The dark side of the Grid

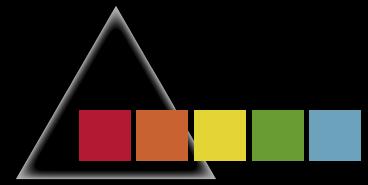

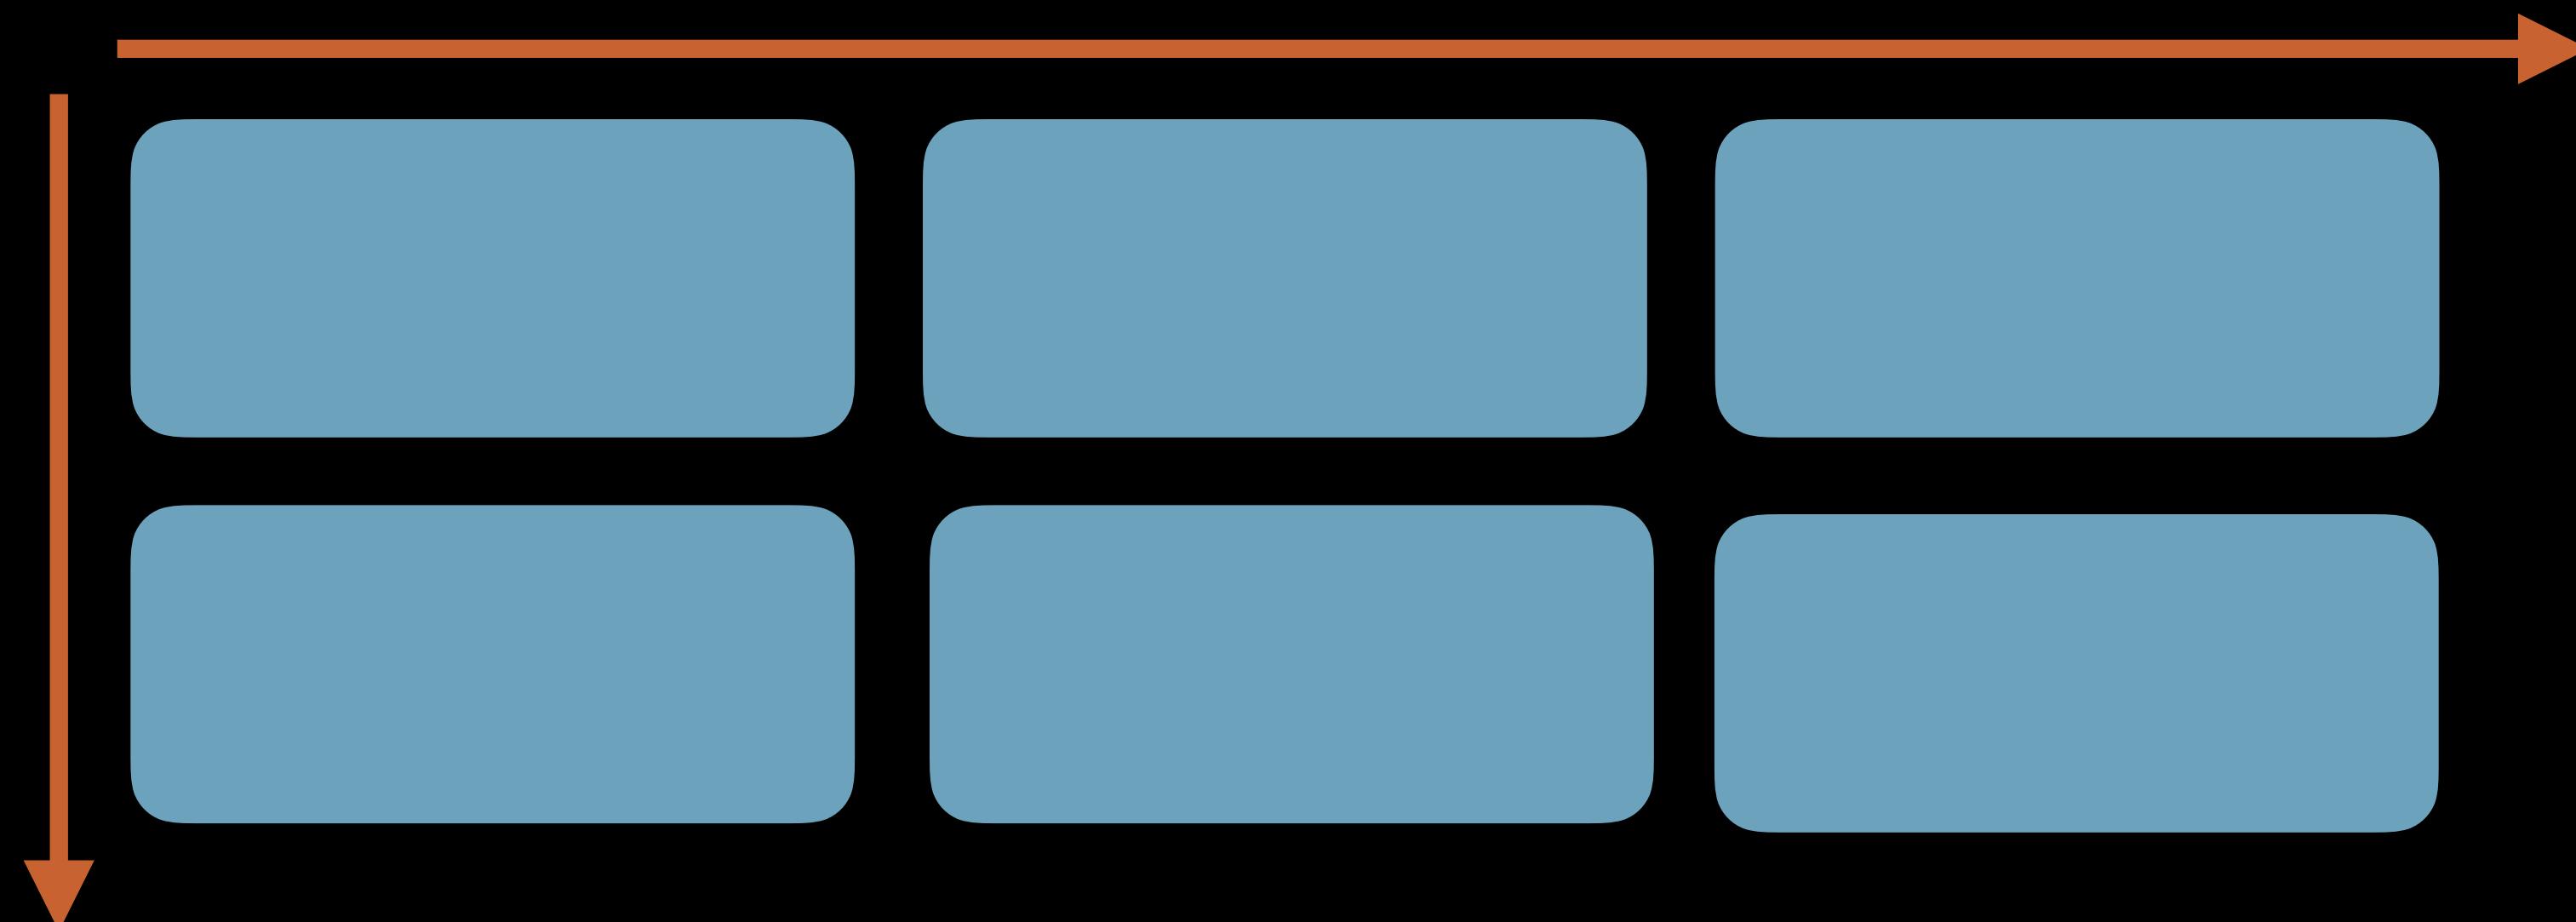

Was ist CSS Grid Layout?

CSS Grid ist ein auf Rastern basierendes Layout-System, das für zweidimensionale Layouts designt wurde.

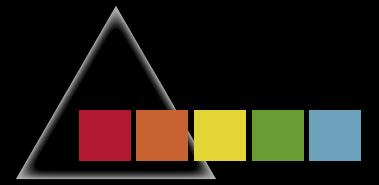

Was ist CSS Grid Layout?

CSS Grid ist ein auf Rastern basierendes Layout-System, das für zweidimensionale Layouts designt wurde.

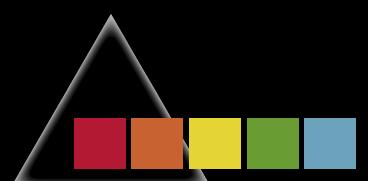

Was ist besonders an Grid?

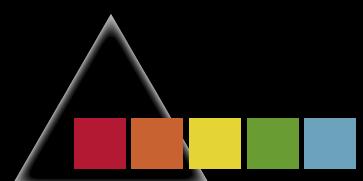

Was ist besonders an Grid?

- Das erste richtige Layout-System in CSS.

