

What is Information Architecture?

Rik Williams, UX Architect, Moorfields Eye Hospital
rikwilliams.net/talks/what-information-architecture/

Objectives

What you will learn in this session...

What is information?

What is architecture?

What is information architecture (IA)?

3 tenants: Ontology, Choreography and Taxonomy

Summary

‘Information + Architecture’

What is Information?

Original Glazed® ONLY 200 kcal
 Signature ring doughnut, a light and fluffy dough with our classic glaze.
CHOOSE ANY 3 for £5.65 or £1.65 each

ALLERGENS
 Contains: Wheat, Egg and Milk.
 Not suitable for Oat, Nut, Peanut, and Soya allergy sufferers due to manufacturing methods.

CORE-01 SEL-MO-001a

Chocolate Sprinkles 262 kcal
 Our signature ring doughnut hand dipped in chocolate icing and colourful sprinkles.
CHOOSE ANY 3 for £5.65 or £1.75 each

ALLERGENS
 Contains: Wheat, Egg, Milk and Soya.
 Not suitable for Oat, Nut and Peanut allergy sufferers due to manufacturing methods.

3019 SEL-MOCCAL-002b

SALTED Caramel DELIGHT 325 kcal *new*
 Hand dipped in milk chocolate, made with Salted Caramel Matchmaker® nibs and a Matchmaker®.
CHOOSE ANY 3 for £5.65 or £2.10 each

ALLERGENS
 Contains: Wheat, Egg, Milk and Soya.
 Not suitable for Oat, Nut and Peanut allergy sufferers due to manufacturing methods.

4330 OAT 125-REVISE

ORIGINAL Filled Classic Kreme 308 kcal
 Our signature Original Glazed doughnut filled with our smooth Kreme filling.
CHOOSE ANY 3 for £5.65 or £2.10 each

ALLERGENS
 Contains: Wheat, Egg, Milk and Soya.
 Not suitable for Oat, Nut and Peanut allergy sufferers due to manufacturing methods.

Information \neq Content \neq Data

Information is the meaning
extracted from a particular
sequence of things.

Information is what a person
understands to be true based
what they experience .

Content is whatever is being
arranged or sequenced for a
person to interpret.

**Data are the facts, observations
and questions that a user has
about a thing.**

**We cannot create information. Instead we
make content that is able to be perceived in
a way that we hope will be based on what
users know.**

Without thinking about how your content is perceived and the data users might have available, you might not be creating the information intended.

