CSS Grid

(CSS Grid Layout Module Level 1)

Why not just use
flexbox?

Intrinsic Web Design

Grid terminology

Grid

```
display: grid;
```

Tracks

grid-template-rows

Tracks

grid-template-columns

Cells

Grid areas

Gutters

`grid-column-gap`

Gutters

`grid-row-gap`

The background is a blue gradient. It features several thin, dark blue rectangular outlines. One large rectangle is on the left, with a smaller one above it. Another rectangle is to its right, with a smaller one above it. A large rectangle is on the right side. A rectangle is at the bottom center. A small rectangle is at the bottom left. The text 'Defining a grid' is centered in the middle of the image.

Defining a grid

On the container:

```
.grid {  
  display: grid;  
  grid-template-columns: 200px 200px 200px 200px;  
  grid-template-rows: 150px 150px 150px 150px;  
}
```

On the container:

```
.grid {  
  display: grid;  
  grid-template-columns: 200px 200px 200px 200px;  
  grid-template-rows: 150px 150px 150px 150px;  
  grid-column-gap: 20px;  
  grid-row-gap: 20px;  
}
```

codepen.io/michellebarker/pen/eLZwVg

repeat()

```
.grid {  
  display: grid;  
  grid-template-columns: repeat(4, 200px);  
  grid-template-rows: repeat(4, 150px);  
  grid-gap: 20px;  
}
```

Shorthand

```
.grid {  
  display: grid;  
  grid-template: repeat(4, 150px) / repeat(4, 200px);  
  grid-gap: 20px;  
}
```

Shorthand

```
.grid {  
  display: grid;  
  grid-template: repeat(4, 150px) / repeat(4, 200px);  
  grid-gap: 20px; // grid-row-gap / grid-column-gap  
}
```

Flexible units (fr)

```
.grid {  
  display: grid;  
  grid-template-columns: repeat(4, 1fr);  
  grid-template-rows: 150px;  
  grid-gap: 20px;  
}
```

The diagram shows a light blue background with a grid of four rectangles. The rectangles are outlined in a darker blue. One rectangle is on the left, one is at the top center, one is at the bottom center, and one is on the right. The text 'Fr' is positioned in the upper right area of the grid.

Fr

a fraction of the leftover space in the
grid container

Flexible units (fr)

```
.grid {  
  display: grid;  
  grid-template-columns: repeat(4, 1fr);  
  grid-template-rows: repeat(4, 150px);  
  grid-gap: 20px;  
}
```

Flexible units (fr)

```
.grid {  
  display: grid;  
  grid-template-columns: repeat(3, 200px) 1fr;  
  grid-template-rows: 150px;  
  grid-gap: 20px;  
}
```

Flexible units (fr)

Implicit tracks

```
.grid {  
  display: grid;  
  grid-template-columns: repeat(4, 1fr);  
  grid-auto-rows: 150px;  
  grid-gap: 20px;  
}
```

Implicit tracks

```
.grid {  
  display: grid;  
  grid-template-columns: repeat(4, 1fr);  
  grid-template-rows: repeat(4, 150px);  
  grid-auto-rows: 150px;  
  grid-gap: 20px;  
}
```

codepen.io/michellebarker/pen/eLZwVg

Placing items

Auto-placement

```
<div class="grid">  
  <div class="grid__item">1</div>  
  <div class="grid__item">2</div>  
  <div class="grid__item">3</div>  
</div>
```

	1	2	3		

<header>

<main>

<aside>

Placing items by grid line

```
<div class="grid">  
  <header></header>  
  <main></main>  
  <aside></aside>  
</div>
```

	1	2	3	4	5
1					
2					
3					
4					
5					

Placing items by grid line

```
header {  
  grid-column-start: 1;  
  grid-column-end: 5;  
}
```

1	2	3	4	5
1				
2				
3				
4				
5				

Placing items by grid line

```
main {  
  grid-column-start: 1;  
  grid-column-end: 4;  
  grid-row-start: 2;  
  grid-row-end: 5;  
}
```

```
aside {  
  grid-column-start: 4;  
  grid-column-end: 5;  
  grid-row-start: 2;  
  grid-row-end: 4;  
}
```

Placing items by grid line

```
header {  
  grid-column: 1 / 5;  
}
```

```
main {  
  grid-column: 1 / 4;  
  grid-row: 2 / 5;  
}
```

```
aside {  
  // grid-column: 4 / 5; – unnecessary as will be  
  auto-placed  
  grid-row: span 2;  
}
```

Placing items by grid line

Start line / end line

```
main {  
  grid-column: 1 / 4;  
  grid-row: 2 / 4;  
}
```

