A D8 COMPONENTS HISTORY LESSON...

Drupal 8	Twig Mapping	DC New Orleans	UI Patterns	Layout Builder	Component Blocks
Nov 19, 2015 (!!!)	???	May 2016	January 2017	Nov 2017 Experimental	July 2020
Goodbye PHP Template, hello Twig	Experimenting with the power of include/extends (and later embed) Goodbye PHP Template, hello Twig	Components module, meeting of the component minds.	Map component data in the admin UI.	Exciting new page building experience in Drupal, but how does it play with Components?	Bridging the gap between UI Patterns and Layout Builder

OUR EXAMPLE TWIG COMPONENT

```

c-container.twig web/themes/custom/nes/nes-components/source/_patterns/03-components/container/c-container
<div class="nes-container with-title is-centered">
  {% if title %}
    <p class="title">{{ title }}</p>
  {% endif %}
  {% if platform or year %}
    <div class="nes-badge is-splited">
      {% if platform %}<span class="is-dark">{{ platform }}</span>{% endif %}
      {% if year %}<span class="is-success">{{ year }}</span>{% endif %}
    </div>
  {% endif %}
  {% if image %}
    {{ image }}
  {% endif %}
  {% if body %}
    {{ body }}
  {% endif %}
  {% if link %}
    <a class="nes-btn is-primary" href={{ link }}>Press Start</a>
  {% endif %}
</div>

```

Super Mario Galaxy 2

Wii 2010

Super Mario Galaxy 2
is a platform video
game developed and
published by Nintendo
for the Wii.

MAPPING DATA IN CODE

COMPONENT LIBRARY / PATTERN LAB

COMPONENTS MODULE

Creates Twig namespaces to access templates in non-standard locations

! *nes.info.yml* *web/themes/custom/nes/nes.info.yml*

```
component-libraries:
  components:
    paths:
      - nes-components/source/_patterns/03-components
```

INTEGRATING IN CODE

MAPPING IN TWIG PRESENTER TEMPLATE

Drupal template references template in component library

node--game--teaser.html.twig web/themes/custom/nes/templates/node--game--teaser.html.twig

```
<article{{ attributes.addClass(classes) }}>
  {% include "@components/container/c-container.twig"
    with {
      'title': label,
      'link': url,
      'platform': content.field_platform,
      'year': content.field_year,
      'image': content.field_image,
      'body': content.body
    }
  %}
</article>
```

MAPPING DATA IN THE ADMIN UI

UI PATTERNS MODULE

Define and manage components in a way that Drupal understands

- Define UI Patterns as Drupal Plugins
- Configure data mappings in the UI
- Optional Pattern Library page exposed in Drupal
- Also allows Drupal to:
 - Preprocess patterns
 - Render patterns programmatically

```
container:
  label: Container
  description: A container component from NES.css
  fields:
    title:
      type: text
      label: Title
      description: Game title.
      preview: Super Mario Galaxy 2
    platform:
      type: text
      label: Platform
      description: Console or platform
      preview: Wii
    year:
      type: text
      label: Year
      description: Year of release
      preview: 2010
    image:
      type: image
      label: Image
      description: Box art
      preview: Super Mario Galaxy 2 is a platform video game developed and publis
    link:
      type: url
      label: Link
      description: link to node
      preview: '#'
```

- ☐ Provide default field wrapper elements
- If not checked, fields that are not configured to customize their HTML elements will get no wrappers at all for their field, label and fieldset. You can use this to quickly reduce the amount of markup the view provides by default, at the cost of making it more difficult to apply custom CSS.
- ☒ Hide empty fields
- Do not display fields, labels or markup for fields that are empty.

Pattern *

Container ▾

UI PATTERNS PATTERN LAB

Automatically create UI Patterns from your pattern library... really.

- End result same as previous UI Patterns Example
- No redundant ui_patterns.yml file necessary
- Some limitations
 - Requires yaml or json file with pattern data
 - Requires specific approach to nested components.

