Fun work environment

Caroline Wester
IBM, DevOps Technology Leader

Donna Fortune
IBM, Sr. Analytics Developer, DevOps Transformation

How helpful is this practice:

★ ★ ★ ★ ★

When employees have fun in the workplace, they enjoy their work and produce better results. Managers in DevOps environments strive to create an atmosphere that is challenging, creative, and fun for employees and for themselves.

The benefits of a fun work environment

Imagine a world where people love their work environment and are calm, stress-free, and happy all day. Does that sound impossible?

Is this a fun talk?

Is this a fun talk?

No. It's a talk about fun.

Is this a fun talk?

No. It's a talk about fun.

That's **different**.

Is this a fun talk?

No. It's a talk about fun.

That's **different**.

Obviously.

20 step plan to achieve FUN.

1. Quantify and Qualify your **FUN** metrics
2. Create a Chief **FUN** Officer (CFO) role
3. Gamify your daily tasks to make them more **FUN**
4. Enthusiastically high five everyone each morning for **FUN**
5. Install a **FUN** ball pit
6. Inject a **FUN** word of the day into conversations
7. Wear **FUN** clothing, something with flair
8. Create **FUN** certificates with gold star systems - relive the fun of kindergarten!
9. Nominate **FUN** assessors for each team
10. Laugh Out Loud (LOL) once a day in the office, others will enjoy your **FUN**

Let's talk about your career.

“Dear Boss, you need to send me to J-Spring so I can go to the session on....

*“Dear Boss, you need to send me to J-Spring so I can go to the session on.... **FUN.**”*

Graduate Program in Industrial, Interior, and Visual Communications Design

The Ohio State University
2010

Aside: When is fun not- fun?

Abstract

Fun is one of the most ubiquitous human experiences. It would be hard to find someone who would say they had never had fun. It would be equally hard to find someone who didn't want to have fun. Why then is it so hard to articulate what makes an experience fun? For the designer, this creates a complex problem. When designers are charged with creating fun experiences, how does one know where to begin? What is fun and why is it important? How do we go about creating a fun experience? We are in need of a "fun" model appropriate for design practice. The goal of this thesis is to provide just that.

Through my research, I will provide designers with a relevant definition of fun. The basis for this definition will be the "funtinuum," a qualitative scale of the dimensions of fun. Second, a rationale for the importance of "fun," its tangible benefits to end users and appropriate contexts for fun in design will be discussed. Lastly, I will present guiding principles for producing fun experiences through interaction design. Case studies of current "fun" products and applications will be explored in the context of these guidelines to provide further explanation on how to create fun experiences.

Aside: When is fun not- fun?

When it's your job.

Does Happiness Promote Career Success?

Julia K. Boehm
Sonja Lyubomirsky
University of California, Riverside

Past research has demonstrated a relationship between happiness and workplace success. For example, compared with their less happy peers, happy people earn more money, display superior performance, and perform more helpful acts. Researchers have often assumed that an employee is happy and satisfied because he or she is successful. In this article, the authors review evidence in support of an alternative hypothesis—namely, that happiness is a source of why particular employees are more successful than others. To this end, the authors consider evidence from three types of studies—cross-sectional, longitudinal, and experimental—that relate happiness to various work outcomes. Taken together, the evidence suggests that happiness is not only correlated with workplace success but that happiness often precedes measures of success and that induction of positive affect leads to improved workplace outcomes.

Keywords: happiness; subjective well-being; positive emotion; work; career; success

A wealth of research suggests that happy and satisfied individuals are relatively more successful in the workplace. For example, happiness is related to income (Diener & Biswas-Diener, 2002), favorable evaluations by a superior (Cropanzano & Wright, 1999), helping fellow workers (George, 1991), and social support from col-

Does Workplace Fun Buffer the Impact of Emotional Exhaustion on Job Dissatisfaction?: A Study of Health Care Workers

Katherine A. Karl
Marshall University

Joy V. Peluchette
University of Southern Indiana

ABSTRACT

This study examined health care workers' (N= 142) attitudes toward workplace fun and the level of fun they experienced at work as well as their emotional labor, emotional exhaustion and job satisfaction. Our results showed that the negative impact of emotional exhaustion on job satisfaction was significantly lower for health care workers' who experienced greater levels of fun at work. In general, the health care workers in this sample expressed positive attitudes toward workplace fun. These results, their implications, and directions for future research are discussed.

Introduction

Should the workplace be fun? A growing number of business writers and consultants would agree, arguing that fun is essential for enhancing employee motivation and productivity, reducing stress, and increasing customer satisfaction (Lundin, Paul, & Christensen, 2002; McGhee, 2000; Paulson, 2001; Ramsey, 2001, Weiss, 2002). In support, recent analyses of *Fortune's* "100 Best Companies to Work For" show that a 'fun work environment' is one of the factors distinguishing superior performers from others (Chan, Gee & Steiner, 2000; Joyce, 2003). But, can this same philosophy be extended to health care... a workplace that typically deals with the more serious and/or tragic aspects of life? It appears so.

Research shows:
Fun is good for
business.

