

Using Design Tokens to up your Accessibility Game

Karen Hawkins November 9, 2023

Meet Karen Hawkins

Karen Hawkins, CPACC Principal of Accessible Design, Level Access **Connect with me** Email LinkedIn

Get today's slides Deck on notist https://noti.st/khawk27

Today's Goals

1. Learn what types of design token decisions affect the accessibility of UI (User Interface) elements.

2. Learn how to use design tokens to improve the accessibility of UI elements.

3. Understand the importance of using design tokens to ensure a consistent experience across a wide set of UI elements.

SECTION 1

Little Ditty about Design and Designs Systems

"

A design system is a complete set of standards intended to manage design at scale using reusable components and patterns.

"

A design system is a complete set of standards intended to manage design at scale using reusable components and patterns.

"

Nielsen Norman Group

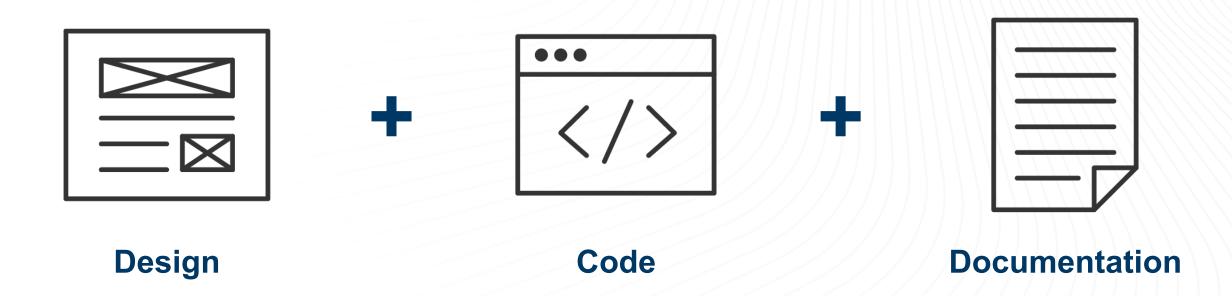

Consistency Efficiency Scale

Design System Composition

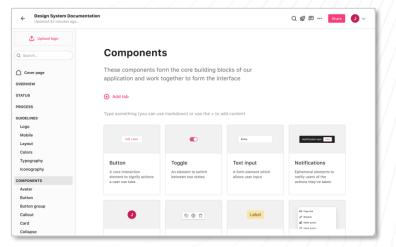

A design system is comprised of reusable design elements, reusable coded

elements, and their documentation.

Atomic design is a methodology for creating design systems. It is a framework to break interfaces down into fundamental reusable building blocks and build them back up in potentially infinite variations.

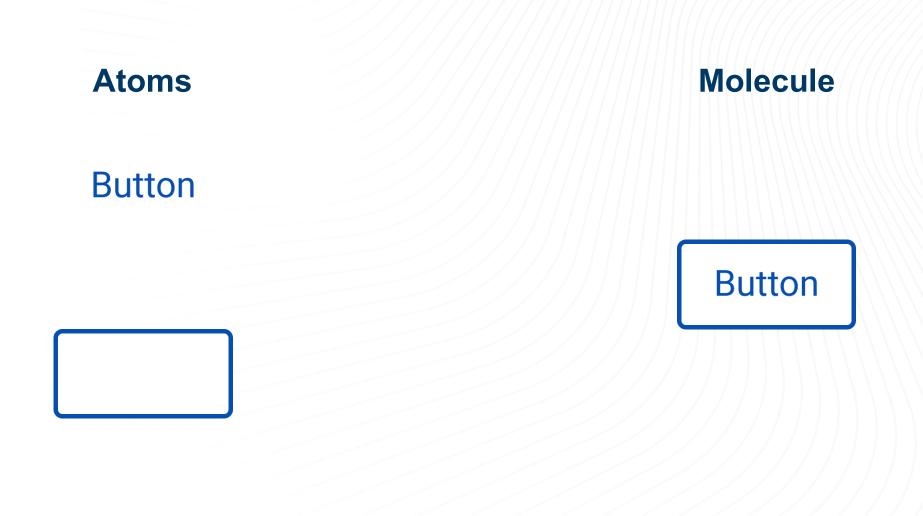

Atomic Design Example

Atoms	Molecules	Organism
Postal Code		First Name
	Postal Code	Last Name
		City
\bigcirc	Dropdown Label	Select an option
Select an option	Select an option	Phone Number
Radio Buttons Group Label		How would you like to be contacted?
~	First choice	Email

