

Pushing Pixels

Hopeful Idealist

Pages

Buttery Smooth

A surreal landscape featuring a tall, dark, rectangular monolith standing in a desolate, rocky terrain. The background shows a sunset or sunrise with a bright orange glow on the horizon, silhouetted mountains, and a starry night sky with a prominent galaxy or nebula. A small figure of a person is visible in the distance on the right side of the monolith.

Thinking in pages has fostered a monolithic approach to the web experience

Let's bust up that monolith

A detailed illustration of a gorilla in a military-style uniform, complete with a tactical vest and an American flag patch on the sleeve. The gorilla is sitting and reading an open book. The scene is set in a library that is on fire, with large stacks of books on the right and a fire burning at the bottom. The air is filled with falling paper and a blue, smoky atmosphere. The text "Let's burn those pages" is overlaid in white at the bottom center.

Let's burn those pages

an ape wearing a spacesuit burning pages in a book surrounded by hundreds of other burning books

Content

An aerial, high-angle view of a lush tropical island. The island is characterized by dense green vegetation, including numerous palm trees and other tropical plants. A central sandy beach area contains several small, rustic wooden huts with thatched roofs, suggesting a village or settlement. The island is surrounded by clear, turquoise water, with a small lagoon or bay on the right side. Several wooden boats are scattered around the island, some docked at small piers or floating in the water. The overall scene is bright and vibrant, with a clear sky and a sense of a remote, idyllic location.

Design an island

A person in a white shirt and blue pants stands with their back to the camera, arms raised, in a room with a grey brick wall. The room is filled with a massive amount of falling papers and books, creating a chaotic and overwhelming scene. The text "Don't throw pages over the wall from design to development" is overlaid in the center of the image.

**Don't throw pages over the wall
from design to development**

Dustin @foxinthewaves · May 24

I've spent so much time fighting with web performance tooling and testing over the years, and I have to say that @SpeedCurve absolutely nails it.

Scheduled benchmarking by region with enriched Lighthouse reports? Too good not to break my own rule against fan boi tech co posts.

**Think in smaller islands of content and
stream them into the browser
(islands architecture)**

The background is a vibrant, abstract digital space. It features a grid of floating, semi-transparent rectangular panels in shades of orange, teal, and purple. Some panels display faint line graphs or data visualizations. In the foreground, there are silhouettes of people: a woman on the left holding a smartphone, and a man on the right looking upwards. The overall atmosphere is one of a high-tech, interactive user interface.

**Don't prioritise developer experience
over user experience
(everything has a cost, especially SPAs)**

A group of performers in traditional Japanese festival costumes, featuring large, curved horns and white masks with red and black markings. They are wearing ornate red and gold jackets. The performers are playing various instruments, including drums and a stringed instrument. The background is a warm, brownish-gold color.

Keep measurement simple and easy for everyone to understand and improve (build a performance culture)

A person wearing glasses and a dark hoodie is sitting at a desk in a high-rise office at night. They are looking at three computer monitors displaying various data visualizations and code. The desk is lit with a warm orange glow from a desk lamp. In the background, a large window offers a panoramic view of a city skyline at night, with lights from buildings and streets visible. The overall atmosphere is futuristic and tech-oriented.
