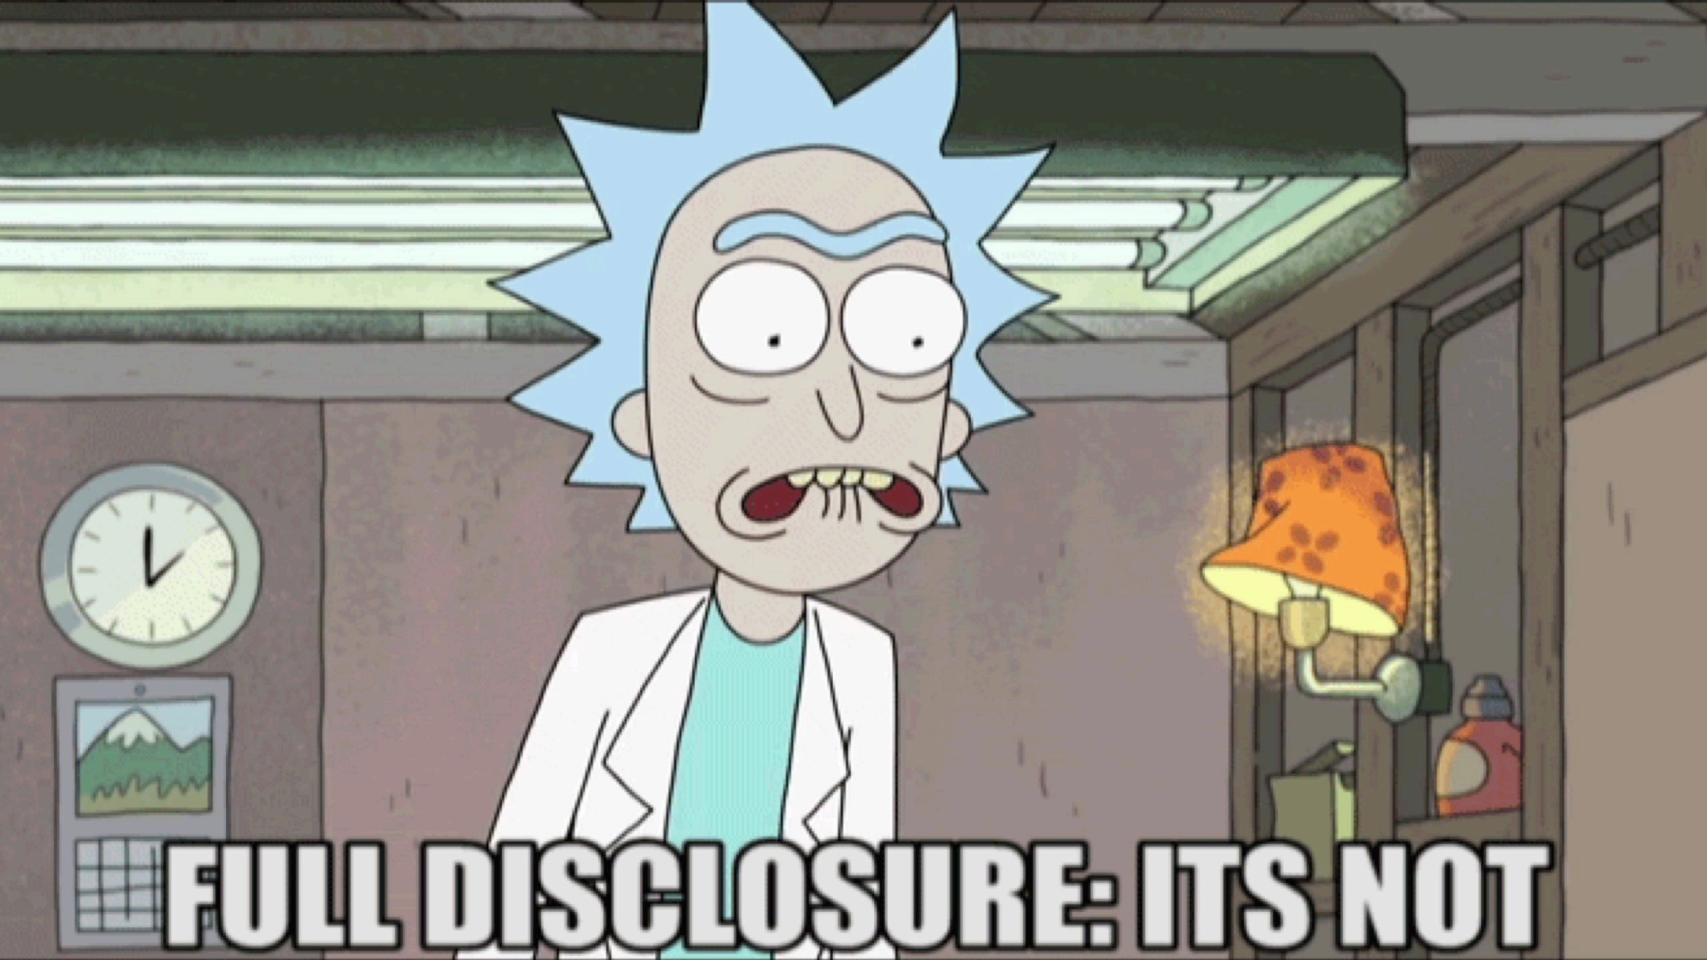

Microservices help if

too many people too many dependencies not scalable

Will this solve all your problems?

Reminder: if you're building microservices, you're building a distributed system. That means, among other things,

