Get a Twilio Phone Number

The screenshot shows the Twilio console interface. At the top, there's a navigation bar with 'Console', 'My first Twilio account', a trial status 'Trial: \$15.50 Upgrade', and a search bar. Below this, the main content area is titled 'Ahoy [redacted] welcome to Twilio!'. The left sidebar has tabs for 'Develop' and 'Monitor', and a list of product categories: Phone Numbers, Messaging, Studio, Functions and Assets (marked as Beta), and Explore Products. The main content area has a section 'Get a Twilio phone number' with a green checkmark indicating a trial phone number is available. Below this, there's an 'Account Info' section with fields for 'Account SID', 'Auth Token', and 'My Twilio phone number', each with a copy icon. A warning message states: 'Always store your token securely to protect your account. Learn more'. To the right, there's a 'Helpful links' section with links to 'How does Twilio work?', 'API documentation', and 'Support help center'. An illustration of two people talking on a globe is also present.