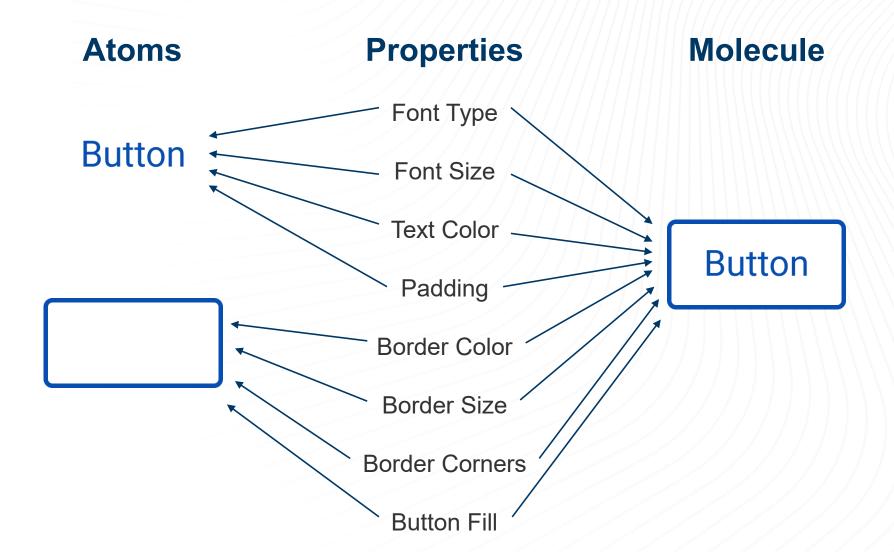

Atomic Breakdown of a Button

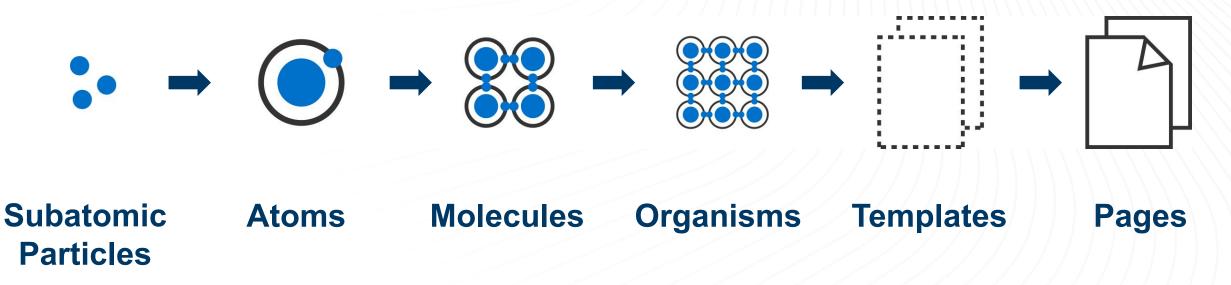

Atomic Breakdown of a Button: Further Analysis

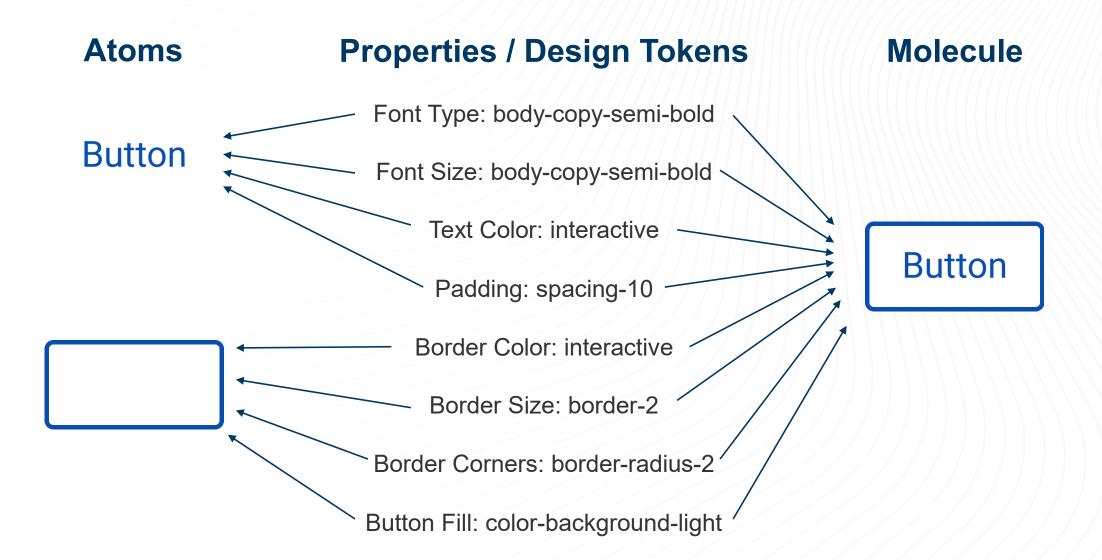

Design tokens are small, repeatable design decisions, that store a design system's visual attributes. They ensure the same style values are used across design files and code.

Subatomic Breakdown of a Button

Design Systems Tend to be Incomplete

Style Guides Map to Atoms and Subatomic Particles

Focus on design tokens

The following colours were identified in our in our contrast audit (#FFFFF) and black (#000000) for large text, graphical objects

Components Map to Molecules

Focus on foundational aspects:

- States
- Variations
- Keyboard interactions
- Screen reader experiences
- Etc.

This link is an <u>inline link</u> in	////

Instructions	0/###

Patterns Map to Organisms

Focus on higher order thinking:

- Reading order
- Landmarks
- Skip links
- Interdependencies between
 multiple components
- Etc.

Border Radius

Token name	Pixel value	REM value	Image
