Bill and Emma Keller Write Matching Cancer Columns, Face Internet Wrath

Last week at the *Guardian*, the writer Emma Gilbey Keller wondered aloud, "Forget funeral selfies. What are the ethics of tweeting a terminal illness?" Her commentary centered on the public presence of Lisa Bonchek Adams, who has [blogged](#) and [tweeted](#) her way through treatment for metastatic breast cancer. "As her condition declined, her tweets amped up both in frequency and intensity. I couldn't stop reading — I even set up a dedicated @adamslisa column in Tweetdeck — but I felt embarrassed at my voyeurism," Keller explained. "Should there be boundaries in this kind of experience? Is there such a thing as TMI? Are her tweets a grim equivalent of deathbed selfies, one step further than funeral selfies? Why am I so obsessed?"

Keller's rhetorical questions were met with anger and hurt from her audience, including Adams, and the *Guardian* has since [removed the entire column](#), but not before she passed the obsession on to her husband, former New York *Times* executive editor Bill Keller.

In the *Times* today, Mr. Keller picked up where his wife left off, likening Adams's treatment and personal writing to "a military campaign" and contrasting her cancer fight with that of his father-in-law's: "His death seemed to me a humane and honorable alternative to the frantic medical trench warfare that often makes an expensive misery of death in America," Keller wrote.

His point, like his wife's, is underinformed and muddled in a mess of condescension toward Adams's suffering and her work. In addition to factual errors, he described Adams as "a cheerleader for cancer research," noting the research fund she helped start, but added, "Beyond that, whether her campaign has been a public service is a more complicated question." Her writing was described as *pecking*, and so on:

"The words of disease become words my brain gravitates to," she pecked the other day after a blast of radiation. [...]

... any reader can see that Adams's online omnipresence has given her a sense of purpose, a measure of control in a tumultuous time, and the comfort of a loyal, protective online community. Social media have become a kind of self-medication. [...]

Her digital presence is no doubt a comfort to many of her followers. On

Inside artist Louise Bourgeois' New York home

Untouched since the day she died, Louise Bourgeois' New York home-cum-studio offers an intimate portrait of the artist

The room at the front of Louise Bourgeois' home in New York. Photo: © Nicholas Carroll

Comment

At 13ft wide, the townhouse in New York that was both home and studio to Louise Bourgeois is almost as tiny as the artist herself. It was here, on the site of an old apple orchard, half a mile from the shore of the Hudson river and Chelsea's elevated railway, that Bourgeois moved back in 1962 when she was 51 years old. It was here too that she died almost half a century later at the age of 98.

The transition from domestic to work-space was engineered with maximum efficiency. When her husband died in 1973, she got rid of the dining table, then the stove, and turned their bedroom into a library for her self-help and psychology books.

Little by little this elfin woman with her ballerina bun colonised the house like one of the spiders she became famous for sculpting. Cocooning herself into the spaces within its walls, she hollowed out arches and knocked through walls, burrowed through floorboards and installed spiralling stairwells to open up cavities below. No space was wasted in pursuit of her art, and nothing has been tidied away since the day she died. Kitchen cupboards are stacked full of tins, Coty foundation and her hairbrush still twined with hair sit on the mantelpiece, next to a book titled 'Taxes for Dummies.'

On the day that I visit, the street outside is glossy with rain, but the spring downpour has brought with it a flock of birds, chirping happily and noisily in the trees. Opposite sits a beautiful church, its bell chiming the hour.

"Louise loved to sit by the window, drawing and writing, watching the street," says her long-time assistant and friend Jerry Gorovoy, who is guiding my visit. A show dedicated to her tapestry works is shortly to open at Hauser & Wirth in Zurich, and though, as he tells me, he doesn't often curate her work, this time he took the reins with pleasure. "I like projects with a small focus where you can bring something new to people," he says. The show includes a number of her heads, as well as spiders and cushion towers. Much of it has never been seen before. Meanwhile, from tomorrow, an exhibition of her works on paper opens at Tate Modern in London.

Los Angeles (AFP) - Harrison Ford broke his leg on the set of the new "Star Wars" movie last week, a spokeswoman said Thursday, correcting initial reports that the veteran actor fractured his ankle.

The 71-year-old had surgery on the broken limb after being hurt when a garage door fell and hit him at Pinewood Studios outside London last Thursday, according to British emergency services at the time.

In an update a week after the accident, spokeswoman Ina Tre-cioakas said: "Harrison Ford's left leg was broken in an accident. His surgery was successful and he will begin rehab shortly.

"He's doing well and looks forward to returning to work," she added in a statement.

Filming began in May on the new episode of the iconic franchise, directed by blockbuster filmmaker J.J. Abrams.

Original cast members Ford, Carrie Fisher, Mark Hamill, Anthony Daniels, Peter Mayhew and Kenny Baker star in the new film, due for worldwide release on December 18, 2015.

Ford is back as smuggler Han Solo, 62-year-old Hamill will return as Jedi Knight Luke Skywalker and Fisher, 57, reprises the role of Princess Leia.

Disney recruited "Star Trek" and "Mission: Impossible III" director Abrams in a bid to re-create the magic from the original trilogy: "Star Wars," "The Empire Strikes Back" and "Return of the Jedi."

Truck driver in Tracy Morgan crash was driving 65 in 45 mph zone: NTSB

The report released by the National Transportation Safety Board says that about a half-mile south of the crash on the northbound New Jersey Turnpike, Kevin Roper, the driver of the truck, ignored signs advising drivers to slow from 55 mph to 45 mph because of construction ahead. The June 7 crash with the comic's limo left one dead and critically Morgan and others.

Truck driver Kevin Roper (right) looks on during his hearing at a courthouse in New Jersey June 11.

RELATED STORIES

A tractor-trailer driver was flying 20 miles above the posted speed limit before his fatal wreck with a van carrying comic Tracy Morgan, investigators said Thursday.

A preliminary National Transportation Safety Board report indicated trucker Kevin Roper — charged with vehicular homicide in the June 7 crash — was zipping along at 65 mph on the New Jersey Turnpike.

"30 Rock" star Morgan, 45, was critically injured and his pal James (Uncle Jimmy Mack) McNair, 63, was killed in the 1 a.m. pileup in Cranbury, N.J.

The Wal-Mart truck driven by Kevin Roper is seen in the crash on the New Jersey Turnpike on June 7.

According to the NTSB, Roper was cruising at a high rate of speed despite two warning signs posted on the northbound Turnpike.

The first, just under a mile away from the accident scene, warned of a lane closure ahead while a second about a half-mile away advised the speed limit was lowered from 55 mph to 45 mph, the report said.

About Grace Community Church

In 2010 Grace Community Church started with just a handful of people, a small place to meet and a dream to grow a church that was fresh, real, powerful and relevant.

God was faithful and the church began to grow – eventually outgrowing its previous facility. Pastor Chip and the other leadership prayerfully decided to relocate to Lakewood Ranch – where Grace has continued to grow - going from 1 to 3 Weekend Services!

Grace Community Church is a non-denominational church that centers on having a real and vibrant relationship with Jesus Christ. If you are looking for a fun, real, non-traditional, life changing, applicable to life church that ministers to the entire family, then Grace Community Church might just be the place for you!

About Our Pastor

Dr. Chip Bennett serves as the Founding Senior Pastor of Grace Community Church. Chip is a very bright and talented young man, being both an accomplished Pastor and successful Businessman throughout his life.

Chip also serves as an adjunct professor in multiple universities, training the next generation of Pastors. His education is as follows:
B.S. – Biblical Studies
M.A. – Theology
M.A. – Classic and Hellenistic Literature
M.Div. – Theology
D.Min – Literary Biblical Preaching & Teaching
Ph.D - Theology

Chips education, coupled with his real life experience gives him a very unique skillset when it comes to preaching and teaching. You will hear the Bible in a new and fresh way, as Chip uses practical application, literary understanding and the imaginative gift of story in his weekend messages.

Chip and his wife Mindy have a wonderful family. His hobbies include reading, electric guitar and being an avid University of Kentucky Basketball fan!

Reviewed June 16, 2014 by Armin

Comments (35)

Filed under corporate and tagged with monogram, monospace, moving brands

Established in 1996, Cambridge Design Partnership (CDP) is a technology and industrial product development consultancy with 65 employees in two offices — its headquarters in Cambridge, England, and a new one in Palo Alto, CA. Working for the consumer, healthcare, energy, and industrial markets, CDP designs products like a disposable splint system for fractured limbs, a respiratory humidifier, a self-cleaning powered painter, a device to help save water in the shower. CDP recently introduced a new identity designed by Moving Brands.

[The] existing business story "Think differently" — although genuine — was almost a replica of Apple's "Think Different," an irony that worked directly against communicating its truly innovative approach. We redefined the brand story as "Potential realised," precisely encapsulating the company's purpose and its ability, through innovation, to realise potential for its clients.

moving brands case study

CDP folks explain their business and how the new identity works for them.

We retained the name Cambridge Design Partnership as it anchored the business to positive perceptions, but we knew its

WHAT IS GRAPHIC DESIGN?

Recommendation 2

Suppose you want to announce or sell something, amuse or persuade someone, explain a complicated system or demonstrate a process. In other words, you have a message you want to communicate. How do you "send" it? You could tell people one by one or broadcast by radio or loudspeaker. That's verbal communication. But if you use any visual medium at all—if you make a poster, type a letter, create a business logo, a magazine ad, or an album cover, even make a computer printout—you are using a form of visual communication called graphic design.

Graphic designers work with drawn, painted, photographed, or computer-generated images (pictures), but they also design the letterforms that make up various typefaces found in movie credits and TV ads; in books, magazines, and menus; and even on computer screens. Designers create, choose, and organize these elements—typography, images, and the so-called "white space" around them—to communicate a message. Graphic design is a part of your daily life. From humble things like gum wrappers to huge things like billboards to the T-shirt you're wearing, graphic design informs, persuades, organizes, stimulates, locates, identifies, attracts attention and provides pleasure.

Graphic design is a creative process that combines art and technology to communicate ideas. The designer works with a variety of communication tools in order to convey a message from a client to a particular audience. The main tools are image and typography.