UI Patterns Pattern Lab

[View](#) [Version control](#) [Automated testing](#)

Posted by [brianperry](#) on 1 May 2018, updated 7 May 2018

This project is not covered by Drupal's [security advisory policy](#).

The UI Patterns Pattern Lab module automatically discovers patterns defined in a Pattern Lab instance and makes them available to be used in Drupal as [UI Patterns](#).

This module will recognize Pattern Lab patterns in any active module or theme's /templates directory, along with any paths defined as Twig Namespaces in your theme by the [Component Libraries](#) module. After enabling this module (which will also enable the dependencies `ui_patterns` and `ui_patterns_library`) and clearing your cache, patterns should be visible at `/patterns` and available to use with any of the UI Patterns integration modules.

This project would not exist without the work of [Antonio De Marco](#) who maintains the [UI Patterns](#) module and [Pierre Dureau](#) who created the [UI Patterns Fractal integration](#) that this project is based on.

LAYOUT BUILDER

LAYOUTS

LAYOUTS AND LAYOUT BUILDER

```
c-container.twig web/themes/custom/nes/nes-components/source/_patterns/03-components/container/c-contain
<div {{ attributes.addClass('container') }}>
  <div class="nes-container with-title is-centered">
    {% if title %}
      <div {{ region_attributes.title.addClass('title-region') }}>
        <h2 class="title"><a href={{ link }}>{{ title }}</a></h2>
      </div>
    {% endif %}
    {% if platform or year %}
      <div class="nes-badge is-splited">
        {% if platform %}<span class="is-dark">{{ platform }}</span>{% endif %}
        {% if year %}<span class="is-success">{{ year }}</span>{% endif %}
      </div>
    {% endif %}
    {% if image %}
      <div {{ region_attributes.image.addClass('image-region') }}>
        {{ image }}
      </div>
    {% endif %}
    {% if body %}
      <div {{ region_attributes.body.addClass('body-region') }}>
        {{ body }}
      </div>
    {% endif %}
    {% if link %}
      <a class="nes-btn is-primary" href={{ link }}>Press Start</a>
    {% endif %}
  </div>
</div>
```

COMPONENT BLOCKS

Best of both worlds

- Recently released (stable release, but early)
- Exposes UI Patterns to Layout Builder
- Sidesteps visual layout issues
- Use any fields available to the entity, along with fixed inputs.

Component blocks

[View](#) [Version control](#) [View history](#) [Automated testing](#)

By [larowlan](#) on 15 July 2020, updated 15 July 2020

[★ Unstar](#) 10 [✉ Followed](#)

Summary

Provides integration between the [UI Patterns](#) module and core's Layout Builder.

Features

One block derivative is created per UI pattern.
The configuration form for the block lets you pick fields from the entity in scope (e.g. the current node) as well as which formatter to use for each field.
You can also use a fixed string, with token support.

MY DREAM WORKFLOW, EVER CLOSER

Component Blocks seems like the glue

- Improve UI based component configuration process in Drupal
 - With specific focus on Layout Builder.
- Make it easier to package, distribute and use individual components
 - Track evolution of Web Components
- Evolve approaches allowing Drupal to automatically discover components
- Keep building amazing looking component based sites using Drupal

Coming up next Saturday 2 pm

- 2pm - **Nodes of the Realm: Managing content access** with Jordan Thompson
- 2pm - **Redefining productivity during burnout** with April Sides
- 2pm - **Understanding React.js** with Mauricio Dinarte
- 2pm - 2:20pm - **Simplifying the Drupal frontend with Single File Components** with Sam Mortenson
- 2:25pm - **Building your Existing Drupal 8/9 Project with Docksal** with Sujeet Kumar Verma and Ridhima Abrol

Coming up next
Saturday 1:45 pm

- Coffee break sponsored by **ATEN** in the Expo Hall