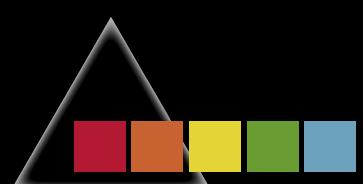

Was ist besonders an Grid?

- Das erste richtige Layout-System in CSS.
- **float, display: inline-block, position, display: table** waren ursprünglich nicht für das Bauen von Layouts konzipiert.

Was ist besonders an Grid?

- Das erste richtige Layout-System in CSS.
- **float, display: inline-block, position, display: table** waren ursprünglich nicht für das Bauen von Layouts konzipiert.
- Irgendwie wie table-Layouts, aber responsive, flexibel und in CSS formuliert und nicht in HTML.

Y

oung photographer Pablo Baquedano spent three seasons roaming the Ardennes, a forest region that spreads throughout France, Luxembourg, and Belgium. Over winter, spring, and summer, the 28-year-old Baquedano witnessed first hand a region in crisis, suffering from a post-industrial economic collapse and a declining population. In the Ardennes there almost as many grandparents as there are children now. That's how many people have left, faced otherwise with a bleak future in a region stuck in terminal decline. Pablo spent his time in the Ardennes capturing the daily life of those living in a region, capturing the truth and beauty of the lives of those France forgot. The photos, in stark black and white, immortalize the romantic banality of small town life, but the images are neither maudlin nor judgemental, they're picturesque and picaresque. Your photography has a very journalistic approach. What makes you want to work in this way? From the start, the photographers I have always liked the most had this approach to their work. I'm good when I'm close to people. If I'm not, I'm bored. To me, photography is about exchange. Generally my projects are born out of discussion, a piece of information, or an encounter. When I'm shooting, I'm in touch with the people I photograph, I like to take the time to chat with them over coffee or a glass of wine. What is the common thread between your different projects? People. It needs to be about life. What I like is when my images feel timeless. The ephemeral nature of events doesn't really attract me that much. For your latest project, you have traveled the Ardennes.

What is the common thread between your different projects? People. It needs to be about life. What I like is when my images feel timeless. The ephemeral nature of events doesn't really attract me that much. For your latest project, you have traveled the Ardennes. Why did you choose this region of France? I wanted to find a region of France that felt forgotten. I was talking to my brother-in-law, who had worked there as a professor, and the idea began to take shape. For me it was a real discovery and the idea of talking about a whole region in this way was something new for me, it was exciting.

The region has been very devastated by the economic crisis. How did you perceive it? My goal was to let the images talk for themselves, but of course, the crisis is everywhere there. Chatting with John Paul Mayette, who works in a co-operative activity defending the Ardennes metalworks, made me aware of the damages caused by the crisis. People there are engaged in a constant fight to preserve their expertise, their lives and their communities, but in the end, the crisis is always stronger than them. habitants a new face over time.

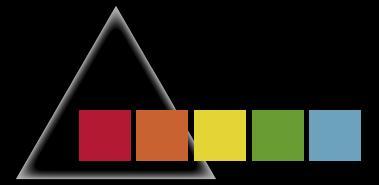

Yet I think I have managed to show that life in the Ardennes continues, thanks to men like John Paul. It was important to show the period of the time I'd spent there, but in the end, the seasons were more a framework for the images than a creative asset in itself. interests me is that the changing seasons give landscapes and inhabitants a new face over time.

Some of the very most touching pictures in the series depict the youth of Ardennes. What's it like to be young there? For the youth of the Ardennes, it is difficult to imagine a future in this place. Some even say that the Ardennes feels like a prison to them. Yet, there are a lot of people trying to find solutions to

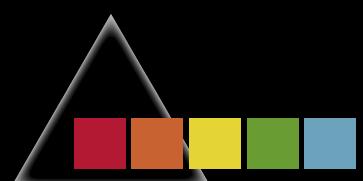

“What I like
is when my images feel
timeless.

PINK FLOYD FUN FACT #2

736 Wochen in den Charts

A black and white photograph of the rock band Pink Floyd. From left to right, it shows Roger Waters, Nick Mason, Syd Barrett (partially visible), and David Gilmour. They are all wearing dark clothing and have their eyes closed, suggesting they are performing or in a meditative state. The background is dark and textured.

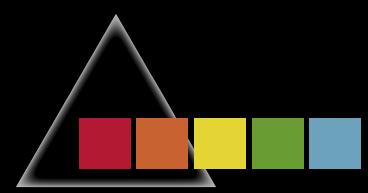

PINK FLOYD FUN FACT #2

736 Wochen in den Charts

The Dark Side of The Moon war 736 Wochen in den amerikanischen Billboard Charts. Das sind mehr als 14 Jahre!