Image-based design

Designers develop images to represent the ideas their clients want to communicate. Images can be incredibly powerful and compelling tools of communication, conveying not only information but also moods and emotions. People respond to images instinctively based on their personalities, associations, and previous experience. For example, you know that a chili pepper is hot, and this knowledge in combination with the image creates a visual pun.

In the case of image-based design, the images must carry the entire message; there are few if any words to help. These images may be photographic, painted, drawn, or graphically rendered in many different ways. Image-based design is employed when the designer determines that, in a particular case, a picture is indeed worth a thousand words.

Type-based design

In some cases, designers rely on words to convey a message, but they use words differently from the ways writers do. To designers, what the words look like is as important as their meaning. The visual forms, whether typography (communication designed by means of the printed word) or handmade lettering, perform many communication functions. They can arrest your attention on a poster, identify the product name on a package or a truck, and present running text as the typography in a book does. Designers are experts at presenting information in a visual form in print or on film, packaging, or signs.

When you look at an "ordinary" printed page of running text, what is involved in designing such a seemingly simple page? Think about what you would do if you were asked to redesign the page. Would you change the typeface or type size? Would you divide the text into two narrower columns? What about the margins and the spacing between the paragraphs and lines? Would you indent the paragraphs or begin them with decorative lettering? What other kinds of treatment might you give the page number? Would you change the boldface terms, perhaps using italic or underlining? What other changes might you consider, and how would they affect the way the reader reacts to the content? Designers evaluate the message and the audience for type-based design in order to make these kinds of decisions.

Image and type

Designers often combine images and typography to communicate a client's message to an audience. They explore the creative possibilities presented by words (typography) and images (photography, illustration, and fine art). It is up to the designer not only to find or create appropriate letterforms and images but also to establish the best balance between them.

Designers are the link between the client and the audience. On the one hand, a client is often too close to the message to understand various ways in which it can be presented. The audience, on the other hand, is often too broad to have any direct impact on how a communication is presented. What's more, it is usually difficult to make the audience a part of the creative process. Unlike client and audience, graphic designers learn how to construct a message and how to present it successfully. They work with the client to understand the content and the purpose of the message. They often collaborate with market researchers and other specialists to understand the nature of the audience. Once a design concept is chosen, the designers work with illustrators and photographers as well as with typesetters and printers or other production specialists to create the final design product.

Symbols, logos and logotypes

Symbols and logos are special, highly condensed information forms or identifiers. Symbols are abstract representation of a particular idea or identity. The CBS "eye" and the active "television" are symbolic forms, which we learn to recognize as representing a particular concept or company. Logotypes are corporate identifications based on a special typographical word treatment. Some identifiers are hybrid, or combinations of symbol and logotype. In order to create these identifiers, the designer must have a clear vision of the corporation or idea to be represented and of the audience to which the message is directed.

Underline Text in Adobe Illustrator

Last week, when I [announced](#) the Blogger redesign, I mentioned that I've been using Adobe Illustrator much more often to comp my designs, instead of Photoshop. The vector-based Illustrator provides more flexibility in shape rendering, and allows me to create and tweak designs faster than the bitmap editing of Photoshop. Once we've honed in on a final design, then I move over to Photoshop for a final polish and pixel-level precision for the site's images. Just after the Illustrator mention in the Blogger entry, I tossed in this little frustration:

One gripe about using Illustrator for web stuff: after 11 versions, there's still no easy way to simulate underlined text without manually drawing lines with the pen tool, then moving them every time the text reflows.

Before drawing attention to this one missing feature, I should mention that I love Illustrator. I've been working with this vector app since it was dubbed **Illustrator 88** — the equivalent of version 1 or 2. I briefly switched over to Freehand (when it was still produced by Aldus) because I could edit and preview artwork at the same time. But Adobe quickly caught up with Aldus, and I switched back. Illustrator is invaluable for working in print design and illustration, and I've been finding more and more uses for it when designing for the Web.

When creating web comps, it's not uncommon to

26 August 2002

[5 pm]

After a brief visit, Zeldman's dad and bride Catherine have sailed out of New York Harbor on their honeymoon cruise. Bon voyage! :))

[5 pm]

Catscape's [Design Project: Currency](#) asks you to design money for the fictional nation of Zambonia. The creator of the winning design will receive Curt Cloninger's [Fresh Styles for Web Designers: Eye Candy from the Underground](#). The deadline is 30 September.

Good thinking: [xBlog](#), "the visual thinking weblog" (and one of our favorite web design resources) is now laid out in CSS2, and marked up in XHTML 1.

[Pirated Sites](#), recently added to our Affiliates bar, may have a new crime to punish. [Tyler's Room](#) ("Where the Boys Are") smells a lot like [Glassdog](#), Lance Arthur's long-running personal site. Hat tip: [Joe Clark](#). **WARNING:** Tyler's Room contains content unsuitable for children and may be blocked as an "adult site" by gateway software installed on your computer or your office network. If you're at work and don't want to be logged as having attempted to visit an adult site, avoid the link.

The DOM-compliant Opera 7 browser mentioned [last week](#) may be closer to release: Opera Software has published a preliminary [Opera 7](#) news page. Our fingers are crossed that the new Opera browser will provide standard DOM support comparable to that of IE6/6, Mozilla, and Netscape 6/7. Imagine scripting behaviors that work the same way in all major browsers.

We've been getting bug reports aplenty from people who use Mozilla 1.1 to visit [zeldman.com](#), [ALA](#), and our other sites. Bug reports are great, but only if they're sent to the right people. The WaSP's [Report Browser Bugs](#) tells how to let browser makers know about flaws in their software. (By the way, Mozilla 1.0 works great. It's the 1.1 version that seems to have gone off its meds.) :))

OK

The most prominent result from the new eyetracking studies is not actually new.
We simply confirmed for the umpteenth time that banner blindness is real.

—Jakob Nielsen, August 20, 2007, Banner Blindness: Old and New Findings

Gender and Diversity in Creativity. Panel at Weapons of Mass Creativity 2014.

3 Days That Changed My Life

I was 38 years old and I had been missing out the whole time. I just didn't know it yet. It was summer 2011 and I had been working for Nike for almost 10 years. On the whole it was a wonderful experience. However, it can be a very inward looking company. This is somewhat exacerbated in Amsterdam (where I worked) due to a high percentage of employees being foreign transplants. It makes sense that the first people you get to know when you arrive in a new country are your colleagues. Those people form the core of the group you work with, drink a beer after work with, hang out on the weekend with etc. I actually met my wife in the copy room at Nike. It always reminded me of that scene in Goodfellas where Lorraine Bracco's character explains that the same group go on holiday together and attend each others' birthday parties. No outsiders were allowed, yet it was considered completely normal.

It was only when I left Nike in 2011 that I realized I hadn't spent any time interacting with the wider creative community. When I started attending Creative Mornings in my new home of Atlanta, it was obvious that I had been missing out. I started to reach out and get involved.

I have since moved again and am lucky enough to have become the organizer of Creative Mornings in San Francisco. I love the fact that we can bring people together on a monthly basis and initiate meetings, collaborations and get everyone excited and inspired. However I had been looking for the last couple of years for a bigger event on a national level and was consistently frustrated by the speaker lineups. Time and time again I would see a new, fancy design conference announced only to click on the link to the list of speakers to find that the schedule is filled with the same white, male, middle-aged faces.

OLGA BELL

PHOTO BY NADIA KALINA

ABOUT OLGA

Olga Bell is an American singer-songwriter, composer, and producer based in Brooklyn. At home in a wide range of musical settings, Bell has worked with composers Orvaldo Golijov and Philip Glass, soprano Dawn Upshaw, the rap group Das Racist, members of the St. Petersburg, Tokyo, and Juilliard string quartets, and the data artist Zachary Lieberman. Bell's festival appearances include Banff, Norfolk, Aspen, and SXSW. In New York, she's played uptown at Carnegie Hall and Lincoln Center, downtown at the Mercury Lounge and Bowery Ballroom, and over in Brooklyn at the Music Hall of Williamsburg. She is a graduate of the New England Conservatory and a recipient of the 2011 Composer's Forum (Fund grant). Both live and on record, Bell's performances have landed consistent critical acclaim and wildly varied descriptions: "Ethereal" – Pitchfork; "a powerful advocate" – The New York Times; "lustrous" – Consequence of Sound; and "...electronic face-punch" – Nijatrionics.

bellinspace.com @bellinspace

INTRODUCTION

This lady is intense and full of energy, just like her music. With a background in classical piano and a love for everything electronic, Bell's music is her own confection – a world of layered beats, swirling synth textures, and sometimes poppy, sometimes haunting, but always beautiful vocals. We can't believe she never considered singing professionally! – more about that in the interview. Olga, who was born in Moscow and raised in Alaska, shared with us about the years she spent studying classical piano, the risk she took in branching out into new musical territory, her brief dream of being an MTV news anchor, why she's not yet satisfied creatively, and her hopes for the future. Thanks, Olga! We can't wait to hear what's next.

Interview date: May 23, 2012

Describe your path to becoming a musician.

I think I always knew – there was no question that I would always do music. When we lived in Moscow, my mother used to take me to the ballet; she says I would come home singing snippets of the score. I started studying music when I was five and two years later, when we moved to the States, we found this amazing piano teacher who had also just moved from Moscow. I studied with her for the next ten years until I went to school in Boston.

In college, at the New England Conservatory, I studied very intensely with a few wonderful pianists but it was this one off-major jazz ear training course that started me down the path to the kind of music I do now. The professor made us listen so closely to a few of his favorite recordings: Billie Holiday, Frank Sinatra, Miles Davis. For our weekly assignments, we had to record our own vocal renditions of the solos to tape, no matter our singing ability – even if we weren't really singers, which I wasn't at the time. I was a piano major.

When I finished school in 2005, I moved directly to New York, got an Apple computer, and started messing around in GarageBand. I love that all Macs come standard with that program! It seems like lots of people start tracking and programming with it – for better or worse. Maybe I would have been better off if I had begun with a band in a garage, but whatever. Now I do a lot more work at the computer than anything else – that's my path so far!

Have you always just done music or have you done other things as well?

I've mostly focused on music. Growing up, it was pretty intense piano study. I guess the closest thing apart from piano would be some acting that I did as a kid. I was in a couple of commercials. I also did a little acting on the side when I lived in Boston, but I've never done it seriously. I always just do voices and accents with my friends. I'm either sort of introverted or a huge ham – very rarely in between.