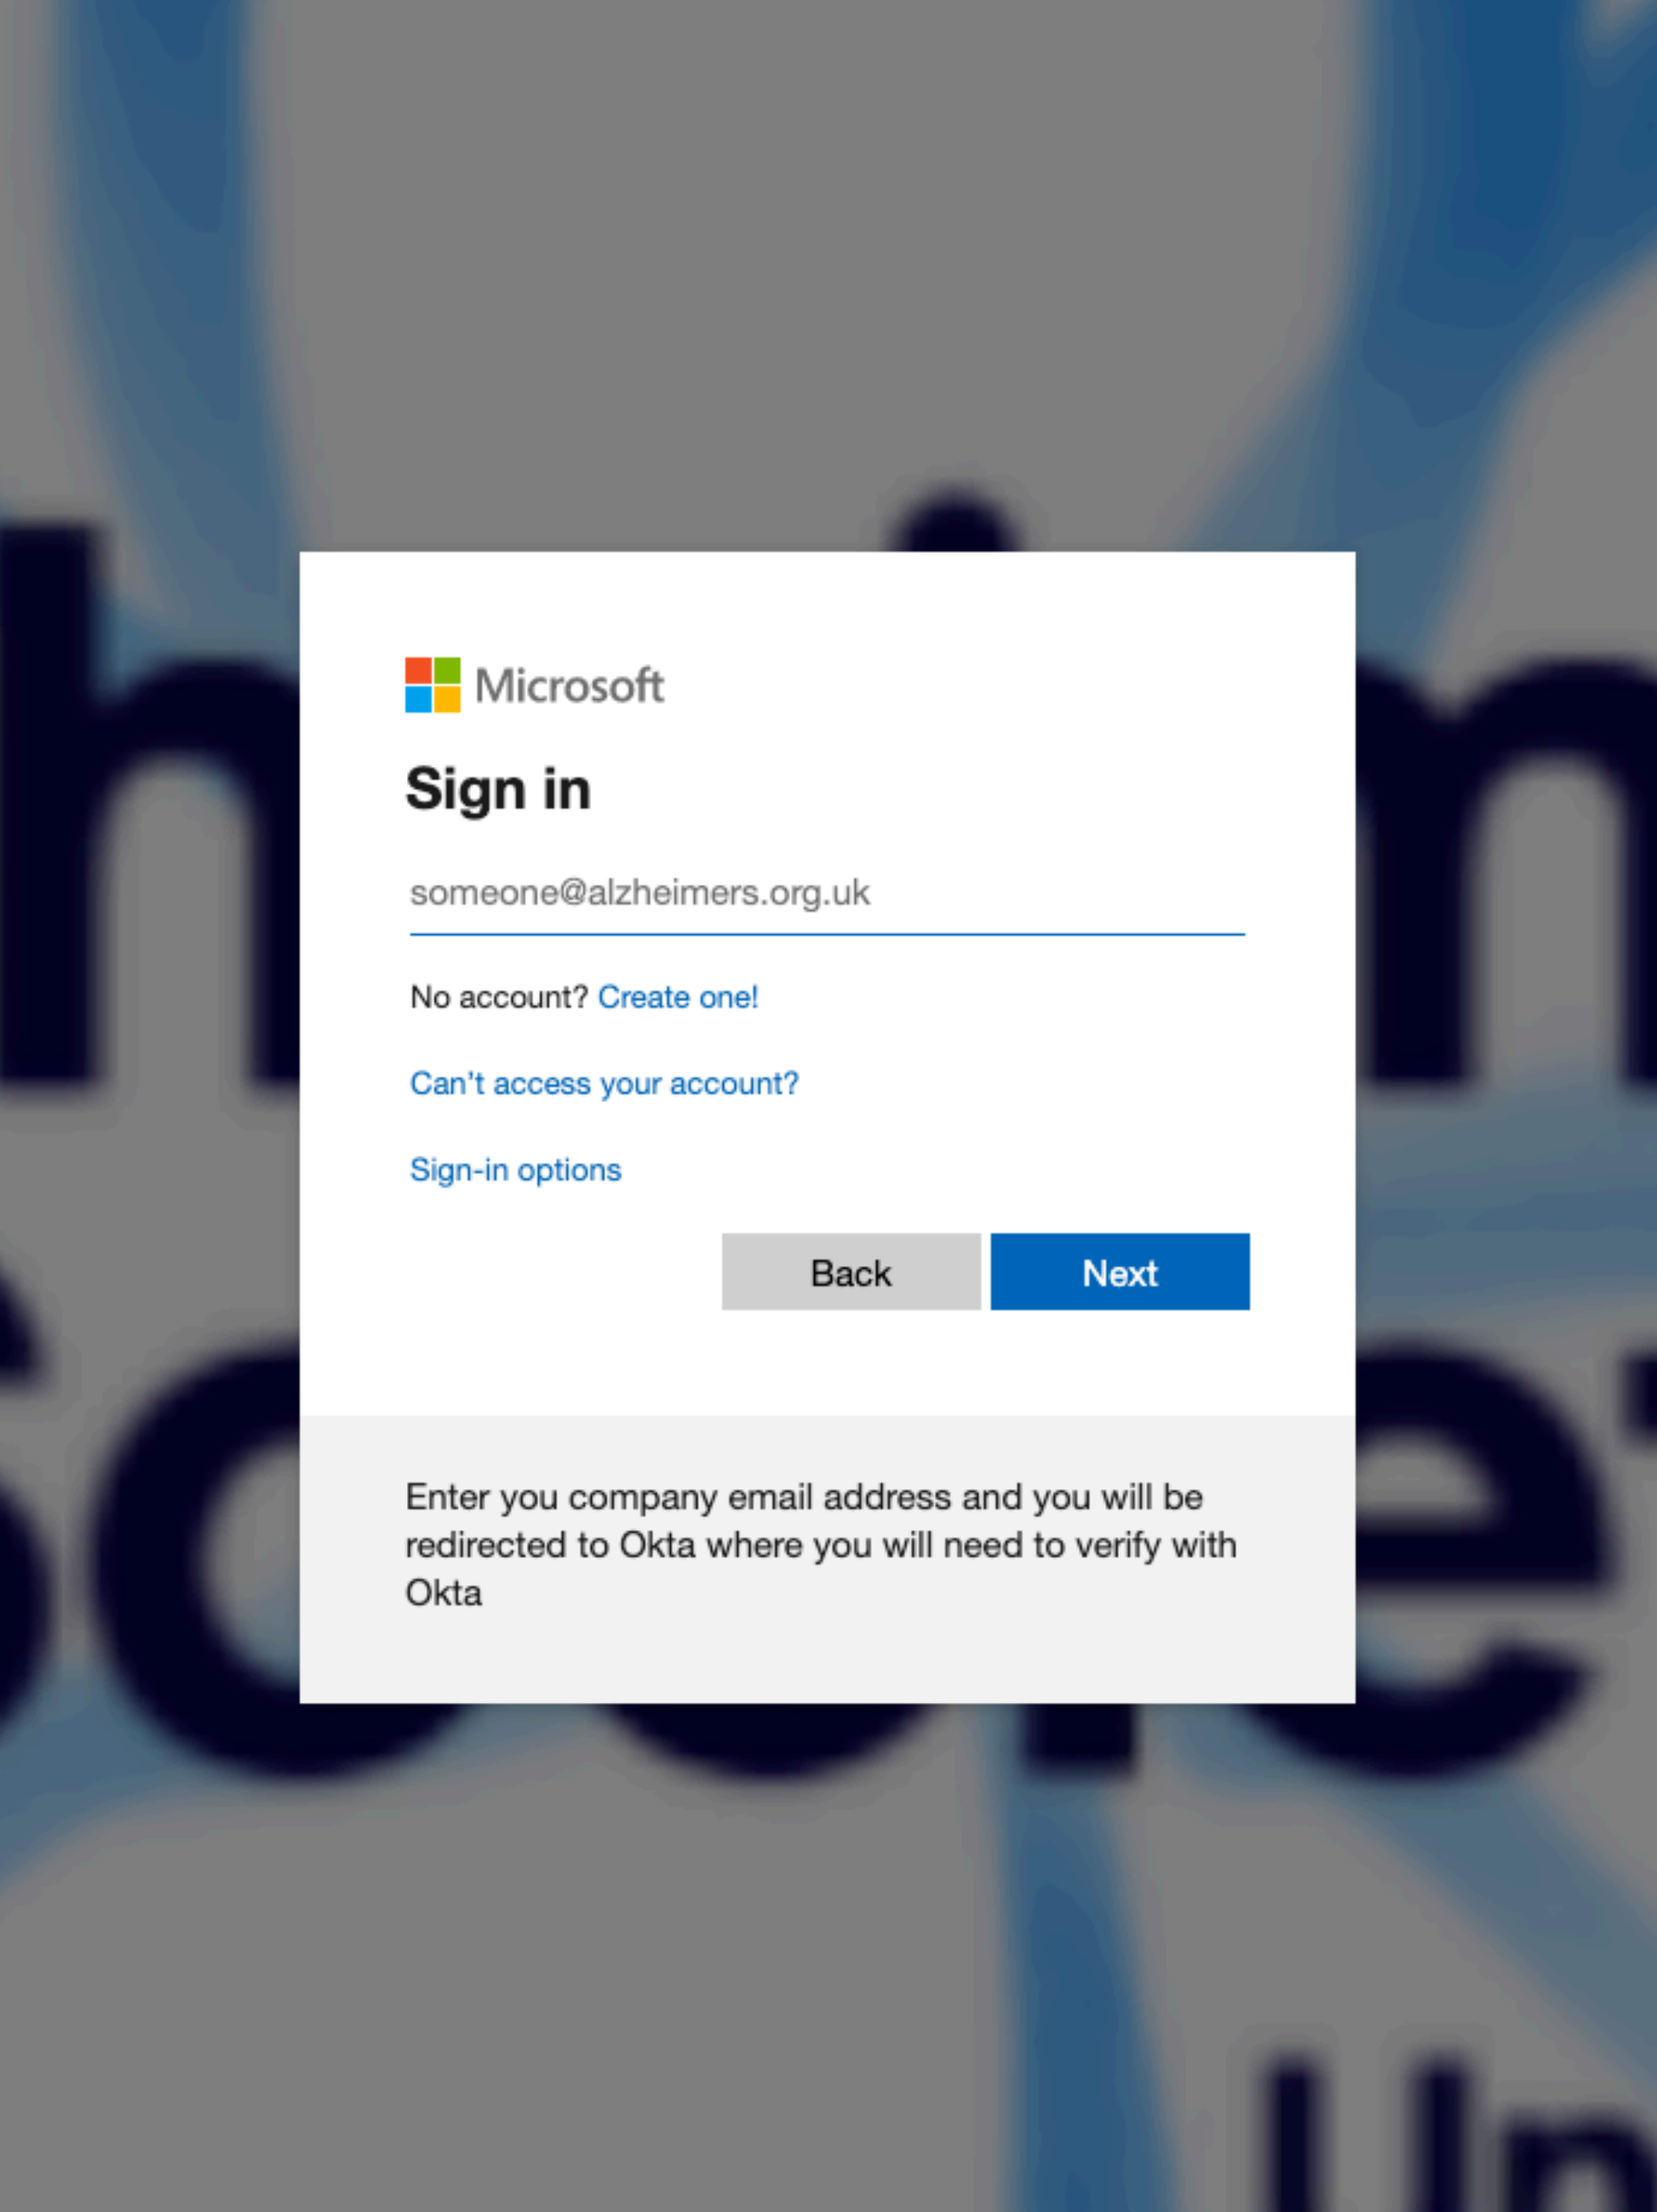

What is Architecture?

Architecture is the the complex
or carefully designed structure of
something.

Physical spaces

City, building

Hallways, lifts, stairs

Windows, doors

Rooms, Spaces

Locks, keys

Furniture, paintings

Desire lines

Squares, rectangles

Digital spaces

System, app, site

Sections, menus, flow, links

Dialogs, viewports, homepages

Pages, States

Passwords, credentials

Interface elements, images

Desire paths

CSS box model

Thinking about architecture is
optional, but **architecture**
always exists.

“You may not have an information architect on your team, but you definitely have information architecture in your experience.”

Sarah R. Barrett

If we don't think about it we are letting
it grow organically which usually means
that it's **hard for people to use.**

**38 years to
build**

161 rooms

**Winchester
Mystery House**

**10,000 panes of
glass**

17 chimneys

**8-weeks to
empty**

47 fireplaces

What is Information Architecture?

“Information architecture makes
sense of mess.”

Abby Covert

“If you’ve ever tried to use something and thought, ‘where am I supposed to go next?’ or ‘this doesn’t make any sense’, you are encountering an issue with an information architecture.”