\$ds-border-radius-0	0 px	0 REM	
\$ds-border-radius-1	2 px	0.125 REM	
\$ds-border-radius-2	4 px	0.25 REM	

Shadow

Shadow

Token name	Color	Х	Y	Blur	Spread	Image
\$ds-shadow-01	\$ds-color-border 50%	0	2	4	0	
\$ds-shadow-02	\$ds-color-border 50%	1	1	4	0	
\$ds-shadow-03	\$ds-color-border 50%	-2	0	4	0	
\$ds-shadow-04	\$ds-color-border 50%	0	-2	4	0	

Grid Accessibility

1.4.10: Reflow

- 400% zoom: 1280 / 4 = 320
- Mobile designs are on a 320px
 viewport for vertically scrolling content
 - Or 1024 / 4 = 256 for horizontally scrolling content
- Benefits:
 - Ensures a design for 1 column of content
 - Enforces designing responsively / for mobile (1.3.4 Orientation)

	12	80		
320	320	320	320	
	Grid size	Token name	Min width	Max width
	Small	\$ds-grid-small	320	575
	Medium	\$ds-grid-medium	576	991
	Large	\$ds-grid-large	992	1440

Typography Accessibility

Best Practices

- Font type: Selected for perceived readability
- Min font size: 12pt / 16px / 1 REM
- Body copy font weight: Regular / 400
- Body copy line height: 1.5X font size
- Heading font weight: Semi-bold / 600

