Joomla!
...because open source matters

The one thing about a Web site, it always changes! Joomla! makes it easy to add Articles, content, images, videos, and more. Site administrators can edit and manage content 'in-context' by clicking the 'Edit' link. Webmasters can also edit content through a graphical Control Panel that gives you complete control over your site.

Joomla!™

...because open source matters

Yesterday all servers in the U.S. went out on strike in a bid to get more RAM and better CPUs. A spokes person said that the need for better RAM was due to some fool increasing the front-side bus speed. In future, buses will be told to slow down in residential motherboards.

Type: Plugin

What it does:

UberPageBreak is a simple plugin you can use to "break" (split) your Joomla! articles or K2 items into multiple pages, in an easy and stylish way. "Page breaking" is done by using the existing "page break" editor button that appears at the bottom of any content (WYSIWYG) editor box, either in Joomla! articles or in K2 items. The plugin bundles 2 cool layouts by default, a list and a tabs layout.

Restricted Words

Comments containing these words will require moderator approval before being published.

Separate words with commas. You may use . * (dot asterisk) as wildcard, but be careful not to be too aggressive. For example, s.*ck will match suck, but also sock and stack. Words must be at least 3 characters in length.