DOKUMENTSTRUKTUR ABFLACHEN

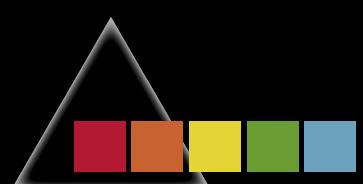

„I believe there will be a strong temptation,
especially with Grid, to flatten out document
structure in order that all elements become a child
of the element with the Grid declared.
Making layout simple, but at what cost?“

-Rachel Andrew

@mmatuzo

CSS display: contents WD

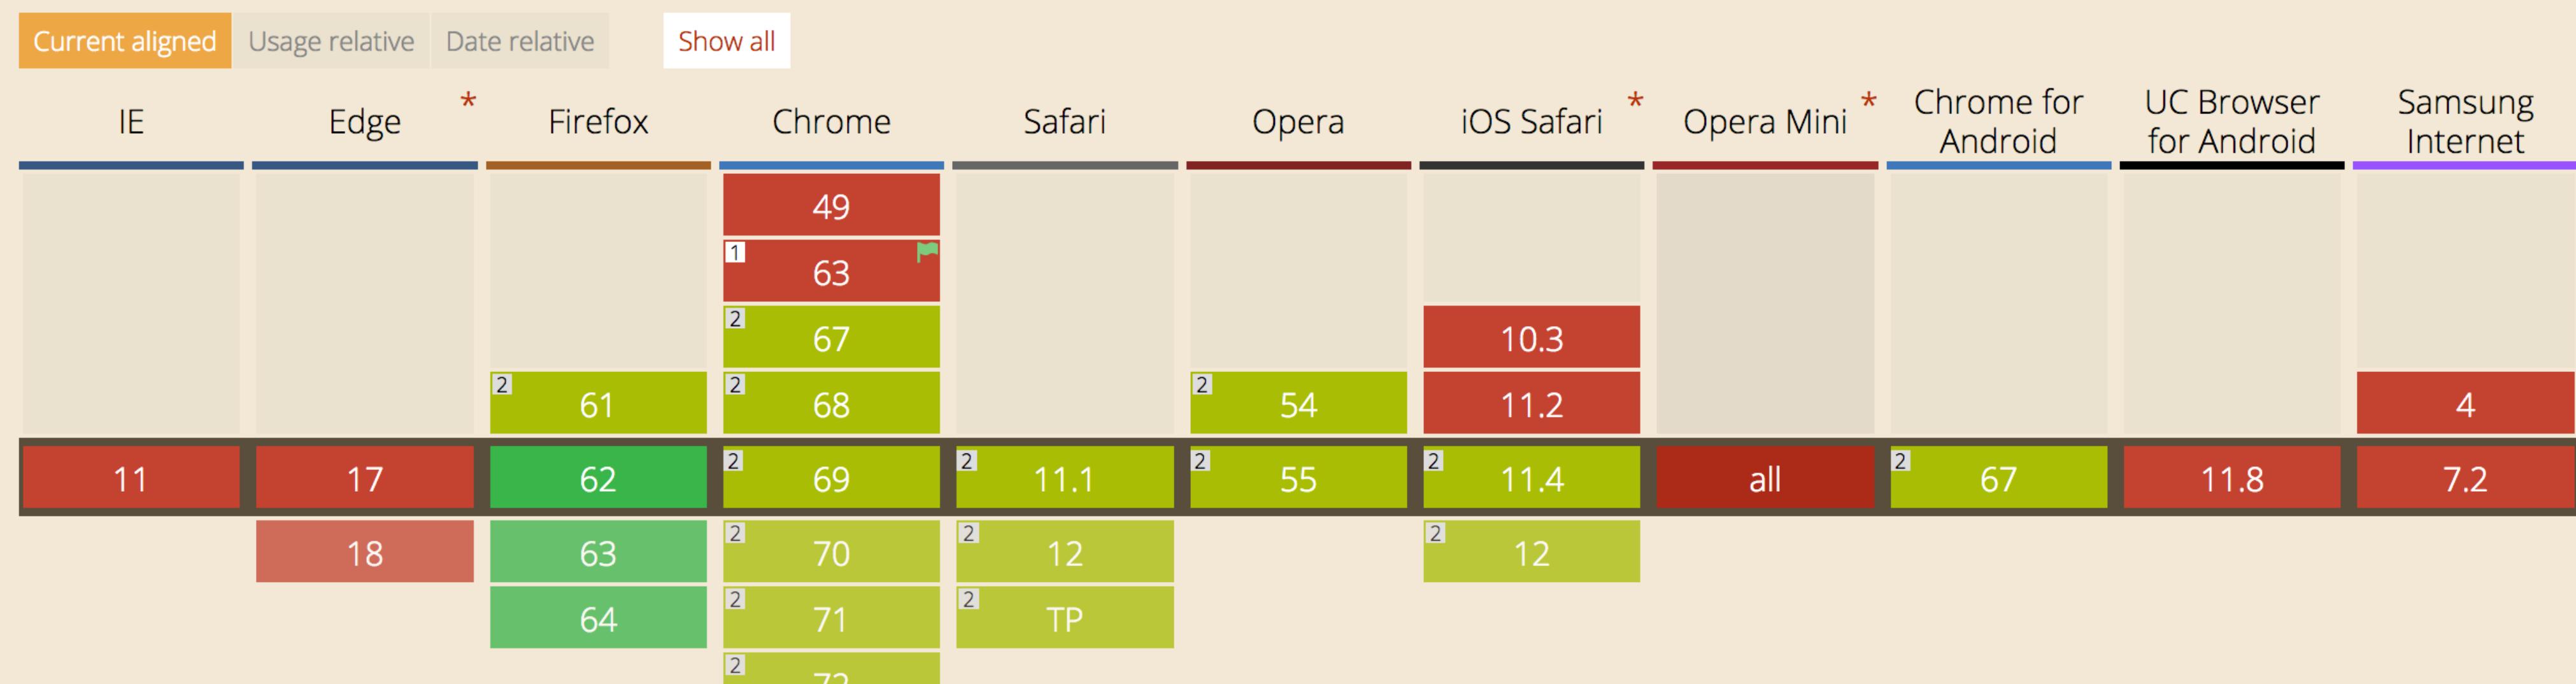

Usage

% of all users

Global

0.1% + 72.91% = 73.01%

display: contents causes an element's children to appear as if they were direct children of the element's parent, ignoring the element itself. This can be useful when a wrapper element should be ignored when using CSS grid or similar layout techniques.

Notes

Known issues (1)

Resources (6)

Feedback

¹ Enabled in Chrome through the "experimental Web Platform features" flag in chrome://flags

² Partial support refers to severe implementation bug that renders the content inaccessible. <https://hiddedevries.nl/en/blog/2018-04-21-more-accessible-markup-with-display-contents>

display: contents; wird in allen großen Browsern außer Edge unterstützt

Léonie
@LeonieWatson

Following

⚠ #CSS `display:contents;` will remove the element from the accessibility tree, so please don't use it when the semantics of the element are important. More on this from [@Aardrian](#)

Display: Contents Is Not a CSS Reset

CSS resets are a collection of CSS styles that undo the default browser styling of many or most HTML elements. Recently I have seen cases of developers using `display: contents` on lists and...

Autoprefixer ignoriert standardmäßig Grid-Eigenschaften.

