**I tweet at @html5test**

**I**  **the web**

**I**  **electronics**

**Why should I  
care about this?**

**electronics + web = IoT**

# JavaScript on Microcontrollers

but...

**Microcontrollers are slow.**

**Microcontrollers are slow.**

*Handwritten signature*

**Microcontrollers are slow.**

*Handwritten signature*

# Raspberry Pi Zero W

1 GHz CPU and 512MB RAM

# micro:bit

16 MHz CPU and 16KB RAM

60 x faster

**30.000 x memory**

“

**JavaScript on  
microcontrollers?  
Are you crazy?**

Me – two years ago

**Microcontrollers are  
very power efficient.**

**Microcontrollers are  
very power efficient.**

**Microcontrollers only  
need to be fast enough  
to solve the problem.**

**Microcontrollers only  
need to be fast enough  
to solve the problem.**

**Microcontrollers do not  
have an operating system.**

Two horizontal white lines are drawn below the text, starting from the left edge of the text and extending to the right, with a slight gap between them.

**Microcontrollers do not  
need 45 seconds to boot.**

**how?**

# Espruino

**Espruino is a JavaScript  
interpreter for  
microcontrollers.**
