I gave a presentation “**TIL from CSSBattle**” the other day about how the CSSBattle has helped me to find a hack against disappearing spaces in container queries when minimized. <https://noti.st/gunnarbittersmann/nKejq3/til-from-cssbattle>

The numbers of targets – of both battle targets and daily targets – up to the date of the presentation were just fine:

- On the opening title (animated), the battle targets left just enough space for the title. <https://bittersmann.de/talks/til-from-cssbattle/opening>
- On the closing title (animated), the daily targets filled the grid exactly. <https://bittersmann.de/talks/til-from-cssbattle/closing>

regarding slides 5-8 and CSSBattle lessons, wouldn't `1fr+3fr` also work there? Or the build tool would drop the unary plus too? (Bearbeitet)

```
.Til {  
  @container widget (width > 18em) {  
    grid-template-areas:  
      "image description"  
      "image form";  
    grid-template-columns: 1fr+3fr;  
  }  
}
```

```
.Til {  
  @container widget (width > 18em) {  
    grid-template-areas:  
      "image description"  
      "image form";  
    grid-template-columns: repeat(1, 1fr) auto;  
  }  
}
```

Yea, that should work. Looks much nicer.

So I need to prepare “TIL **more** from CSSBattle”? When need I to present this, that the number of targets would fit again? 🤔

Oh wait, `1fr 3fr` is one case on the page. Another one is `1fr auto`. I would still need a `)` there, i.e. `repeat()`? (Bearbeitet)