Where did you grow up and was creativity a part of your childhood?

I was born in Moscow and I moved to the States when I was seven. My mom was always extremely supportive of everything I was doing, especially the music. She took me to piano lessons several times a week, shuttled me to recitals, and lots of competitions – I think it was all very nerve-wracking for her! I also did some composing as a kid, which I'm very happy to be doing again now. My mom and my step father, who joined our family when I was 10, have always been supportive. I'm very lucky because they've never given me grief about not having a "real" job.

When we lived in Russia, my mother worked for Radio Moscow and sometimes she took me to work! I heard so many different things there, from the BBC to her weekly folk music show, which I loved. When we moved to Anchorage, she started working in a different field, but there were always art books and music and lots of wonderful stimulus around our house.

"I sort of had a reckoning moment after I finished at the conservatory... I wanted to sing; I wanted to make beats and write songs. I had too many questions about all the other music that I loved to decide to only focus on piano for the rest of my life."

A smarter way to look at fitness.

Apple Watch gives you a complete picture of your all-day activity. The three rings of the Activity app show your daily progress and help motivate you to sit less, move more, and get some exercise. It's also an advanced sports watch, giving you real-time stats for a variety of the most popular workouts. Over time, Apple Watch learns your activity and fitness levels. It uses that information to improve the accuracy of your measurements and suggest personalized all-day activity goals. It even provides custom reminders to encourage you to achieve them.

SIMPLY WORKS.

The best tools don't require a lot of fuss – they just work. With Pencil, we've radically simplified things like charging and wireless connection so you can spend less time in menus and more time creating.

Power it up

Under normal use, you won't need to recharge Pencil for about a month. The battery can be slid out and recharged on any standard USB port in under 90 minutes.

Kiss to Pair™

Bluetooth connection as it should be: no settings menus, no confusing pairing rituals. Just press Pencil's tip to the screen. Clear, stable, simple... easy as falling in love.

Plays nicely

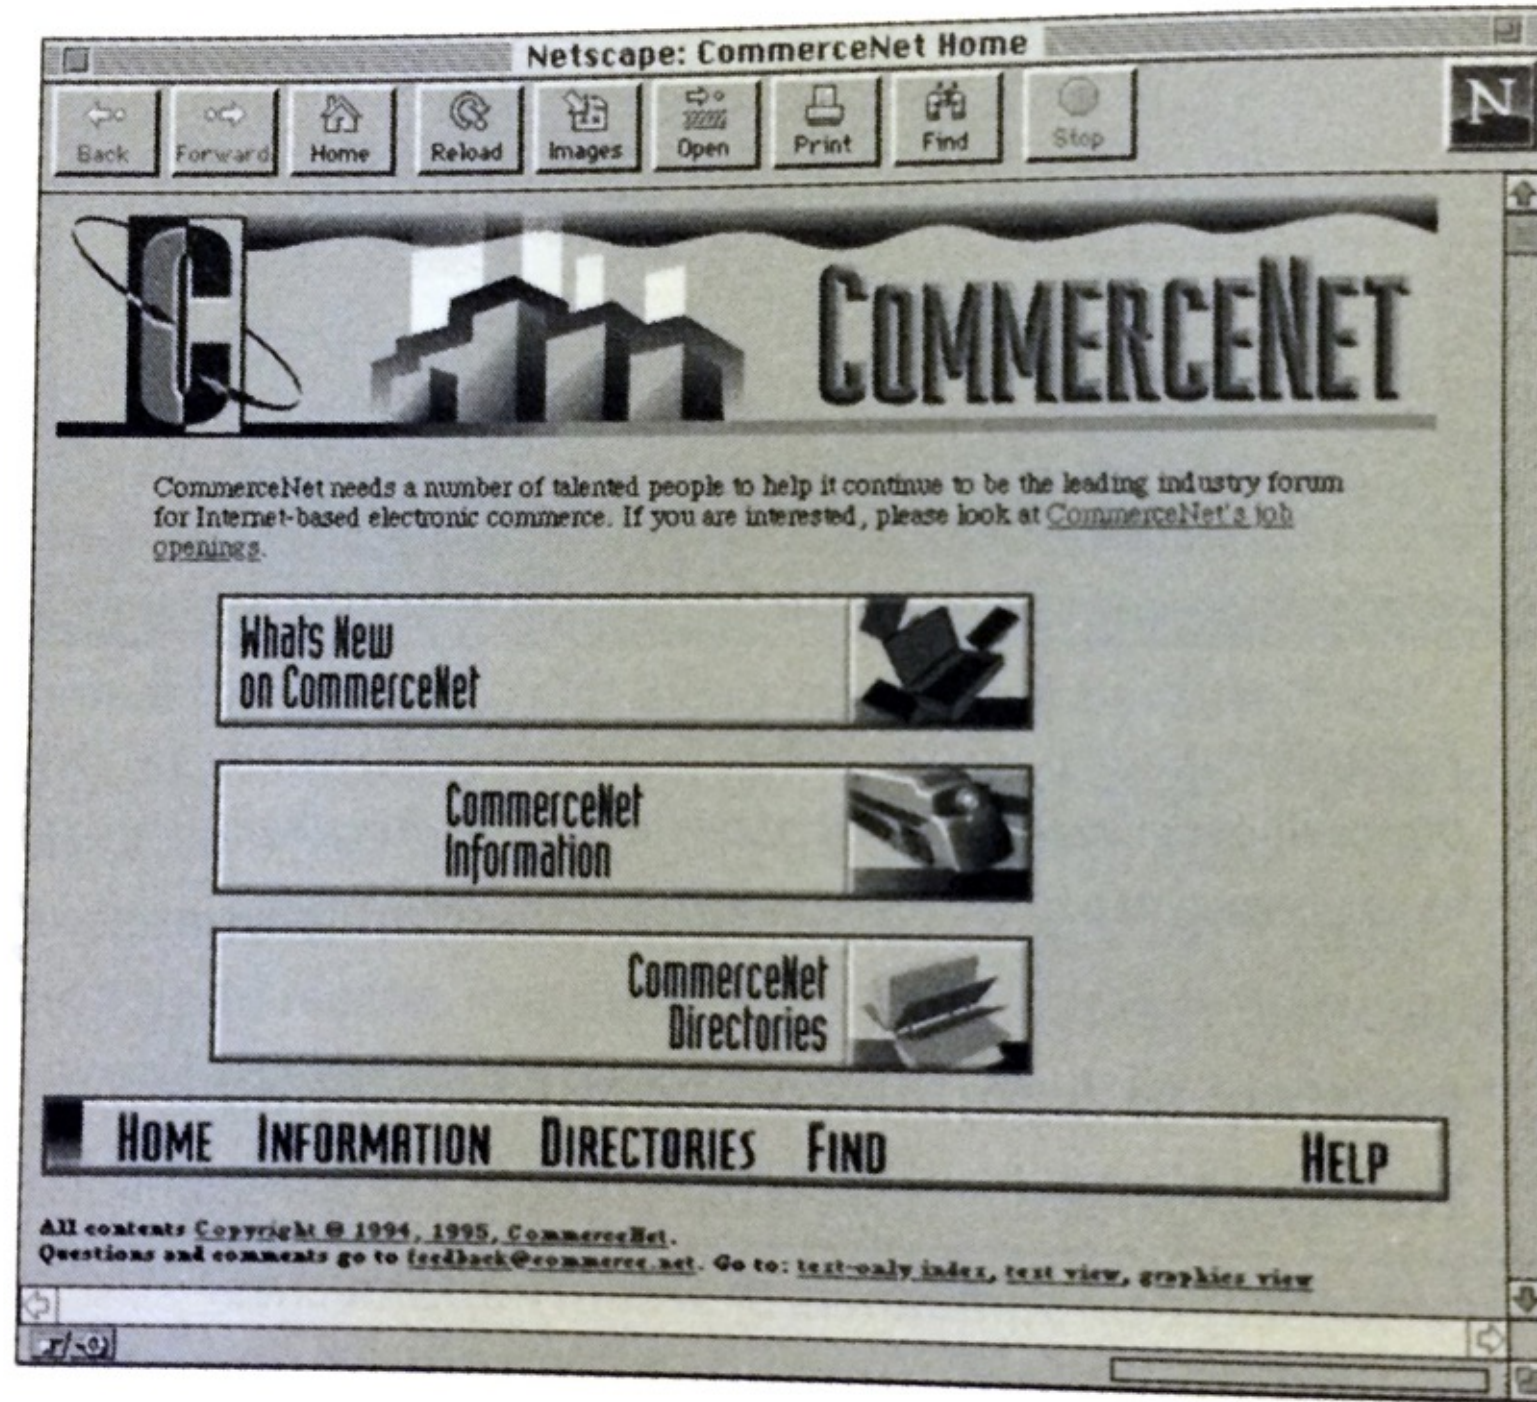

Palm Rejection, Erase, and Blend work only with Paper, but Pencil also works well as a non-connected stylus in any other app and on any touchscreen device.

[Visit Support for videos and articles about using Pencil >](#)

Try **Sketch**, **Outline**, **Write**, **Color**, and **Mixer** for free while using Pencil.

older than the web.**

GOLDEN SLUMBER

The Sandman (played here by Sasha Cooke, who has appeared in the M&M's production) sprinkles magic dust onto the sleeping children, who fall into a deep sleep and dream about a banquet served by a fish maître d'. Balenciaga by Nicolas Ghesquière wool-silk jacket, \$2,995; Balenciaga, NYC; Chloe flats. Sandman and fish maître d' costumes courtesy of the Metropolitan Opera. Details, see in This Issue.

Wild Irish Rose

In the footsteps of Yeats and Maud Gonne, actor Adam Driver makes stormy romance with model Daria Werbowy—who wears the sweeping skirts and man-tailored jackets that render this autumn unforgettable. Photographed by Annie Leibovitz.

LINE AND VERSE

"Jeweled still, tower by tower" They paddle in the gold. Companionable streams or climb the air. Their hearts have not grown old. (K.B. Yeats, "The Wild Swans at Coole"). The early 20th-century length and shape pitch these clothes in a wistful, poetry-tinged key. Beilhaft cable-knit sweater, \$1,895; Beilhaft, NYC. Rochas wool-tweed skirt, \$1,330; modapaperand.com. Michael Kors camel gabardine coat; select Michael Kors stores. Details, see in This Issue.

