AMAZON LEADERSHIP PRINCIPLES

# Customer Obsession

Leaders start with the customer and work backwards. They work vigorously to earn and keep customer trust. Although leaders pay attention to competitors, they obsess over customers.

AMAZON LEADERSHIP PRINCIPLES

# Invent and Simplify

Leaders expect and require innovation and invention from their teams and always find ways to simplify. They are externally aware, look for new ideas from everywhere, and are not limited by “not invented here.” As we do new things, we accept that we may be misunderstood for long periods of time.

AMAZON LEADERSHIP PRINCIPLES

# Learn and Be Curious

Leaders are never done learning and always seek to improve themselves. They are curious about new possibilities and act to explore them.

AMAZON LEADERSHIP PRINCIPLES

# Have Backbone; Disagree and Commit

Leaders are obligated to respectfully challenge decisions when they disagree, even when doing so is uncomfortable or exhausting. Leaders have conviction and are tenacious. They do not compromise for the sake of social cohesion. Once a decision is determined, they commit wholly.

AMAZON LEADERSHIP PRINCIPLES

# Bias for Action

Speed matters in business. Many decisions and actions are reversible and do not need extensive study. We value calculated risk taking.

What is  
psychological safety?

# What is psychological safety?

When a team feels safe to engage in learning behaviors like asking for help, admitting errors, disagreeing, and trying something new without fear of negative consequences like embarrassment or punishment.

Mechanism to learn from mistakes

- What happened?
- What data do you have to support your analysis?
- What was the impact on the customers?
- What are the contributing factors?
- What did you learn and how will you prevent it from happening again in the future?

- **Experimentation**  
Proactive and strategic experimentation.

# Working Backwards Process

Use it to get clarity, not to document what you've already decided to do.

- Who is the customer?
- What is the customer problem or opportunity?
- What is the most important customer benefit?
- How do you know what the customers need or want?
- What does customer experience look like?
