"I have a really hard time describing what a progressive web app actually is."

—What the heck is a "Progressive Web App"? Seriously.

"A progressive web app is an enhanced version of a Single Page App (SPA) with a native app feel."

—Building Progressive Web Apps

"Before You Build a PWA You Need a SPA"

-hackernoon.com

"I've seen too many devs assume PWA is a subset of SPA. We need to improve our messaging"

—Jake Archibald

"A Progressive Web App is a regular website following a progressive enhancement strategy to deliver native-like user experiences by using modern Web standards."

—What is a PWA

"The name isn't for you and worrying about it is distraction from just building things that work better for everyone. ... It's marketing, just like HTML5 had very little to do with actual HTML."

Something seems to be up with the internet connection. Sorry about that.

Here's what you need to know about the Ampersand conference:

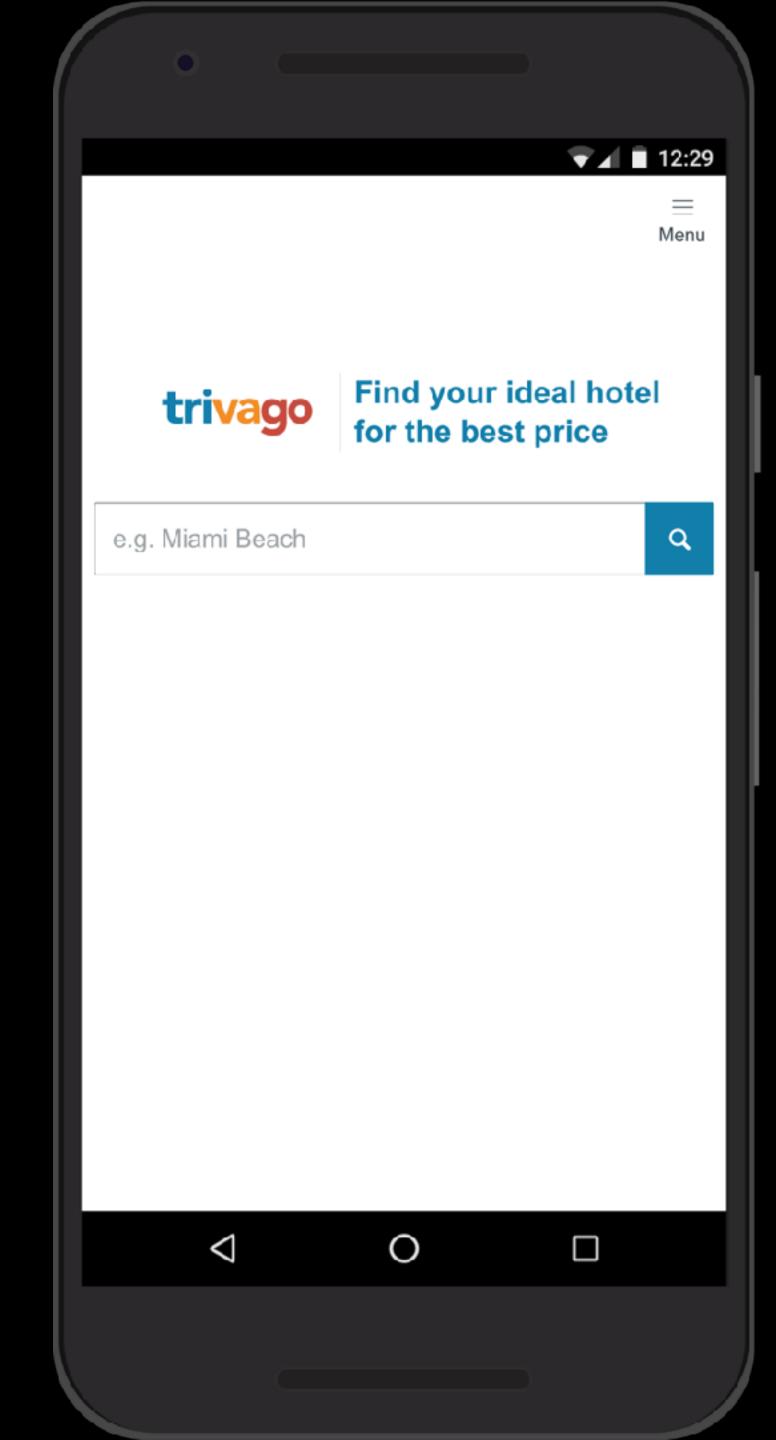

- Ampersand is happening on Friday, June 29th,
 2018.
- It will be at the Duke of York's Picturehouse in Brighton, UK.
- Registration starts at 9am.
- If you have any questions, you can write to Alis Cox.

THE HISTORY OF HUMAN

civilisation is a tale of cumulative effort. Each generation builds upon the work of their forebears. Sometimes the work takes a backward step. Sometimes we wander down dead ends. But we struggle on. Bit by bit our species makes progress. Whether the progress is incremental or a huge leap forward, it is always borne upon the accomplishments of those who came before us.

Nowhere is this layered nature of progress more apparent than in the history of technology. Even the most dramatic bounds in technological advancement are only possible when there is some groundwork to build upon.

Saving Your Web Workflows with Prototyping

· Matthias Ott – User Experience Designer

A well-written (and beautifully designed) article on the nature of the web, and what that means for those of us who build upon it. Matthias builds on the idea of material honestly and concludes that designing through prototypes—rather than making pictures of