Drew Barrymore is a natural as the heart-strong heroine in Vogue's vision of the classic fairy tale. And as John Powers writes, this beguiling survivor is really beginning to bloom.

Photographed by Annie Leibovitz.

Beauty & the beast

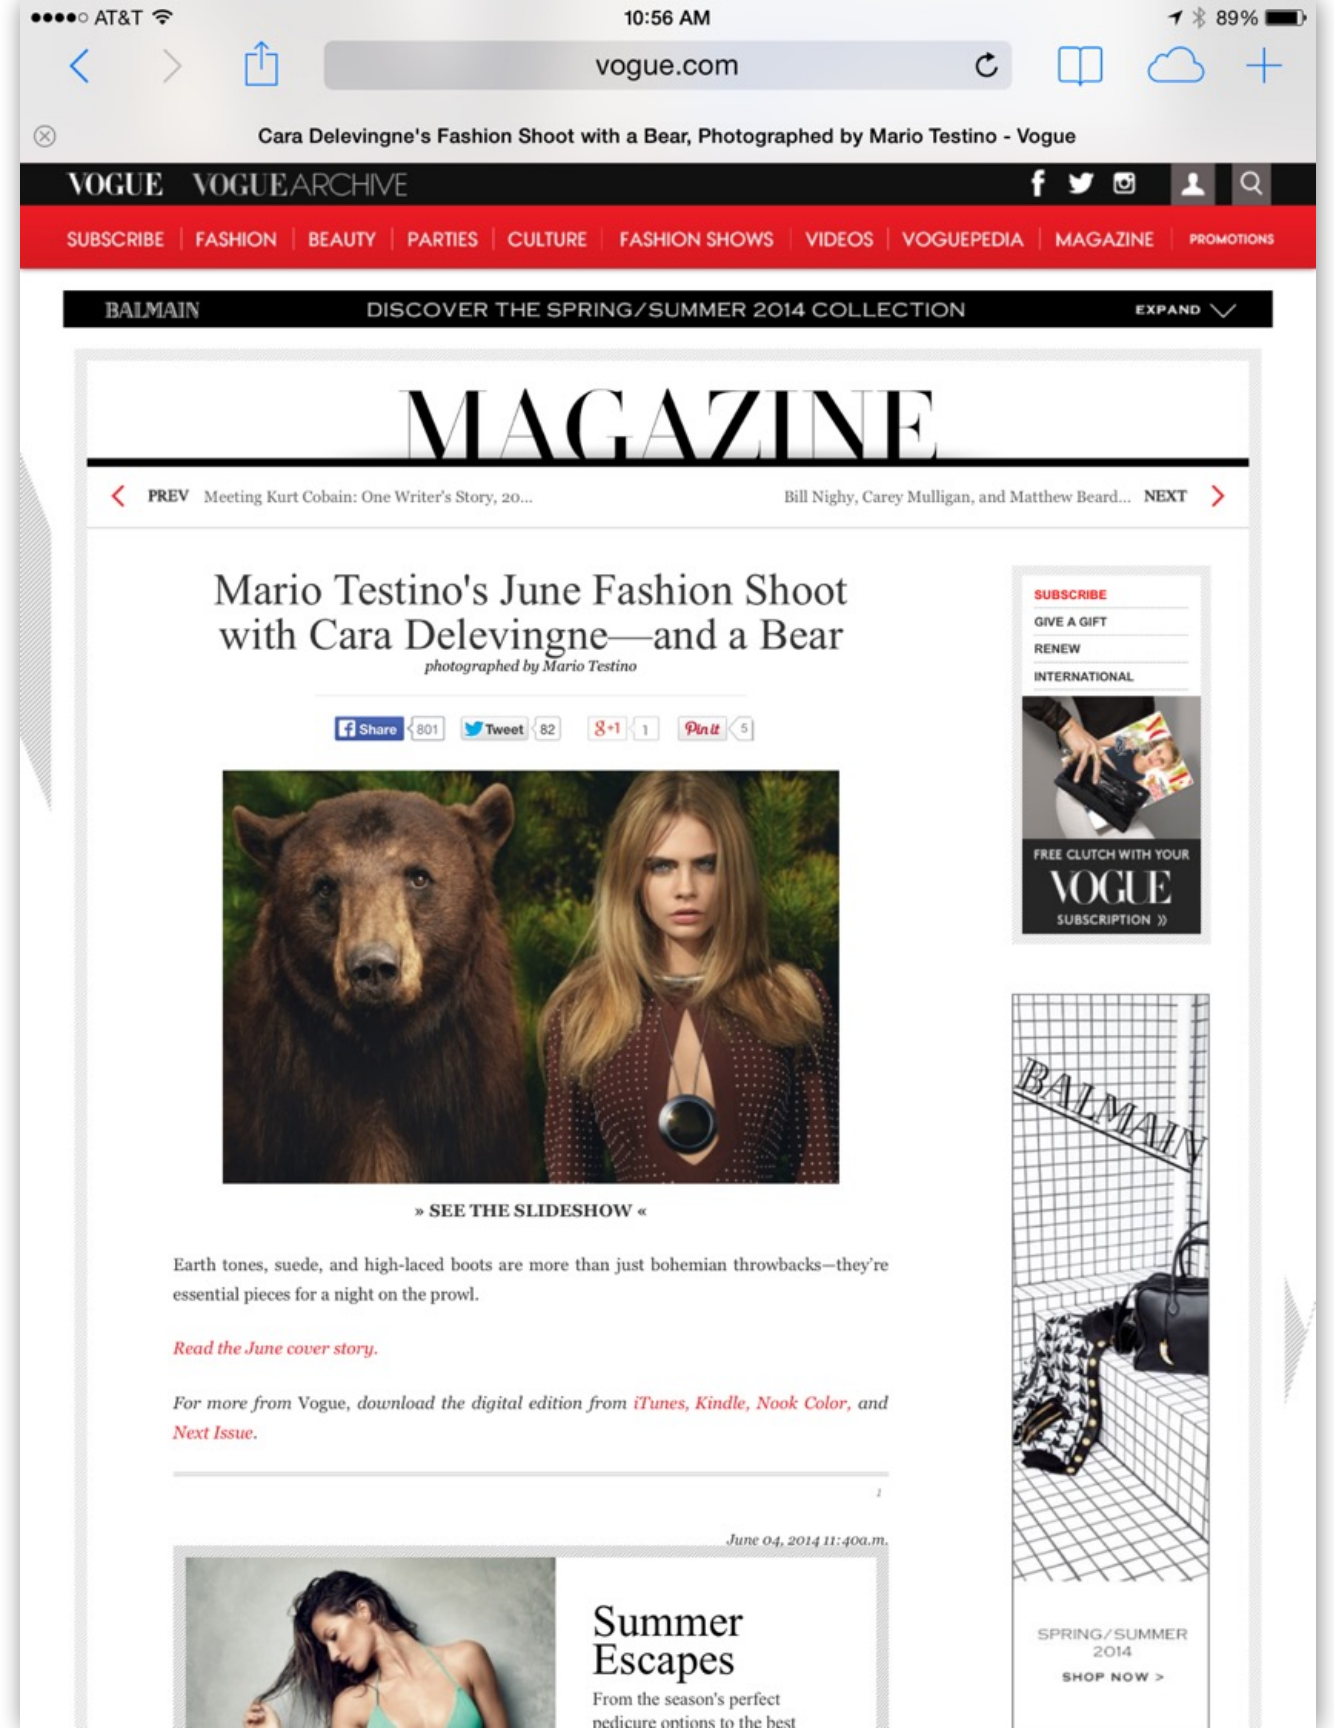

Her sisters demanded fine gowns and furs. All that Beauty wished for was a rose

A THORNY PROBLEM

Beauty finds herself captive in the Beast's palace when she selflessly offers herself up to save her father from the Beast's abiding wrath. (Her father's warning: "Pick a rose for his daughter from the Beast's garden.") Chanel Haute Couture's beaded-and-ribboned dress. Details, see in This Issue. Fashion Editor: Grace Coddington

timide. Vohabilla Vous, rien
que vous.

sons? Légumes, fruits, graines, épices, laurier-sauce... Le style retour-du-potager fait fureur aujourd'hui. On ne voit que ça. Chez Aquarelle, rue de Rivoli, une composition mêle aubergines, poivrons, petites roses d'Inde, viburnum et freesias. «Un bouquet où il y a à voir et à manger», s'amuse le fleuriste. Le même propose sur Internet un panier de coloquintes : «De la famille des cucurbitacées, cultivées dans des régions ensoleillées, nous avons réuni, tout en jouant avec leurs formes et leurs couleurs, courges, potirons et pâtissons dans un joli panier pour un effet décoratif garanti», annonce la notice. Est-ce bien raisonnable?

Le sociologue Hugo Ezan pense que oui. «À l'heure où tout est industrialisé, normalisé, numérisé, c'est l'expression de l'authenticité, suggère-t-il. Cela veut dire : regardez comme mes sentiments sont sincères, je fais appel à la nature pour vous les prouver. En ce sens, le bouquet parle encore le langage d'antan. Quoiqu'on veuille, le sélam est toujours présent. Ce nouveau bouquet étend même, à certains égards, le langage traditionnel : une rose rouge, c'est l'amour fou, avec des épices, c'est encore plus torride... Et les fruits exotiques, les coquillages qu'on y ajoute même parfois, sont comme les butins, les trésors qu'on déposait aux pieds de ceux qu'on aime. «Et puis, il y a un lien entre la fleur et le fruit. Les fleurs sont des organes sexuels, ne l'oubliez pas. Un bouquet n'est rien d'autre qu'un

Left On Fishwrap (are listed on an inventory publication. This and means they do the highly visual

Famelicose

The last best word I learned today was mirabile
visu—okay, two words—Latin for wonderful to

behold. After I learned it I saw wonder everywhere,
I *beheld* it, hopping brown sparrows and the tender

new blacktop on the street outside my building,
freshly rolled. But today there's this: kaiho, Finnish

for something we haven't named in English, a
yearning shot through with the understanding that

the yearned-for thing can never be. In my mind
kaiho rhymes with I go and I want to but there's all this

work to do, birds to envy and streets to stalk, all the
windows of the houses flashing sunlight so I can't see in.

