

Hot Takes, Myths, And Falsehoods

Why Everyone Is Wrong About DevOps Except For Me

Don't believe everything that you read on the internet

Matty McStrattyface

@mattstratton

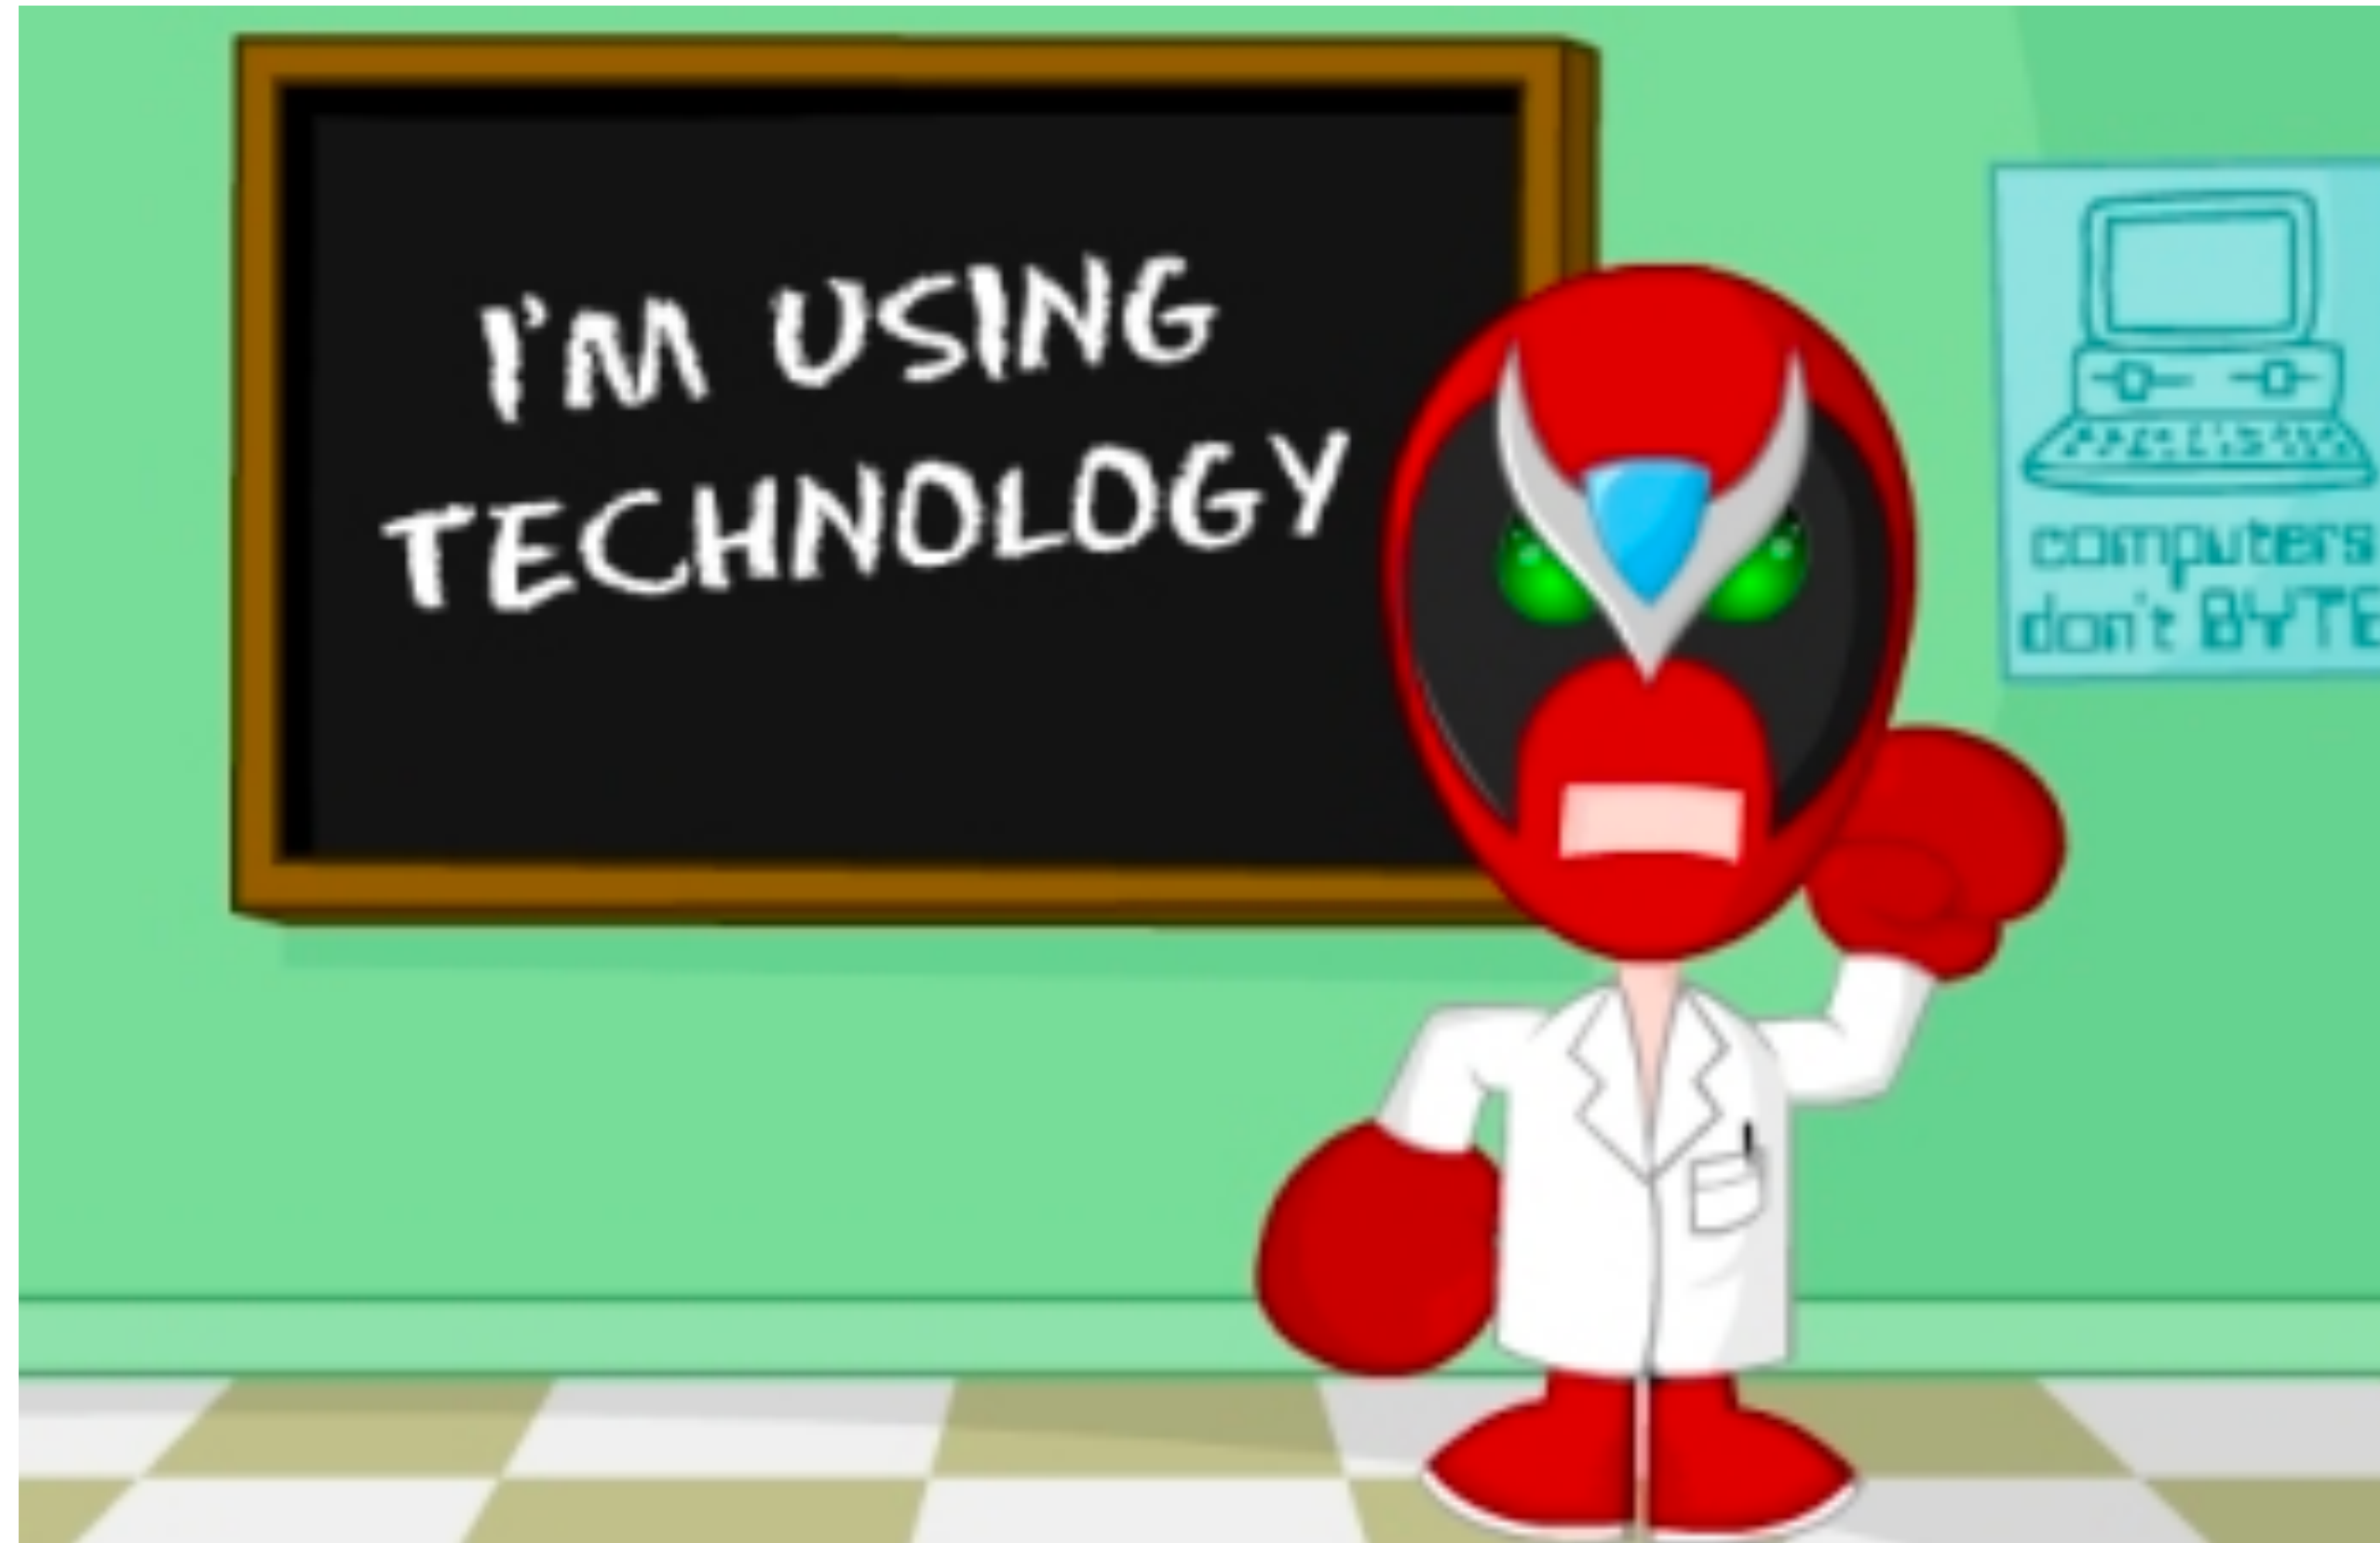

Putting words in random order is not thought
leadership except it sorta is

9:32 PM - 19 Jul 2018 from [Toronto, Ontario](#)

@mattstratton

“DevOps is more than just tools”

FALSE

- If it was more than just tools, why would we have so many of them?
- Nobody cares about your culture
- There are a LOT of tools on DevOps twitter

“DevOps is more than just automation”

FALSE

- The “A” in CAMS is the only vowel
- Vowels are more important than consonants
- Therefore, automation is the most important

“Kubernetes won’t solve all your problems”