IA Institute

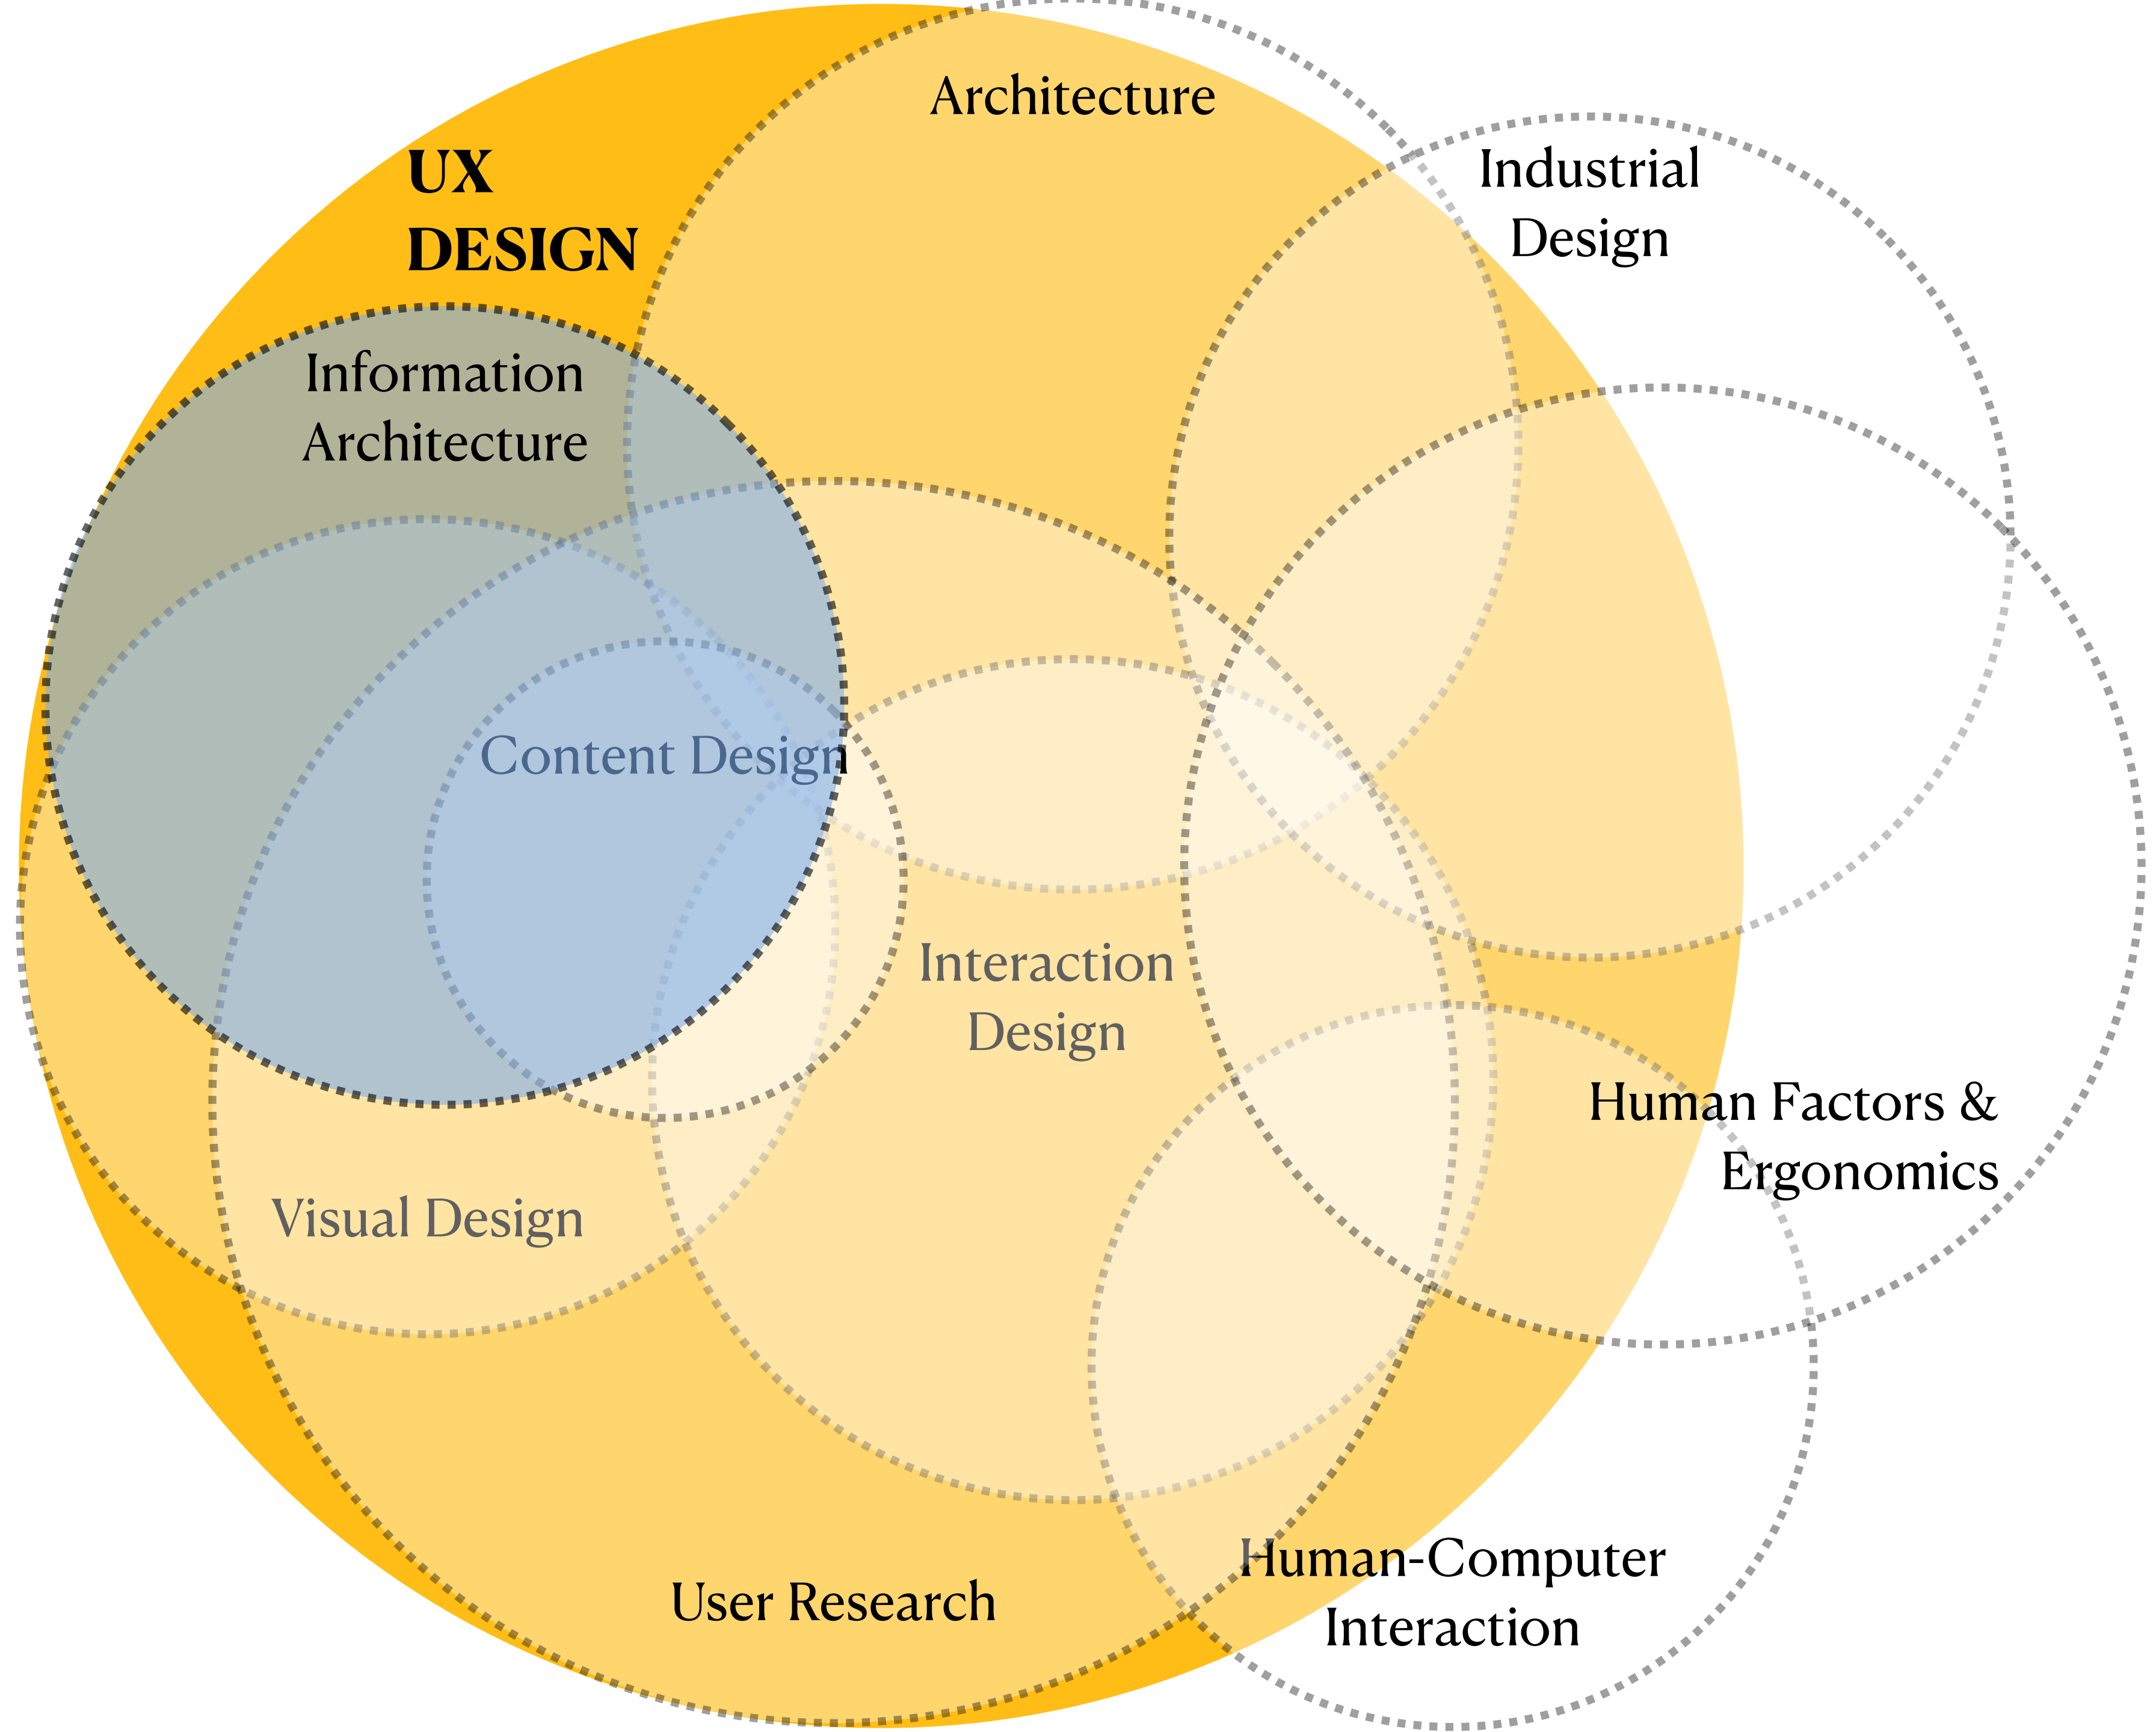

“Information architecture is the practice of deciding how to arrange the parts of something to be understandable.”