Does Work

This study examined the level of fun, exhaustion and emotional exhaustion who experienced this sample and its implications, and

Should the workplace would agree, and productivity, research Christensen, 2005 support, recent 'fun work environment' others (Chan, 2005) extended to help tragic aspects

Effects of Workplace Fun on Employee Behaviors: Focused on Generation Y in the Hospitality Industry

Young Gin Choi
Hospitality Management and Dietetics
Kansas State University, USA

Junehee Kwon
Hospitality Management and Dietetics
Kansas State University, USA

and

Wansoo Kim
Tourism Management
Dong-A University, Korea

ABSTRACT

The conceptual model of this study was tested based on responses from 234 hospitality students in the US who are Generation Yers and had worked in the hospitality industry for more than 3 months. This study revealed that Generation Y employees' attitude toward workplace fun positively affects their experienced workplace fun. In turn, Generation Yers' experienced workplace fun showed direct effects on their job satisfaction, task performance, and interpersonal citizenship behaviors. Affected by experienced workplace fun, job satisfaction significantly enhanced employees' task performance and interpersonal job satisfaction. In essence, for Generation Y employees in hospitality businesses, workplace fun is a significant factor in their job satisfaction, task performance, and interpersonal citizenship behavior. These findings provide a significant insight to hospitality employers who typically have a hard time to attract best young talents and motivate them mainly due to low-paying, low-status nature of hospitality jobs.

Keywords: workplace fun, Generation Y, hospitality business, job satisfaction, task performance, interpersonal citizenship behavior.

INTRODUCTION

A growing number of business writers and consultants maintain that fun at work is essential for enhancing employee motivation and productivity, reducing stress (Karl, Peluchette, Hall, & Harland, 2005). According to Glasser (1994), having fun is the highest level of need of workers and often unmet at work while the lower levels of needs are mostly met at work. Bolton and Houlihan (2009) even articulated that fun at work seems become an established and accepted contributor to advisable people management and thus the bottom line. Indeed, previous academic studies have linked workplace fun with job satisfaction (Karl & Peluchette, 2006) and with task performance and organizational citizenship behavior (Fluegge, 2008).

Personality

ABSTRACT

In two online studies (total $N = 1215$), respondents completed personality inventories and a survey of their Internet commenting styles. Overall, strong positive associations emerged among online commenting frequency, trolling enjoyment, and troll identity, pointing to a common construct underlying the measures. Both studies revealed similar patterns of relations between trolling and the Dark Tetrad of personality: trolling correlated positively with sadism, psychopathy, and Machiavellianism, using both enjoyment ratings and identity scores. Of all personality measures, sadism showed the most robust associations with trolling and, importantly, the relationship was specific to trolling behavior. Enjoyment of other online activities, such as chatting and debating, was unrelated to sadism. Thus cyber-trolling appears to be an Internet manifestation of everyday sadism.

© 2014 Elsevier Ltd. All rights reserved.

1. Introduction

Online *trolling* is the practice of behaving in a deceptive, destructive, or disruptive manner in a social setting on the Internet

disruptive aspects may distinguish trolling from other forms of on-line antisociality, such as cyber-bullying, where perpetrator identities are usually clear (Lenhardt, 2013) and the intent is more straightforward.

Just because it's fun,
doesn't mean it's **good**.

Get **rid** of the stuff that stops
us doing what we enjoy.

Get **rid** of the stuff that stops
us doing what we enjoy.

“We’re short staffed. You’re going to
need to cancel all my meetings for a
month so I can do programming.”

Get **rid** of the stuff that stops
us doing what we enjoy.

This worked!

“We’re short staffed. You’re going to need to cancel all my meetings for a month so I can do programming.”

Interactions are fun. Interruptions are not.

Srikanth K M 11:37 AM ☆

@here Is the REST API for cf ic cpi exposed to users? I do not see it here : <http://ccsapi-doc.mybluemix.net/#/>

