Occasion specific dresses are confusing because at times you cannot choose what to wear. Well for women who stick to jeans no matter what occasion it has a great sense of dressing depending on what style of jeans will go in which outfit and what occasion. Here's a list of different occasion fit jeans for women:

- **Skinny fit jeans and traditional Kurti:** For an Indian function you know that you will have to work and stay busy for the whole day. So just a traditional Kurti when paired up with skinny jeans will keep you on toes while making you feel comfortable.
- **Baggy jeans and road trips:** Don't walk out of your night suit mentally while these baggy jeans still help you nail the look with a t-shirt and this pair.
- **Slim fit jeans and long shirts:** Your office informal parties are the most confusing and this above-mentioned combination can save you from the mess. You will be putting on a long shirt that will keep the formal part of the party intact and for the rest you can walk around in comfort with your favourite pair of jeans.