The screenshot shows a code editor interface with two tabs: `# main.css` and `# main.prefixed.css`. Both tabs are under the title `main.css — darksideofthegrid`.

`# main.css` content:

```
1 .grid {  
2   display: grid;  
3   grid-template-columns: 100px 100px 100px;  
4   grid-template-rows: 200px 200px 200px;  
5   grid-gap: 10px;  
6 }  
7
```

`# main.prefixed.css` content:

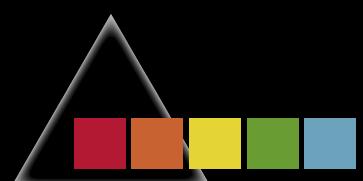

```
1 .grid {  
2   display: grid;  
3   grid-template-columns: 100px 100px 100px;  
4   grid-template-rows: 200px 200px 200px;  
5   grid-gap: 10px;  
6 }  
7
```

The code editor has a dark theme. The status bar at the bottom shows: `Ln 1, Col 8`, `Spaces: 2`, `UTF-8`, `LF`, `CSS`, `Prettier`, and icons for a gear, a smiley face, and a bell.

Autoprefixer ignoriert standardmäßig Grid-Eigenschaften.

```
$ autoprefixer
```

```
module.exports = {  
  plugins: [  
    require('autoprefixer')({  
      grid: true,  
    })  
  ]  
}
```

The screenshot shows a dark-themed code editor interface with two tabs open: `# main.css` and `# main.prefixed.css`. The `main.css` tab contains the following CSS code:

```
1 .grid {  
2   display: grid;  
3   grid-template-columns: 100px 100px 100px;  
4   grid-template-rows: 200px 200px 200px;  
5   grid-gap: 10px;  
6 }  
7
```

The `main.prefixed.css` tab contains the following CSS code, which is a copy of the main.css file but with vendor prefixes added:

```
1  
2  
3  
4  
5  
6  
7  
8  
9  
10  
11  
12  
13
```

The status bar at the bottom of the editor displays the following information: Ln 1, Col 8, Spaces: 2, UTF-8, LF, CSS, Prettier, and icons for settings, search, and notifications.

