Shifting to Where?

Exploring paths to a cloudless world

Laura Santamaria

Developer Advocate

logdna

So you need a bit of cloud…
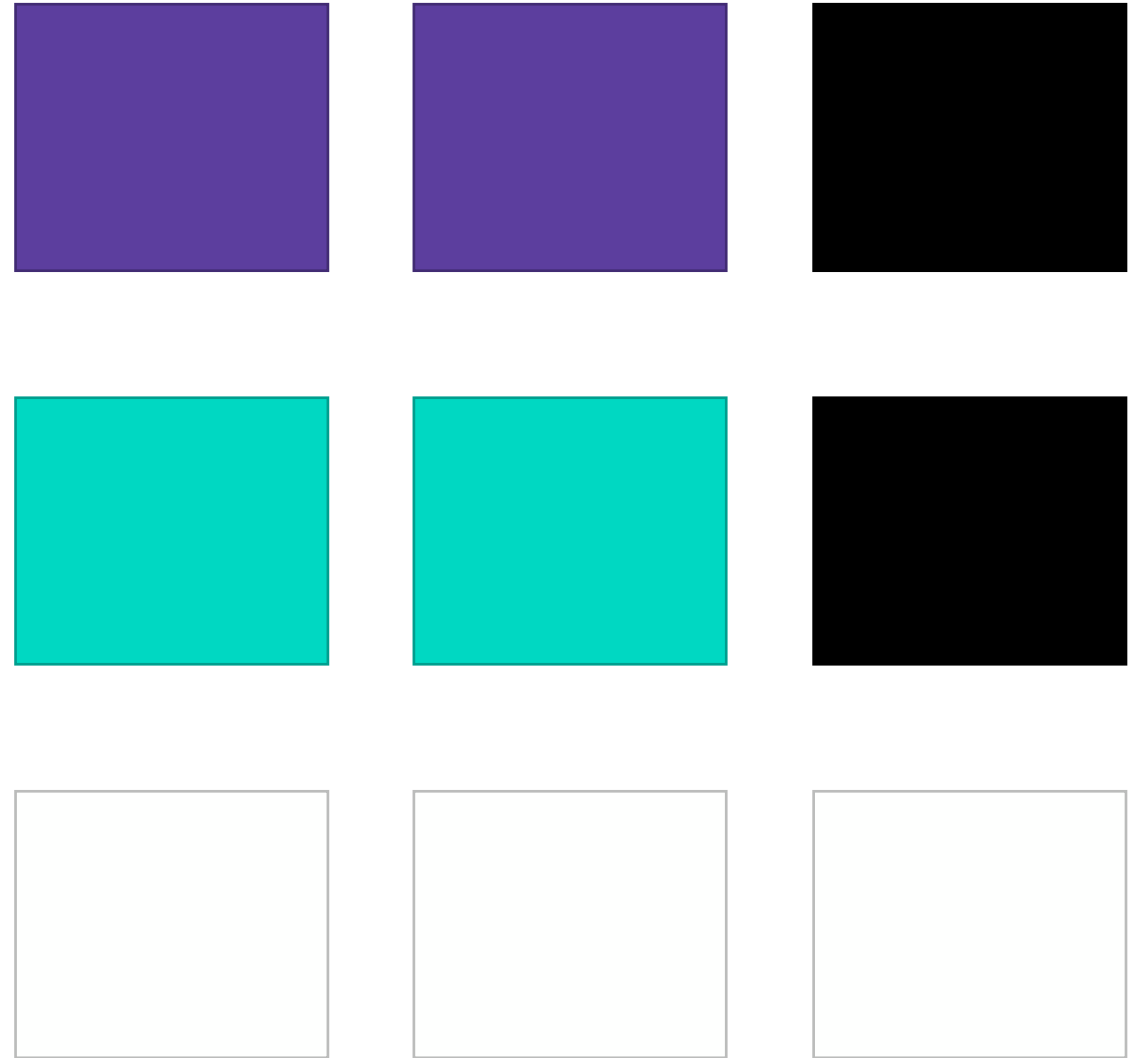

What are all these terms, anyway?

Monolithic

Microservices

Containerized

Serverless

It's all about understanding the flow of data

Where do you start?

Photo by Lÿv Jaan on Unsplash

Clean up your architecture

Define your application type

Use gathered data

Photo by Łukasz Łada on Unsplash

Make a map

Identify internal comms pathways

Define black box units

Adjust map

Prune
branches

Is the move worth it?

This isn't a global panacea

Know your team

Good luck!

(Thanks)
