Results 1 - 1 of 1

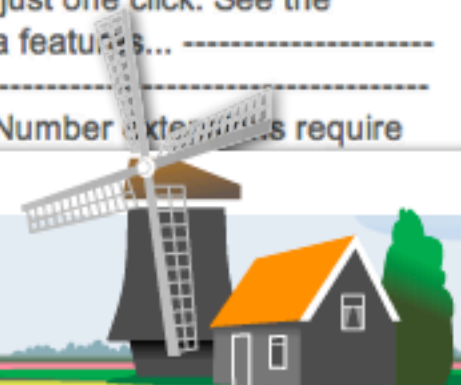

Cache Cleaner

1.5 NATIVE JOOMLA 1.7 JOOMLA 2.5 ★★★★★ 91 votes M P

Cache Cleaner - clean **cache** fast with 1 click. With **Cache Cleaner** you can clean your **cache** fast and easily via a link in your Joomla! Administrator! If you are editing an article - for instance - and want to see the changes in the frontend, you first have to clean the **cache**. Normally this means having to go to the Joomla! **Cache** Manager, select all **cache** types and delete them. This is very annoying and requires a lot of clicks and waiting time. **Cache Cleaner** gives you a quick link in the top right of your Joomla! Administrator (status bar), which will clean all **cache** by simply clicking on it. It doesn't need to reload the page either, because it uses ajax to do this in the background. **Cache Cleaner** can also clean the temp (tmp) folder with just one click. See the **Cache Cleaner** system plugin settings for some cool extra features...

[Advanced Search](#)

Here are a few examples of how you can use the search feature:

Entering this and that into the search form will return results containing both "this" and "that".

Entering this not that into the search form will return results containing "this" and not "that".

Entering this or that into the search form will return results containing either "this" or "that".

Entering "this and that" (with quotes) into the search form will return results containing the exact phrase "this and that".

Search results can also be filtered using a variety of criteria. Select one or more filters below to get started.

Joomla!

Congratulations! You have successfully installed Joomla! It is now ready to use. Joomla! makes it easy to build a website just the way you want it and keep it simple to update and manage.

plugin

Joomla is a flexible and powerful platform, whether you are building a small site for yourself or a huge site with hundreds of thousands of visitors. Joomla is open source, which means you can make it work just the way you want it to.

REVIEWS (383) [SUBMIT REVIEW](#)

★★★★★ world best editor ever

sarah_hayes
2012-04-10
Reviews: 5

enormous number of possibilities for customization.
doesn't offend with other extensions. a must have for everyone.