Autoprefixer mit `grid: true` Setting.

The screenshot shows a code editor with two files open:

- main.css** (active tab):

```
1 .grid {  
2   display: grid;  
3   grid-template-columns: 100px 100px 100px;  
4   grid-template-rows: 200px 200px 200px;  
5   grid-gap: 10px;  
6 }  
7
```
- main.prefixed.css**:

```
1 .grid {  
2   display: -ms-grid;  
3   display: grid;  
4  
5   -ms-grid-columns: 100px 100px 100px;  
6   grid-template-columns: 100px 100px 100px;  
7  
8   -ms-grid-rows: 200px 200px 200px;  
9   grid-template-rows: 200px 200px 200px;  
10  
11  grid-gap: 10px;  
12 }  
13
```

The code editor has a dark theme with orange highlights for the active tab and selected code. The status bar at the bottom shows: Ln 1, Col 8, Spaces: 2, UTF-8, LF, CSS, Prettier, and some icons.

Autoprefixer mit grid: true Setting.

The screenshot shows a dark-themed code editor with two tabs open: `# main.css` and `# main.prefixed.css`. The `main.css` file contains the following CSS code:

```
1 .grid {  
2   display: grid;  
3   grid-template: 100px 100px 100px / 200px 200px 200px;  
4   grid-gap: 10px;  
5 }  
6
```

The `grid-template` line is highlighted with a light gray background. The `main.prefixed.css` file contains the following CSS code:

```
1  
2  
3  
4  
5  
6  
7  
8  
9  
10  
11
```

The status bar at the bottom of the editor displays the following information: Ln 5, Col 1 (94 selected) Spaces: 2 UTF-8 LF CSS Prettier 😊 🔔

Gaps werden in IE 10 und 11 durch Spalten bzw. Reihen imitiert.

The screenshot shows a dark-themed code editor with two tabs open: `# main.css` and `# main.prefixed.css`. The `main.css` file contains the following CSS:

```
1 .grid {  
2   display: grid;  
3   grid-template: 100px 100px 100px / 200px 200px 200px;  
4   grid-gap: 10px;  
5 }  
6
```

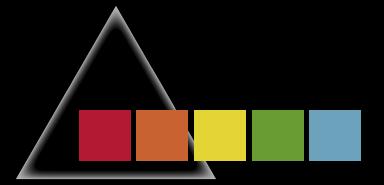

The `main.prefixed.css` file contains the following CSS, which includes vendor prefixes for Microsoft Edge:

```
1 .grid {  
2   display: -ms-grid;  
3   display: grid;  
4  
5   -ms-grid-rows: 100px 10px 100px 10px 100px;  
6   -ms-grid-columns: 200px 10px 200px 10px 200px;  
7  
8   grid-template: 100px 100px 100px / 200px 200px 200px;  
9   grid-gap: 10px;  
10 }  
11
```

The status bar at the bottom indicates: Ln 5, Col 1 (94 selected) Spaces: 2 UTF-8 LF CSS Prettier 😊 🔔

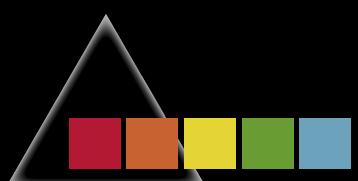

Gaps werden in IE 10 und 11 durch Spalten bzw. Reihen imitiert.

Internet Explorer Unterstützung stellt für viele EntwicklerInnen noch eine große Hürde da.

„I don't think we owe it to any users to make it all exactly the same. Therefore we can get away with keeping fallbacks very simple. My hypothesis: users don't mind, they've come for the content.“

-Hidde de Vries

There is no dark side of the ~~moon~~-grid really.
Matter of fact it's all dark.

Verantwortlicher Umgang mit Grid

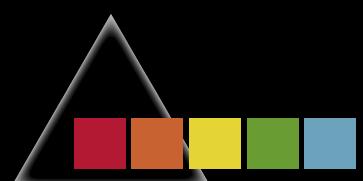

Verantwortlicher Umgang mit Grid

- Eigenschaften wie **grid-auto-flow: dense**; oder andere Techniken, die die visuelle Reihenfolge verändern, bei interaktionsintensiven Komponenten vermeiden.