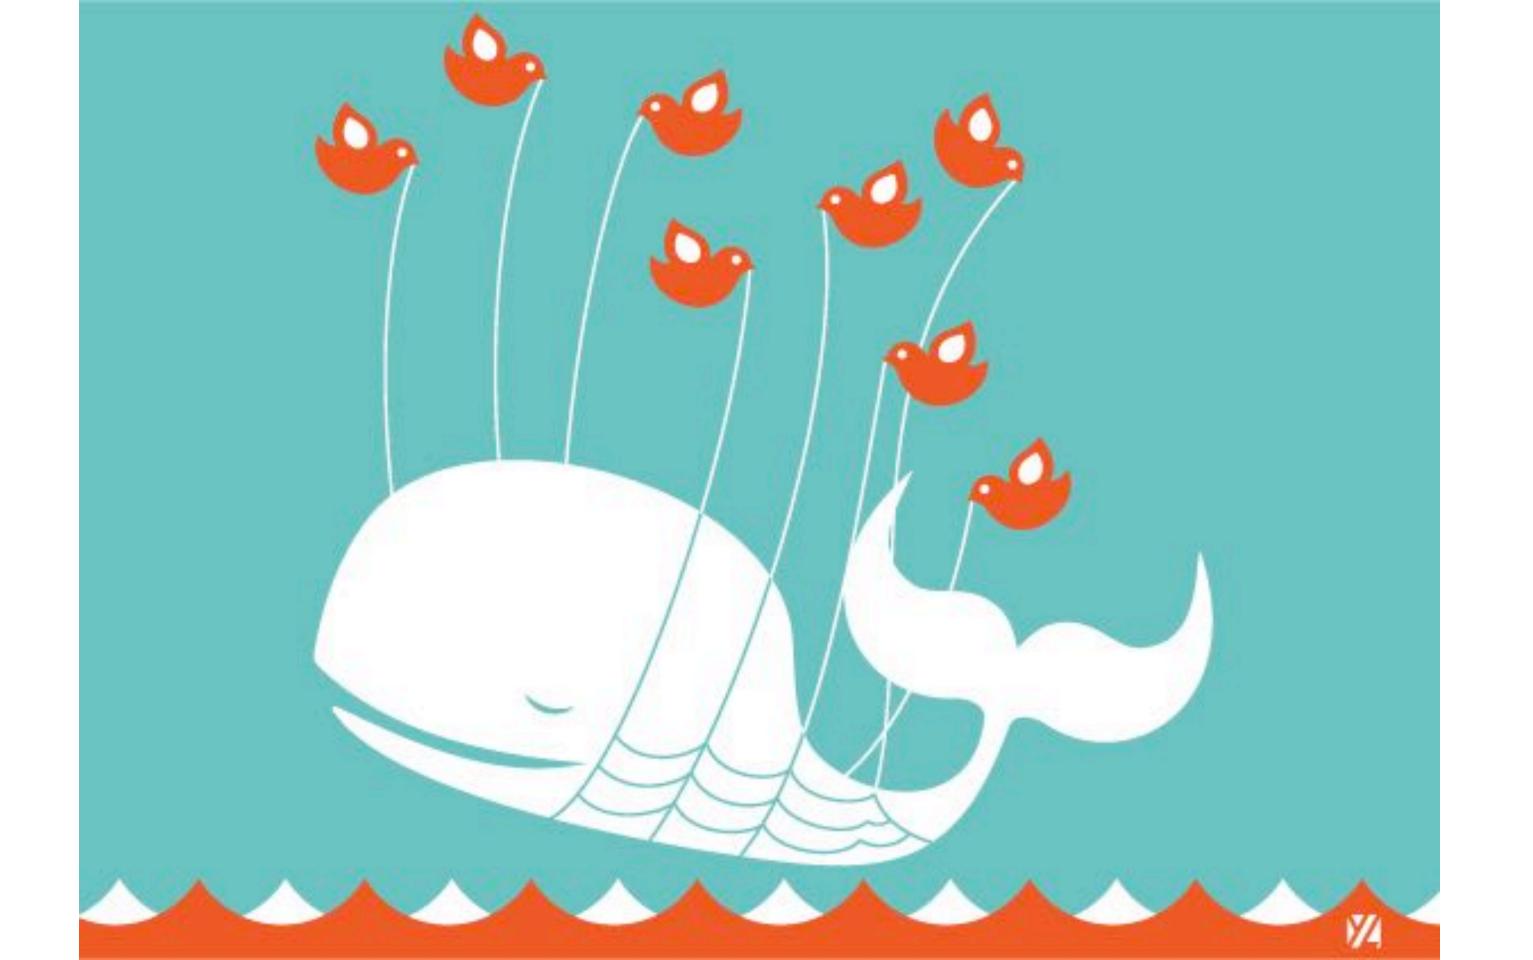

each service has to be independently testable and deployable (including to your dev environment) and should degrade gracefully if it cannot reach its dependencies.

930128629677416450

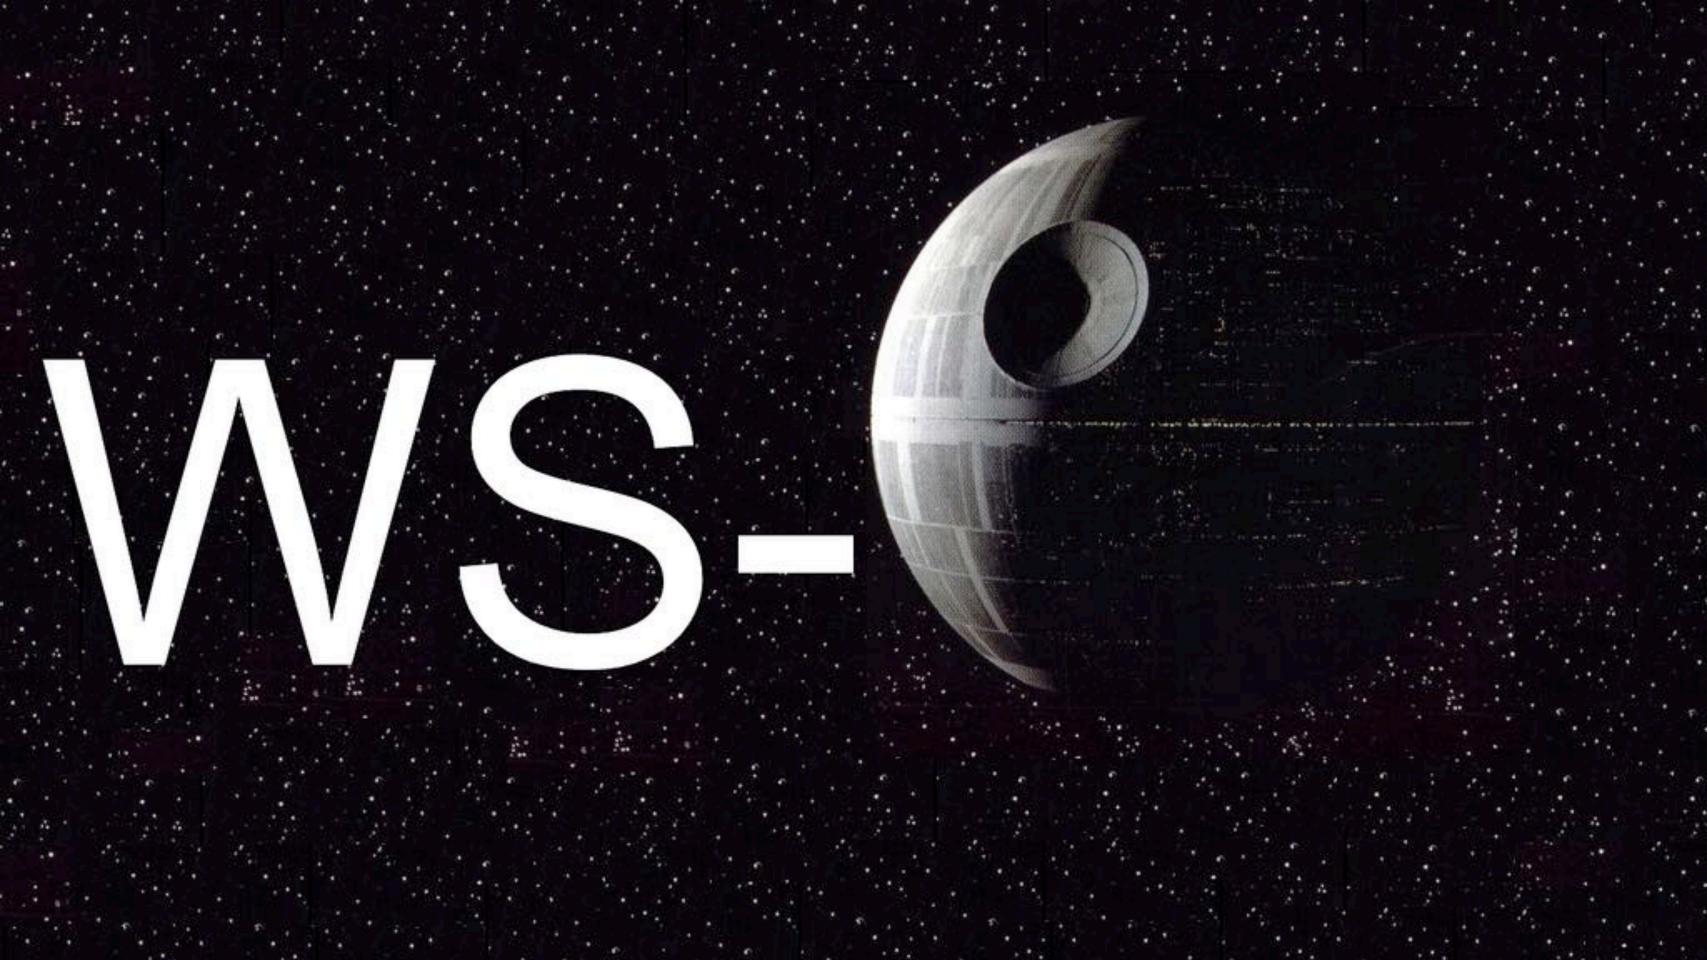

SOA done right?

