AlphaCSP

6 yrs 1 mo

- **Training Division Manager**

Jan 2007 - Oct 2010 · 3 yrs 10 mos

- Development and delivery of most of AlphaCSP courses on different Java-related topics and in different levels;
Among the customers: IDF, Cisco, IDI direct insurance, Rafael, PayPal, Opal, BMC, Malam, Checkpoint, HP Software and others.
- Development and delivery Artifactory training for JFrog customers world-wide;
Among the customers: Cisco, Sita, Ansys and others.
- JTeam – Extremely successful internal training program in AlphaCSP – ¼ of AlphaCSP personnel are JTeam alumni.
- Java department technical lead at MalamTeam Training Center – development and delivery of all Java courses.
- Named one of the best speakers in all AlphaCSP events through the years.

- **Consultant & Architect**

Jan 2007 - Oct 2010 · 3 yrs 10 mos

Consulting, building architectures and design, mentoring, and developing in various Java-related projects on the topics, described in Specialties section above;
Among the customers: BMC, Logia, IDF, Starhome (Comverse), Malam, Cisco, IDI, IDIT, Isracard, Virtual Tweens, Amobee, SolarEdge, Checkpoint, Cadence, Evolgen, ExLibris, Retalix, Schema, Time To Know and others.

- **Senior Developer**

Oct 2004 - Jan 2007 · 2 yrs 4 mos

As a Linux system administrator, how do I shift my career to DevOps?

Disha Rathod

DevOps Online Trainer (2013–present) · 5y

Hi,

Being a Linux administrator will help you to easily get started with DevOps because it starts with learning Linux fundamentals, DevOps also includes cloud computing concepts like AWS. More importantly DevOps is all about tools, it comes with hundreds of tools. **Git**, Chef, Maven, Jenkins, Puppet, Docker are modern and most popular DevOps tools.

So in order to move into DevOps industries you should have prominent knowledge following concepts

1. Linux Fundamental; Shell Scripting
2. Cloud Computing (AWS)
3. DevOps Fundamentals
4. Software Development Life Cycle
5. Continuous Integration, Deployment, and Delivery.

Manifesto for Software Craftsmanship

Raising the bar.

As aspiring Software Craftsmen we are raising the bar of professional software development by practicing it and helping others learn the craft. Through this work we have come to value:

Not only working software,
but also **well-crafted software**

Not only responding to change,
but also **steadily adding value**

Not only individuals and interactions,
but also **a community of professionals**

Not only customer collaboration,
but also **productive partnerships**

That is, in pursuit of the items on the left we have found the

SPEAKING.JBARU.CH

A large, diverse crowd of people is shown in a state of high excitement and celebration. Many individuals have their arms raised in the air, and their faces are lit up with wide, joyful smiles and open-mouthed laughter. The background is filled with more people, creating a sense of a large-scale event or conference. The overall atmosphere is one of collective joy and achievement.

**EVERYBODY WANTS TO BE A
"PLATFORM ENGINEER"**

How Is Platform Engineering Different from DevOps and ...

Sep 16, 2022 — **Platform engineering** is the next stage of the **DevOps** evolution. It encompasses the best intentions of the cultural shifts that came before it.

TechTarget

<https://www.techtarget.com> › searchitoperations › tip › Pl...

Platform engineering vs. DevOps: What's the difference?

Apr 13, 2023 — **DevOps** teams create the software, with a focus on accelerating delivery and enhancing quality, whereas **platform engineers** implement and manage ...

People also ask

Is platform engineering same as DevOps? [@JBARUCH](#) [#DPEOps](#)[@DEV2NEXT](#)[SPEAKING.JBARU.CH](#)

what is platform engineering in a sentence?

Platform engineering is about building and managing scalable infrastructure and services that enable developers to efficiently deploy and run applications.

so, someone who writes all the yaml files for the organization?

Haha, you could say that! They often handle YAML files for Kubernetes, CI/CD pipelines, and config management, but their role goes beyond just "YAML engineering." They set the stage for devs to do their best work.