—often or very hungry

F

Gardeviance

We like to pretend we are old-timey and rich. We toured the
Victorian estate and saw the mirrored ceilings, inlaid ivory

mantelpiece, eccentric hanging houseplants with beady
leaves like knotted-strings of green pearls. We walked

through French doors into one of the gardens where we admired
the statuary: taut young women, greyhounds, bowls of fruit. And

back inside as we mooned over the wedding portrait, I knew
I would go home and pretend to be you. Shameful but true,

I will stare at the postcards and wish for a walnut trunk, slippery
silk things to fold into it, a place to get away to before it turns cold.

—chest for valuables; a traveling trunk

G

Und ewig lockt das Basic-Channel-Bett ... Diesmal wurde der Ruf in Barcelona vernommen – und flugs hat es sich Alex Alarcon auf der von etlichen Vorgängern weich gelegenen Matratze gemütlich gemacht. Eine fast schon verzweifelte Unaufdringlichkeit ist ihm zueigen: Die atmosphärischen Elemente umschwirren sich, haben im reduzierten Sinne viel Platz, den sie tragischerweise nicht nutzen können. Es entstehen simple unpräntöse Grooves, auf die man sich gern einlassen möchte – sie öffnen sich ebenso langsam wie die subtil gespannte Erwartung auf eine sich weiter entwickelnde Auflösung im Raum. Die findet nicht statt, allzu abrupt brechen die Stücke ab, so dass zwischen ihnen klaffende Lücken entstehen, unüberbrückbar. Etwas nicht ohne weiteres Fassbares fehlt, so dass der Hörer um ein Flow-Erleben gebracht wird, dessen Potential in den Blaupausen durchaus enthalten scheint. Eben diese Blaupausen zieren indes das Booklet: Jedem Track ist die Skizze eines rauen Minerals zugeordnet. Also scheint der unfertige Charakter der acht Steinchen gewollt zu sein? So als ob Alarcon in seinem Fundus einige zwar viel versprechend funkelnde Stücke gefunden hat, sie aber lieber uns zu einer weiteren Bearbeitung überlässt.

Taylor Swift

Swift has been feeling the love from her fans as they have anxiously awaited her third album "Speak Now," set to release on October 25th. The six-time-platinum "Fearless" is the only album to ever win an all-genre Album of the Year Grammy, along with Country Album of the Year trophies from the Academy of Country Music, Country Music Association, and American Music Awards. Taylor sold more than 13 million records, had more than 25 million digital downloads, headlined numerous performances including the 2010 NFL kickoff concert live from New Orleans, Louisiana, and topped the charts several times with "Our Song," "Love Story," and "You Belong With Me."

"Some of these things I wrote about are things nobody ever knew about. I'm beyond excited for you to hear these confessions."

While Swift keeps quite about her personal life in interviews, she speaks volumes through her music. Since the release of Fearless in 2008, she has captured her life in song, journaling her life in detail through words and melody. "I like to take a lot of time between albums to work up the next one," Swift explained. "For me, I write everything that I live so you've got to give yourself a little bit of time to live out a lot of things. Thankfully, in the past two years, I've experienced a lot of things that I've been dying to write about."

For her latest album, Swift wrote all the songs herself. "It just sort of happened that way," Swift explains. Like I'd get my best ideas at 3:00 a.m. in Arkansas, and I didn't have a co-writer around so I would just finish it. That would happen again in New York and then again in Boston. The song that made the cut for the album were songs that I wrote by myself, so wish me luck on this one," Swift adds with a laugh.

The Triple Threat

"Some of the things I wrote about are things nobody ever knew about. I'm beyond excited for you to hear these stories and confessions."

Interactive editor for CSS Shapes.

Create and adjust CSS Shapes values with an interactive editor overlapping the selected element.

Requires Chrome 37+

Shapes sidebar:

The extension adds a new sidebar to the DevTools Elements panel called "Shapes". It offers controls to create and edit CSS Shapes values like `polygon()`, `circle()` and `ellipse()` on the selected element.

Polygons:

Click the edges of the shape to add new points. Drag points to change the shape. Double-click an existing point to remove it. Select the transform tool to move, scale and rotate the polygon shape.

Circles & ellipses:

Drag the shape to move it around. Pull on the edges and corners to scale and resize.

  <p>I will arise and go now, and go to Innisfree,<br/>
And a small cabin build there, of clay and wattles made;<br/>
Nine bean-rows will I have there, a hive for the honey-bee,<br/>
And live alone in the bee-loud glade.</p>

  <p>And I shall have some peace there, for peace comes dropping slow,<br/>
Dropping from the veils of the morning to where the cricket sings;<br/>
There midnight's all a glimmer, and noon a purple glow,<br/>
And evening full of the linnet's wings.</p>

  <p>I will arise and go now, for always night and day<br/>
Tears take water, I answer with my hands, by the shore, the lake.</p>

81 Changing the Shapes with Sara Soueidan

SEPTEMBER 2, 2014

So far, page layout on the web has predominantly consisted of a lot of boxes stacked on top of boxes – rectangular columns everywhere. That's about to change. New specifications, including CSS Shapes and CSS Exclusions, are about to change the shape of the "page." Sara Soueidan joins Jen Simmons to explain.

GEORGE HAS RULES.

GEORGE HAS RULES. Personal rules, that she makes for herself. Georgata knows her limits and creates hard rules that bend under no circumstances. For example, she is not allowed to rent movies from any movie rental store in town and would never consider opening an account at one. "Do you know how many late fees I'd rack up?" George explains. "It's easier to just forbid myself the option and prevent the guilt."

One of George's earliest rules she made was "I am not allowed to hold babies." This stemmed from the original rule, "I am not allowed to hold babies on stairs." And with George you can count on there being a story (most likely a long-winded one) behind everything she says. The origin of this particular rule comes from her early childhood. George spent her beginning years growing up in a downtown San Francisco apartment. Her family lived on the second level. The stairs leading down to the lobby consisted of two flights joined with a 90-degree landing.

One day as her family was quickly hustling out of their apartment her mom asked George to hold the baby. The baby was Josephine, six years her minor, who was practically half George's size at the time. The baby squirmed, George freaked out and addressed the situation by just letting go. The baby dropped to the next step down then proceeded to roll all the way down the first flight to the landing. "I thought she would have stopped at the first landing," George explains, "but she kept on rolling!" Josephine made it to the bottom and burst out in tears only to be scooped into her parents' arms who had frantically ran down in pursuit.

Spring fashion's fluid grace is brought to life
by the dancers of the Royal Ballet

PHOTOGRAPHS BY TOM ALLEN

STYLED BY CATHY KASTERINE

Brody nevéhez köthető néhány vezető angol napilap újratervezése, úgy mint a The Guardian és a The Observer. Nemrégiben tervezett új arculatot a The Times magazinnak, és

Elbetűtípust

hozott létre az American magazin számára.

Designer

Neville

Angol designer, tipográfus,
és művészeti vezető

Londonban született 1957. április 23-án.

Számos tevékenysége mellett részt vesz a **FUSE** projektben, mely egy magazin design, grafikai design és betűkép design témakörök köré szervezett konferencia sorozat. A FUSE project célja, a vizuális nyelvben és a tipográfia műfajában új utak keresése és folyamatos fejlődési iránymutatás.

Industria

Brody

art
director

1994-ben saját stúdiót hozott létre **Research Studios** néven, mely azóta újabb műhelyekkel gyarapodtak San Franciscoban, Párizsban, Berlinben és New Yorkban.

A cégcsoport mindenféle munkákon dolgozik a publikáción át a filmkészítésig.

Typographer

Insígnia

FACE

Főképp a **FACE** magazin művészeti vezetőjeként, valamint számos betűtípus tervezőjeként ismert. Kísérletező és kihívásokkal teli munkássága során minden média típusban igyekezett a vizuális kommunikáció határait a végletekig fesztetni.

Three Is Better Than One

It's hard to think that one could take the same style used to design the Guggenheim Museum in Spain and many other famous buildings and transform that design into a simple yet elegant vase. Famous designer Frank Gehry did that for Tiffany and Company recently for a new vases and tableware collection. This particular vase mimics the shape of fish and orchids which are prevalent in his designs for Tiffany and Co. The three vases connected in the center make for beautiful lines and curves all the way around. Three vases connected also make for an interesting flower arrangement! Featured in *Inside Out*.

Stool Sleek

The Lem Piston Stool has been featured in many magazines. The designers Shin and Tomoko Azumi even designed a sleek footrest connected to the bar stool. A nice feature which is new compared to most bar stools is a small backing a few inches high. The backing is just tall enough for lower back support but it doesn't distract from the clean lines of the stool. You can find this sleek black and chrome stool at your nearest trendy bar or from The Conran Shop for about \$700. Featured in *Elle Décor*.

ELIZABETH'S BOUTIQUE

HIGH FASHION NEARBY

The latest from top designers in women's haute fashion.

As we leave behind the sizzle of summer and look forward to the fall season, cute shorts and sexy tops must now give way to spectacular styles that are a darker, richer, version of the spring fashions that caught our eye in March. Fall fashion is all about revisions: turquoise is the new teal, gauze turns to wool, and camisoles become romantic blouses. Whatever your style, you will find it all and more at Elizabeth's Boutique located in Market Street, right across from Central Park.

There are many reasons to look forward to fall—the changing colors of the leaves, sipping hot chocolate with old friends, the anticipation of upcoming holidays, cool breezes in the air—and most importantly, the new fall fashions! With the Boutique's commitment to quality, flair for style, and the highest possible standard of customer service, everyone is sure to find their own special look. You are sure to be a hit no matter what the occasion!

Elizabeth's defines the meaning of the word style. From the moment you walk through the doors, you begin to appreciate how magnificent simplicity can be. Soft undertones and ornate accents accentuate the atmosphere of sophistication in this unique Market Street boutique. The hottest fashions by top designers line the walls and fill racks to beguile even the most discerning taste.

