A compound grid based on Gerstner's Capital Magazine

Introduction

This layout is designed using a recreation of Karl Gerstner's compound grid that was designed for Capital Magazine in the 1960's. It's a compound – meaning combined – grid of 6 column and 4 columns. This allows for very flexible layout combinations, including the unusual 5 column, asymmetric column configuration which is the basis for this layout.

This layout is designed using a recreation of Karl Gerstner's compound grid that was designed for Capital Magazine in the 1960's. It's a compound – meaning combined – grid of 6 column and 4 columns. This allows for very flexible layout combinations, including the

“It’s impossible to perceive content and presentation separately. The two combine to create something more valuable: meaning.”

CONTENT
OUT

What bugs me about “content out” · Cennydd BOWLES · 20 November 2011

“Creating layouts on the web has to be different because *there are no edges*. There are no ‘pages’. We’ve made them up.”

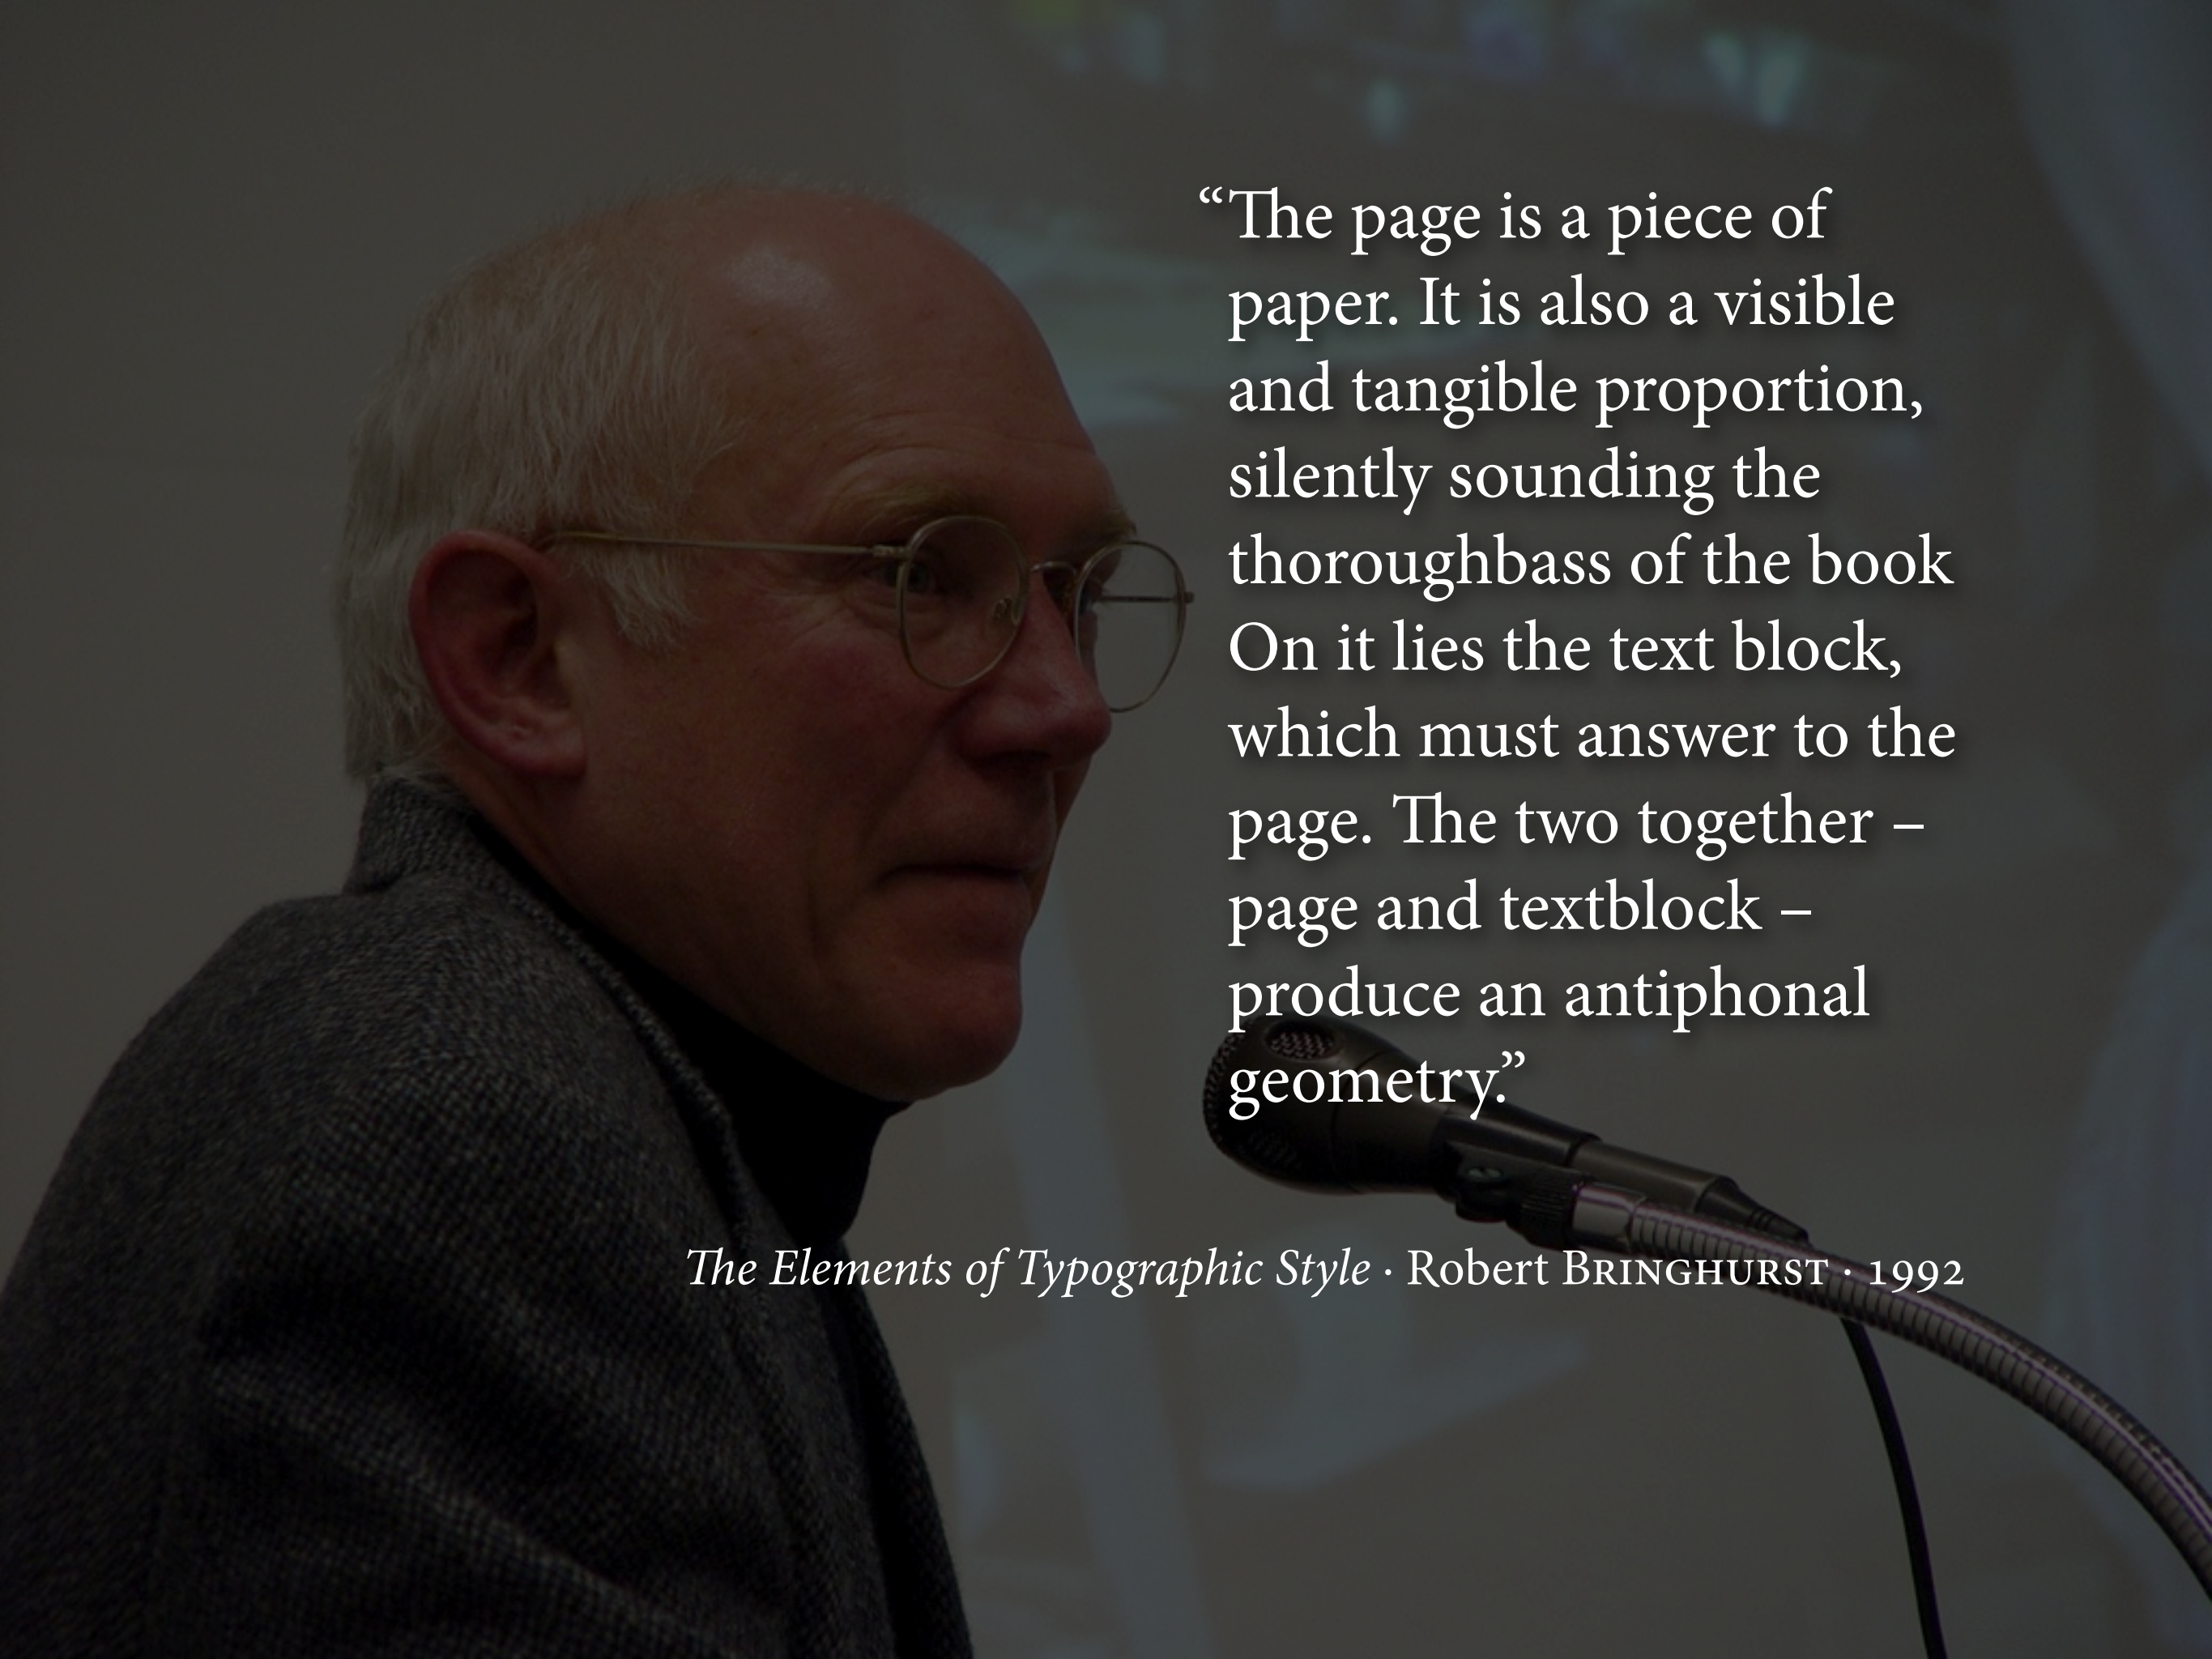

A Richer Canvas · Mark BOULTON · 24 March 2011

NEVER MIND THE QUALITY 

feel the

wideth!

“The page is a piece of paper. It is also a visible and tangible proportion, silently sounding the thoroughbass of the book. On it lies the text block, which must answer to the page. The two together – page and textblock – produce an antiphonal geometry.”

The Elements of Typographic Style · Robert BRINGHURST · 1992

“Frames are part of the fundamental architecture of graphic design. Indeed, framing is one of the most persistent, unavoidable and infinitely variable acts performed by the graphic designer.”

Graphic Design: The New Basics · Ellen LUPTON & Jennifer COLE PHILLIPS · 2008

Leonardo DA VINCI • 1490

“The frame is a form
which has as its
traditional determination
not that it stands out but
that it disappears, buries
itself, effaces itself, melts
away at the moment it
deploys its greatest
energy.”