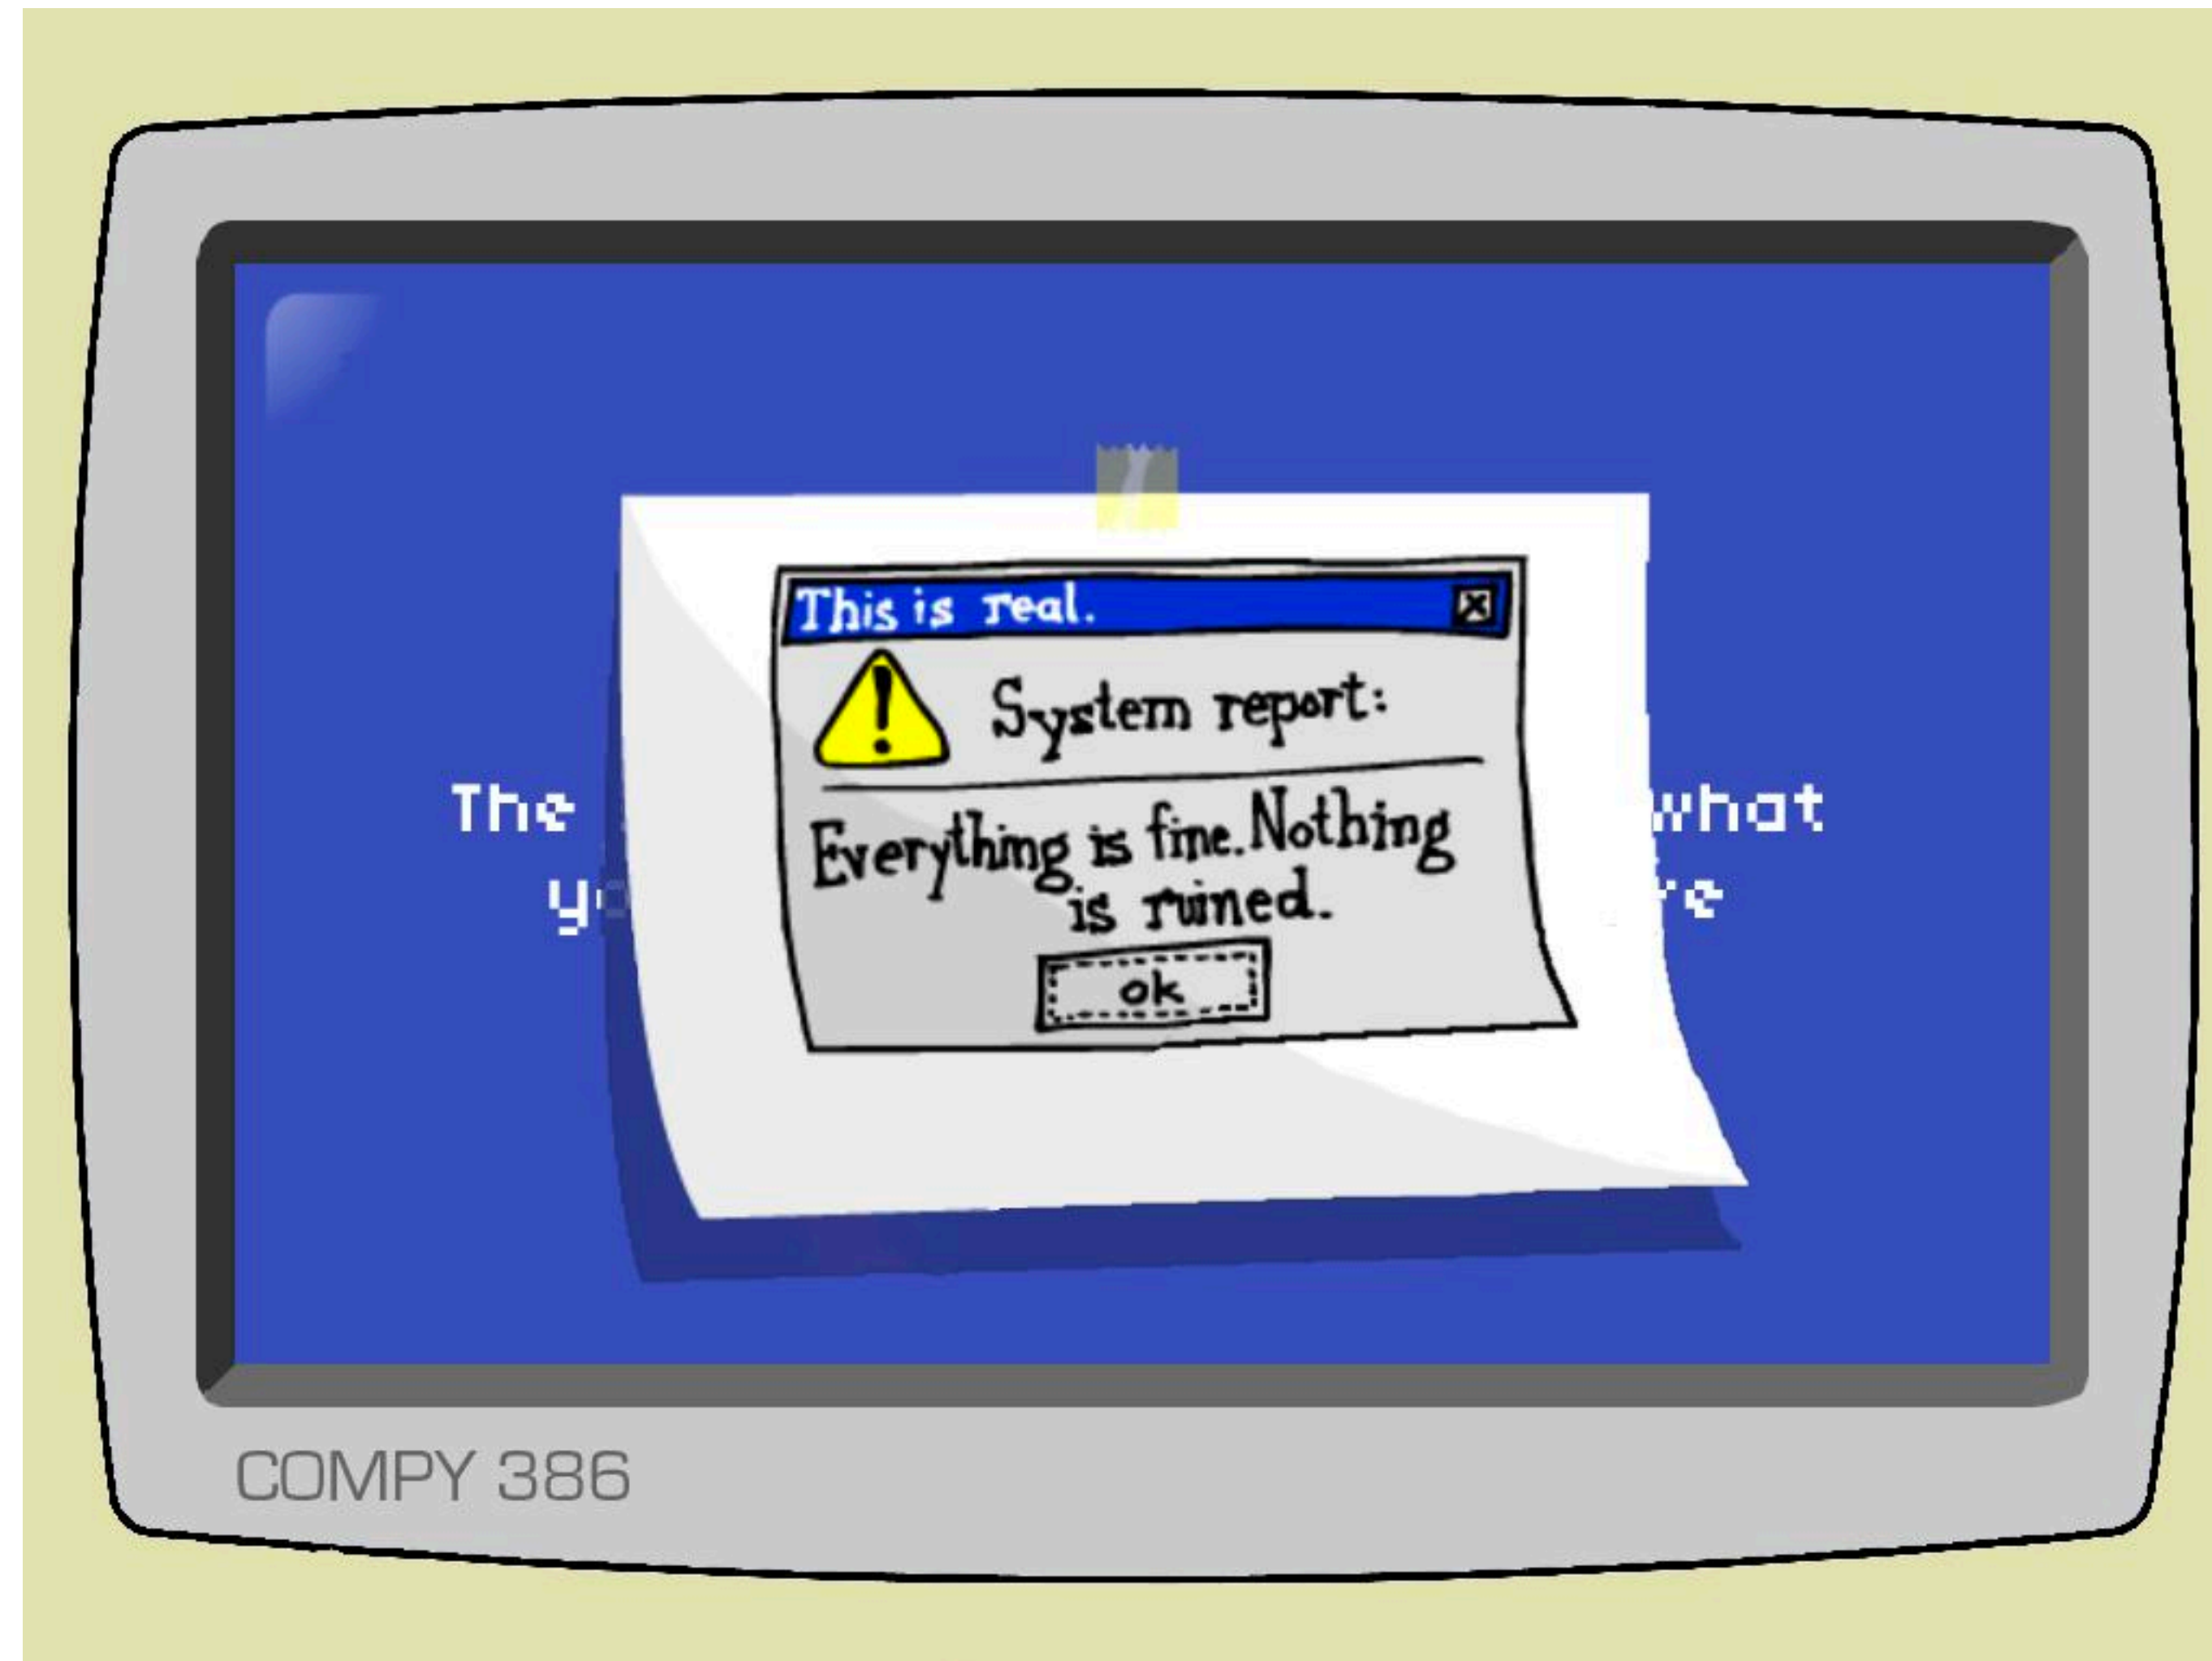

FALSE

- Kubernetes came from Google
- Docker is boring and old
- YAML shows your commitment to precision

