DISCLAIMER

I am not a medical professional and cannot diagnose or recommend treatment for any disease. These experiences are mine and represent my personal experience.

This talk will mention depression, anxiety and ADHD. While it's not intended to go very deep, please be responsible for your health. I am not offended if you need to leave at any time.

ADHD

DOPAMINE DEFICIENCY

POOR WORKING MEMORY

EXECUTIVE FUNCTION

#ADHD Coping Mechanisms 101: ADRENALINE

- 1) Avoid starting
- 2) Panic sets in
- 3) Finally start
- 4) Get stuck on one detail
- 5) Rabbit hole
- 6) Meltdown about wasted time
- 7) Stay up as long as it takes (perfectionistic fear of failure)
- 8) Pull it off
- 9) Burnout recovery
- 10) Repeat twitter.com/NearlyFarleyAr...

Nearly Farley 🌸👤🌸 @NearlyFarleyArt

I posted an article about this, but ways "gifted" ADHD pass as high functioning is by using adrenaline to kick in gear. That means developing OCD like behaviors centered around anger, self hate & panic (aka anxiety). You learn acceptance and praise comes from a hell you create. twitter.com/blkgirllostkey...

ERROR BUDGETS

A computer monitor with a white bezel and HP logo. The screen shows a dark background with a pair of scissors cutting a line. The monitor is on a desk with a keyboard and mouse. The background wall has some text and a balloon.

**YOUR PERFORMANCE IS NOT
YOUR VALUE**

MANAGE WIP

aaron aldrich

@crayzeigh

Today:

- ✓ got out of bed
- ✓ showered
- ✓ brushed teeth

It's not a very accomplished day, but a non-zero day.
Brain chemicals cause some bullshit.