Placing items by grid line

Span (with auto-placement)

```
main {  
  grid-column: span 3;  
  grid-row: 2 / 4;  
}
```

Placing items by grid line

Start line / span

```
main {  
  grid-column: 1 / span 3;  
  grid-row: 2 / 4;  
}
```

Placing items by grid line

Span / end line

```
main {  
  grid-column: span 3 / 4;  
  grid-row: 2 / 4;  
}
```

Placing items by grid line

Negative grid lines

```
main {  
  grid-column: 1 / -2;  
  grid-row: 2 / 4;  
}
```

Naming lines

```
.grid {  
  display: grid;  
  grid-template-columns:  
    [header-start main-start]  
    repeat(3, 1fr)  
    [main-end] 1fr [header-end];  
  grid-auto-rows: 150px;  
}
```

header-start
main-start

main-end

header-end

Grid areas

```
header {  
  grid-column: header;  
}
```

```
main {  
  grid-column: main  
  grid-row: span 3;  
}
```

```
aside {  
  grid-row: span 2;  
}
```

grid-template-areas

```
.grid {  
  display: grid;  
  grid-template-columns: repeat(4, 1fr);  
  grid-auto-rows: 150px;  
  grid-template-areas: "h h h h"  
                      "m m m a"  
                      "m m m a"  
                      "m m m .";  
  
  grid-gap: 20px;  
}
```

grid-template-areas

```
header {  
  grid-area: h;  
}
```

```
main {  
  grid-area: m;  
}
```

```
aside {  
  grid-area: a;  
}
```

CSS Variables

(a.k.a. Custom Properties)

**CSS
Variables**

!=

**Preprocessor
Variables**

CSS
Variables

==

Dynamic
variables

Defining variables

```
:root {  
  --bgColor: red;  
}
```

Using variables

```
.my-component {  
  background-color: var(--bgColor);  
}
```

Defaults

```
.my-component {  
  background-color: var(--bgColor, orange);  
}
```

```
.my-component:last-child {  
  --bgColor: red;  
}
```

Defaults

```
.box {  
  background-color: var(--bgColor, orange);  
}  
  
.purple {  
  --bgColor: rebeccaPurple;  
}
```

Defaults

```
<div class="box"></div>
```

```
.box {  
  background-color:  
    orange;  
}
```

```
<div class="purple">  
  <div class="box"></div>  
</div>
```

```
.box {  
  background-color:  
    rebeccaPurple;  
}
```

CSS Variables + CSS Grid

Managing complex grid declarations

Managing complex grid declarations

```
.grid {  
  display: grid;  
  grid-template-columns:  
    [outer-start] minmax(20px, 1fr) [wrapper-start]  
    repeat(24, minmax(0, 30px))  
    [wrapper-end] minmax(20px, 1fr) [outer-end];  
  grid-template-rows:  
    [outer-start] 1fr [text-top-end] 40px  
    [heading-start] auto [heading-end]  
    40px [text-bottom-start] 1fr [outer-end];  
  grid-gap: 0 20px;  
}
```

minmax()

minmax(20px, 1fr)

Minimum size

A white arrow pointing from the text 'Minimum size' to the '20px' argument of the minmax function.

Maximum size

A white arrow pointing from the text 'Maximum size' to the '1fr' argument of the minmax function.

minmax()

`minmax(20px, 1fr)`

`minmax(0, 60px)`

codepen.io/michellebarker/pen/wYGMPQ

Managing complex grid declarations

```
.grid {  
  display: grid;  
  grid-template-columns:  
    [outer-start] minmax(20px, 1fr) [wrapper-start]  
    repeat(24, minmax(0, 30px))  
    [wrapper-end] minmax(20px, 1fr) [outer-end];  
  grid-template-rows:  
    [outer-start] 1fr [text-top-end] 40px  
    [heading-start] auto [heading-end]  
    40px [text-bottom-start] 1fr [outer-end];  
  grid-gap: 0 20px;  
}
```

Managing complex grid declarations

```
:root {  
  --colWidth: 30px;  
  --gutter: 20px;  
  
  @media (min-width: 1600px) {  
    --colWidth: 50px;  
    --gutter: 30px;  
  }  
}
```

Managing complex grid declarations

```
.grid {  
  display: grid;  
  grid-template-columns:  
    [outer-start] minmax(20px, 1fr) [wrapper-start]  
    repeat(24, minmax(0, var(--colWidth)))  
    [wrapper-end] minmax(20px, 1fr) [outer-end];  
  grid-template-rows:  
    [outer-start] 1fr [text-top-end] 40px  
    [heading-start] auto [heading-end]  
    40px [text-bottom-start] 1fr [outer-end];  
  grid-gap: 0 var(--gutter);  
}
```