IA Institute

IA is a critical discipline for user
experience (UX) design

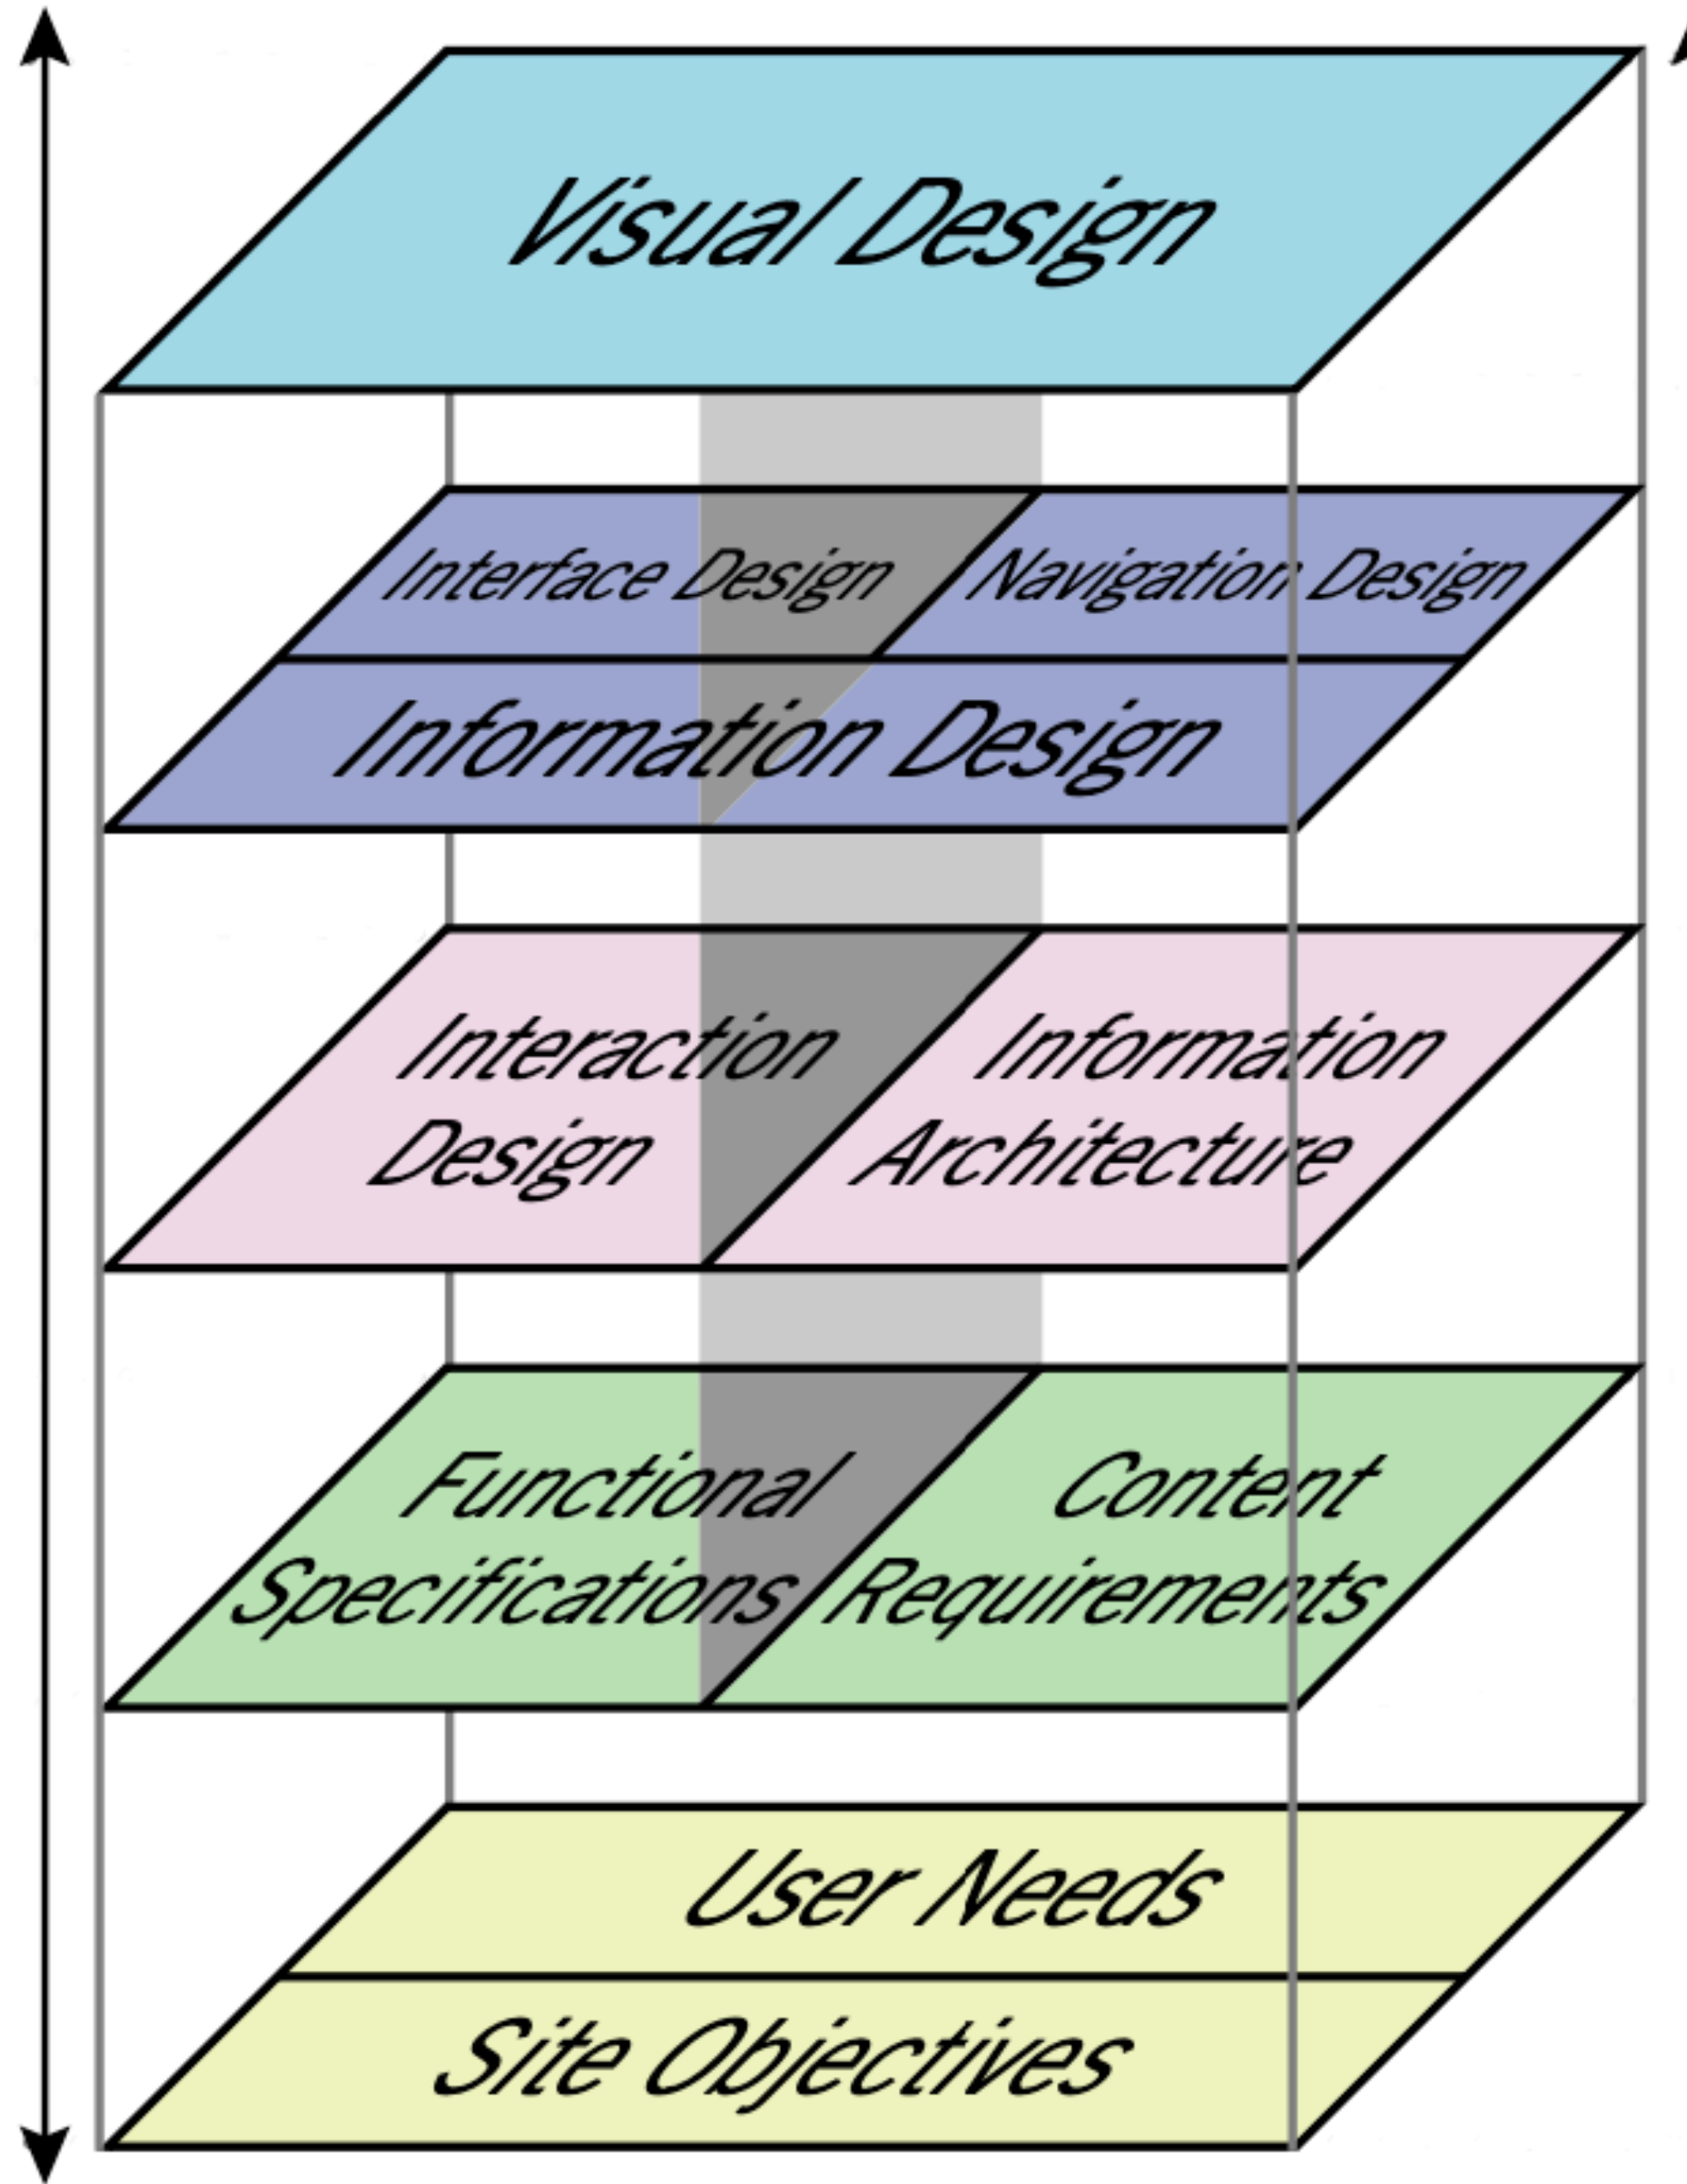

User experience (UX) design is a process to create products and services that provide meaningful and relevant outcomes for people.

UX involves the design of the entire process of acquiring and integrating the product or service, including aspects of branding, design, usability and function.

