

# When is the perfect time for Test Tube Baby Treatment

**THE PERFECT TIME FOR**  
**TEST TUBE BABY**  
**TREATMENT**

Test Tube Baby Treatment is the second name to an [IVF Treatment](#). The babies born with the IVF Treatment are usually called Test Tube Babies. Since every couple dreams of becoming a parent, but eventually, they are unable to become a parent.

Although the solution of this problem is possible through IVF, doctors still recommend them to adopt Test Tube Baby Treatment.

- Not being able to conceive even after having unprotected sexual intercourse for one year of marriage.
- No irregular menstruation of a woman.
- Formation less than normal amount of male sperm (15-20 per ml), which are not able to conceive a woman.
- Older age of man and woman.
- Neoplasia in a woman's uterus.
