Righting a Sinking Ship: Troubleshooting systems with available data

Laura Santamaria, Developer Advocate

@nimbinatus | #Halihax

Now What?

Step 0:

Panic!

Step 0:

Don't Panic!

90% Perseverance +
Patience

10% Luck

Maybe some knowledge
sprinkled on

Step 1:

Get Data

@nimbinatus | #Halihax

Lucky

Commands

\$ journalctl -xe

\$ docker logs <container>

\$ kubectl logs <object>

\$ minikube logs

\$ oc logs -f <object>

@nimbinatus | #Halihax

Not Lucky

Step 2:

Analyze

Tools

Step 3:

Act

@nimbinatus | #Halihax

wait!

Step 3:

Backup

Step 4:

Act

@nimbinatus | #Halihax

Try it!

Step 5:

Fail

Common Reasons

You can still fix it!

Step 6:

Repeat as
necessary

What if you're stuck?