Concrete

Completion

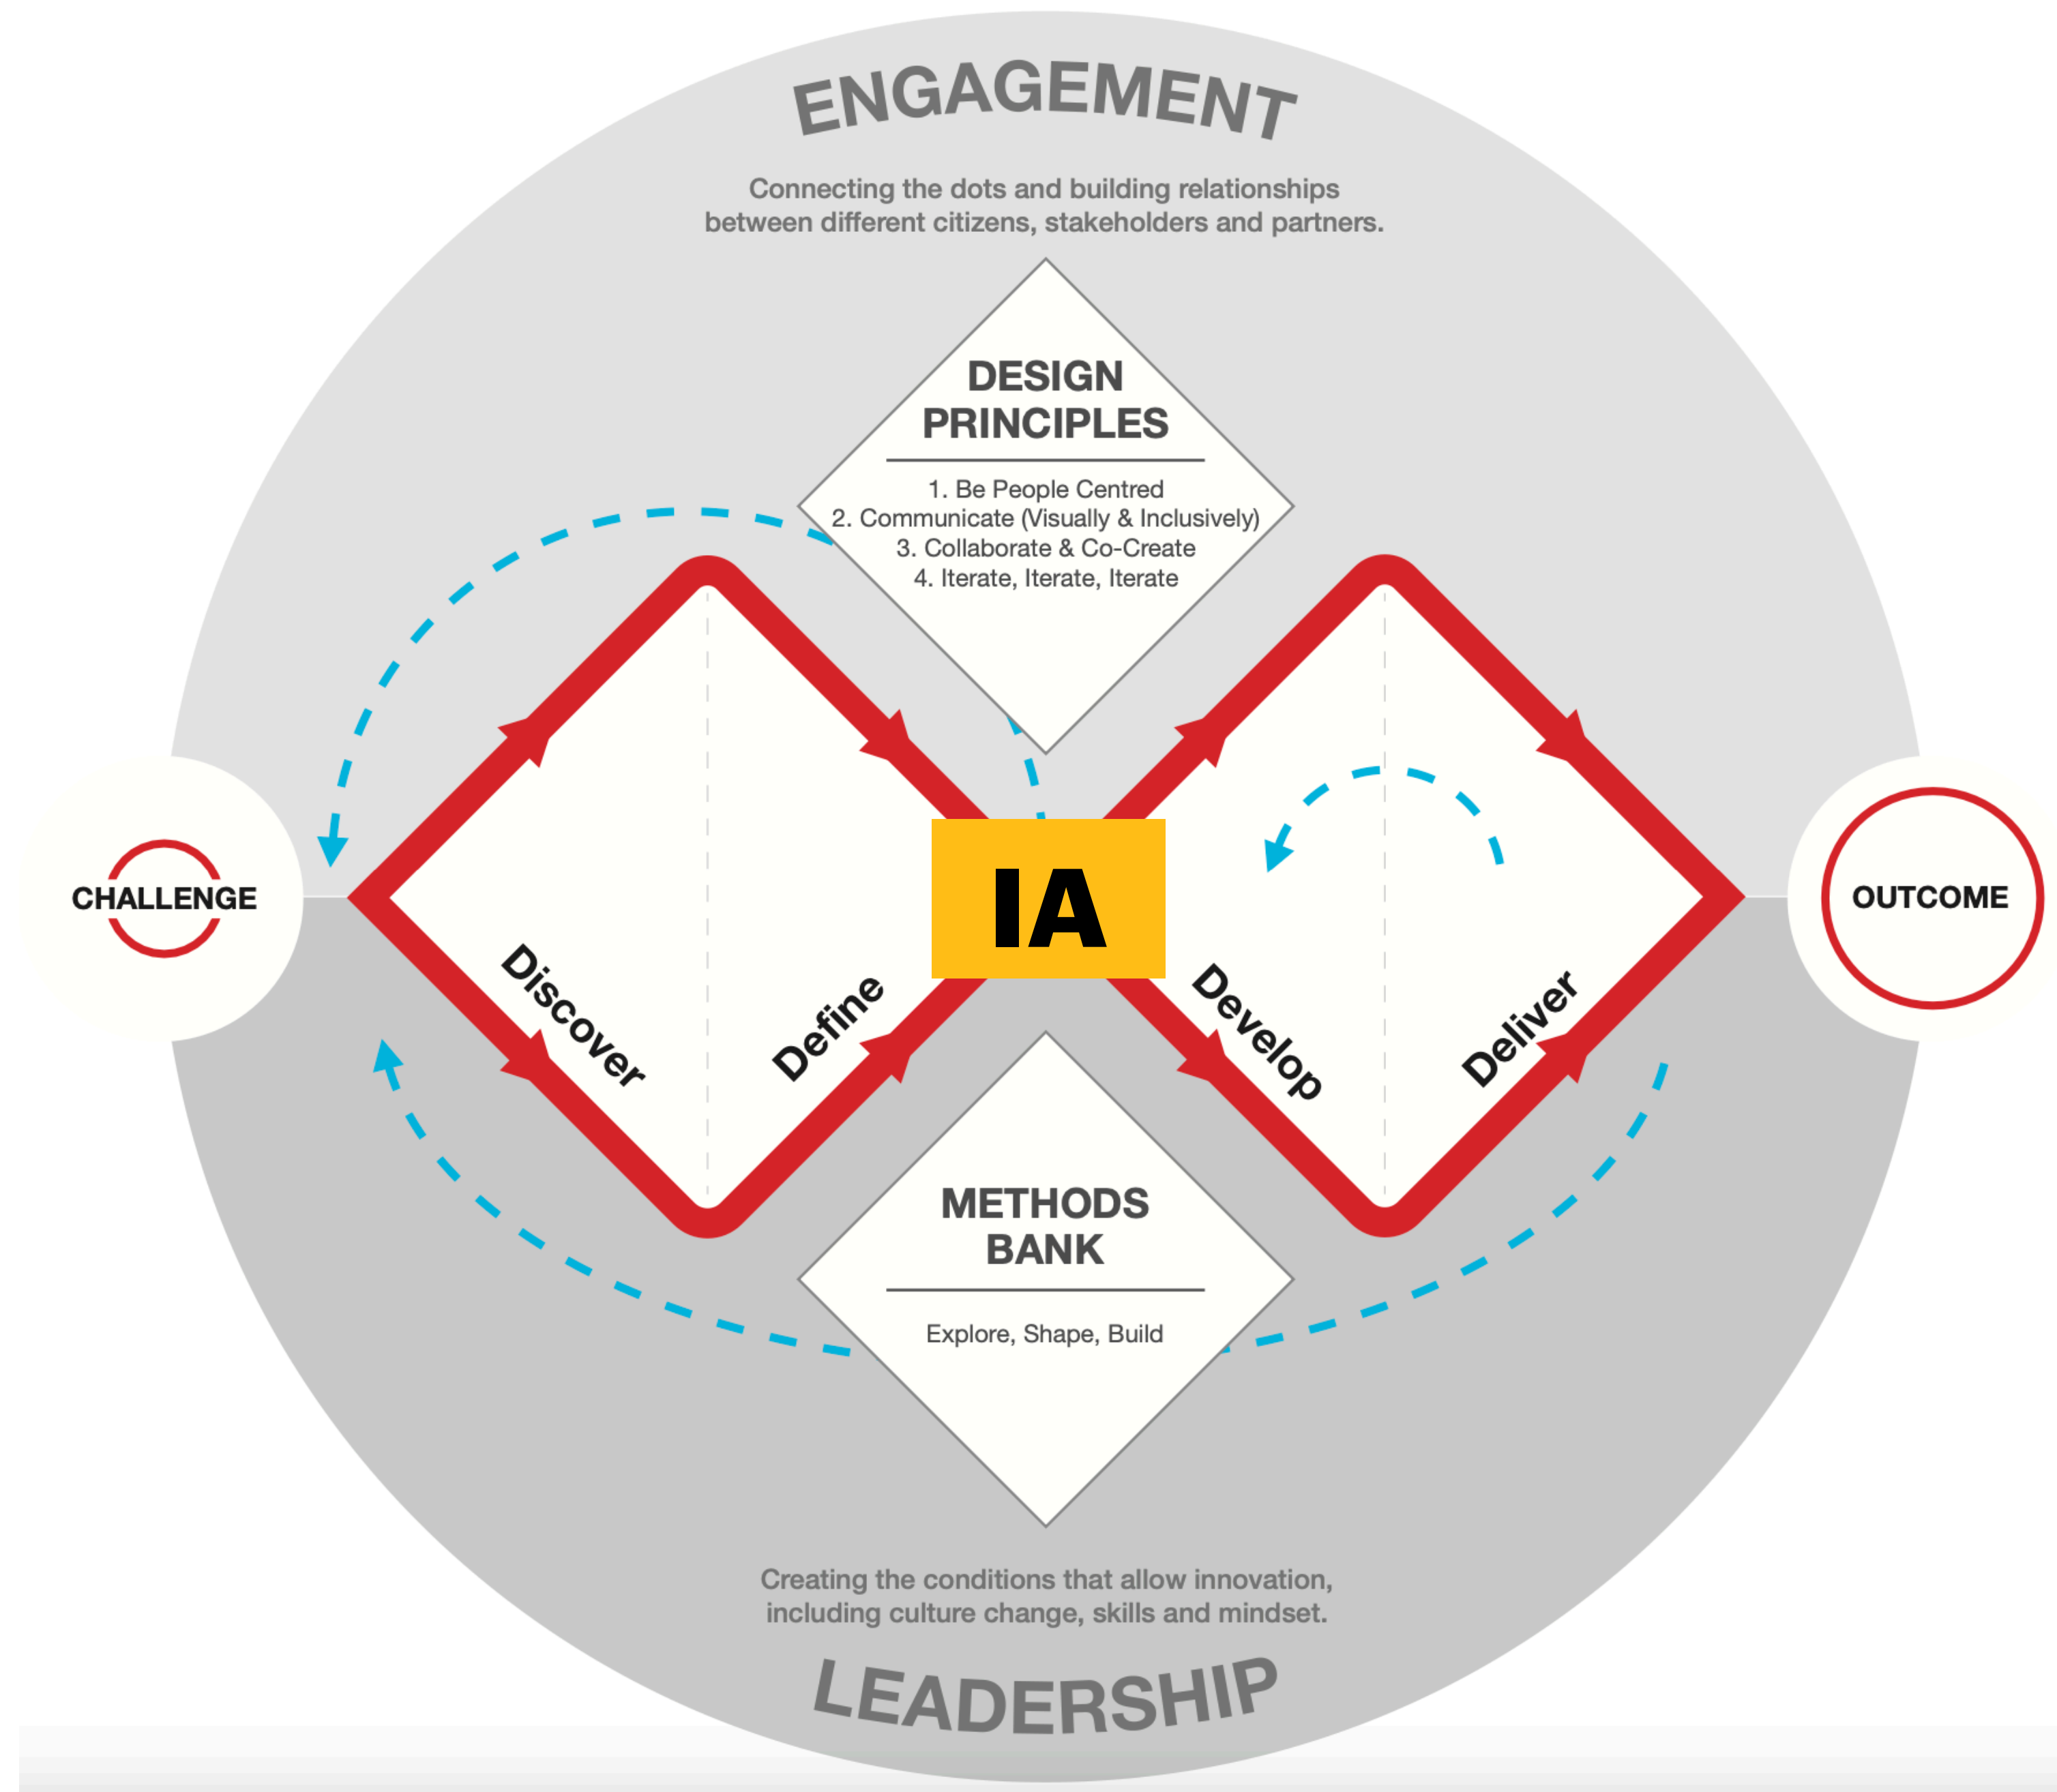

Only visual design? Voice?...

Only here? Not throughout?

Abstract

Conception

Information architecture focuses on the organisation of data and objects into structure in a system.

IA defines what types of content and functions will be available for people under what labels, sequences and hierarchies.

**Why is information
architecture important?**

An effective IA helps people to make meaning and find what they're looking for — in the real and the virtual worlds.

“[IA] takes user research insights and synthesises them into structure.”

Sophia Prater

“Information architecture provides actionable blueprints for what's being designed and built.”

Abby Covert

**“Well-defined leads to well-
designed.”**

Lindsay Eryn

IA can define...

- Which content is most essential for people at each stage of a journey?
- How important is this thing compared with this other thing for the customer?
- What are the relationships between these objects for a user?
- What labels should we use to make this system easy to navigate?
- What content do we require to meet a customer's needs? How can it be reused?
- Where should a user be able to get to from this location?
- How to categorise items so that they are findable?

