

# What's new in Responsive Design

RACHEL ANDREW AT WEY WEY WEB. DECEMBER 2022

How do we support all these  
different screen sizes?

“

**The control which designers know in the print medium, and often desire in the web medium, is simply a function of the limitation of the printed page. We should embrace the fact that the web doesn't have the same constraints, and design for this flexibility. But first, we must 'accept the ebb and flow of things.'**

Flexbox responds to  
the content

```
display: flex
```

I am item one

I am item two

I am item three

`display: flex`

I am item  
one

I am item  
two

I am item three and I have a lot more content than the other two  
items.

What does it mean to respond  
to content?

`flex-basis: auto`

I am item one

I am item two

I am item three

`max-content`

`flex-basis: auto`

I am item  
one

I am item  
two

I am item three and I have a lot more content than the other two  
items.

Space reduced from max-content until all boxes fit

We don't have to line  
everything up.

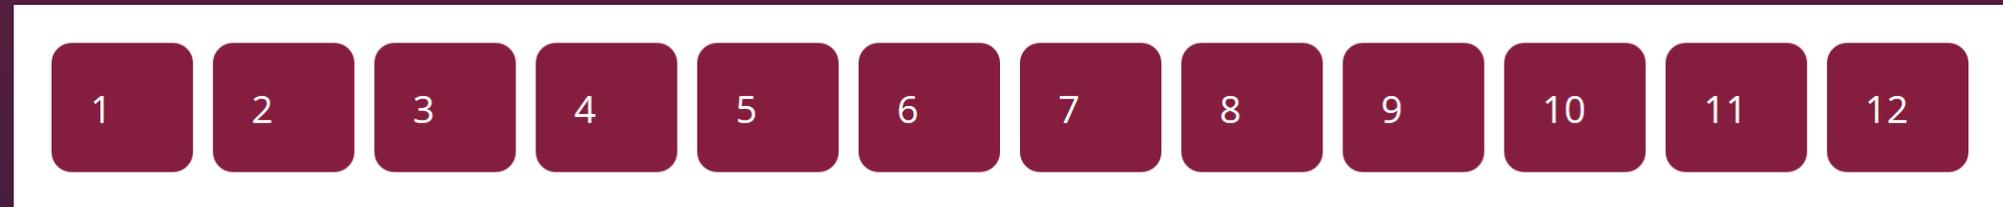

Sometimes what we need is just to make things fit nicely.

# CSS Grid

For when you do want to line everything up.

```
.grid {  
  display: grid;  
  grid-template-columns: repeat(12, 1fr);  
}
```

```
repeat(12, 1fr)
```

```
.grid {  
  display: grid;  
  grid-template-columns:  
    repeat(12, minmax(auto, 1fr));  
}
```

```
repeat(12, 1fr)

Can I hover?

What does it mean to do  
responsive design today?

Respond to content

Use new layout and image  
features

Use media features and  
container queries to enhance  
your layout.

It's not just about screen, or  
even component, size

Responding to needs and  
environment

Don't expect people to fix something to use your website. Respond to meet them where they are.

Thank you!
