#ADHD Coping Mechanisms 101: ADRENALINE

- 1) Avoid starting
- 2) Panic sets in
- 3) Finally start
- 4) Get stuck on one detail
- 5) Rabbit hole
- 6) Meltdown about wasted time
- 7) Stay up as long as it takes (perfectionistic fear of failure)
- 8) Pull it off
- 9) Burnout recovery
- 10) Repeat twitter.com/NearlyFarleyAr...

Nearly Farley 🌸👤🌸 @NearlyFarleyArt

I posted an article about this, but ways "gifted" ADHD pass as high functioning is by using adrenaline to kick in gear. That means developing OCD like behaviors centered around anger, self hate & panic (aka anxiety). You learn acceptance and praise comes from a hell you create. twitter.com/blkgirllostkey...

ERROR BUDGETS

blame-aware retro

A close-up photograph of a silver and blue fountain pen lying diagonally across an open notebook. The notebook pages are filled with handwritten text in cursive, which is slightly out of focus. The overall image has a soft, warm-toned background with a dark overlay.

**YOUR PERFORMANCE IS NOT
YOUR VALUE**

MANAGE WIP

aaron aldrich @ heartifacts

@crayzeigh

Today:

- ✓ got out of bed
- ✓ showered
- ✓ brushed teeth

It's not a very accomplished day, but a non-zero day. Brain chemicals cause some bullshit.

11:55 PM - Oct 12, 2017 · Southington, CT