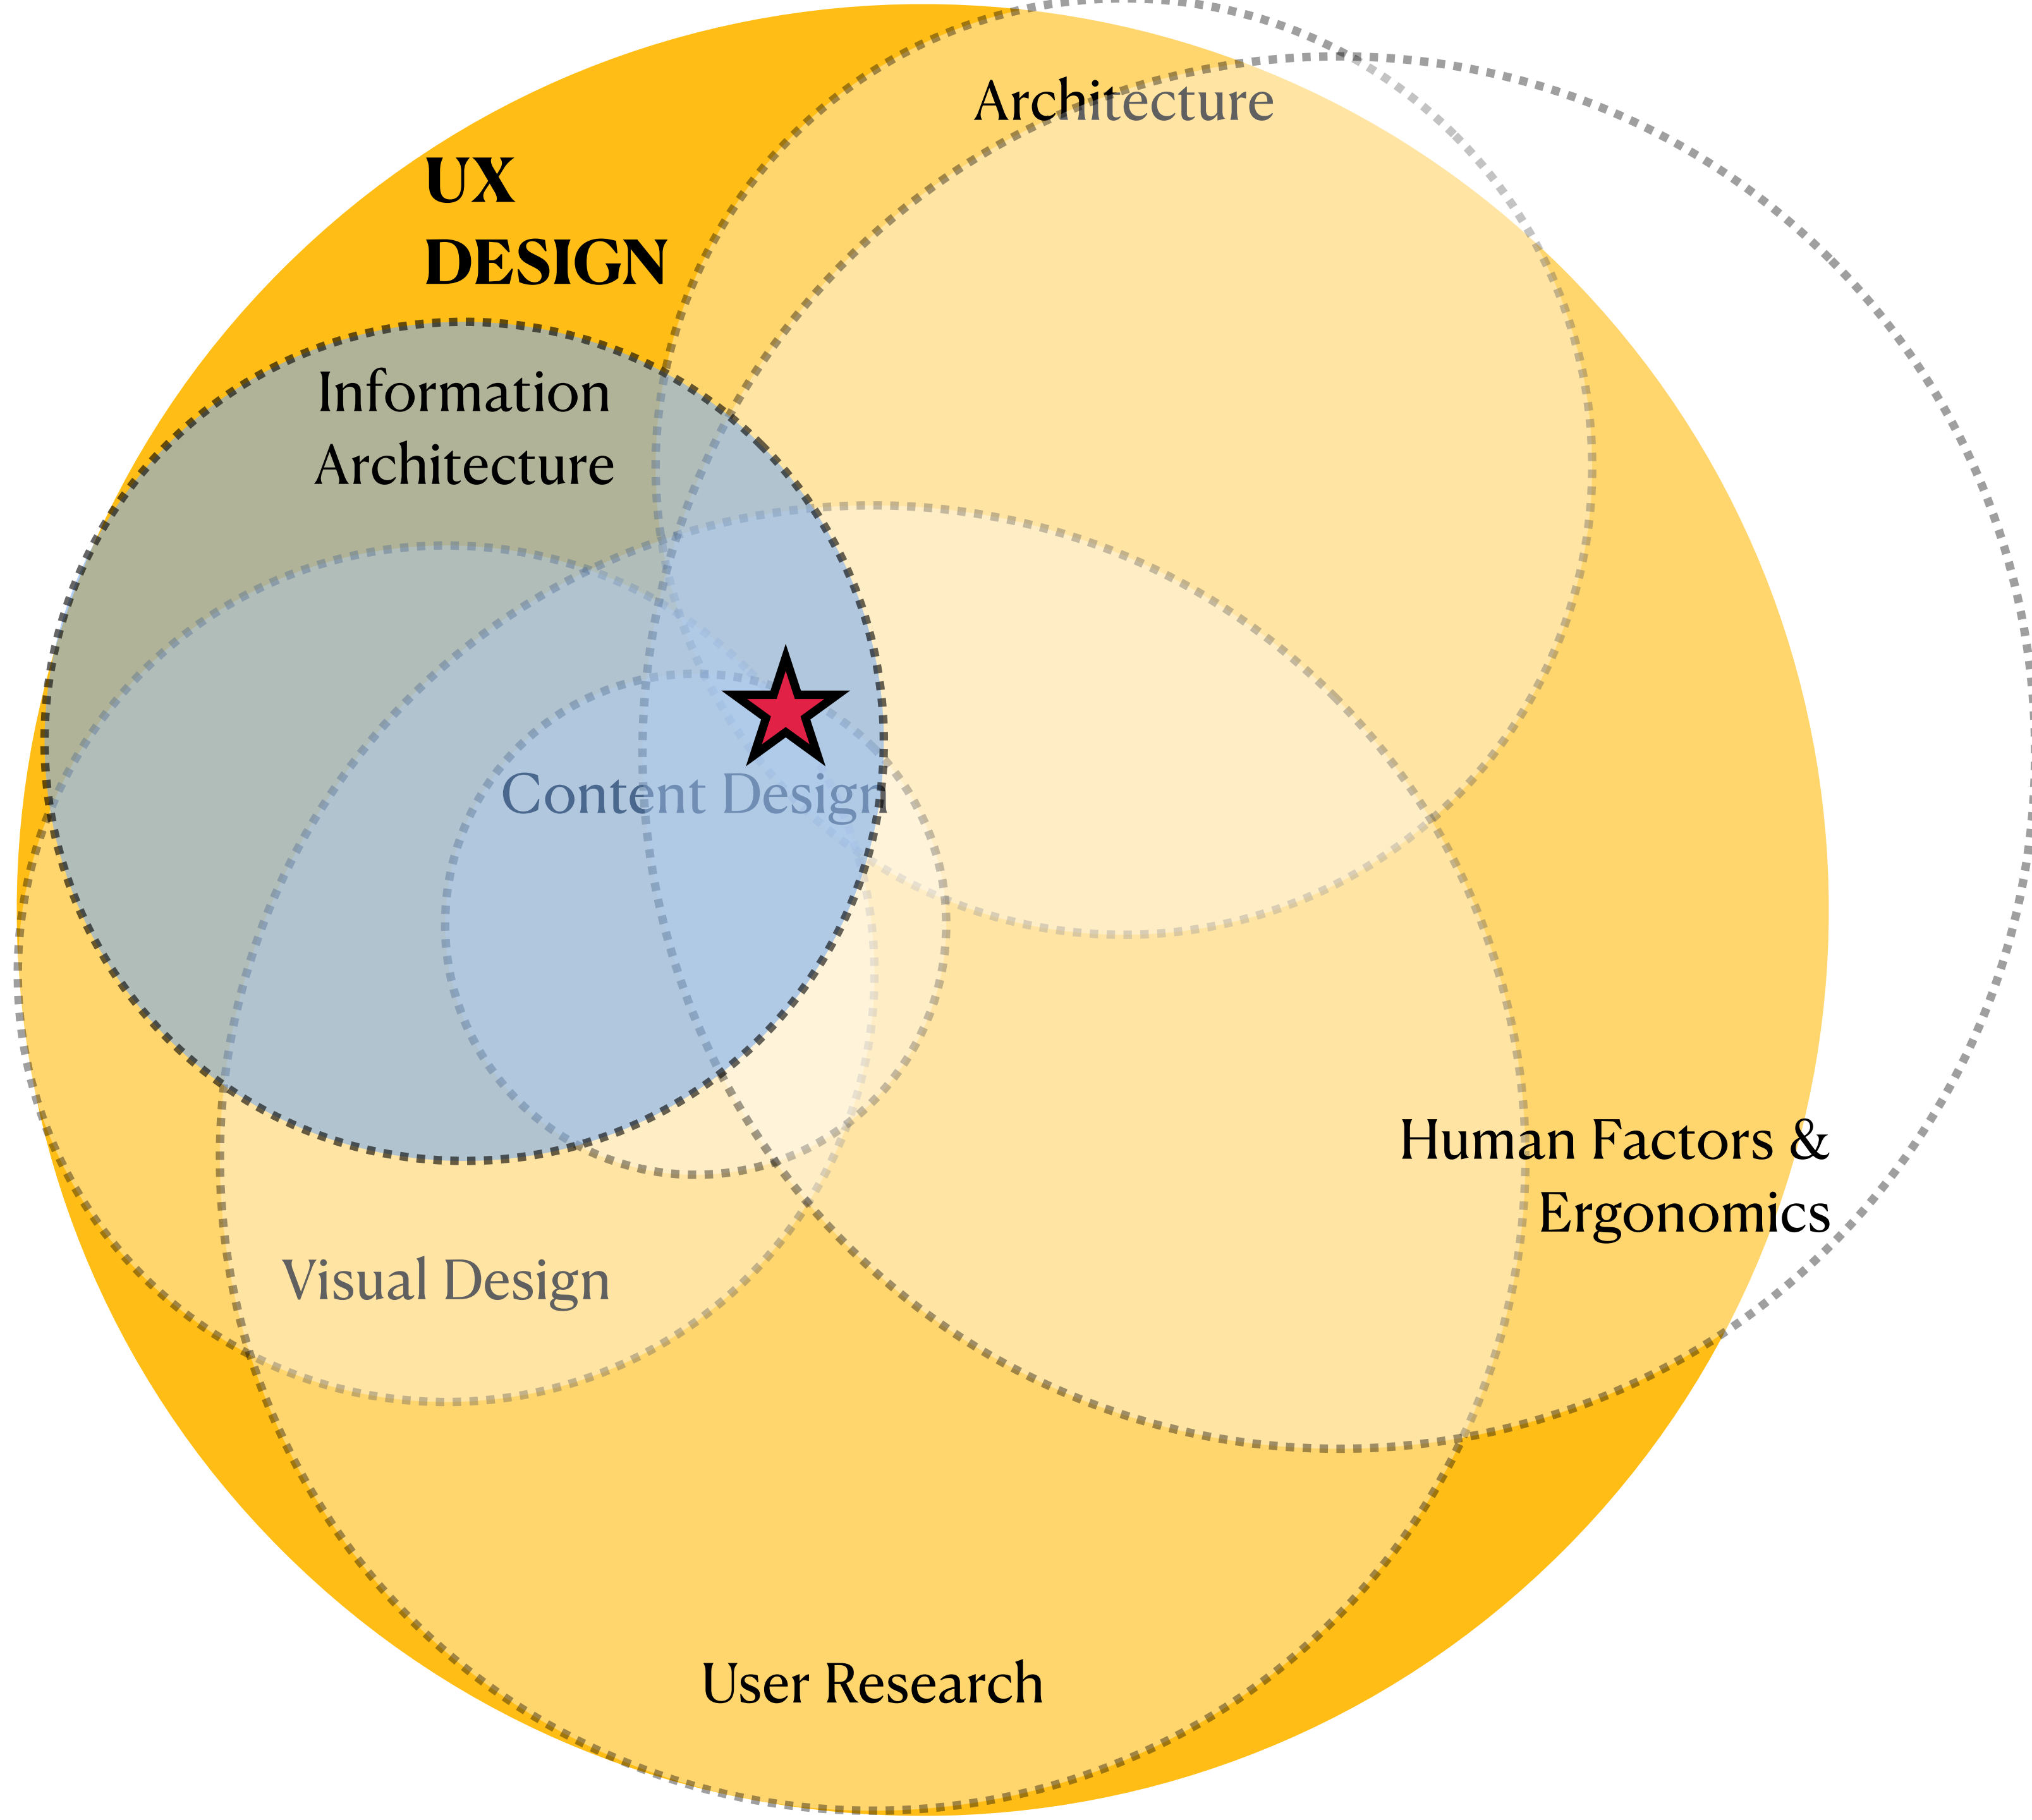

Good IA for Users...

- Increases...
 - **speed** by lowering the time to complete tasks.
 - **value** by making the right product/service.
 - **accessibility** by making the system understandable, consistent and predictable.
 - **accuracy** by aligning with real, valid, mental models.
 - **focus** by keep an onus on task, purpose and outcome.
- Reduces...
 - **cognitive load** by making the unclear, clear.
 - **errors** by not providing misleading (or hard to find) choices.
 - **abandonment** by enabling/signalling task progression/completion.
 - **frustration** by meeting real needs without fuss or bother.

Good IA for Organisations...

- Increases revenue by:
 - increasing likelihood of conversions / sales.
 - reduces risk of abandonment to a competitor.
 - reduces costs of contacting customer support.
- Reduces content duplication.
- Creates competitive advantage.