Reggie Robot BOT 11:37 AM

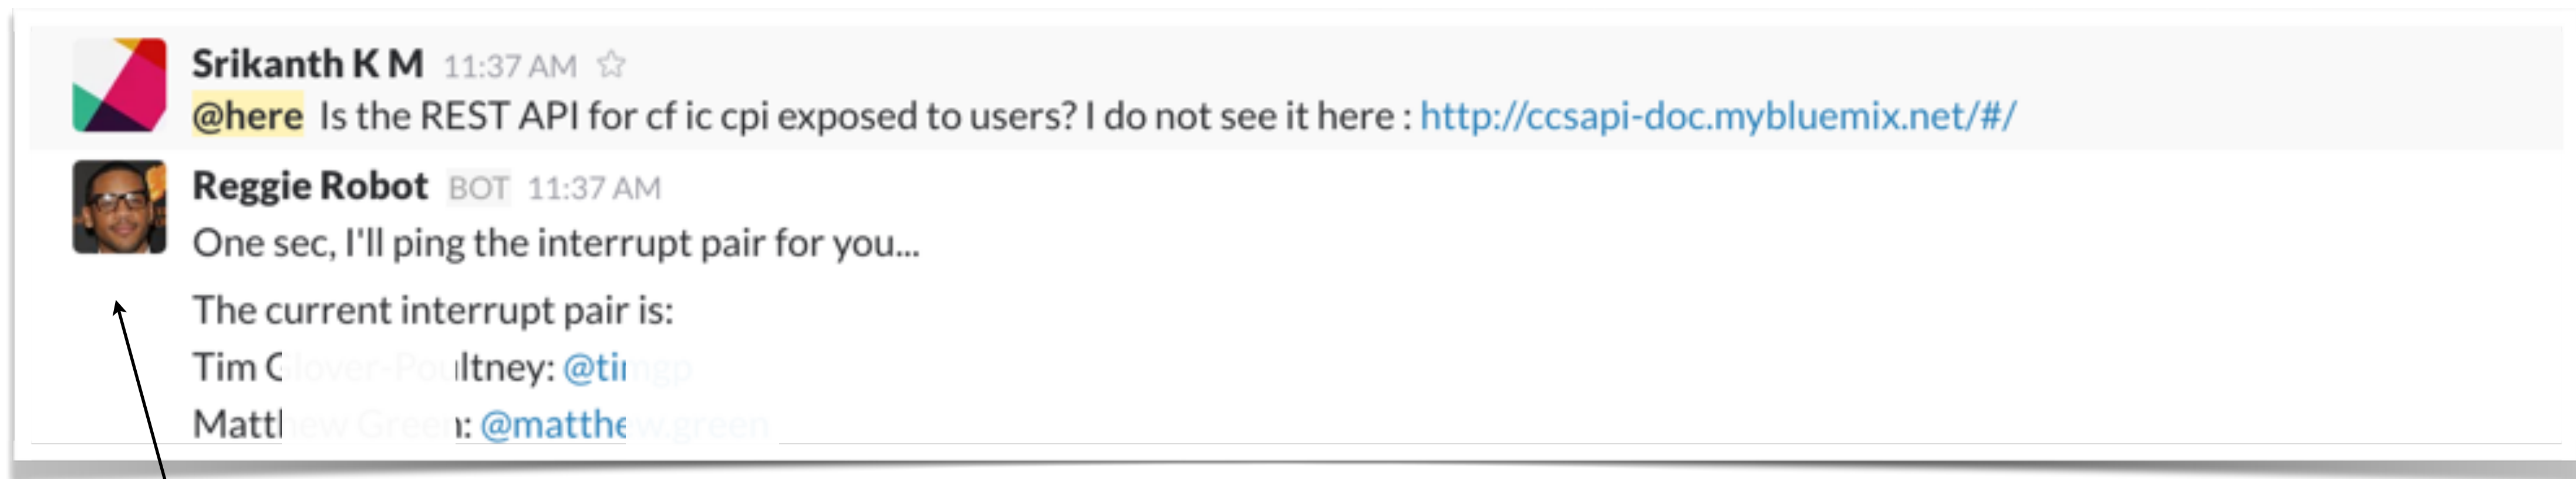

One sec, I'll ping the interrupt pair for you...

The current interrupt pair is:

Tim Clover-Poultney: [@tingp](#)

Matt New Green: [@matthew.green](#)