At Elizabeth's Boutique, warm greetings await you in an inviting, luxurious showroom of style. The exceptional, standard-setting customer service sets the tone as friendly faces not only welcome you, but assist you with your fashion needs. Creative touches such as spa-like comfort robes and slippers in the dressing rooms along with the availability of fashion consultants add to the convenience of shopping and trying on clothes. Private showings, closet inventories and wardrobe consultations are available by appointment and are great ways to let the experts help you put together your new fall look.

A visit to Elizabeth's Boutique is a pleasure to the senses. Fashionable pieces for the ladies from such well-known designers as Marc Aurel, Cynthia Steffe, Simon Chang, Sue Wong and One Girl Who, along with jewelry by Hutzler Designs catch the eye, and add to your shopping adventure. Expertly designed attire and accessories always set the standard of style. For an occasion where shopping becomes a memorable event to be shared and experienced time and again, Elizabeth's Boutique is a definite must on anyone's fashion journey.

Ladies, are you shopping for that perfect gift for the man in your life? Elizabeth's has a full line of men's shirts from Riscatto and James Tattersall and suede jackets that complete any gentleman's wardrobe. And with our Men's Den conveniently situated and comfortably designed for those who wish to grab a breather, shopping has taken on a whole new meaning. Satellite HD TV, comfortable leather seating and refreshing beverages of your choice complete the experience. Not a minute of the big game is missed! Elizabeth's has even designed a small area just for children; complete with snacks, drinks and coloring books so that the little ones are entertained.

Up for a little Bunko get-together? Let Elizabeth's host your next Bunko party and let the good times roll. Grab your Bunko Box and we'll do the rest. Afternoon teas are a great way to wind down your day and get ready to pick the kids up from school—but how about a morning get together after dropping the kids off? Gather up the ladies from the carpool gang and meet at Elizabeth's for a fun filled Mimosas morning of non-stop laughter. Fun and exciting fashion shows can be scheduled for your next event which is also a great way to preview the upcoming styles in runway format. The website, www.elizboutique.com, is an added bonus for individuals who enjoy the comfort and convenience of shopping from home.

Giving Back

Elizabeth's Boutique owner Elizabeth Goodwin dreamed of starting her own boutique even as a small child. But she realized that it had to be more than just a clothing store. When she started her retail career at sixteen she knew immediately what direction she needed to take to make a difference in not only the retail industry, but as part of the community as well. After graduating in 1985 with a degree in Fashion Merchandising, Elizabeth set out to make her dream a reality and help those less fortunate.

Men have their own area to relax in.

Elizabeth's is located in Market Street, The Woodlands.

By participating in fashion shows, silent auctions and charitable events, the boutique has been able to assist many local charities and shelters primarily benefiting women and children in need.

The creation of Customer Appreciation night serves to celebrate and honor all of those who have helped make Elizabeth's Boutique a success. This is an exciting event for both customers and sales staff alike. It is a time for sharing and enjoying all that the boutique has become.

You are invited to visit Elizabeth's Boutique both to experience all of the exciting fun ways to celebrate fashion and to see what true customer service really is. Elizabeth's is conveniently located at 9595 Six Pines Drive in the Market Street plaza, across from Central Park. Please call 281-292-9399, or visit them on the web at www.elizboutique.com.

charles in CHARGE

No shy, unassuming creative type, fashion designer Charles Chang-Lima tells it like it is.

By Michele Herrera

Snoop in any fashion-conscious A-lister's closet and you'll find his masterpieces. Liv Tyler and Kate Moss are fans, along with Julianne Moore, and you just might catch Sarah Jessica Parker wearing one of his stunning numbers on the red carpet. Even Oprah Winfrey has donned his creations from time to time. Not surprisingly, Charles Chang-Lima is the new It modiste with an eye for modern glamour and a knack for knowing what women—even real ones—really want.

According to FashionFinds.com, he is referred to as the silent killer of the fifth floor at Barney's New York, because Chang-Lima moves product and his designs simply fly off the racks faster than anyone else's. And it's no wonder why: Chang-Lima makes sure his creative imagination, inventive spirit and special handmade touches are apparent in every piece he conjures up.

"Party girl, fashionable and comfortable," says Chang-Lima, describing his design philosophy. Billowing chiffon, dramatic rosettes, deliberately feminine blueprints are what you'll find in his atelier.

Chang-Lima pranced onto the scenes in the mid 90s with his eponymous hit collection highlighting luxurious, all-American sportswear. In Spring 2007, he launched REDUX Charles Chang-Lima, a gamine compilation of dresses and gowns. And a few years back, he combined fashion with philanthropy uniting with Lynn White to found Angels of Hope, a non-profit organization dedicated to creating awareness about women's health issues and providing outreach in local communities. "Angels of Hope was created because there was a period of one year where almost every month I heard about colleagues, either themselves or a member of their family, being diagnosed with cancer," Chang-Lima says. "It was overwhelming and it seemed like there was no end. I always like to do something to pay back, and then this was presented to me."

A whirlwind of cultures and couture, Chang-Lima began his odyssey in Caracas, Venezuela, his birthplace. A stranger to his homeland, mid-youth he and his family packed their bags and headed to Taiwan, where he spent the majority of his early life and education. "Disastrous. It was a real nightmare," Chang-Lima recalls of growing up on the East Asian island. "I could not wait to come to a country where I could be free." Coming from a nation where liberty was nonexistent, the first thing he wanted to do in the States was break out of the box he was once encouraged to fit into. In many interviews, he's expressed that he wants the women he designs for to have a voice.

With freedom in mind, he set out for New York City and graduated from the Parsons School of Design, where he received the prestigious Gold and Silver Thimble Awards. Today, his sexy, delicate and distinctive collections are all the rage, and his life welcomes embellishments on and off the runway. "I am still trying

Left: Putting the finishing touches on one of his Spring 2008 creations.

5 Questions with Charles Chang-Lima:

What inspires your designs? All my friends in my social circle as well as the icons from the past, such as Tina Chow, Audrey Hepburn and Greta Garbo.

Name four famous faces that would be on your best-dressed list. Jennifer Lopez, Gwen Stefani, Sarah Jessica Parker and Ellen DeGeneres.

If you could dress any celebrity, who would it be? Ellen Barkin. She is sophisticated, intelligent, stylish and not trend-driven.

What are some of your favorite fashion brands? Lanvin, The original Jil Sander, Thom Browne.

Where is your favorite place to shop in South Florida? Bal Harbour.

to discover myself, but more than ever, with the maturity of my age and the experience in my life, it helps me focus more on the people that I associate with. I appreciate them a lot more and respect them equally," he says. Chang-Lima admits that his motivation does not stem from money or fame; it comes from someplace much deeper. He's no chameleon, and you won't catch him changing his colors or thin-strapped suspenders for anyone.

When asked what advice he'd pass along to aspiring fashion designers, Chang-Lima snaps, "Stop designing. Keep your mouth quiet. Watch and learn," with a candor, intelligence and charm only he could get away with. And he does. **M**

RYANAIR FA IL TIFO PER L'ITALIA

CHEN: So, Frank, what's your view of the current state of the Earth?

ZAPPA: Not exactly terrific.

CHEN: Why?

ZAPPA: There's a design flaw in the human organism. I can state some absolute proof about why people are not as fantastic as they think they are.

I HAVE NOT FOUND PEOPLE OF GOODWILL ANYWHERE IN ANY TYPE OF BUSINESS, CONNECTED WITH ANY RELIGION, NOBODY WORTH TRUSTING, NOBODY WHO IS SECURE ENOUGH IN THEIR OWN BELIEFS THAT THEY WOULD TRUST THEMSELVES. I HAVE NOT KNOWN ANYONE WHO WASN'T WILLING TO SELL OUT FOR A NICKEL AND ANY ONE OF THEM IS A POTENTIAL MURDERER...

I mean, did you ever see a dog become a lawyer? As far as I'm concerned, any creature other than the human species is better.

CHEN: Well, we're extinctions one to three species every day and it's going to rise to one an hour within ten years, we're poisoning groundwater, eroding our soil base and on and on.

ZAPPA: It couldn't happen to a nicer bunch of guys.

CHEN: Do you think our problems are innate, or do you think it's just our corrupt philosophy?

ZAPPA: Innate. You're not going to fix the design problem. The design problem is built into the human species because it was born to destroy.

CHEN: You don't think there's any way we can evolve?

ZAPPA: I don't think so.

CHEN: Okay, in your music you've referred to the common belief in a deity and that God is dumb.

ZAPPA: Well, we're just dealing with logic there because religions say that man is made in God's image. If that is exactly true, then God is in pretty bad shape. I'm a devout pagan. It's the only religion that works.

CHEN: Why do you think it works?

ZAPPA: It gives your back what you put into it. None of the other religions do.

CHEN: What do you tell your kids about possible Earth death?

ZAPPA: The same thing I'm telling you.

CHEN: There's nothing you can do about it?

ZAPPA: Well, you were born a human being, okay, it's tough tuchas.

CHEN: Don't we have a responsibility to do something about it? What about innocent animals and other life forms? It's not their fault.

ZAPPA: I know it's not their fault. What you can do is try to make life comfortable for them because they are superior. If you have animals that you live with at your house, then you have to respect those animals and realize that they're in a lot better shape than we are and don't be so arrogant because you can talk and write. What's so terrific about the means of communication that we possess? Have you ever heard a politician on television?

CHEN: Right, but don't you think that we can evolve out of that? I mean, we've evolved to this point.

ZAPPA: I'm not convinced that we've evolved at all. I tend to doubt all that stuff because these are fairy tales that were told to us by other people and I never saw another person you could trust. Not to the extent that you could trust a dog or cat. See you have the idea that we've been corrupted, that we started out pure. I don't believe that's true. I think we started off exactly what we are, a really inferior

type of animal life. I think that it's part of the design. We're the only animal species that exhibits the type of arrogance and the special type of incredible ignorance that is rampant in human beings. You have to realize that it's incredibly ignorant to do war. Other animals don't. They kill, but they don't engage in war. And revolutions always make things worse. See, the one thing that sets human beings apart from other animals is their laziness and stupidity as well as their ignorance and their arrogance. We have this fantastic package of all the worse elements in the universe built into "what people are". That's why they become things like lawyers and ministers and accountants. Look at it this way: I think that dogs and cats are wonderful but you can train them to be mean. I think that people are basically pretty

ZAPPA: Well, you're fighting some long odds.