Mixed Greens, Tomatoes, Onions, Grated Carrots & Cucumbers with Choice of Dressing

CHEESE FLAT BREAD \$6.95
Topped with Roasted Tomato Sauce & Mozzarella Cheese

GREEN DOOR CHILI FRIES \$6.25
Sweet Potato Fries topped with Mead's Chili & Cilantro Sour Cream

BUFFALO CAULIFLOWER (V) \$5.50
Roasted Cauliflower Tossed in a Tangy Buffalo Sauce with "Blue Cheese Dip"

SANDWICHES

All sandwiches are \$9.25

THE TASTIE VEGGIE (V)
Avocado, Cucumbers, Arugula, Carrots, Tomatoes & Olives with Vegan Cream Cheese Spread on Squaw Bread

ARTICHOKE & GOUDA GRILLED CHEESE
Caramelized Artichoke Hearts & Fennel spread with Sliced Tomato, Arugula & Melted Gouda on grilled 12 Grain Bread

CAJUN CHIK'N TORTA
Grilled Cajun Chik'n topped with melted Pepper Jack cheese, Tomatoes, Lettuce, Caramelized Onion & Black Bean Spread on Rosemary Torta Roll

CLASSIC CHEESEBURGER
House-Made "Burger," & Crisp Lettuce on Potato Bun with Oven-Roasted Tomato Spread, Choice of Pepper Jack, Swiss, Gouda or Vegan Cheese.