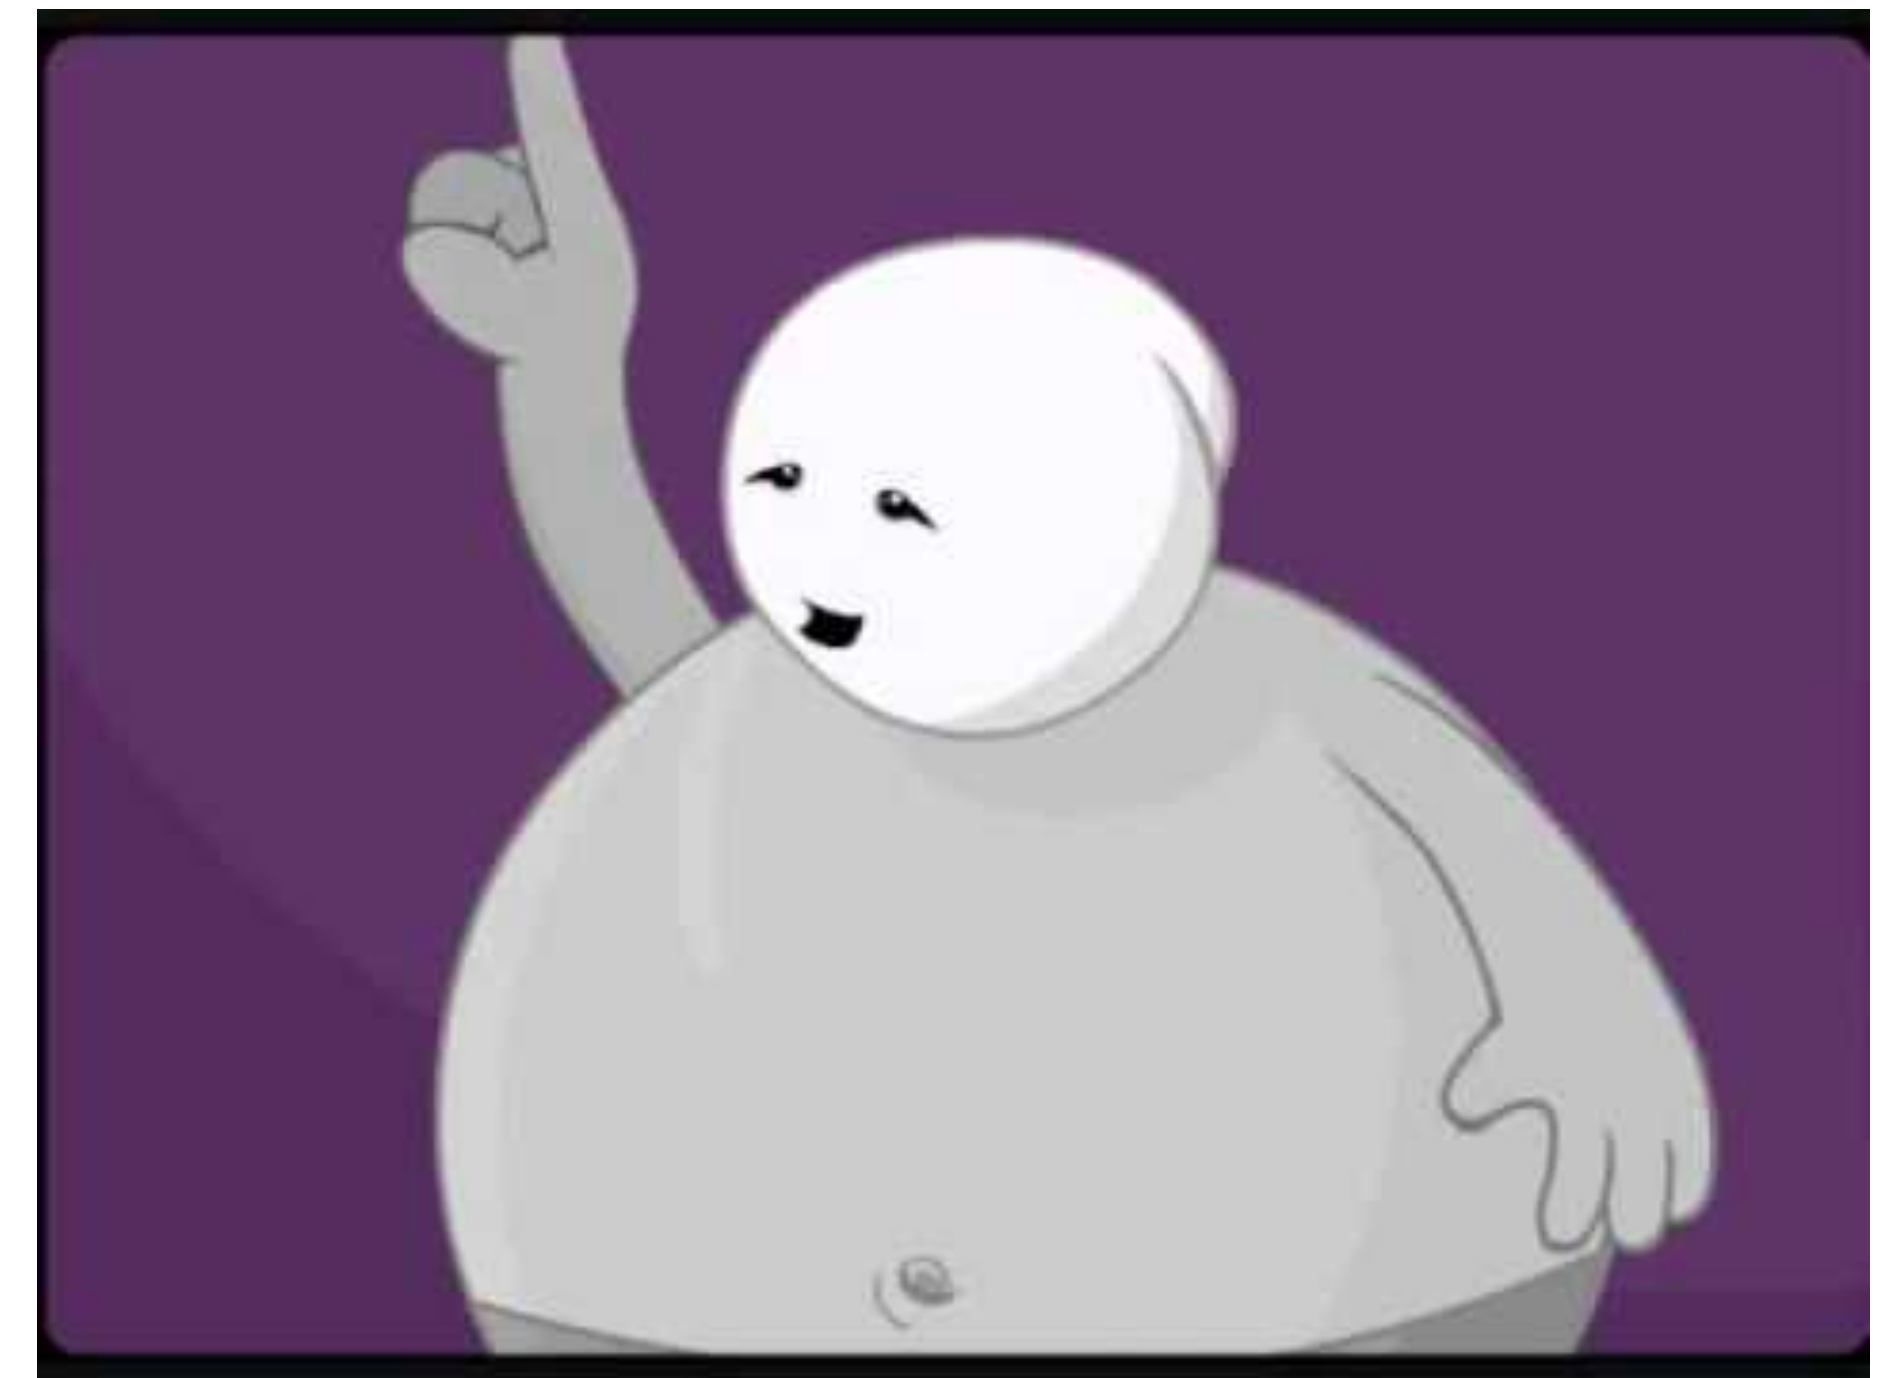

“If you DevOps, you still need testing”

FALSE

- Remove the human element and remove the human error
- If your microservice only does one thing, it can't have an error. That would be an additional thing
- QA people are annoying anyway