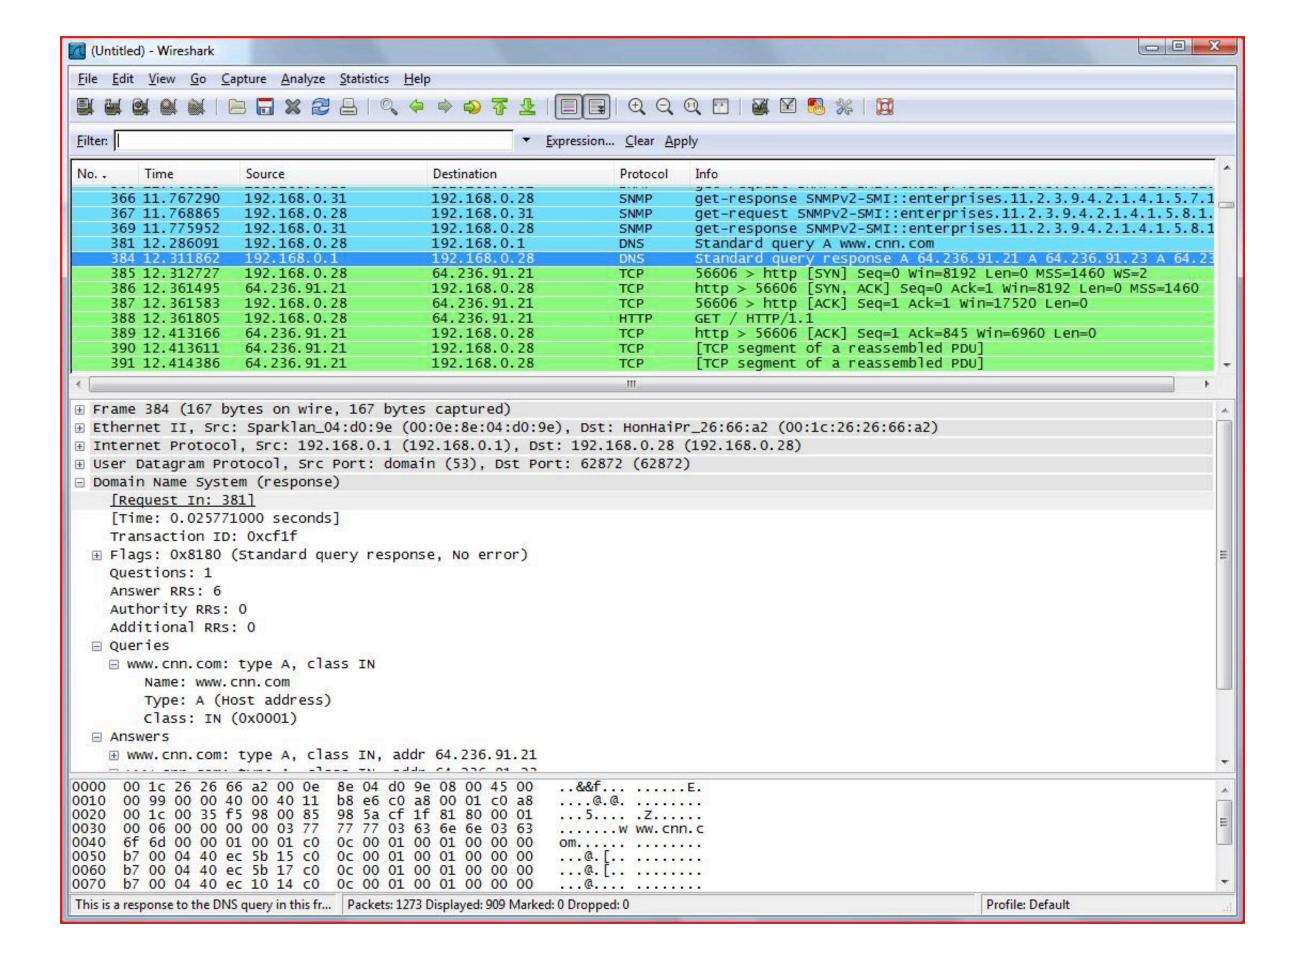

SOAP: Simple Object Access Protocol. Except it's not Simple, it's Complicated. And it's not about Objects, it's about RPC. So really: CRAP

— https://twitter.com/joewalnes/status/563691487586549761

We replaced our monolith with micro services so that every outage could be more like a murder mystery.

— https://twitter.com/honest_update/status/ 651897353889259520

Here's a diagram of two microservices and their shared database.

— https://twitter.com/mathiasverraes/status/ 711168935798902785

OH: "replace your shared monolithic DB with a shared monolithic stream store"

- https://twitter.com/ntcoding/status/928902644764200960

In every distributed system architecture diagram, change the box labeled "Kafka" to "ESB" and immediately "The hot new thing" becomes "The legacy we need to get rid of". Think about that. #decentralize

— https://twitter.com/olivergierke/status/1044592822500904960

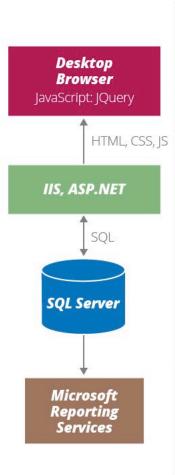

...don't even consider microservices unless you have a system that's too complex to manage as a monolith. The majority of software systems should be built as a single monolithic application.

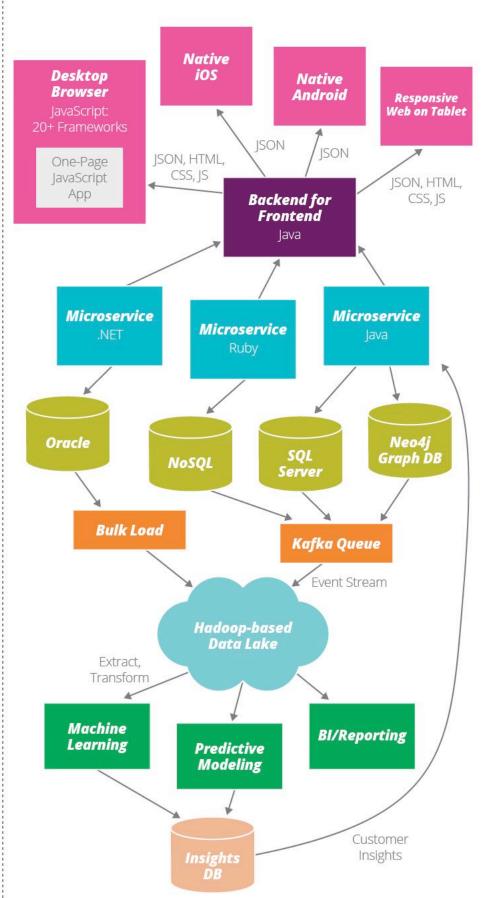

Do pay attention to good modularity within that monolith, but don't try to separate it into separate services.