Reviews: 2

I just jumped to Joola 2.5 and started to teach my self again, do you want to avoid the headache of having to switch from tinyMCE to None just to insert a video from Joomla? install JCE, way better than having to buy tylenol. Thank you guys!

```

Algemene tips

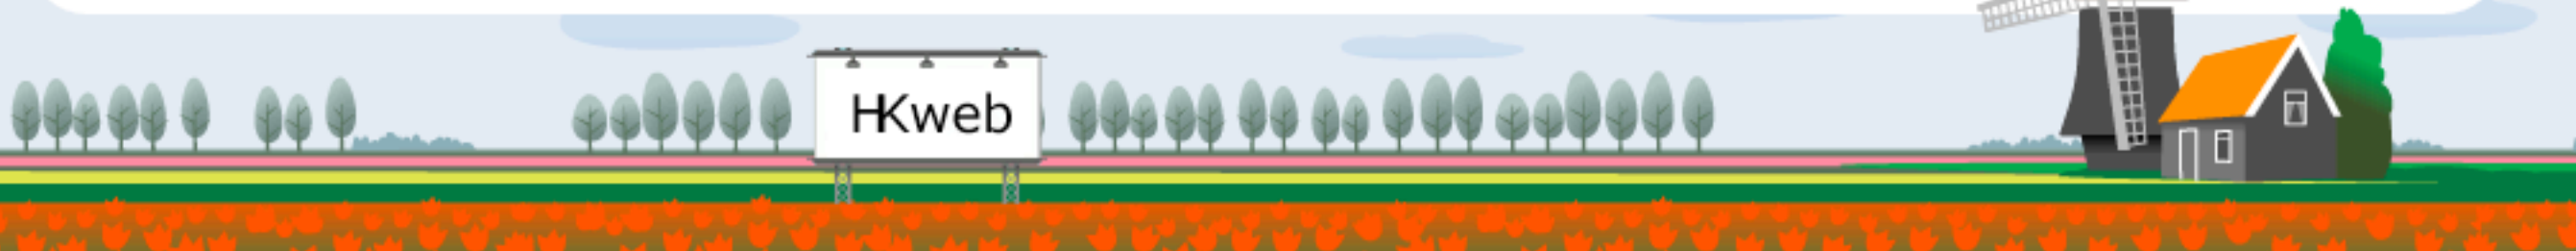

- Installeer op een lokale server
- Test de extensie
- Bekijk de code
zitten er geen verborgen links in?
- Deïnstalleer van de lokale server

- Zorg voor een backup, voordat je begint
- Handige extensie: Akeeba Backup
- Download je Backup
- Test je Backup

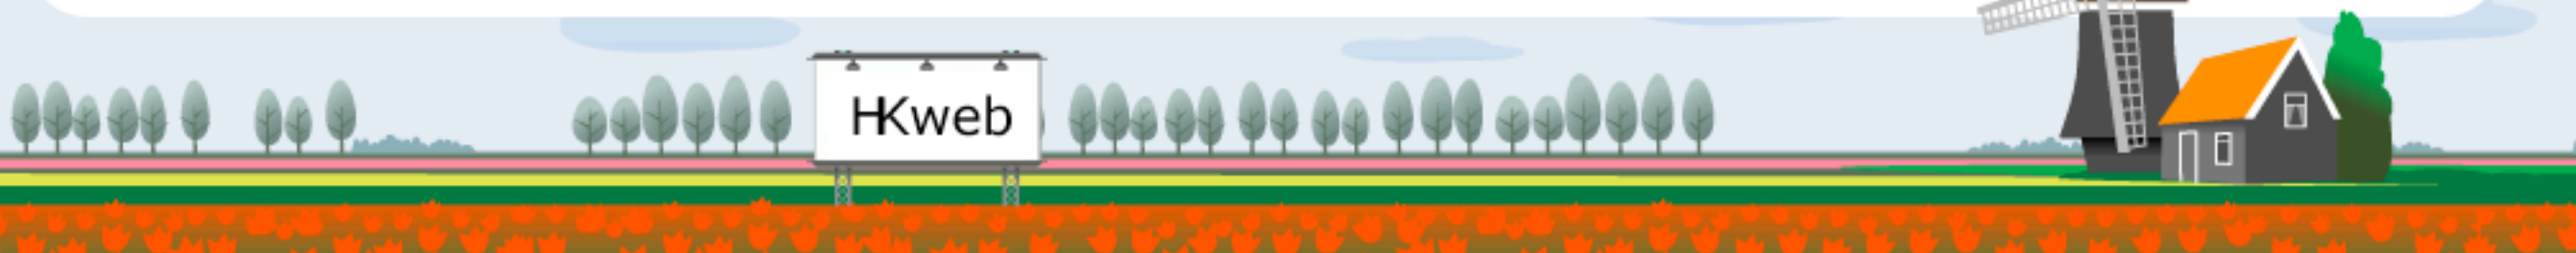

**"een niet geteste backup
is geen backup!"**

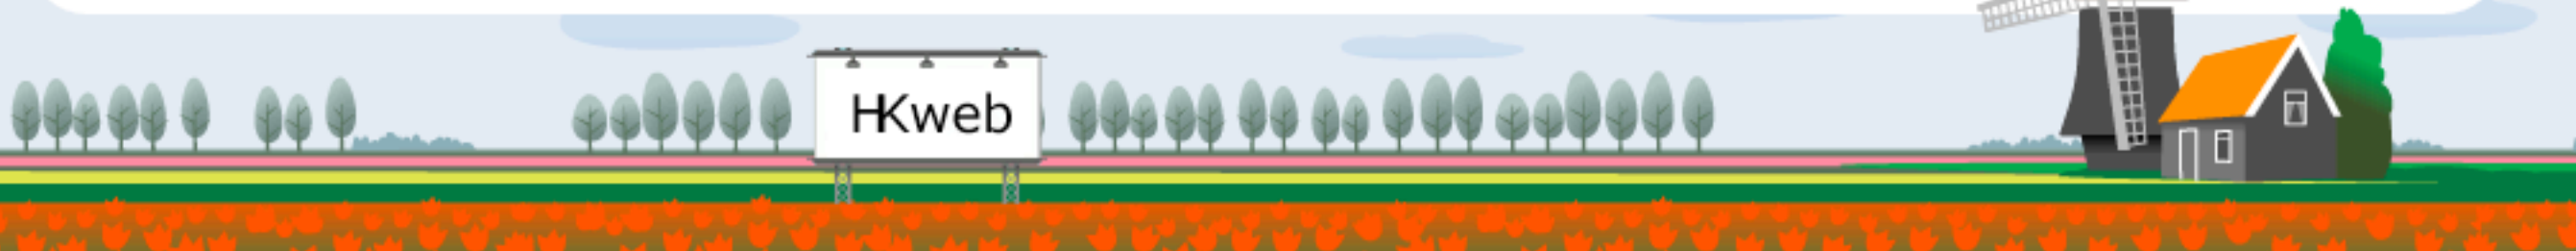

- Gebruik je de extensie niet meer?
VERWIJDEREN -> deïnstalleren
 - en kijk of alles verwijderd is
 - zowel bestanden als tabellen in de database