CHEN: We're articulating a revolutionary philosophy, an open-ended belief system that is based on the cause-and-effect laws of nature that govern our survival. We're saying we can and must now take responsibility to create our evolution.

ZAPPA: I don't think that's possible.

CHEN: Why not?

ZAPPA: Because we're destined to destroy ourselves.

CHEN: By who, by what? It's hard for me to believe that we've evolved from apes, etc., to destroy ourselves. We've still got a tiny bit of cleanliness in our brains. We have an objective intelligence. Why can't we use it to create our destiny?

YOU CAN BET EVERYTHING WILL COME TO AN END.
IT'S GOING TO BE UGLY AND IT'S GOING TO BE A MESS,
AND IT'S GOING TO BE SOMETHING THAT SOMEBODY
DID IN THE NAME OF GOD.....

shitty, but you could maybe have a chance to improve them. Maybe. It's easier to make a dog mean than it is to make a human be nice. I see that the only inevitability is that the human species will fulfill its destiny. Which is to destroy everything.

CHEN: That's your bottom line?

ZAPPA: I think that's what people were designed to do. Maybe in a few hundred thousand years or maybe a few million years, we'll be somebody else's oil.

CHEN: So in the meantime, what are we supposed to do?

ZAPPA: I think you should resign yourself to the fact that you're shit.

CHEN: I know that, but I do have a small space in my head where I can generate a little integrity and do something creative for survival.

ZAPPA: Are you going to catch the bomb before it comes down?

CHEN: No, but why wait for the bomb? Look, Mao started with nine people meeting in a library room. I'm not saying that that was a creative revolution, but a benevolent revolution is within the realm of the possible. It can happen, you know, a small group of people can turn things around. It's the idea that have power. I mean I think it's irresponsible to just resign yourself to some black fate, and not even try to do anything about it.

ZAPPA: No, it's not irresponsible, it's realistic. It's not a matter of resignation either. If you look statistically at what the odds are against doing anything to alter all human behavior every place on the planet, you'll see it's not possible, because it's not just them or us. Anybody that

MIAMI BEACH
IS A MAN-MADE
ISLAND THAT
WAS ONCE A
COCONUT GROVE

miami

Miami is all about beaches, bikinis, and bars with bottle service, right? Wrong. Tempting as it might be to sit on South Beach all day with a frozen drink in hand, you would be missing out on the real action happening in the crevices of the inner city where, spurred on by Art Basel and the attention it has drawn to the city, a young group of artists, musicians, and businesses are joining forces, reclaiming the run-down streets, and building one of the most exciting creative communities in America. You may need to dodge a few sketchy characters along the way, but trust us, once you discover the other side of Magic City, you'll come away from Miami with more than just a tan.

BY NATALIE SHUKUR. PHOTOGRAPHED BY NICOLE NICHOLEN

SWEAT RECORDS

TRY AND THINK of a Miami band. Not so easy, is it? There are a few Florida bands that spring to mind, but Miami? We were stumped at Gloria Estefan. That's something that Lauren "Lolo" Reskin, the scarlet-haired proprietor of independent store Sweat Records, hopes to change. A one-woman cheer squad for local music, Reskin is a member of the city's arts and entertainment council and sits on the music taskforce advisory board for the department of film and cultural affairs. "One of the funnest things to me is this scene from 30 Rock where Alec Baldwin's character tells Liz Lemon he's going to Miami," says Reskin, a smile spreading across her face. "She's like, 'Why are you going to Miami?' And he's like 'The same reason everybody goes to Miami: sex and the burgeoning art scene.' Recently, she says, Miami tourism 'stopped promoting girls in bikinis with bottles and

started promoting arts and culture.' And while Art Basel may be putting the city's arts on the map, with new initiatives like Miami Live Music Month launching this November, "they want people to know Miami for its music like they do for the art scene," she adds. Founded in 2005 and based in Little Haiti—a rough-around-the-edges neighborhood which is also home to record label 10k Islands, Honor Roll recording studios, and the city's stalwart indie music venue Churchill's Pub-Sweat is more than just a record store. It's a vegan coffee shop, a venue for monthly music and comedy nights, and a bookstore—in short, it's the beating heart of the Miami music scene. "It's all galvanizing," says Reskin of Miami's cultural landscape. "The last couple of years, the bike thing [Miami Bike Scene] started to happen, there's more urban gardening, there's food trucks, bands are finally coming down here..." Reskin sees Miami as the next Seattle, "in the sense that there's so much cool shit going on that nobody knows about unless you live here," she says. "And even if you live here, you have to tap into it somehow."

MIAMI SOUND MACHINE

ANIMAL TROPICAL

Believes that cursive from swamp rock is alive, this project, with spoken word interludes, and a killer collection of polyester suits make Animal Tropical one of the more exciting bands in Miami. Check out their new EP, *Committed to This*.

myspace.com/animaltropicalband

LIL DAGGERS

Evoking the dark, 80s swagger of the Animals, the designer delivery of Jonathan Richman, the organ-infused stylings of the Lynes, and the very essence of Julian Casavellanos, Lil Daggers are a loose collective of musicians who make hip-shaking garage-rock. Their debut full-length is slated for release in February, but for now you can enjoy songs such as "Evelyn" with the wonderfully romantic chorus, "Let me be your stylist."

mySPACE.com/lildaggers

PLAINS

Plains is Miami's equivalent of a subgenre, with members including Michael McGuinness, founder of record label and record studio House Roll, and Miley from Morphologic Studios. Jorge Gonzalez Graupera from local Latin-punk band Quiero, and Assistant News Republic's John Hancock are down. Their brand of strange, mostly new music is destined for the radio.

mySPACE.com/plainsmi

DEAF POETS

Deaf Poets are two young former shop boys with a penchant for the blues who grew up on a diet of the White Stripes and the Struts and know how to make girls dance. The two-piece may be only eight months old, but they already put on a show as tight as their Crayola-colored jeans.

mySPACE.com/deafpoets

THE HOME STUDIO

of artists Jen Stark and her boyfriend Alvaro Ibarra, a.k.a. Freegums, in little Havana is an explosion of markers, pots of paint, tubes of crazy glue, rafts of colored construction paper, tubes of Play Doh, and kitsch souvenirs, (from a toy llama to a bronze bust of Tutankhamun). It's the creative pied à terre of a pair who are the sartorial embodiment of their work. Stark is the color crusader, today resplendent in a tie-dye top and miniskirt adorned with multicolored ribbons. Her arresting, intricate, rainbow-hued paper sculptures have attracted international attention,

making her one of the most promising young artists on the Miami scene. One of her early pieces, "How to be a Millionaire in 100 Days," involved cutting 10,000 scraps of paper a day for 100 days, resulting in a stunning sculptural mound of confetti. On the table in front of us sit half-finished psychedelic felt-tip drawings, which she will show at the SCOPE satellite fair during Art Basel in December. Freegums's graphic drawings are as detailed as Stark's, but in contrast (like his black skinny jeans and black and white tank top), are devoid of color.

T-shirts are his medium of choice, on which he prints satirical slogans, dizzying patterns, and "crazy creatures." Also in his portfolio: large-scale paintings on wood, album art work for musician Mayer Hawthorne. T-shirts for local band Jacuzzi Boys, and an installation he created for the opening of BAR during last year's Art Basel where he plastered the walls with his brain-bending prints. "We feed off each other's energy," he says of being in a creative couple. "Sometimes we'll both be sitting here drawing and I'll be in the zone, and I'll look up and she'll be in the zone, too."

DE STAGNI

NEKTAR DE STAGNI

BEFORE MOST OF us could tie our shoelaces, Nektar de Stagni was sketching dresses and studying CNN's *Style With Eliza Klenoch*. "I used to tape it on YouTube and watch it over and over again," says the petite fashion designer and jeweler who runs the boutique NDS in Miami's Design District. Despite working with freshwater pearls, lapis lazuli, coral, and black diamonds, her irreverent jewelry is surprisingly affordable. "I want people to be able to wear them," she says, picking up a bracelet made of neon plastic and smoky quartz. "My approach to design is often about finding a playful balance between opposites. It's a pearl necklace with shark teeth, or a silk blouse with sweat pants. It's about contrasting contemporary ideas with vintage, even ancient sensibilities." NDS, a space she shares with her boyfriend, painter and sculptor Martin Opel, is an ever-evolving canvas. Currently it's operating as a "jewelry salon" selling pieces by BLESS alongside the

Artist Editions collection for which de Stagni commissioned art world luminaries both local (Herman Bas) and international (Tom Sachs). "The outcome of our projects is often an experimental hybrid between art and design," says de Stagni. And Miami is fertile ground for the couple. "I love Miami's history, how it's gone in and out of fashion through the decades," she says. "The rearing '20s with its lax attitude towards prohibition, the 'Hollywood' '50s, decadent '80s, Versace '90s, and now a great art boom. Its new architecture is evolving in stark contrast to its Deco heritage, it's a transient, teenage city with an eclectic culture, and lush beaches to top it off. There's no place like it!" nektardestagni.com

Chelsea Pier Skatepark in West Manhattan is 15,000 square feet of concrete transition. The park holds numerous contests a year including COA's West Coast Caramel.

If we could first know where we are, and whither we are tending, we could then better judge what to do, and how to do it. We are now far into the fifth year, since a policy was initiated, with the avowed object, and confident promise, of putting an end to slavery agitation. Under the operation of that policy, that agitation has not only, not ceased, but has constantly augmented. In my opinion, it will not cease, until a crisis shall have been reached, and passed. "A house divided against itself cannot stand." I believe this government cannot endure, permanently half slave and half free. I do not expect the Union to be dissolved — I do not expect the house to fall — but I do expect it will cease to be divided. It will become all one thing or all the other.

"A house divided against itself cannot stand."

I believe this government cannot endure, permanently half slave and half free. I do not expect the Union to be dissolved — I do not expect the house to fall — but I do expect it will cease to be divided. It will become all one thing or all the other.

Either the opponents of slavery, will arrest the further spread of it, and place it where the public mind shall rest in the belief that it is in the course of ultimate extinction; or its advocates will push it forward, till it shall become alike lawful in all the States, old as well as new — North as well as South.