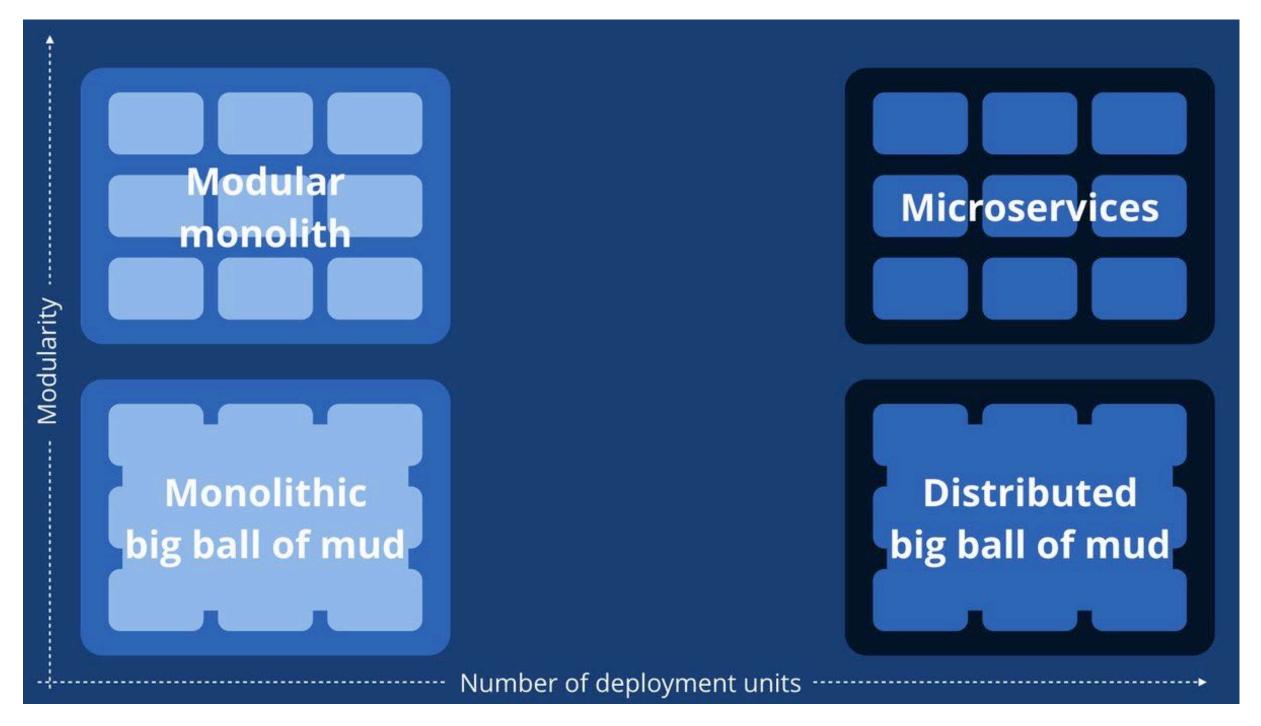

— http://martinfowler.com/bliki/MicroservicePremium.html

https://twitter.com/simonbrown/status/847339104874381312

The #microservices bandwagon exists because the name is cool. Monoliths just need marketing help... #MegaPlatform #UberContainer #StereoLith

- https://twitter.com/sjmaple/status/724541627407147008

#Serverfull

A word of the week: Microlith – a huge enterprise app ported to one, fat Docker container. #MicroserviceJokes

— https://twitter.com/rmehmandarov/status/ 865542627004788737

If you want to implement microservices, the 1st thing you need to do is implement aggregated logging. The 2nd is implement correlation IDs

> — https://twitter.com/samnewman/status/ 862255875125366786

Microservices can help large number of people go faster by allowing more autonomy. I remain to be convinced it does the same for small teams

— https://twitter.com/samnewman/status/ 778118760226062336

Repeat after me I'm not Facebook, Google, or Amazon

Greed

is applied to a very excessive or rapacious desire and pursuit of material possessions.

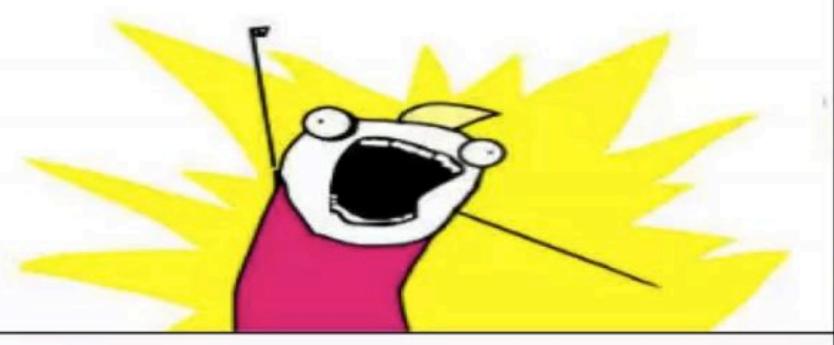

Sloth

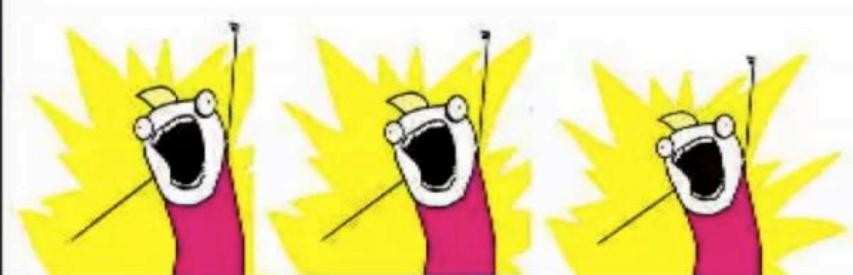

is sometimes defined as physical laziness, but spiritual laziness is emphasized.

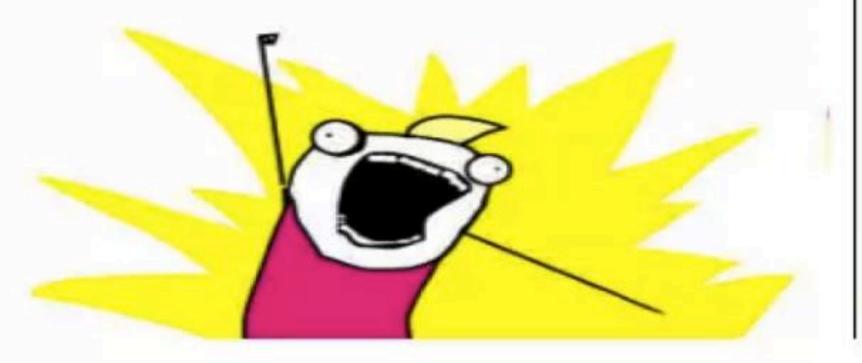

WHAT DO WE WANT?

TO DELIVER BETTER SOFTWARE!

WHEN DO WE WANT IT?

CONTINUOUSLY!!!

Continuous Integration **CI**

Build and test every push

Continuous Delivery CD

Manual production deployment

Continuous Deployment **CD**

Automated production deployment

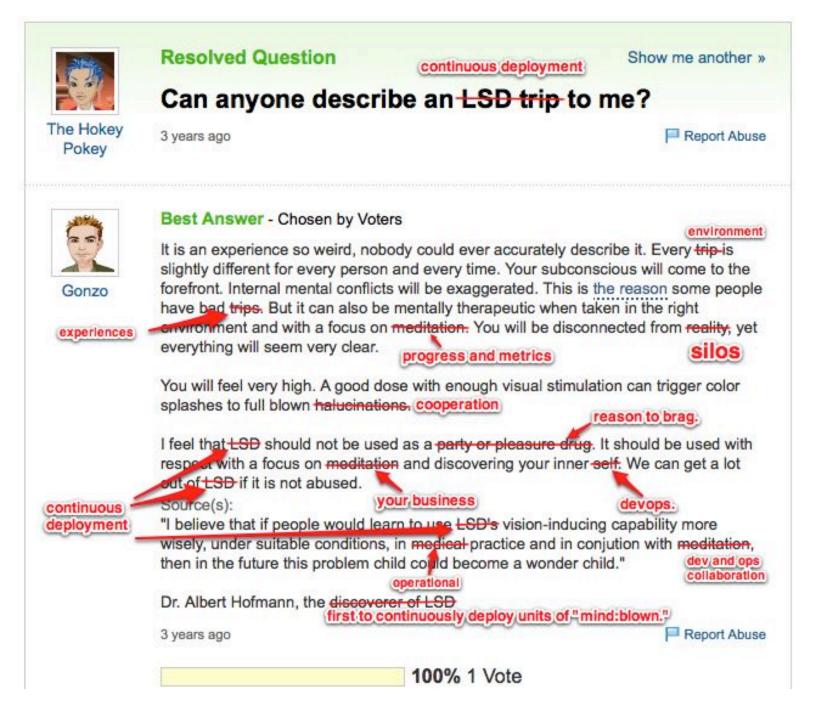

Facebook switched to Continuous Delivery / Deployment in 04/2017

https://code.facebook.com/posts/270314900139291/ rapid-release-at-massive-scale/

Deploy multiple times per day if it fits your business model. Don't deploy for the sake of deploying.