THE TWELVE FACTORS

I. Codebase

One codebase tracked in revision control, many deploys

II. Dependencies

Explicitly declare and isolate dependencies

III. Config

Store config in the environment

IV. Backing services

Treat backing services as attached resources

V. Build, release, run

Strictly separate build and run stages

VI. Processes

Execute the app as one or more stateless processes

VII. Port binding

Export services via port binding

VIII. Concurrency

Scale out via the process model

IX. Disposability

Maximize robustness with fast startup and graceful shutdown

X. Dev/prod parity

Keep development, staging, and production as similar as possible

XI. Logs

Treat logs as event streams

XII. Admin processes

@JBARUGH /n/management to #DPE one-off processes @DEV2NEXT

@JBARUCH

#DPE

@DEV2NEXT

SPEAKING.JBARU.CH

← → ↻ 🛡️ 🔒 <https://www.bruceeckel.com/2021/01/02/the-problem-with-gradle/>

stymied me. This is the problem I had with Gradle:

To do anything you have to know everything

Yes, it's hypothetically possible to create a simple `build.gradle` file for a basic build. But usually by the time you get to the point of *needing* a Gradle build, your problem is complicated enough that you must do more. And it turns out that "doing more" translates to "knowing everything." Once you get past the simple things you fall off a cliff.

Think of the grappling shoes in the very first episode of *Rick and Morty*. Rick explains that the shoes allow you to walk on vertical surfaces, so Morty puts them on and promptly falls down a cliff, after which Rick explains that "you have to turn them on." Gradle is my grappling shoes.

My goal here is to give you perspective, so as you fall down the cliff face you will understand what is happening, and what is necessary to climb back up.

IT IS SLOW AND THE DEVELOPERS HAVE NO IDEA WHY!

@JBARUCH

#DPE

@DEV2NEXT

SPEAKING.JBARU.CH

WHAT IS BUILD?

- × Project setup
- × Downloading the Internet
- × Artifact generation: Compilation, packaging, etc
- × Tests
- × Artifact deployment

WHAT CAN GO WRONG?

- × Project setup
- × Downloading the Internet
- × Artifact generation: Compilation, packaging, etc
- × Tests
- × Artifact deployment

WHEN CAN IT GO WRONG?

AT ANY TIME.

THE BUILD FRUSTRATES THE DEVELOPERS

@JBARUCH

#DPE

@DEV2NEXT

SPEAKING.JBARU.CH

LET'S ASK CHATGPT

What techniques can I use to speed up a Maven build?

Sure, here are some quick tips to speed up a Maven build:

1. **Skip Tests:** Use `-DskipTests` to skip running tests.
2. **Parallel Execution:** Use `-T` flag to run in parallel. E.g., `-T 4` for 4 threads.
3. **Offline Mode:** Use `--offline` to avoid checking for updates.
4. **Incremental Build:** Use `mvn -am -p1` to build only changed modules and their dependencies.
5. **Profile:** Use Maven profiles to conditionally enable plugins.
6. **Resource Filtering:** Limit resource filtering to only necessary files.
7. **Use a Mirror:** Set up a local Nexus or Artifactory mirror.

Hope that helps! Got a preference for Gradle, but these should give your Maven build a boost.

WHAT THE ACTUAL F*CK?!

- × Skipping tests defeats the purpose of the build!
- × How about skipping compilation?
- × We want faster feedback, not less feedback

WHAT FEEDBACK DO WE WANT?

@JBARUCH

#DPE

@DEV2NEXT

SPEAKING.JBARI.CH

CI/CD PIPELINE QUALITY GATES

CI/CD? NOT GREAT, NOT TERRIBLE.

@JBARUCH

#DPE

@DEV2NEXT

SPEAKING.JBARU.CH

TWO TYPES OF FEEDBACK

ASYNCHRONOUS

- x e.g., CI/CD
- x we never wait for it
- x results are distracting

SYNCHRONOUS

- x e.g., build
- x we'll wait for it in the flow
- x we'll be pissed off when it's slow

DPE Dramatically Improves Productivity

Almost every surveyed IT organization agreed that “Since integrating Developer Productivity Engineering into our development process, the time savings we experienced on build and test cycle times have dramatically improved developer productivity.”

DEVOPS? SRE? PE? DPE?

- × DevOps mainly solves Ops' concerns
- × It is is a collaborative methodology
- × It needs engineering implementation
- × Call it SRE or call it PE, someone has to write all those YAML files
- × But what about People Productivity?
- × DPE has the answer and it's another pillar of DevOps Engineering implementation