Have we no tendency to the latter condition?

Let any one who doubts, carefully

contemplate that now almost complete legal combination — piece of machinery so to speak — compounded of the Nebraska doctrine, and the Dred Scott decision. Let him consider not only what work the machinery is adapted to do, and how well adapted; but also, let him study the history of its construction, and trace, if he can, or rather fail, if he can, to trace the evidence of design and concert of action, among its chief architects, from the beginning.

Partial support refers to not supporting the `break-before`, `break-after`, `break-inside` properties. Webkit browsers do have equivalent support for the non-standard `-webkit-column-break-*` properties while Firefox supports `page-break-*` to accomplish the same result (but only the `auto` and `always` values).

Up to Design Issues

There is a currently (2014, 15) a massive move to get the web secure in the sense of encrypted and authenticated. Of encryption and authentication, the encryption part is the part which has garnered the most attention, both among its promoters and those in governments [who protest](#) against it has giving too much power to users, criminals included, compared with law enforcement. Mary Ellen Mark

"Sometimes I try and intervene, but you have to realize, as a **PHOTOGRAPHER** you can't expect that your intervening will actually **DO** anything!"

DAM

ed

Mary Ellen Mark has made some of America's most iconic photographs among them is the collection of photographs of the Carson family and one of them being the devastating moment of death being in their car with their two young children. Mary Ellen Mark followed the Carson family Linda, Owen, Tracy and Jesse both in the 80's and again in the 90's during this time she did a series of photographs capturing their lives on the streets.

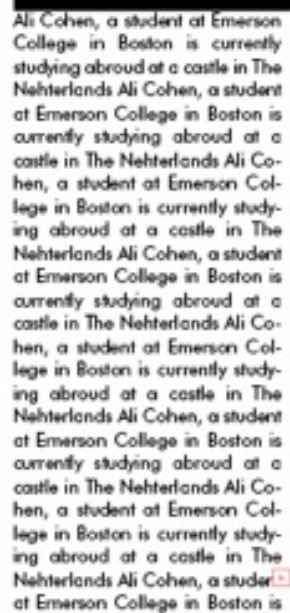

The Carson family had granted Mark full access to their lives for 10 days this allowed Mark to push at the boundaries of documentary photography and control of the way, scenes and circumstances of themselves. She Mark managed to capture both the still and the everyday into genuine heart wrenching, empathetic revealing images. One of Mark's extraordinary talents as a documentary photographer is her ability to gain trust from her subjects especially with the Carson family, which enabled her to continue photographing them over a number of years.

BRUTAL STANDING

Like the legendary Phoenix, the Barbican rose from the ashes caused by bombing during the Second World War.

The idea of the centre was born in the 1960s, an era of renewed optimism and fresh ideas, and an exciting time for the arts. New architectural styles were emerging, including the 'brutalism', a bold, modernist architectural style that characterises the Barbican as a whole. Built at the northeast corner, construction of the 40-acre residential, arts, and cultural complex in the City of London began in 1971. It was opened by Her Majesty the Queen on 3 March 1982, and she described it as 'one of the wonders of the modern world'. It contains the Barbican Estate, the Barbican Centre, the City of London School for Girls, the Museum of London, and the Guildhall School of Music and Drama. It includes three of London's tallest buildings: Cromwell, Shakespeare and Lauderdale towers, which measure 123 metres (403 feet) each. The architects overseeing the development were Chamberlain, Powell and Bon and the construction began in 1963. The first buildings to appear were office blocks on London Wall, followed by the residential terrace blocks and towers. These were officially opened in 1969, but not completed until 1975. It remains a symbol of the previous generation's efforts to change the way we live through architecture, a concept still demonstrated now.

Europe through a student's eyes

04-08 esq 145

As head of U.S. Central Command, Admiral William "Fox" Fallon is in charge of American military strategy for the most troubled parts of the world, including the entire Middle East. As hawks in Congress and at the Pentagon planned for war with China, Fallon instead urged cooperation with the Chinese. And now, as the White House has been escalating the war of words with Iran, and seeming ever more determined to strike militarily before the end of this presidency, the admiral has instead urged restraint and diplomacy. In the end, who will prevail, the president or the admiral?

Grace Hopper

Grace Murray Hopper (December 9, 1906 – January 1, 1992) was an American computer scientist and United States Navy rear admiral. A pioneer in the field, she was one of the first programmers of the Harvard Mark I computer, and invented the first compiler for a computer programming language. She popularized the idea of machine-independent programming languages, which led to the development of COBOL, one of the first modern programming languages. She is credited

with popularizing the term "debugging" for fixing computer glitches (inspired by an actual moth removed from the computer). The U.S. Navy destroyer USS Hopper (DDG-70) is named for her, as was the Cray XE6 "Hopper" supercomputer at NERSC.

Grace Hopper

Grace Murray Hopper (December 9, 1906 – January 1, 1992) was an American computer scientist and United States Navy rear admiral. A pioneer in the field, she was one of the first programmers of the Harvard Mark I computer, and invented the first compiler for a computer programming language. She popularized the idea of machine-independent programming languages, which led to the development of COBOL, one of the first modern programming languages. She is credited with popularizing the term "debugging" for fixing computer glitches (inspired by an actual moth removed from the computer). The U.S. Navy destroyer USS Hopper (DDG-70) is named for her, as was the Cray XE6 "Hopper" supercomputer at NERSC.

Feedback

¹ Partial support in IE9 refers to supporting "vm" instead of "vmin".

² Partial support refers to not supporting the "vmax" unit.

ALVA NOTO

Kun at kalde Carsten Nicolai for musiker ville være en stor underdrivelse. Hans undersøgelser af lydens frekvenser, struktur og materialisering gør ham til meget mere end blot en musiker. Alva Noto befinder sig i grænselandet mellem videnskab, medier, visuel kunst og lyd.

As head of U.S. Central Command, Admiral William "Fox" Fallon is in charge of American military strategy for the most troubled parts of the world, including the entire Middle East. As hawks in Congress and at the Pentagon planned for war with China, Fallon instead urged cooperation with the Chinese. And now, as the White House has been escalating the war of words with Iran, and seeming ever more determined to strike militarily before the end of this presidency, the admiral has instead urged restraint and diplomacy. In the end, who will prevail, the president or the admiral?

Magazines and the Web

In 1989 I delivered a proposal to CERN for the system that went on to become the world wide web. This year, we celebrate the web's 25th birthday.

Like the average 25-year-old, the web has been shaped by a vast array of influences – in fact, it was built through the efforts of millions. So this anniversary is for everyone. We should look proudly on what we've built. And as with most twentysomethings, the web's full potential is just starting to show. A radically open, egalitarian and decentralised platform, it is changing the world, and we are still only scratching the surface of what it can do. Anyone with an interest in the web's future – and that's everyone, everywhere – has a role in ensuring it achieves all it can.

Looking back for a moment, what is the web we celebrate this year? It is not the wires connecting our computers, tablets and televisions. Rather, it is the largest repository for information and knowledge the world has yet seen, and our most powerful communications tool. The web is now a public resource on which people, businesses, communities and governments depend. It is vital to democracy and now more critical to free expression than any other

the analogue era. These connections transform presidential elections, overturn authoritarian regimes, power huge businesses and enrich our social networks.

Through this concept of linking, the web has grown up significantly in 25 years, from a collection of interlinked static documents to a much richer environment of data, media and user interaction. Millions of developers are using this open web platform to create distributed applications that can run on desktops, phones, tablets, televisions, automobiles, digital billboards, watches... everywhere.

Very soon, millions more sensors, appliances and other devices large and small will take the web to new places. The potential excites me and concerns me at the same time – that makes the web worth our ongoing stewardship. We must build and defend it now so that those who come to it later will be able to create things that we cannot ourselves imagine.

I believe that the future of the web is under threat from some governments that may abuse their powers, some businesses that may try to undermine the open market, and from criminal activity. In recent years we have seen a steady increase in censorship of the web by governments around the world. We've seen a proliferation of corporate walled gardens, excessively punitive laws pertaining to copyright and computer misuse, and attempts to undermine or disregard net neutrality. But mass surveillance, and particularly the reported attempts by intelligence agencies in the US and UK to break commercial encryption systems to make it easier to spy on people, is the most worrying of all, because it could engender a loss of trust and lead to Balkanisation of the web. We risk losing all that we have gained from the web so far and all the great advances still to come. The future of the web depends on ordinary people taking responsibility for this extraordinary resource and challenging those who seek to manipulate the web against the public good.

The good news is that the web has openness and flexibility woven into its fabric. The protocols and programming languages under the hood – including URLs, HTTP, HTML, JavaScript and many others – have nearly all been designed for evolution, so we can upgrade them as new needs, new devices and new business models expose current limitations. I have several goals for the web of the next quarter century. Through them, I believe we can continue to advance our society and reduce some of the threats posed to and by a system capable of such reach and power.

HTTP://TIMELINE
THE HISTORY OF
THE WORLD WIDE WEB

A WORLD-CHANGING PROPOSAL MARCH 1989

Tim Berners-Lee, a physicist at Cern, wrote *Information Management: A Proposal*, a paper for a communication system. His boss described it as "vague, but exciting".

THE WORLD WIDE WEB LAUNCHES AUGUST 1991

Berners-Lee's proposal to share information over networked computers became a reality, using one of Steve Jobs's NeXTSTEP computers.

PHOTO UPLOADS ARE BORN JULY 1992

Berners-Lee uploaded a photo of his colleagues' parody pop group, Les Horribles Cernettes – widely described as the web's first.

THE FIRST POPULAR BROWSER SEPTEMBER 1993

Although Berners-Lee's WorldWideWeb or Nexus (in 1990) was the first browser, Marc Andreessen's Mosaic popularised the web.

For MTV, the answer is \$10,000 and a country of digitally minded students looking to make a global difference. MTV and mtvU are announcing their next step of the "Against Our Will" campaign. The program, calls on students to create an innovative digital tool that will raise awareness and hopefully stop slavery. The rules are wide open, allowing the contestants to build whatever they think will do the most good, whether that's a video game, a text service, a widget or even a clever use of an API. The winning team will get a \$10,000 prize and the chance to develop the idea.

Translate.

Don't Transfer.