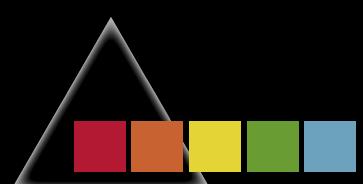

Verantwortlicher Umgang mit Grid

- Eigenschaften wie **grid-auto-flow: dense**; oder andere Techniken, die die visuelle Reihenfolge verändern, bei interaktionsintensiven Komponenten vermeiden.
- Komponenten mit dem Keyboard testen.

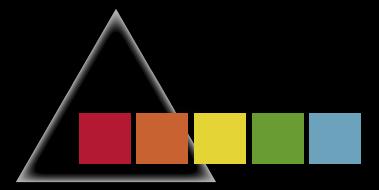

Verantwortlicher Umgang mit Grid

- Eigenschaften wie **grid-auto-flow: dense**; oder andere Techniken, die die visuelle Reihenfolge verändern, bei interaktionsintensiven Komponenten vermeiden.
- Komponenten mit dem Keyboard testen.
- Nicht die Semantik verschlechtern und die Dokumentstruktur abflachen.

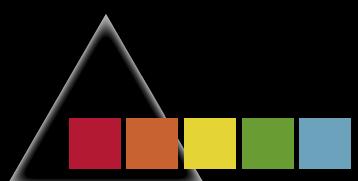

Verantwortlicher Umgang mit Grid

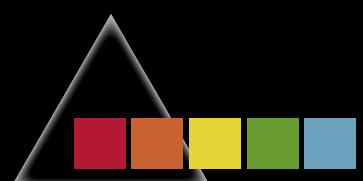

Verantwortlicher Umgang mit Grid

- Wenn man Autoprefixer verwendet, dann so, dass zu jeder Zeit für jede/n im Team klar ist, was passiert.