https://twitter.com/allspaw/status/925490726468771840

Gonzo

experiences

Best Answer - Chosen by Voters

environment

It is an experience so weird, nobody could ever accurately describe it. Every trip is slightly different for every person and every time. Your subconscious will come to the forefront. Internal mental conflicts will be exaggerated. This is the reason some people have bad trips. But it can also be mentally therapeutic when taken in the right environment and with a focus on meditation. You will be disconnected from reality, yet everything will seem very clear.

progress and metrics

You will feel very high. A good dose with enough visual stimulation can trigger color splashes to full blown halucinations. cooperation reason to brag.

I feel that LSD should not be used as a party or pleasure drug. It should be used with respect with a focus on meditation and discovering your inner self. We can get a lot out of LSD if it is not abused.

continuous deployment Source(s): your business

devops.

"I believe that if people would learn to use LSD's vision-inducing capability more wisely, under suitable conditions, in medical practice and in conjution with meditation, then in the future this problem child could become a wonder child."

Lust

is an intense and uncontrolled desire.

Always use the hottest

High-latency low-throughput append-only database with very expensive transaction commit protocols just doesn't have the same ring to it as "Blockchain" does it?

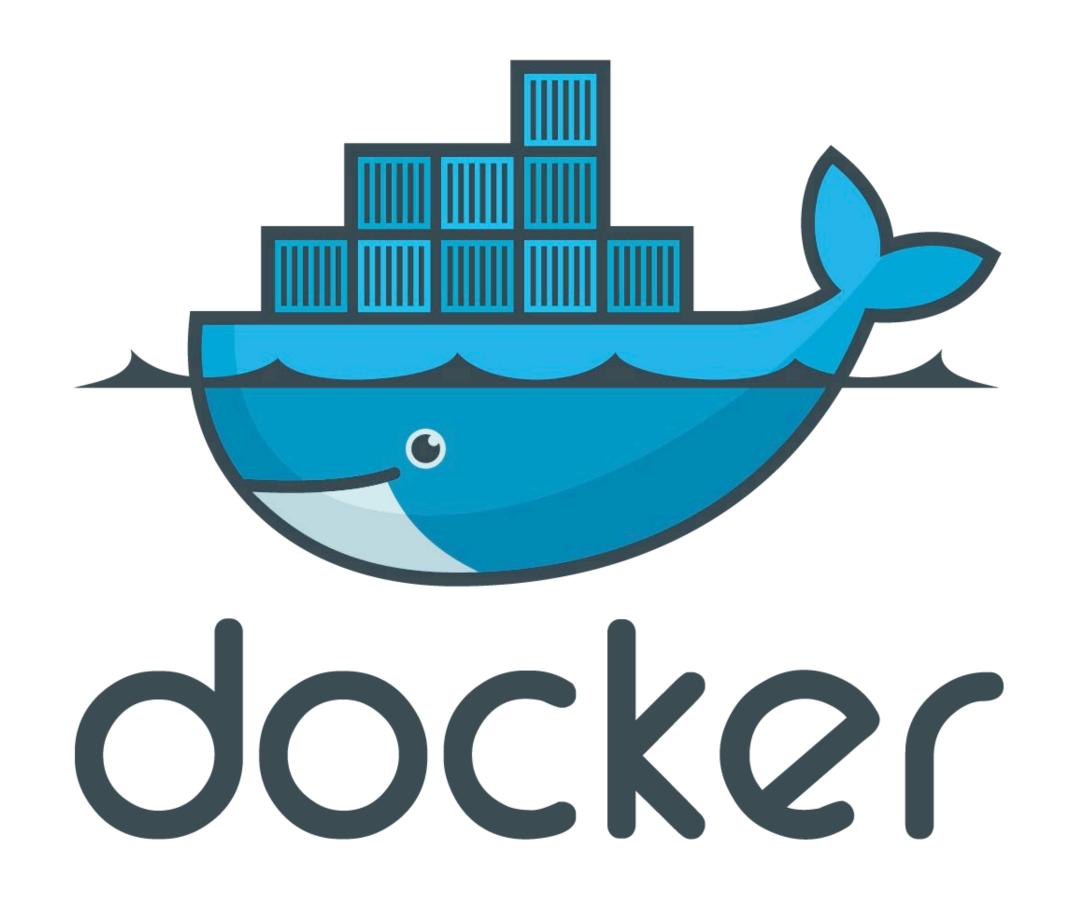

— https://twitter.com/jstogdill/status/1004448569615626240

#Database: garbage-in garbage-out #Blockchain: garbage-in garbagecarved-in-stone

- https://twitter.com/nivertech/status/1033037299553103872

the team that releases no more than once a quarter has asked about deploying with docker

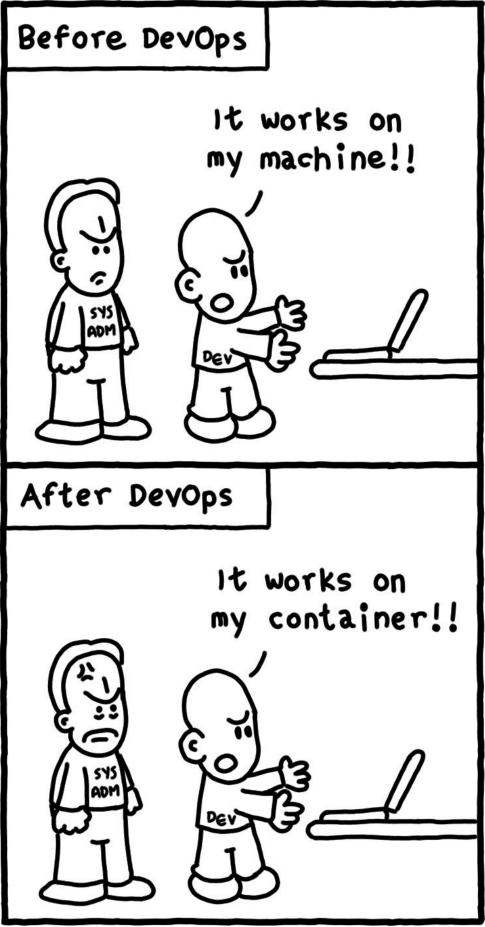

Docker: each docker container should just run one process Me: but your containers are 700+MB each Docker: you see why our mascot is a whale

- https://twitter.com/classam/status/743333692462895104

https://turnoff.us/geek/before-devops-after-devops/

Daniel Stori (turnoff.us)

It's elegant in its simplicity because it's all tires. If you understand tires, you can understand the whole system.

"A container is just a process"

containers will not fix your broken architecture

you are welcome

— https://twitter.com/littleidea/status/659445920954642432

You gotta love the docker-compose command line:

docker-compose down -v Removes all volumes

docker-compose -v down Prints the version of docker-compose

— https://twitter.com/fhopf/status/971910920522760192

New dependencies of your artifacts JVM and base image

so.. using GlibC? How's re-imaging all of your @Docker images going?