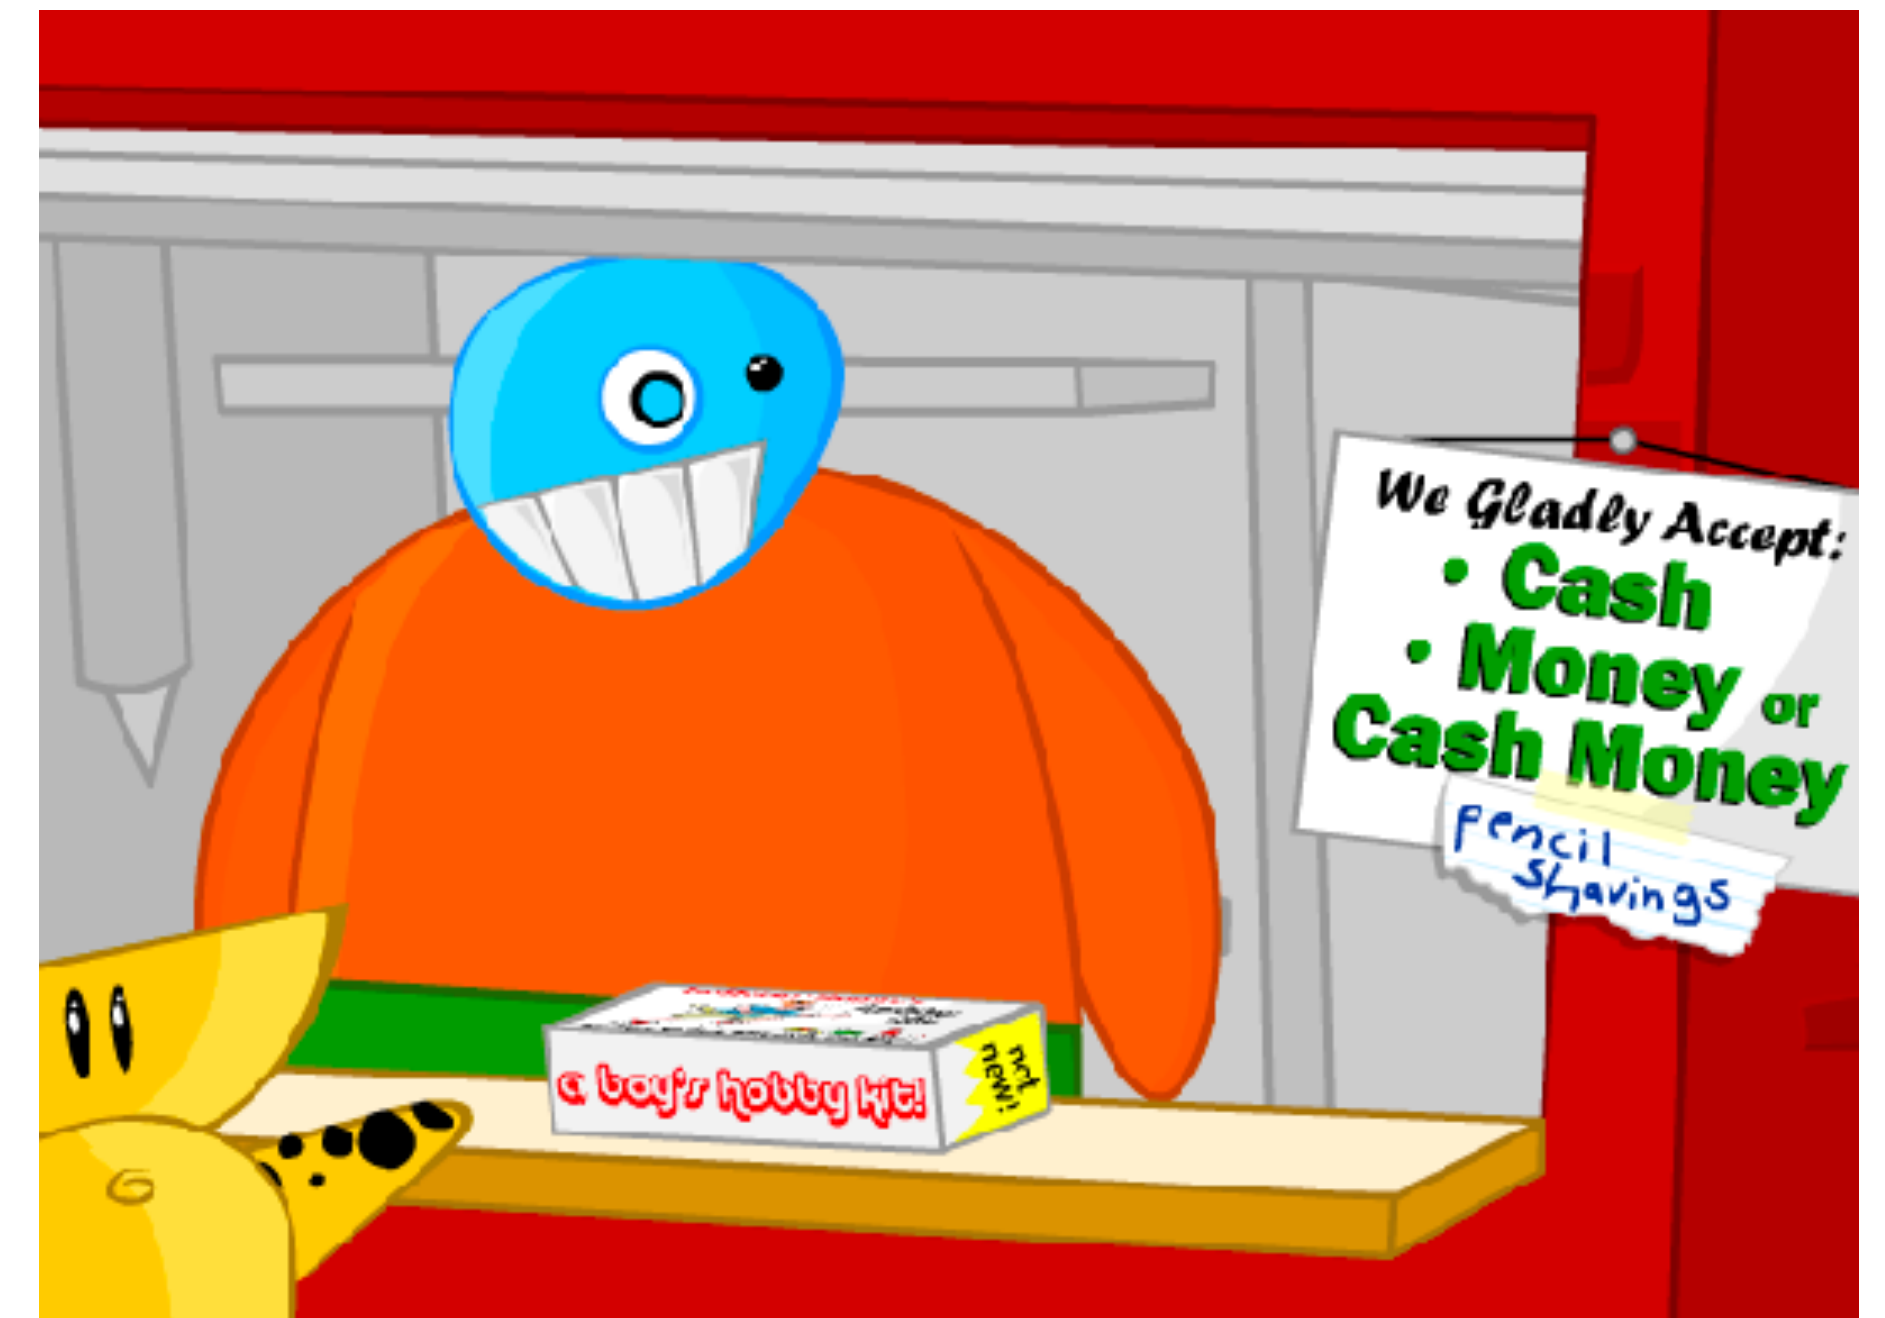

“You can’t buy DevOps”