La vérité en peinture · Jacques DERRIDA · 1978

THE GOLDEN RATIO φ

is for the

weak

„Also sprach Zarathustra!“

Tondichtung (frei nach Friedr. Nietzsche)
für grosses Orchester.

reit. Metr. ♩ = 69.

Richard Strauss, Op. 30.

This page of the score contains the beginning of the piece. It features multiple staves with complex rhythmic patterns and dynamic markings such as *f*, *p*, and *cresc.*. A specific instruction *(feierlich)* is written above a section of the music. The notation includes various note values, rests, and articulation marks.

This page continues the orchestral texture. It shows dense harmonic arrangements with frequent use of *cresc.* and *f* markings. The notation is dense and detailed, with many beamed notes and complex rhythmic figures. The page concludes with a *poco cresc.* marking.

This page shows further development of the musical themes. It includes a *dim.* (diminuendo) marking and a *Werk.* (work) instruction. The notation is highly detailed, with many notes and rests across multiple staves.

This section at the bottom of the first page contains a specific musical phrase. It includes the instruction *(geteilt)* and features a melodic line with dynamic markings like *f* and *p*.

This section at the bottom of the second page includes the instruction *(nicht geteilt)* and *immer breiter.* (becoming broader). It features a melodic line with *cresc.* markings and dynamic changes.

This section at the bottom of the third page shows a dense texture of notes, likely for a woodwind or string section, with various dynamic markings and articulation.

The Web Aesthetic

by [PAUL ROBERT LLOYD](#) · September 25, 2012

Published in [State of the Web](#), [Layout & Grids](#), [Mobile/Multidevice](#) · [16 Comments](#)

“It is the nature of the web to be flexible, and it should be our role as designers and developers to embrace this flexibility, and produce pages which, by being flexible, are accessible to all.”

THANK YOU
