33 33

34 - Second new feature (2 of 2)

34 + Array helper (2 of 2)

35 35

36 36

37 + Ember 3.8 introduces the `{{array}}` helper to create an array in a template. This helper works in similar fashion to the already existing `{{hash}}` helper.

38 +

39 + The helper would be invoked as `{{array arg1 ... argN}}` and return the value `[arg1, ..., argN]`. For example, `{{array 'a' 'b' 'c'}}` would return the value `['a', 'b', 'c']`.

40 +

41 + Read the [\[original RFC\]](https://github.com/emberjs/rfcs/blob/master/text/0318-array-helper.md) (<https://github.com/emberjs/rfcs/blob/master/text/0318-array-helper.md>) for more information.

# Ember 3.8 Released

FEBRUARY 27, 2019 BY MELANIE SUMNER, KENNETH LARSEN, ANNE-GREETH VAN HERWIJNEN

Today the Ember project is releasing version 3.8 of Ember.js, Ember Data, and Ember CLI. This release kicks off the 3.9 beta cycle for all sub-projects. We encourage our community (especially addon authors) to help test these beta builds and report any bugs before they are published as a final release in six weeks' time. The [ember-try](#) addon is a great way to continuously test your projects against the latest Ember releases.

You can read more about our general release process here:

I was super sad when travel restrictions forced me to cancel my trip to @EmberConf, but now it is looking like the remote event is going to be incredible and I'm once again reminded about how great this community is!!