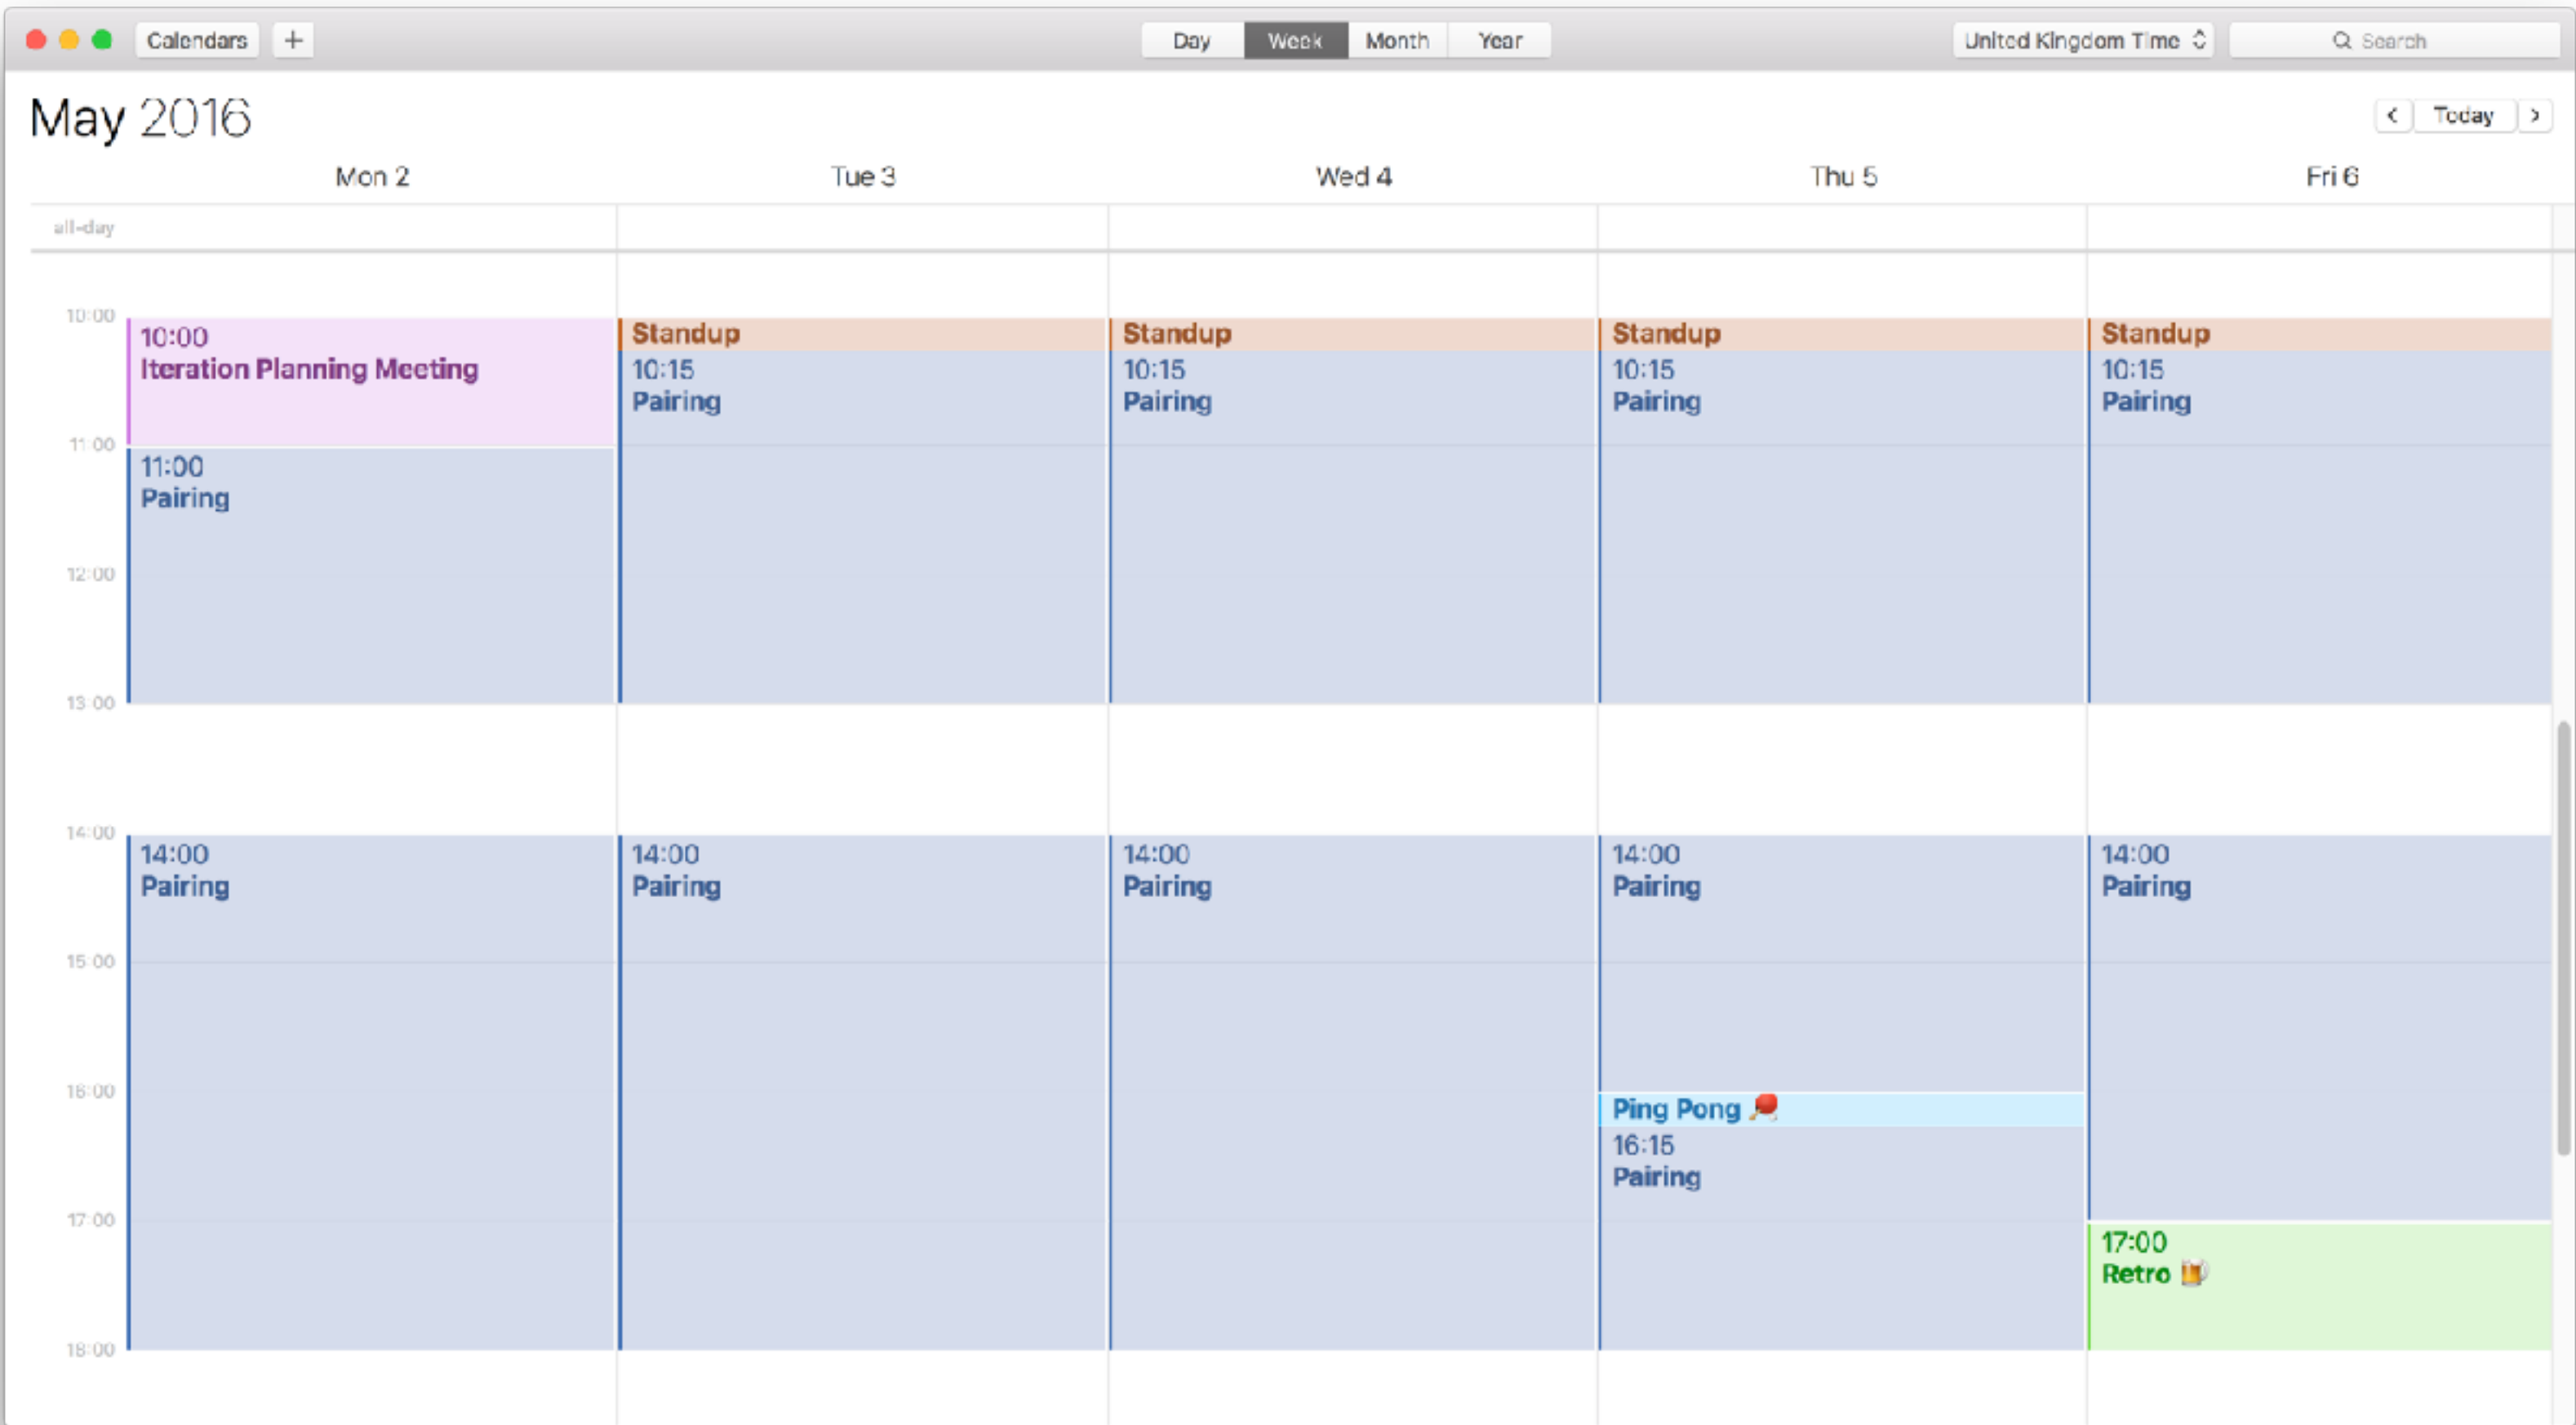

Interactions are fun. Interruptions are not.

Martijn promises me this is a hilarious in-joke if you're British.
Apparently.

Protect your coding time
from meetings.

*“I’m sorry, since I’m pair-
programming, I can’t make
that meeting.”*

Pair programming

Jessica Kerr @jessitron

25/08/2016

I hate doing code review. I love pairing.
I don't want to exert judgement on your code, I want to collaborate on code.

Prototyping versus hardening

Can adding logging ever be fun?

Prototyping versus hardening

Can adding logging ever be fun?

Making a difference is fun.

Prototyping versus hardening

Can adding logging ever be fun?

Making a difference is fun.

Having a prototype become real is fun.

Prototyping versus hardening

Can adding logging ever be fun?

Making a difference is fun.

Having a prototype become real is fun.

Add the logging when you know it actually matters.

*"We don't want to be the
prototyping department."*

-- Head of Innovation, A-Client

**Testing should not be part
of the hardening phase.**

TDD is fun.

TDD

- ✓ returns the absolute ROM angle

calculateAvgRomForSet

- for a set with one rep
 - 1) returns the appropriate angle for the rep
- for a set with two reps
 - ✓ returns the appropriate value for two reps

102 passing (437ms)
1 failing

1) Post result and utility function test calculateAvgRomForSet for a set with one rep returns the appropriate angle for the rep:

AssertionError: expected 160 to equal 120
+ expected - actual

-160
+120

at Context.<anonymous> (test/server/transformSession_spec.js:250:47)

TDD

when the rep start, middle and end exceed goals

✓ returns true

when the rep end is less than the start goal

✓ returns false

when the rep start is less than the start goal

✓ returns false

when the rep intermediate is more than the end goal

✓ returns false

calculateROM

when start and end angles are the same

✓ returns the correct ROM

when the start and end angles differ

✓ returns the ROM for the largest angle

when the middle angle is greater than start/end

✓ returns the absolute ROM angle

calculateAvgRomForSet

for a set with one rep

✓ returns the appropriate angle for the rep

for a set with two reps

✓ returns the appropriate value for two reps

103 passing (423ms)

Automation

Computers don't expect to have fun (yet).

Let **them** do the tedious tasks.

Bonus: Automating stuff is fun (yay!).