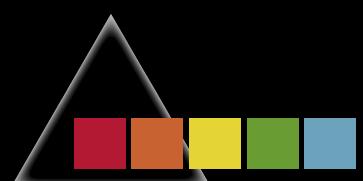

Verantwortlicher Umgang mit Grid

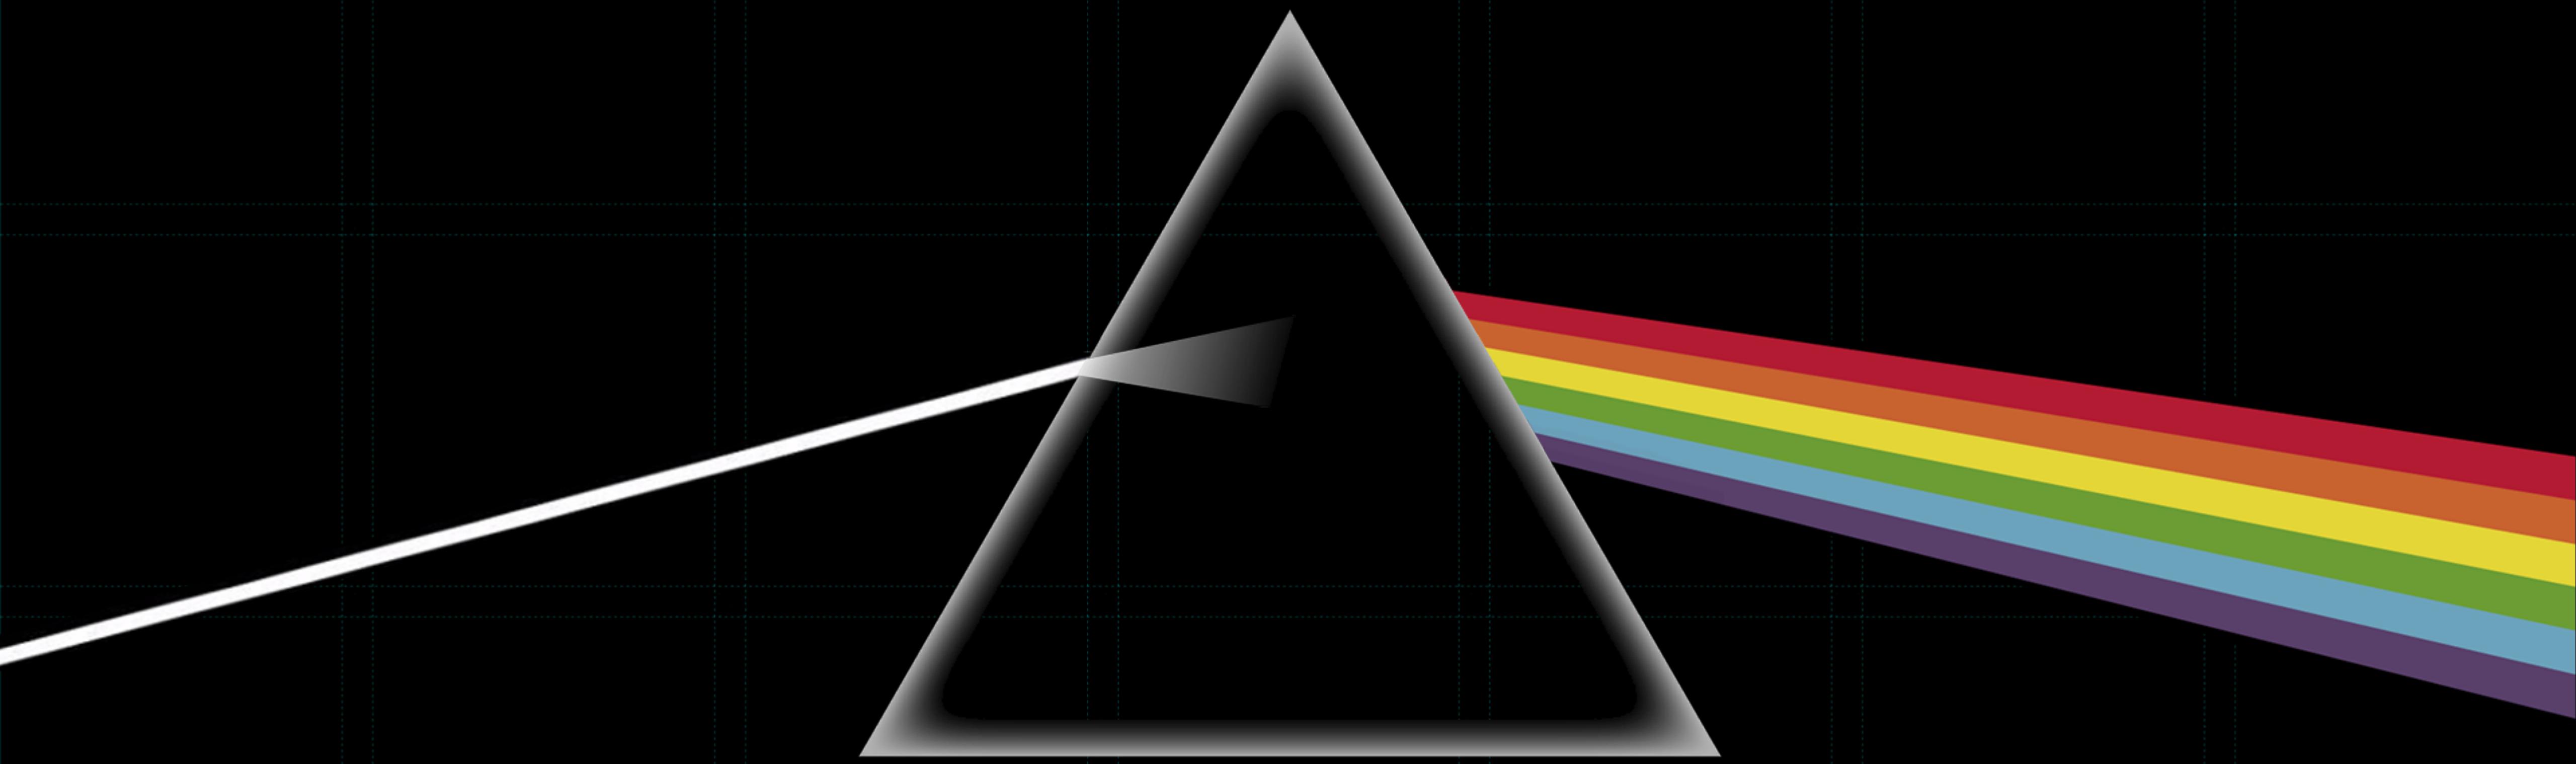

- Wenn man Autoprefixer verwendet, dann so, dass zu jeder Zeit für jede/n im Team klar ist, was passiert.
- Sicher gehen, dass die Komponenten auch in älteren / eingeschränkteren Browsern funktionieren.

Verantwortlicher Umgang mit Grid

- Wenn man Autoprefixer verwendet, dann so, dass zu jeder Zeit für jede/n im Team klar ist, was passiert.
- Sicher gehen, dass die Komponenten auch in älteren / eingeschränkteren Browsern funktionieren.
- Die Macht von Progressive Enhancement ausnutzen.

Danke