— https://twitter.com/starbuxman/status/ 700591322177019904

Containerizing legacy applications

Microservices + containers Cargo cult

cargo culting comes from received but not integrated knowledge. because one doesn't grasp how a thing works, one simply goes through the motion of how one was told to do it.

> — https://twitter.com/GeePawHill/status/ 931941663886454784

If you are only picking Kubernetes because that's the way Google does it, then you should also consider writing your own filesystems.

— https://twitter.com/kelseyhightower/status/ 741310392756887552

At this point you're crazy to think you can manage k8s yourself. I'm sure you've got engineers who want to. It's shiny and fun now, but the novelty wears off quick. And then you are left with an old snowflake

> — https://twitter.com/ibuildthecloud/status/ 1020371700934881280

Kubris – the belief that Kubernetes can do everything by itself

- https://twitter.com/monadic/status/1007293757501378560

OH: "their infra is 50 shades of broken and they're now setting up their own frankenetes cluster hoping it'll fix everything"

— https://twitter.com/copyconstruct/status/ 935317466573504512

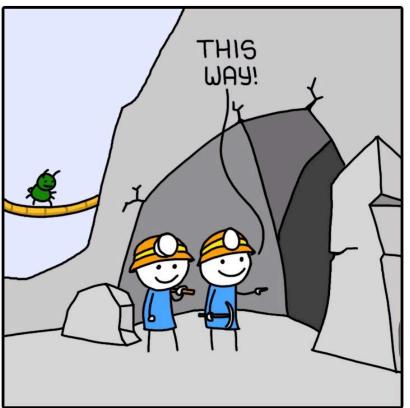

We've been so beaten into thinking we need to care about the speed-of-delivery with containers, we lost focus somewhere on prod reliability

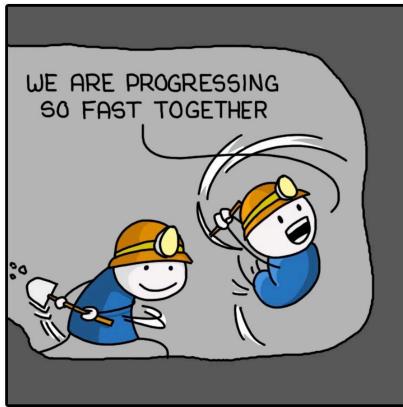

— https://twitter.com/danveloper/status/858372256174669824

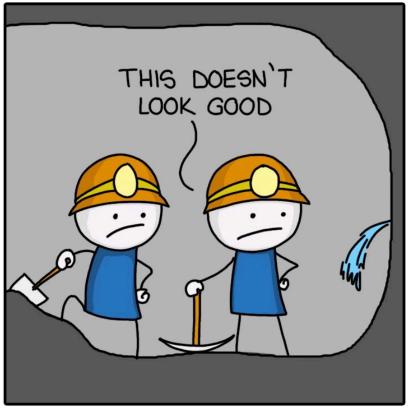

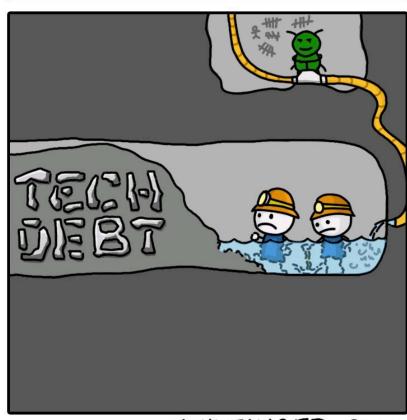

https:// www.monkeyuser.com/ 2018/tech-debt/

TECH DEBT

MONKEYUSER.COM

What's wrong here?

For a stateful production service

```
$ docker run -p 9200:9200
-p 9300:9300
-e "http.host=0.0.0.0"
-e "transport.host=0.0.0.0"
-e "discovery.zen.ping.unicast.hosts=..."
docker.elastic.co/elasticsearch/elasticsearch
```

Zombies

ideas that should have been killed by evidence, but keep shambling along

Run Elasticsearch as root

Cockroaches

claims that disappear for a while when proved wrong, but just keep on coming back

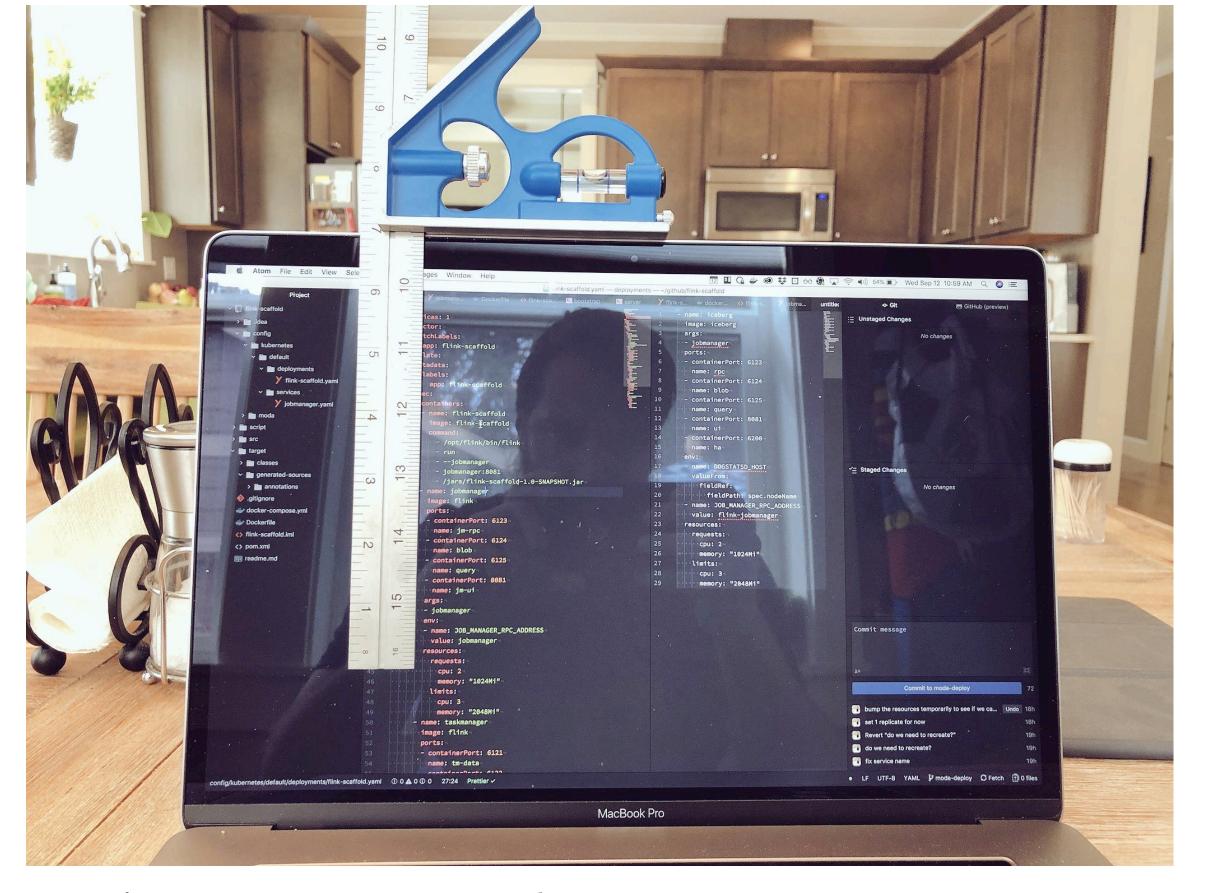

Make JAR not WAR

YAML

One more thing Serverless

Replying to @kelseyhightower

Serverless car... you don't need to worry about engine and fuel... just sit inside and ride:)

Yesterday I have bird and bee discussion with junior devops for make realize cloud instance is born of real hardware.

