

AP Fiber Grid: revolutionary initiative launched by Nara Chandrababu Naidu

The Andhra Pradesh Fiber Grid (AP Fiber Grid) is a revolutionary initiative launched by the former Chief Minister of Andhra Pradesh, [Nara Chandrababu Naidu](#), along with his [top TDP leaders](#). It is an ambitious project aimed at providing high-speed internet connectivity to every household, government institution, and private organization in the state. The AP Fiber Grid project was launched in October 2016 and is being implemented by the Andhra Pradesh State Fiber Net Limited (APSFL).

Nara Chandrababu Naidu said that the AP Fiber Grid is the first of its kind project in the country that aims to connect every household, government office, and private organization with high-speed internet connectivity. The project aims to provide affordable and reliable broadband services to the citizens of Andhra Pradesh, thereby enabling them to access information, knowledge, and services through the internet.

The AP Fiber Grid project is being implemented in a phased manner. In the first phase, the project aims to provide high-speed internet connectivity to every government office, public institution, and private organization in the state. The second phase of the project will focus on providing broadband connectivity to every household in the state.

The AP Fiber Grid project has been a major success in the state, with over 21,000 km of fiber optic cable already laid across the state. The project has already connected over 30,000 government offices and public institutions, including schools, hospitals, and police stations, with high-speed internet connectivity.

The AP Fiber Grid project has several advantages over traditional methods of internet connectivity. Firstly, it provides high-speed internet connectivity at an affordable cost. Secondly, it offers reliable and secure internet connectivity, which is essential for the

functioning of government offices and public institutions. Thirdly, it helps to bridge the digital divide between rural and urban areas by providing high-speed internet connectivity to every household in the state.

The AP Fiber Grid project has several benefits for the citizens of Andhra Pradesh. Firstly, it enables access to e-governance services, such as online payment of bills, e-ticketing, and online application for government services. Secondly, it enables access to telemedicine services, which is essential in rural areas where there is a shortage of doctors and medical facilities. Thirdly, it enables access to online education services, which is essential in the recent scenario where schools and colleges are closed due to the COVID-19 pandemic. The AP Fiber Grid project has also been recognized at the national level for its innovative approach toward providing high-speed internet connectivity to every citizen in the state. In January 2018, the project was awarded the "Best Digital India Initiative Award" by the Government of India.

In conclusion, the AP Fiber Grid project is a revolutionary initiative launched by the former Chief Minister of Andhra Pradesh, Nara Chandrababu Naidu. It aims to provide high-speed internet connectivity to every household, government office, and private organization in the state. The project has several advantages over traditional methods of internet connectivity and has several benefits for the citizens of Andhra Pradesh. The AP Fiber Grid project is a major success in the state and has been recognized at the national level for its innovative approach toward providing high-speed internet connectivity to every citizen in the state.