1.4.4 Resize Text

- 200% font size: 24pt / 32px / 2 REM
- 200% line height: 3X font size

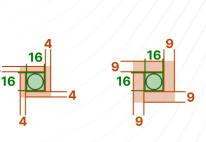

Characteristics	Breakpoint	Visual
ds-body-copy	Desktop, tablet, and mobile	Lorem ipsum dolor sit amet, consectetur adipiscing elit. Quam amet morbi magna ornare nunc netus dictum sit.
Font: Roboto Weight: regular (400) Size: 16 px (1 REM) Line height: 24 px (1.5 REM)		magna omare nunc netus dictum sit.
ds-body-copy-200% Font: Roboto Weight: regular (400) Size: 32 px (2 REM) Line height: 48 px (3 REM)	Desktop, tablet, and mobile	Lorem ipsum dolor sit amet, consectetur adipiscing elit. Quam amet morbi magna ornare nunc netus dictum sit.
ds-heading-500 Font: Roboto	Desktop, tablet, and mobile	Lorem ipsum dolor sit amet, consectetur adipiscing elit. Quam amet morbi magna ornare nunc netus dictum sit.

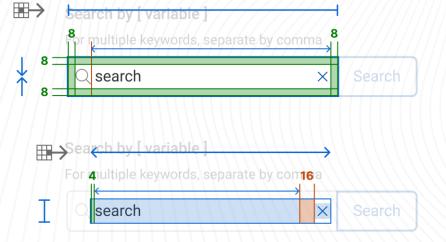

Spacing Accessibility

2.5.8 Target Size (Minimum)

 Minimum target size for icons: 24px X 24px

Best Practices

- Aiming for 44px X 44px (2.5.5 Target Size)
- Considerations for contextual spacing requirements for improved operability and readability
- This is a footer link
 This footer link leads offsite 12
 This link has focus and leads offsite 12
 This footer link leads offsite 12

24	This is a footer link
24	This footer link leads offsite 🖸
17	This link has focus and leads offsite \square
	This footer link leads offsite
	This is a footer link

Colour Accessibility (1 / 2)

Best Practices

- Documented colour pairs that meet minimum standards with guidelines for usage
- No placeholder text (1.4.3 Minimum Contrast, 3.3.2. Labels or Instructions)
- No images of text (1.4.3 Minimum Contrast)

#074EB0	#0098C7

Graphical Objects and User Interface Components

Colour Accessibility (2 / 2)

1.4.1 Use of Colour

- Not using colour alone to indicate meaning, information, etc.
 - Particular attention to state design and chart design
- Inline links underlined by default
- Using at least 1 dimension to convey meaning, with or without the addition of colour

1.3.3 Sensory Characteristics

 Not using colour alone to indicate meaning, information, etc. in instructions

Contrast

- Aiming for greater than 7:1 contrast for text (1.4.6 Contrast Enhanced)
- Aiming for greater than 4.5:1 contrast for graphical objects and user interface components (1.4.11 Non-Text Contrast)
- Aiming for greater than 3:1 contrast for inactive elements (1.4.3 Minimum Contrast)

Sidebar: Dual Modality Design

Colour

Read means stop.

Yellow means slow down.

Green means go.

Position

Top means stop.

Middle means slow down.

Bottom means go.

Focus Indicator Accessibility

Best Practices

- Focus indicator is always situated outside an element
- Focus indicator is made of 3 rings which meets contrast requirements between the rings (white, medium pink, white)
 - Each ring is 2px thick (2.4.13 Focus Appearance)
- Contrast is guaranteed with any adjacent colour in our design system

Anatomy		Usage

Apply Design Decisions to Other Elements

Why is consistency so important?

NN/g Consistency is Key to Usability

Usability Quality Attributes

- Learnability
- Memorability
- Efficiency
- Error Tolerance
- Satisfaction

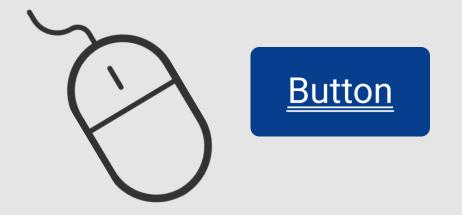

Consistency Experiences Are

- Easy to learn
- Easy to remember
- Efficient
- Error tolerant
- Pleasant to use