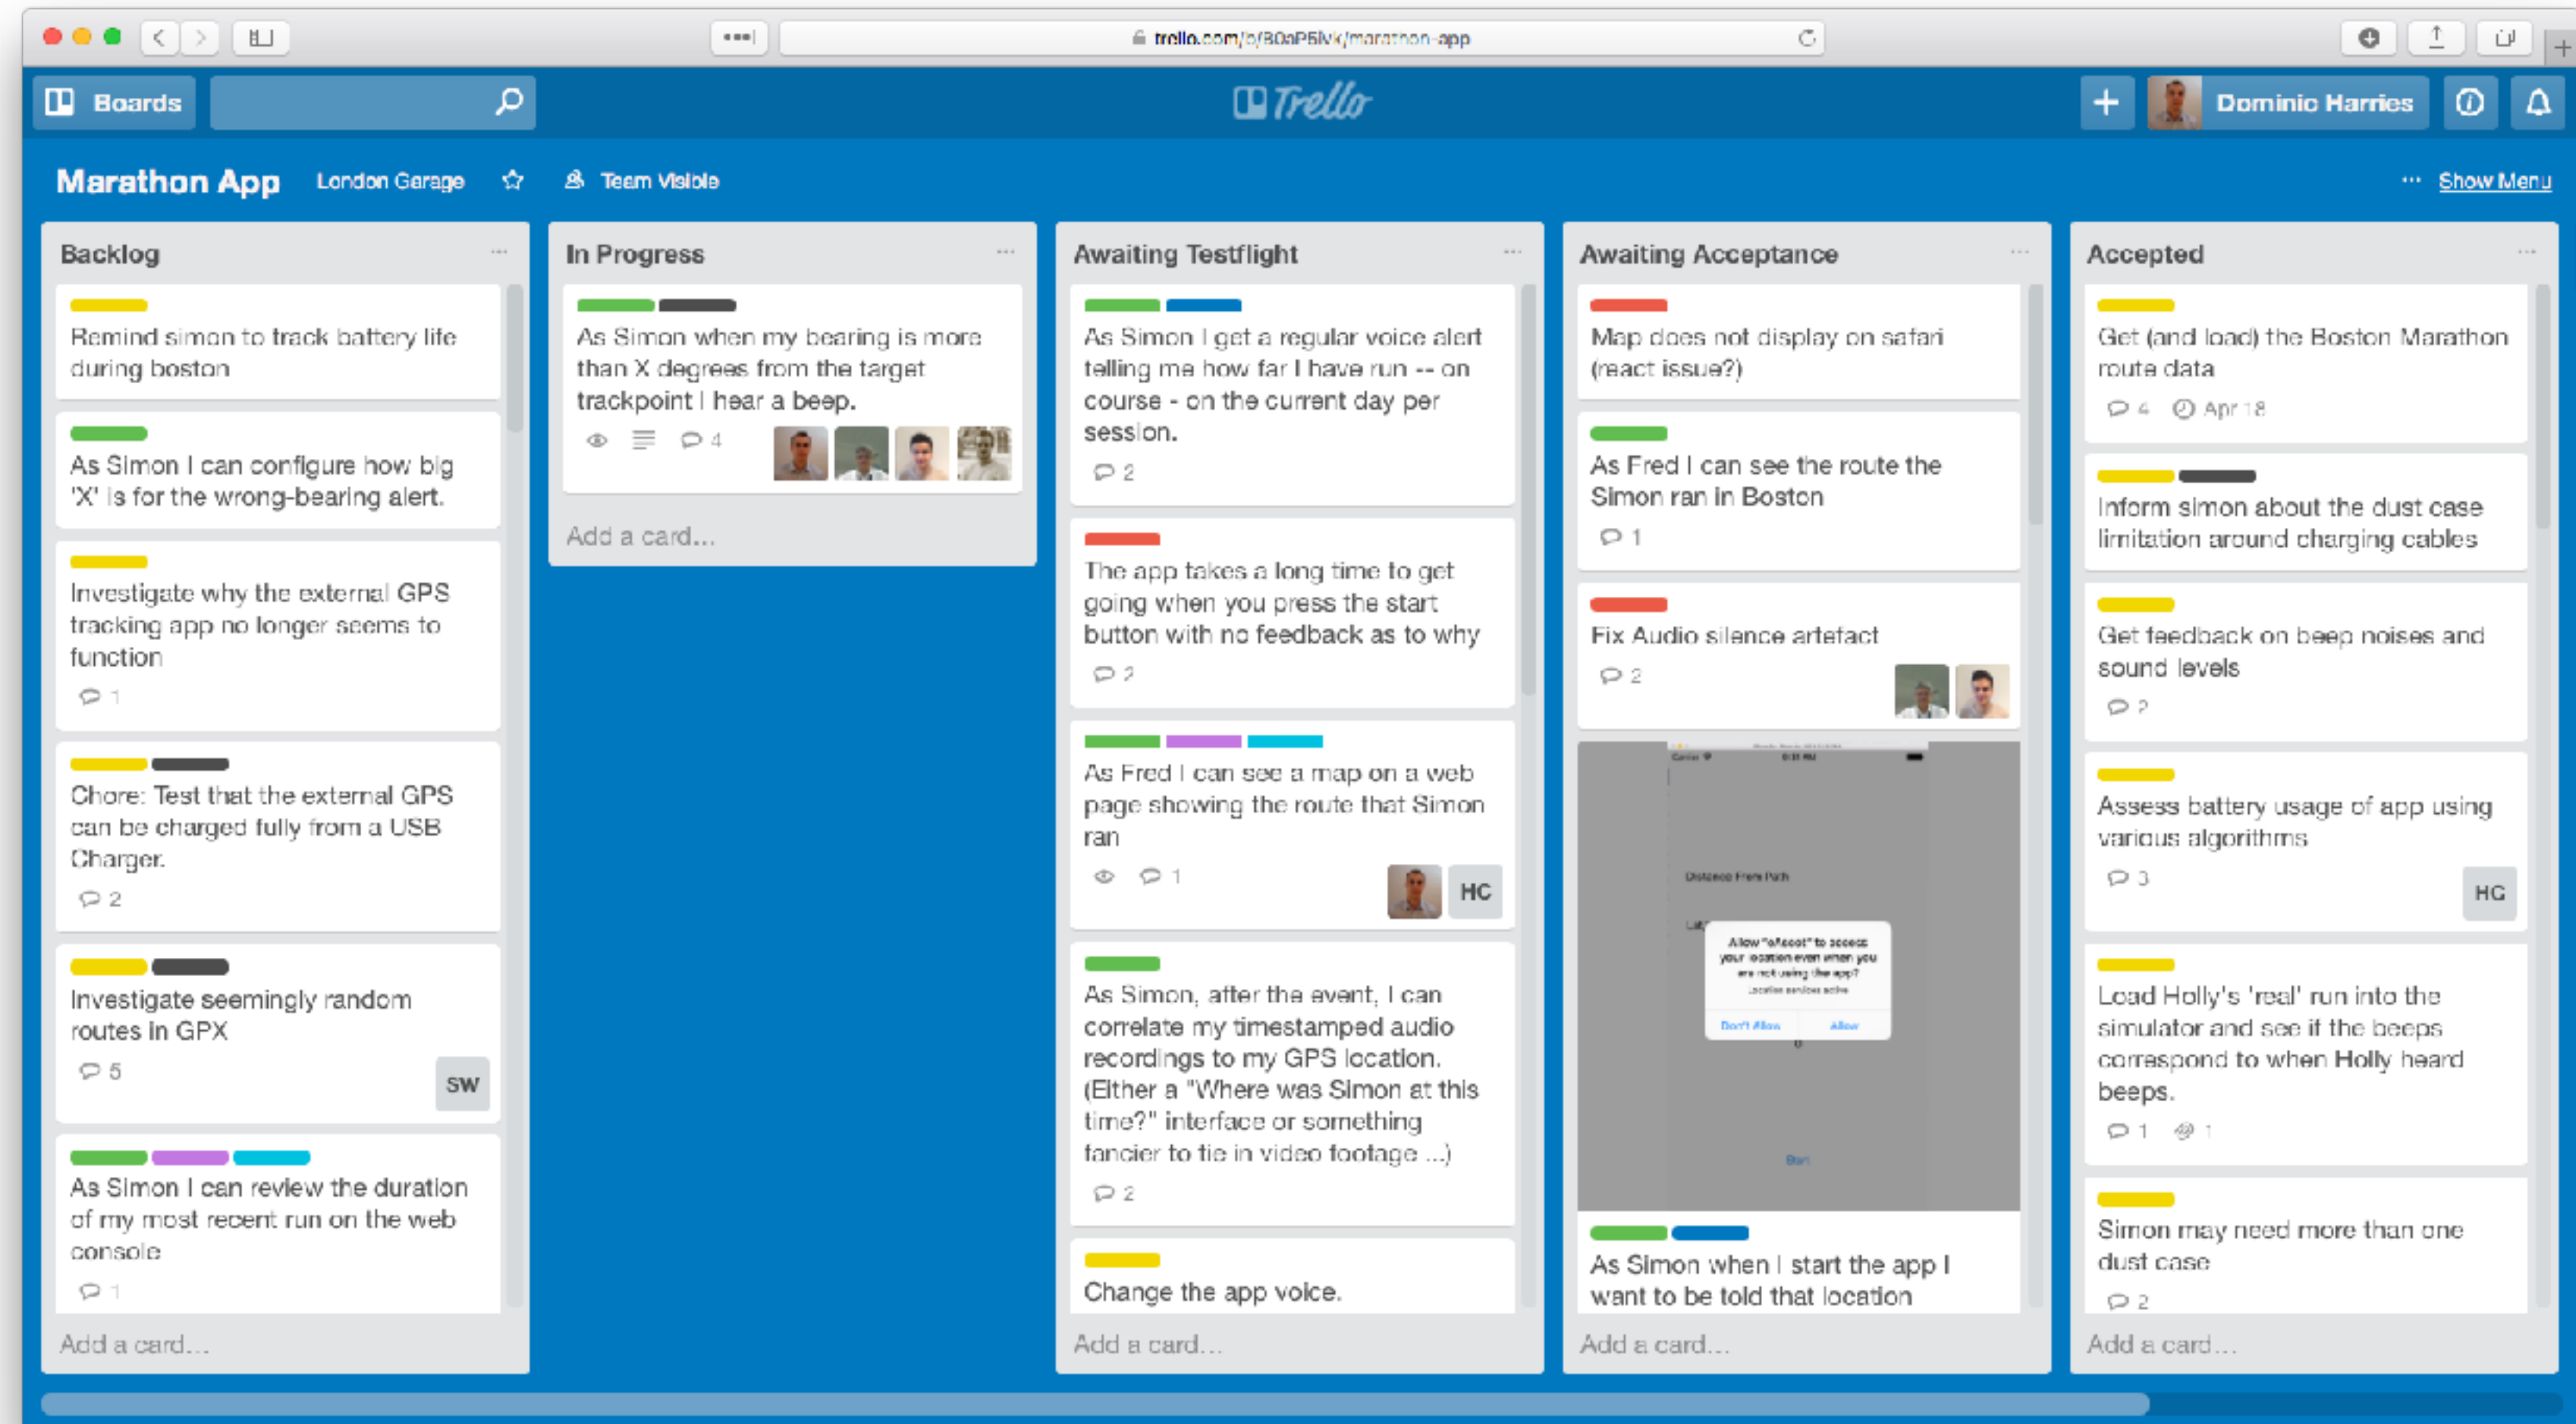

Status for all to see.