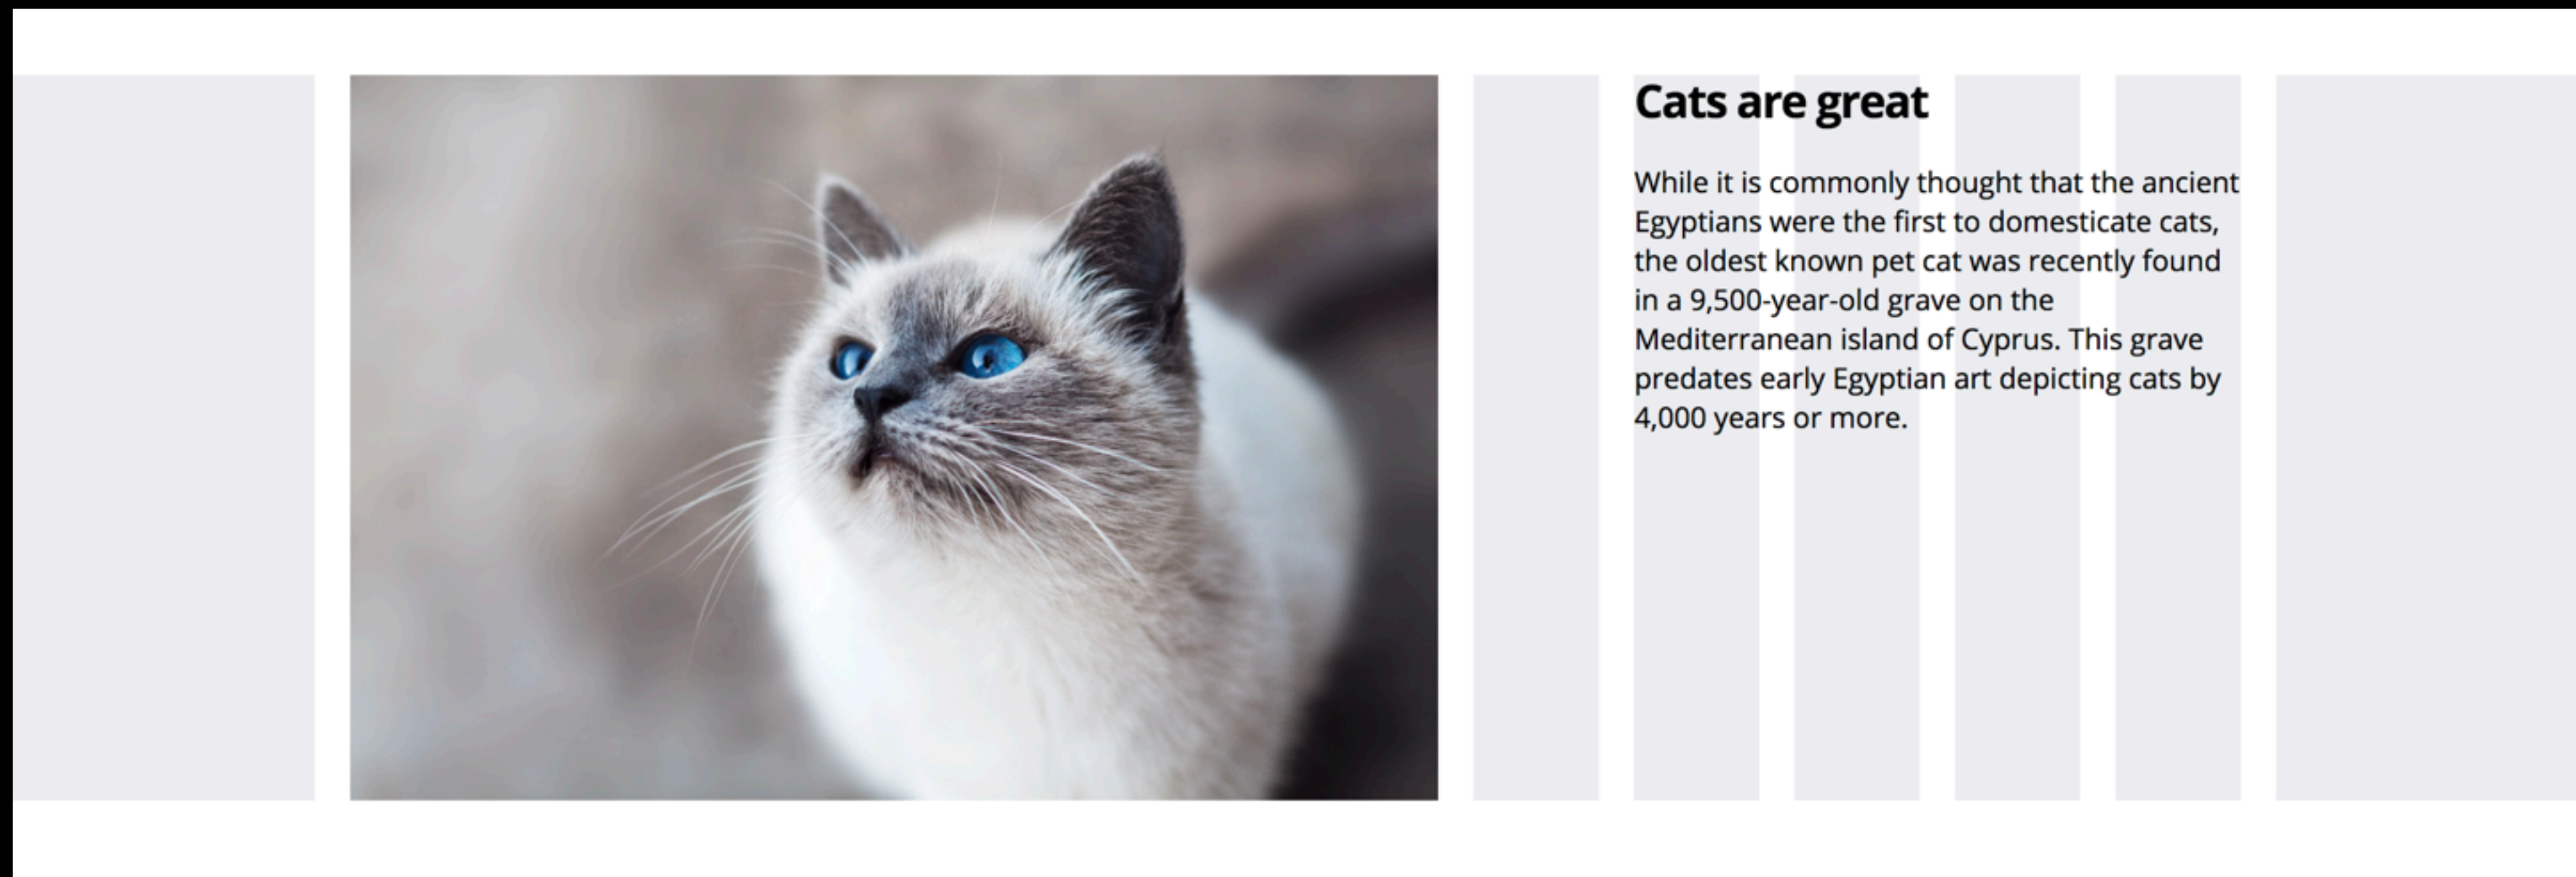

Managing component variants

Managing component variants

```
<article class="grid">  
  <figure class="grid__img"></figure>  
  <div class="grid__text"></div>  
</article>
```

Managing component variants

Managing component variants

```
.grid {  
  display: grid;  
  grid-template-columns:  
    minmax(20px, 1fr)  
    repeat(12, minmax(0, 70px))  
    minmax(20px, 1fr);  
  grid-gap: 20px;  
}
```

Managing component variants

```
.grid__img {  
  grid-column: 2 / 8;  
}  
  
.grid__text {  
  grid-column: 10 / span 4;  
}
```

Managing component variants

codepen.io/michellebarker/pen/XBPMZZ

Managing component variants

```
.grid__img {  
  grid-column:  
    var(--imgStart, 2) / var(--imgEnd, 8);  
  grid-row: 1;  
}
```

```
.grid__text {  
  grid-column:  
    var(--textStart, 10) / span 4;  
  grid-row: 1;  
}
```

Managing component variants

```
.grid--2 {  
  --textStart: 3;  
  --imgStart: 8;  
  --imgEnd: -2;  
}
```

```
.grid--3 {  
  --imgStart: 1;  
}
```

```
.grid--4 {  
  --textStart: 2;  
  --imgStart: 8;  
  --imgEnd: -1;  
}
```

CSS Variables + Javascript

Get property value:

```
getComputedStyle(element).getPropertyValue("--myVariable")
```

(Returns a string)

Set property value:

```
element.style.setProperty("--myVariable", 4)
```