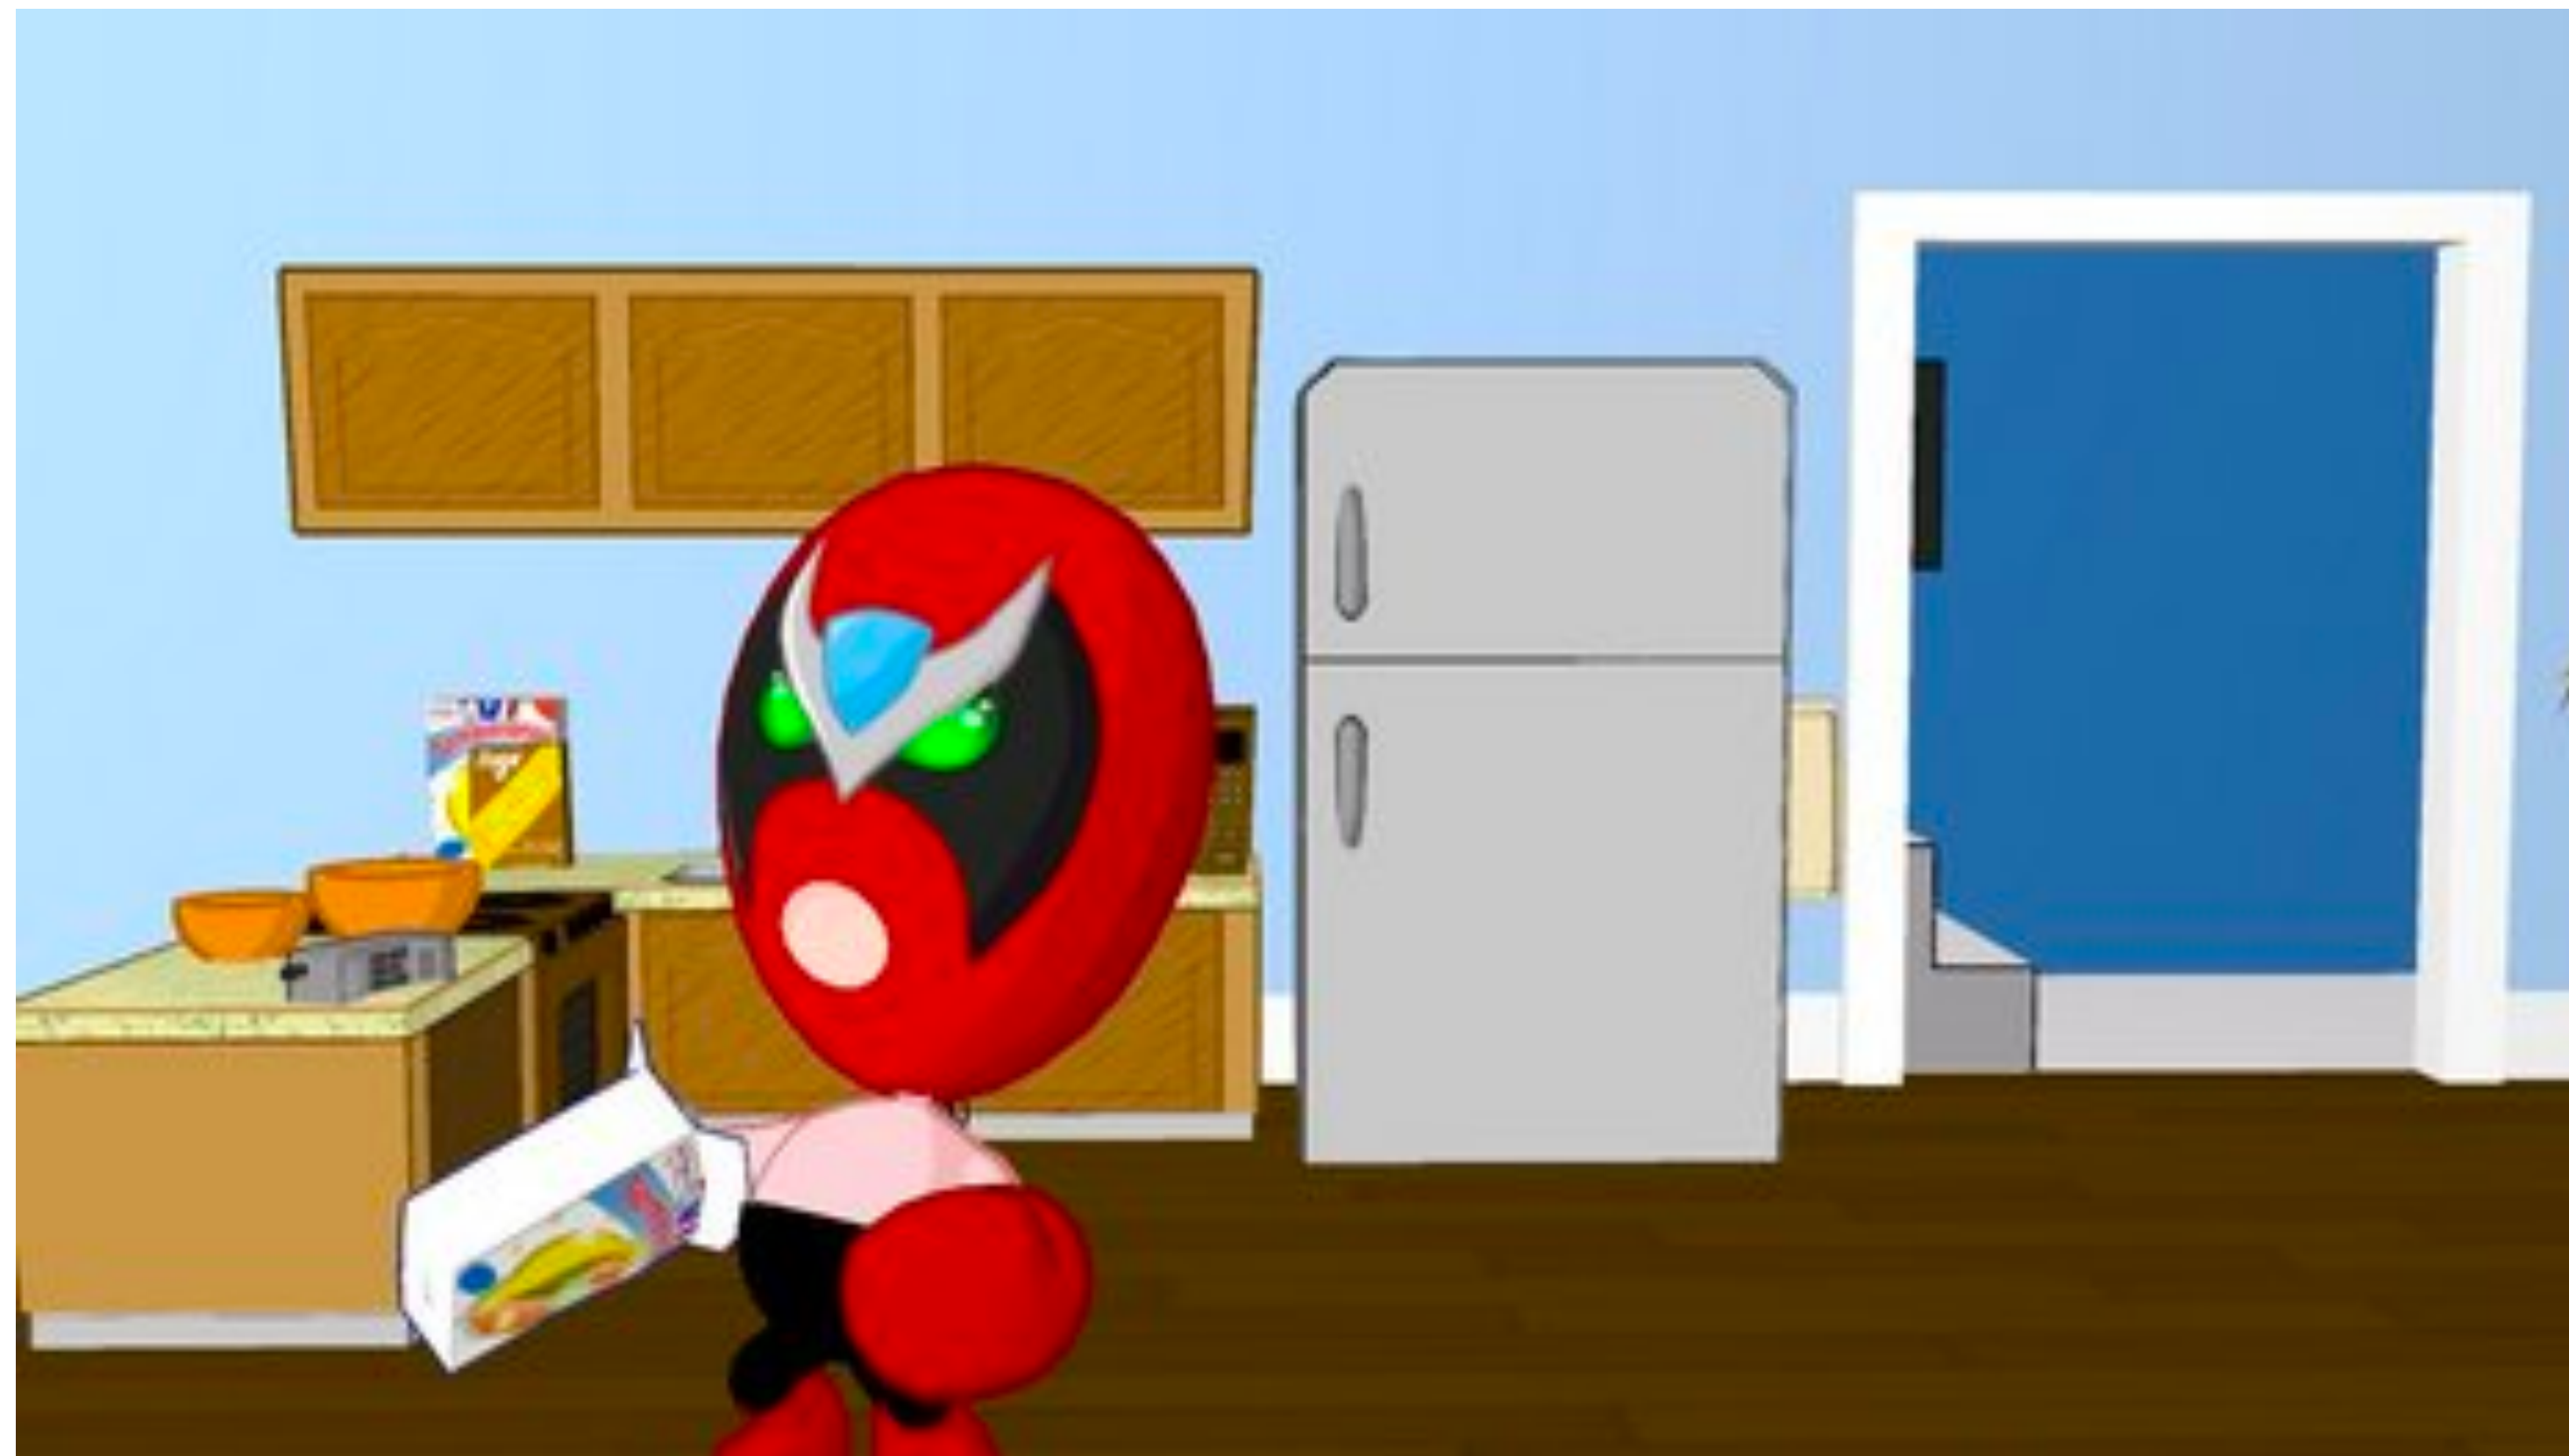

FALSE

- You may not be able to buy it, but I can sell it to you
- Seriously, I would love to sell you some devops
- What will it take to get you in a devops today?

“DevOps is not a title”

FALSE

- Nobody can tell you what titles to use in your organization
- I suppose your HR people can
- But what does HR know anyway?

“You can do DevOps on Windows”

FALSE

- A key component of DevOps is a smug sense of self-satisfaction
- Windows is all click-next, right?
- Something something slashdot

FLAGRANT SYSTEM ERROR

Computer Over.
Virus = Very Yes.

“Cats are more aligned with DevOps than dogs”

FALSE

Pagey Says....
