33	33	
34		− Second new feature (2 of 2)
	34	+ Array helper (2 of 2)
35	35	
36	36	
	37	+ Ember 3.8 introduces the `{{array}}` helper to create an array in a template. This helper works in similar fashion to the already existing `{{hash}}` helper.
	38	+
	39	+ The helper would be invoked as `{{array arg1 ... argN}}` and return the value `[arg1, ..., argN]`. For example, `{{array 'a' 'b' 'c'}}` would return the value `['a', 'b', 'c']`.
	40	+
	41	+ Read the [original RFC](https://github.com/emberjs/rfcs/blob/master/text/0318-array-helper.md) for more information.