- Depubliceer Core Extension die je niet gebruikt
 - deze niet verwijderen, omdat ze niet los te installeren zijn.

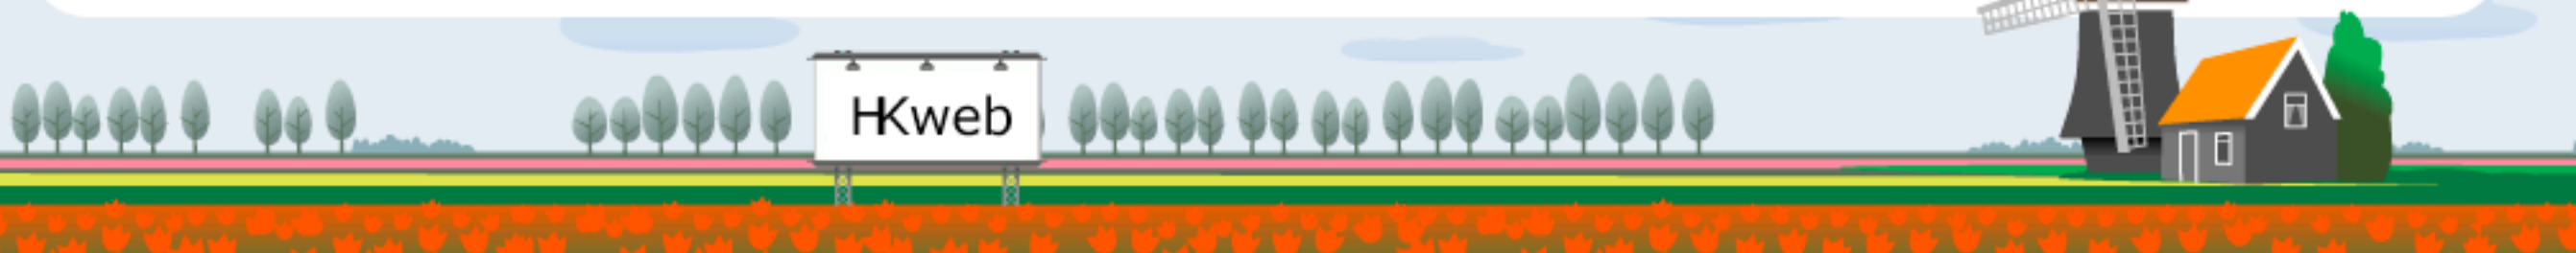

- "Minder is beter"
 - wil niet te veel op je website
 - voorkom dat het een bonte kermis wordt
 - bedenk voor wie de site gemaakt is
- Niet voor elke afwijking van standaard een extensie zoeken. Met template overrides kun je ook heeeeeeel veel.
- Je zult een keer moeten upgraden... ook de extensies

- meld bugs -> het liefst bij de maker zelf
- help mee met vertalingen
- geef de maker feedback en doe suggesties ter verbetering
- deel je eigen verbeteringen met de wereld
- laat dit ook weten via een review / stem op de JED
- schrijf op je eigen blog over de extensies

"mijn lijstje"

- NL taalbestand
- JCE
- NoNumber
 - Cache Cleaner
 - Advanced Module Manager
- Widgetkit
- JotCache
- plugin CacheControl
- Xmap
- RSForms Pro