— https://twitter.com/DEVOPS_BORAT/status/ 289777231683788801

"Yes, we acknowledge that Serverless has Servers. Can we resume discussion on rest of the architecture?"

I felt a great disturbance in the cloud, as if millions of microservices suddenly cried out in terror, and were suddenly serverless.

— https://twitter.com/kennybastani/status/ 858021145890762755

2016: Serverless Architecture 2017: Codeless Architecture 2018: Architectureless Architecture

— https://twitter.com/benbjohnson/status/ 746049032699600897

by 2025, 30% of net new technical debt will be serverless

- https://twitter.com/mstine/status/972207185005633536

PaaS reborn?

If your PaaS can efficiently start instances in 20ms that run for half a second, then call it serverless.

- https://twitter.com/adrianco/status/736553530689998848

Every vendor that can't compete in Cloud chooses "Hybrid" as their strategy – Opinion's law of Cloud.

— https://twitter.com/cloud_opinion/status/ 594215778947362816

Pride

is identified as believing that one is essentially better than others.

"I know, we need DevDevOpsOps!"

— https://twitter.com/
agile_memes/status/
1019694518050754560

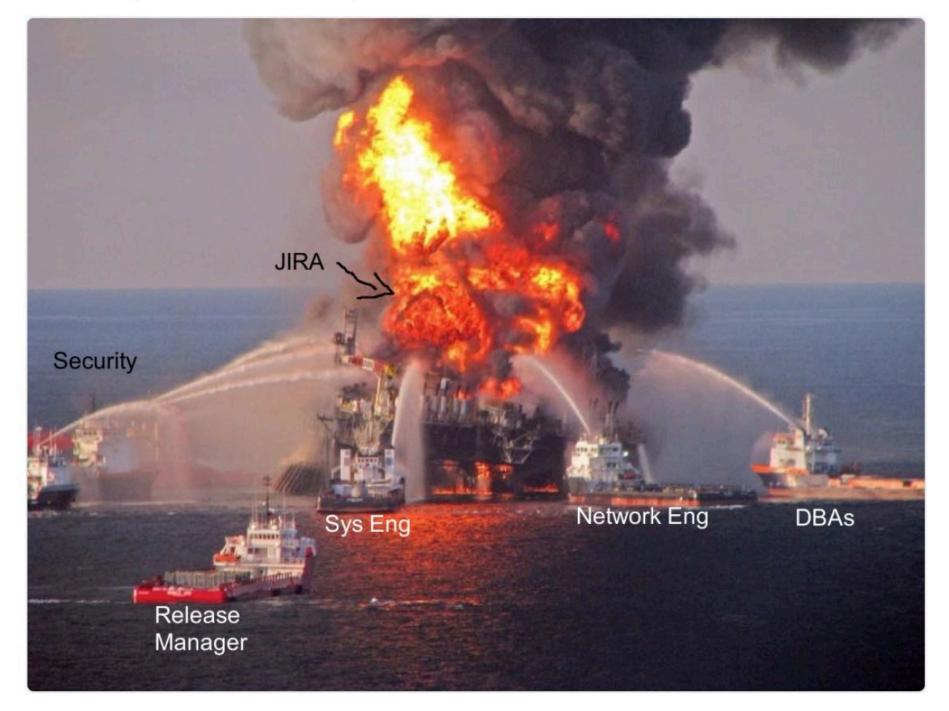

Enterprise DevOps

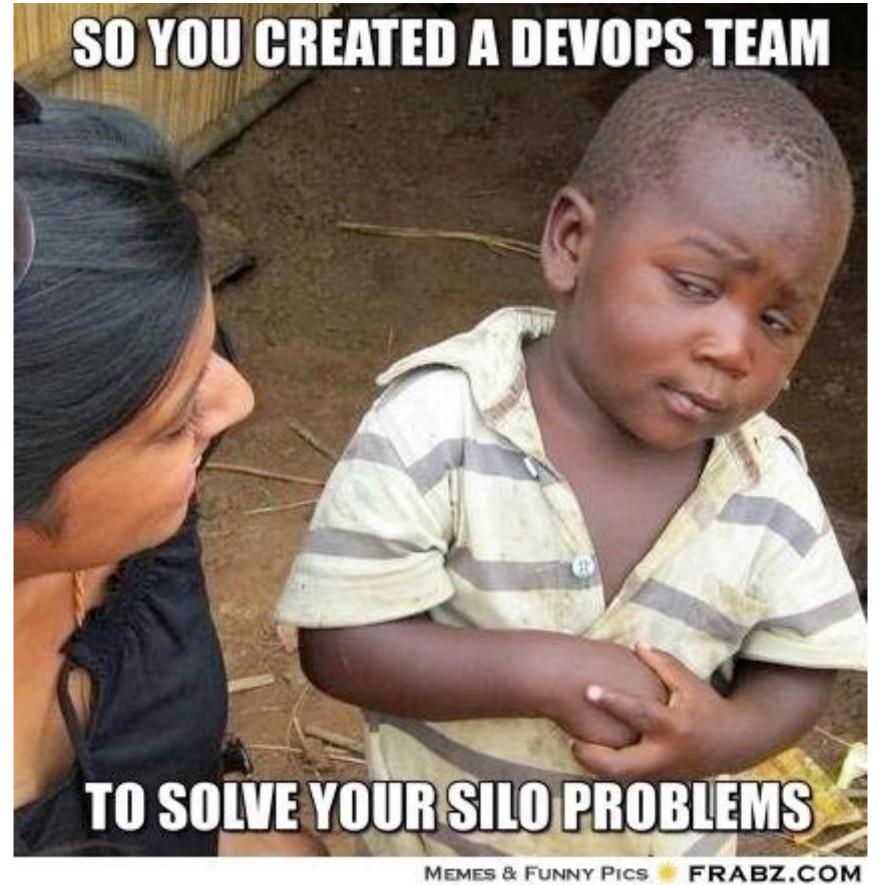

DevOps is not a

tool | certificate | job title | team

To make error is human. To propagate error to all server in automatic way is #devops.

— https://twitter.com/DEVOPS_BORAT/status/ 41587168870797312

DevOps is a software engineering culture and practice of putting horrors into containers and then talking about Kubernetes at conferences.

— https://twitter.com/sadserver/status/1011652439303262208

Envy

is the discontent towards someone's traits, status, abilities, or rewards.

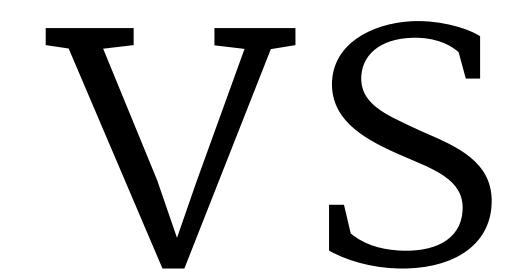

Craft everything yourself!

Infrastructure

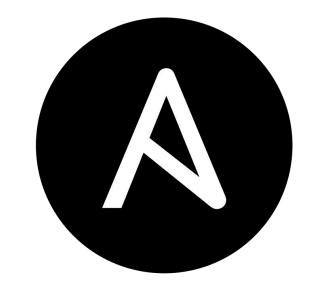

All my servers are cattle ... except for the redis instance. That one gets health care and Christmas gifts.