GREEN DOOR HABIT (V)
House-Made Hummus, Avocado, Smokey Tempeh, Sliced Tomato & Arugula on Toasted 12 Grain Bread

PORTOBELLO SANDWICH
Marinated Grilled Portobello Mushroom Cap, Arugula, Sliced Tomatoes & Caramelized Onions with Swiss Cheese. Served on a Potato Bun with Lemon-Tahini dressing

THE KING'S SHROOM (V)
Slow Cooked Shredded King Oyster Mushrooms & Chopped House Patty Smothered in our BBQ Sauce topped with Southern Slaw & served on a Sweet Flaxseed Roll

SRIRACHA BOMB BURGER (V)
House-Made "Burger" on a Toasted Potato Bun, drizzled with Spicy Sriracha Sauce on a bed of Crisp Asian Slaw

EGG & ASPARAGUS SUB
Sliced Hard-Cooked Eggs, Roasted Asparagus with Pickled Onions & Arugula, lightly dressed with Lemon-Tahini served on a Sweet Flaxseed Roll

MEAD'S BLT (V)
Grilled 12 Grain Bread with Gouda Cheese, Bac'n, Lettuce, Tomato, Hummus & Avocado. Drizzled with a Lemon-Tahini & Sriracha Sauce.

Lunch and Dinner

Who is this who darkens counsel
by words without knowledge?
Now prepare yourself like a lion
and answer Me.

Where were you when I laid
the foundations of the earth?
Tell Me, if you have understood
Who determined its measure
Or who stretched the line upon
it? Or who stretched the line upon
it? Or who stretched the line upon
it?

38 Then the Lord answered
of the whirlwind, and said
The Lord Reveals His
Omnipotence to Job
Rebukes no partiality to an
are wise of heart.

Where were you when I laid
the foundations of the earth?
Tell Me, if you have understood
Who determined its measure
Or who stretched the line upon
it? Or who stretched the line upon
it? Or who stretched the line upon
it?

Description

Is what you offer findable, accessible, clear, communicative, useful, credible, controllable, valuable, learnable and delightful?

Heuristics provide a shared language of critique and measurable principles that help you prepare to succeed with users, both in research and out in the wild.

This poster references five important historical sources of information architecture and usability heuristics to provide a list of ten core heuristic principles for any information architecture project. Each

1. Ontology

“What we mean when we say what we say.”

Dan Klyn

Ontology is a declaration of
meaning in a specific context
— but meaning is slippery!

These are fish

The meaning behind a label/term
can be completely different between
organisations and their users.

Meaning is...

Subjective

Sociopolitical

Psychographic

Lost in translation

Not talked about enough

Poorly defined ontology causes findability issues, user errors and retention problems.

Dementia with Lewy bodies (DLB): what is it and what causes it?

Dementia with Lewy bodies (DLB) is a type of dementia caused by Lewy bodies, which are clumps of protein in the cells of the brain. Read more about what DLB is, and who gets the condition.

- 1. [Dementia with Lewy bodies \(DLB\): what is it and what causes it?](#)
- 2. [Getting a diagnosis of dementia with Lewy bodies \(DLB\)](#)
- 3. [Symptoms of dementia with Lewy bodies \(DLB\)](#)
- 4. [Treatments and support for dementia with Lewy bodies \(DLB\)](#)
- 5. [Dementia with Lewy bodies \(DLB\) – useful resources](#)

Dementia with Lewy bodies (DLB)

What is dementia with Lewy bodies?

Dementia is caused by different diseases that affect the brain. Lewy body dementia – also known as dementia with Lewy bodies (DLB) – is caused by Lewy body disease.

In this disease, tiny clumps of proteins known as Lewy bodies appear in the nerve cells of the brain. Lewy bodies are named after PH Lewy, the German doctor who first identified them.

Lewy bodies cause a range of symptoms, some of which are shared by Alzheimer's disease and some by Parkinson's disease. For this reason, DLB is often wrongly diagnosed. About 1 in 10 people with dementia has DLB.

Watch this short video about dementia with Lewy bodies:

What causes dementia with Lewy bodies?

It is not yet known why Lewy bodies develop in the brain or exactly how they cause dementia, but we do know that Lewy body disease:

- can cause different symptoms depending on what parts of the brain have the biggest build-up of faulty proteins
- reduces the levels of important chemicals needed to send messages around the brain
- breaks the connections between nerve cells, eventually causing these cells to stop working
- usually develops over a period of many years – typically when a person is approaching old age. Lewy bodies can be developing in the brain for a long time before any symptoms show.

Having Lewy body disease doesn't mean that a person's dementia is only caused by the build-up of Lewy bodies in their brain.

Many people with DLB also have a build-up of other proteins that cause **Alzheimer's disease**. This is common in people over about 80 years old. For people with both DLB and Alzheimer's, dementia symptoms are often more severe and progress more quickly.

Parkinson's disease

Parkinson's disease is also caused by a build-up of Lewy bodies in the brain. DLB has a lot of symptoms in common with Parkinson's disease. Both cause problems with:

- thinking
- movement
- how well the body works.

In DLB, the symptoms of dementia begin before or around the same time as the person develops problems with movement.

For people with Parkinson's disease, symptoms of dementia often develop many years after the movement problems begin.

Who gets dementia with Lewy bodies?

Around 5% of people with a diagnosis of dementia are recorded as having DLB, but there is good evidence that the condition is under-diagnosed. Scientists think DLB may account for up to 20% of all dementia.

Dementia with Lewy bodies affects men and women roughly equally. As with most other types of dementia, DLB becomes increasingly common over the age of 65. It can also affect people younger than this.

There is not much evidence that anything we might be exposed to during our lives increases the risk of DLB. Having a traumatic head injury (or repeated injuries) may increase the risk of developing Parkinson's disease later in life, but it's not known whether this also applies to DLB.

Almost all people who develop DLB have a 'sporadic' form, which means that the main cause is unknown. Some genes may increase the risk of developing DLB.

Advice

Can genes cause dementia?

Around 1 in 4 people aged 85 years and over has a close birth relative with dementia. Find out what part genes play in dementia and how genetics can affect the risk of developing the condition.

Meg and Keith's experience of dementia with Lewy bodies and Parkinson's disease dementia

Real stories

Adjusting to life after diagnosis is challenging for people living with dementia. 28 June 2018

movement (motor symptoms). These are the main feature of Parkinson's disease.

- Lewy bodies in the outer layers of the brain are linked to problems with mental abilities (cognitive symptoms), which is a feature of DLB.

People with a Lewy body disorder can have problems with movement and changes in mental abilities at the same time.

A person with Parkinson's disease is at high risk of going on to develop dementia (Parkinson's disease dementia) as their condition progresses. Dementia may be more likely in a person who has developed Parkinson's later in life or who has been living with it for several years.

Did you find this useful?

We provide free advice and support articles about Alzheimer's disease. This way we have been able to help over 50,000 people and carers who deal with Alzheimer's.

Our work is funded through donations from people like you! You can help us make a difference.

How to organise anything

(I double dare you to try to break this!)

There are only 5 ways to organise things...

- **Location**
- **Alphabet**
- **Time**
- **Category**
- **Hierarchy**

**“Organising things isn’t hard. Agreeing on
how to organise things is hard.”**

“It takes knowledge to know that a tomato is a fruit and wisdom to know not to put it in a fruit salad.”

Miles Kington

3. Choreography

Choreography comes together when meaning (ontology) and categorisation (taxonomy) interact with each other to create an experience.

Choreography is the sequence of steps a user can take, across contexts/channels.

Examples of Choreography in IA

- The difference in features between a **desktop and a mobile experiences** (Insta)
- A limitation of functionality based on the **role of a user** (free/paid plan)
- The change of interface for a **first-time user vs. long-time user** (Facebook).

Ontological Choreography

How does the **language** you are using change in certain contexts or channels?

Label changes

Icon substitution

Meaning changes

Taxonomical Choreography

How does the **structure** you are using change in certain contexts of channels?

Navigation schema changes

Content hierarchy changes

Limitation of features

Placemaking — the act of determining how to communicate the intended purpose of a place to its users.

How do you know what these places are for?

Subtle cues which denote where you are and what you can do here.

Placemaking

A single room can be changed slightly to communicate different intentions to users.

**We have to decide how we want
our users to move**

The interplay of ontology, taxonomy
and choreography can't simply be
designed: it needs to be architected first.

Summary

Information architecture is all about organising content or things, describing them clearly and providing ways for people to get to them.

Good information architecture helps people to find information they need. It can also help them learn and make better decisions.

A lot of information architecture work relates to websites and intranets, but is just as relevant for music and movies, a computer file system, your paper files at home or even groceries on supermarket shelves.