Status for all to see.

Keep stories small, so status is self-reporting.

Daily stand-up. Keep it **short.**

We all hate being told what to do.

Usually, because we know it's wrong.

Let people make their **own**
decisions.

Step 2: Add fun

Can I have a **volunteer**?

... or two?

The exercise:
Write down your partner's father's name.

The exercise:
Write down your partner's father's name.

Wait, where's the rigour?

Wait, where's the rigour?

Wait, where's the rigour?

Write down your partner's father's name.

Wait, where's the rigour?

Write down your partner's father's name.

We need QA on these letters. Show a draft of each letter to me, first.

Wait, where's the rigour?

Write down your partner's father's name.

We need QA on these letters. Show a draft of each letter to me, first.

Show each letter to the room, so we know what your progress is like.

Wait, where's the rigour?

Write down your partner's father's name.

We need QA on these letters. Show a draft of each letter to me, first.

Show each letter to the room, so we know what your progress is like.

What have we learned?

- Status reporting and code reviews slow things down.
- That was on an earlier slide, but we learned that better through a game :)

Children should learn mainly through play until age of eight, says Lego

Toy company funds research suggesting educational development can be hindered by early formal schooling. So are UK schools getting it wrong?

Lucy Ward

Save for later

Children learn through play.
Adults do too.

Learning Through Play

¹Peter K. Smith, PhD, ²Anthony Pellegrini, PhD

¹Goldsmiths, University of London, United Kingdom, ²University of Minnesota, USA
June 2013, Rev. ed.

[PDF version](#) 

Introduction

We define play, review the main types of play and their developmental benefits in various areas.

Subject: What is Play?

Play is often defined as activity done for its own sake, characterized by means rather than ends (the process is more important than any end point or goal), flexibility (objects are put in new combinations or roles are acted out in new ways), and positive affect (children often smile, laugh, and say they enjoy it). These criteria contrast play with exploration (focused investigation as a child gets more familiar with a new toy or environment, that may then lead into play), work (which has a definite goal), and games (more organized activities in which there is some goal, typically winning the game). Developmentally, games with rules tend to be common after about 6 years of age, whereas play is very frequent for 2- to 6-year-olds.

Software development can be a rather long, tedious procedure. And for some professional software developers, the best way to blow off steam is to leave little "Easter eggs" in their software. Generally speaking, an Easter egg is a hidden message, joke, or feature that is not documented, and often not even meant to be found by the casual user. These are 5 of the best, littlest known Easter eggs in computer software.

"Is 'Gullible' in

Creating a Fun Workplace... 13 Ways to Have Fun at Work!

By Jody Urquhart

There are 3 ways to motivate people to work harder, faster and smarter:

1. **1. Threaten them.**
1. **2. Pay them lots of money.**
1. **3. Make their work fun.**

In today's workplace, threatening people has not been effective. Paying them lots of money (even if you can afford it) has only shown short-term success. Only number three, making their workplace enjoyable, has a track record of effecting real change. It is time managers learned how to create an atmosphere that is challenging, creative and fun for employees as well as for themselves.

HOW FUN IS PRODUCTIVE

Imagine a work world where people love their work environment, and they are calm, stress-free and happy all day long. People who are in good spirits are more likely to be productive. Their mental attitude produces increased oxygen, endorphins, and blood flow to the brain, which enables them to think more clearly and creatively. They are more relaxed, more accepting of others, and more likely to share their sense of humor.

Laughter creates a bond that brings others together; people like to be with employees who are having fun. Creativity, intuition and flexibility are key to successful operation of organizations today. In stimulating environments, employees enjoy their time at work and they will also excel at work. Attracting customers is easier in an environment of hospitality. A fun workplace is not only more productive, but it attracts people and profits.

A TEST: IS YOUR STAFF SUFFERING FROM TERMINAL SERIOUSNESS?

Scan your workplace and take note:

Do you regularly catch people laughing or smiling at work?

YES NO

When something funny happens do people stop and appreciate it?

YES NO

Does your organization have fun activities at least monthly?

YES NO

Do you have tools (fun giveaways, draws) to invite employees to participate in having fun in your environment?

YES NO

Are managers usually optimistic and smiling at work?

YES NO

If you answer no to two or more of these questions, your staff probably suffers from "terminal seriousness," which is negatively affecting morale and productivity.

More Benefits of Humor in the Workplace

Dr. Norman Cousins said, "Laughter is an igniter of great expectations." Children laugh an average of 400 times a day and that number drops to only 15 times a day by the time people reach age 35. Preschoolers must know something we don't. Laughter releases endorphins (a chemical 10 times more powerful than the pain-relieving drug morphine) into the body with the same exhilarating effect as doing

A layer of fun

A layer of fun
... on top of a terrible
workspace ...

A layer of fun
... on top of a terrible
workspace ...
is **still** terrible.

31% of us dislike team-
building activities.

31% of Americans dislike
team-building activities.

How to ruin an office party?
Take attendance.

Fun is **important**.

Recap on achieving fun:

1. Get rid of un-fun things
2. Add fun things

Doing 2. without 1. is going to **fail**.

Thank you!