- https://twitter.com/ajordens/status/801847570259509248

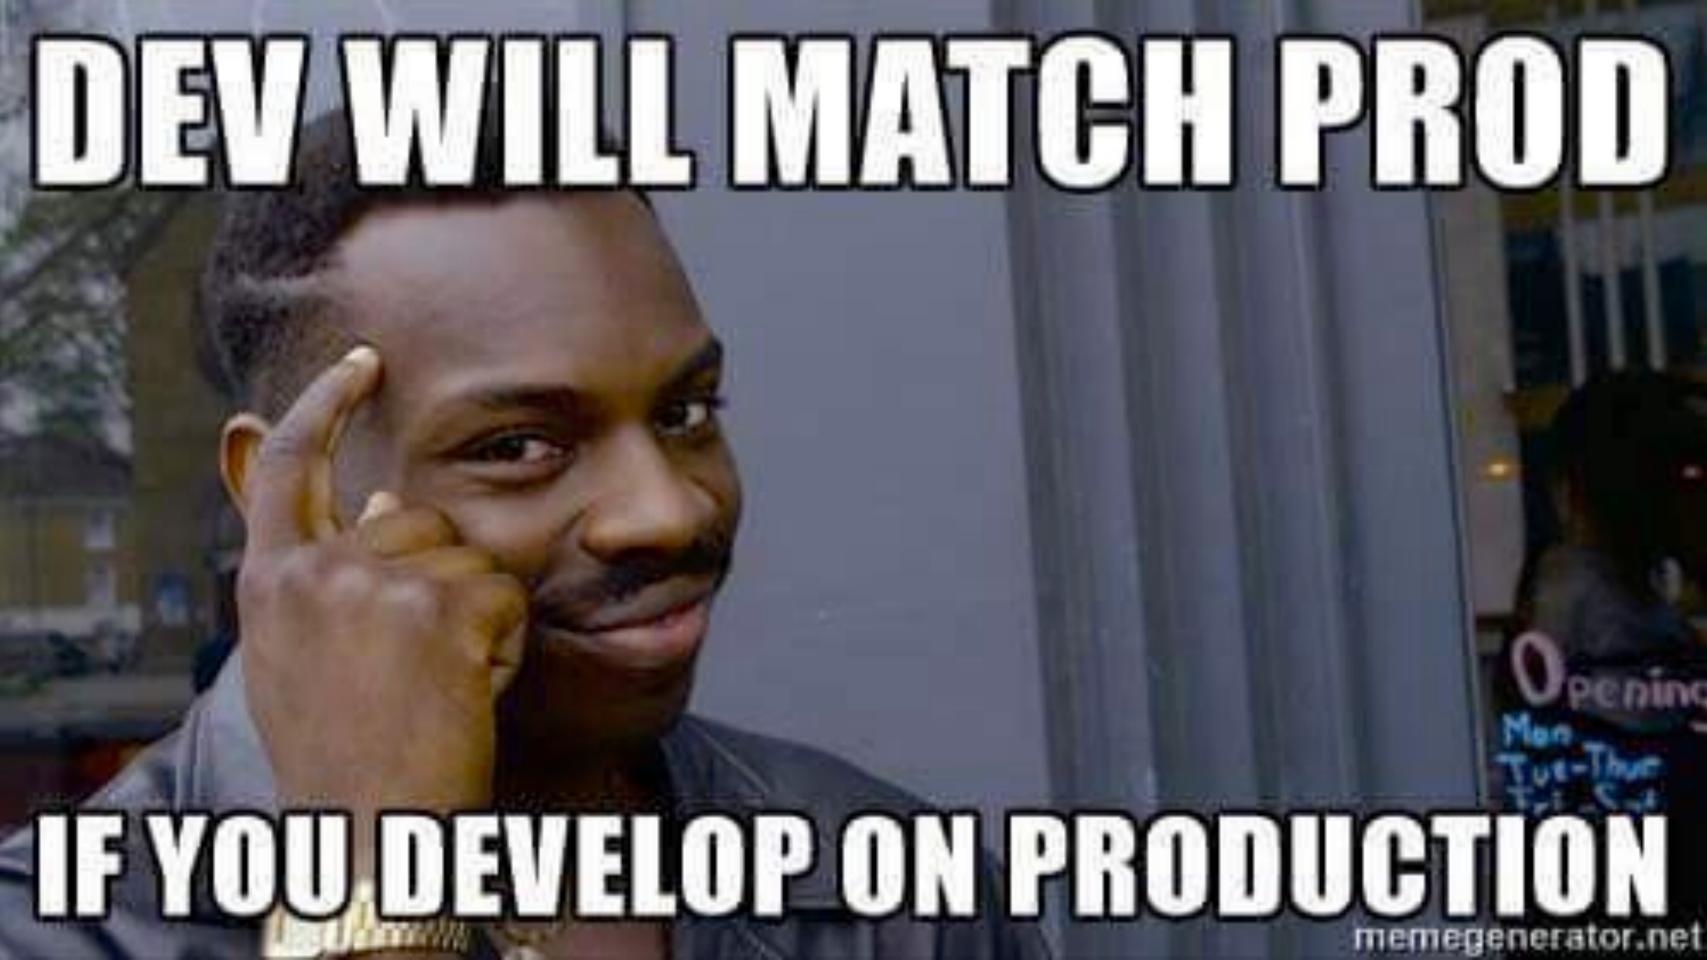

"Every company has a test environment. Some are lucky enough to also have a production environment."

— https://twitter.com/lowrykoz/status/1017850159198294022

Avoid Drift

I like the "ssh tags the instance for garbage collection" model as a step; it lets you migrate a team to new habits.

- https://twitter.com/ferlatte/status/905984786082050048

Wrath

also known as "rage", may be described as inordinate and uncontrolled feelings of hatred and anger.

How I Hacked My Morning Routine: I wiped a production database and now I am 100% definitely awake

— https://twitter.com/iamdevloper/status/ 1034824761833136128

How do you monitor your system? End users.

UDP: User Distress Protocol.

— https://twitter.com/thisisvibs/status/1022323915417210880

pretty awesome when monitoring tools say zero overhead. Might as well say negative overhead.. I mean if you are going to lie at least add value!

— https://twitter.com/adrianfcole/status/ 1024140189331906560

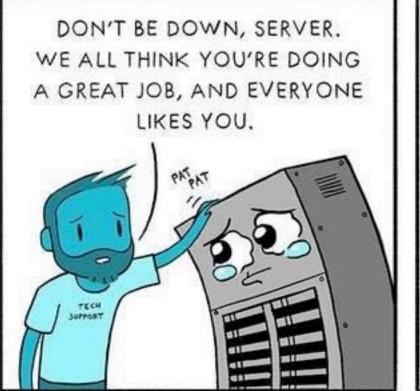

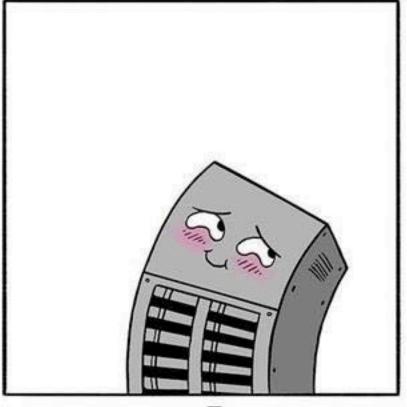

What we really do when a server is down. #DevOps

— https://twitter.com/ mattiasgeniar/status/ 1039892272643489792

Conclusion

What did we learn today? It depends...

A good developer is like a werewolf: Afraid of silver bullets.

— https://twitter.com/codepitbull/status/ 784691906005635072

Think back five years ago. How many technical opinions did you deeply hold which you now repudiate? Now think about the present. How many opinions do you deeply hold today?

We are always in a state of progressive wrongness. Don't cling too tightly to what you believe today.

— https://twitter.com/djspiewak/status/ 1040247203648819200

Gluttony 2. Treed 3 Stûtk 4. Envy
