AlphaCSP

6 yrs 1 mo

- **Training Division Manager**

Jan 2007 - Oct 2010 · 3 yrs 10 mos

- Development and delivery of most of AlphaCSP courses on different Java-related topics and in different levels;
Among the customers: IDF, Cisco, IDI direct insurance, Rafael, PayPal, Opal, BMC, Malam, Checkpoint, HP Software and others.
- Development and delivery Artifactory training for JFrog customers world-wide;
Among the customers: Cisco, Sita, Ansys and others.
- JTeam – Extremely successful internal training program in AlphaCSP – ¼ of AlphaCSP personnel are JTeam alumni.
- Java department technical lead at MalamTeam Training Center – development and delivery of all Java courses.
- Named one of the best speakers in all AlphaCSP events through the years.

- **Consultant & Architect**

Jan 2007 - Oct 2010 · 3 yrs 10 mos

Consulting, building architectures and design, mentoring, and developing in various Java-related projects on the topics, described in Specialties section above;
Among the customers: BMC, Logia, IDF, Starhome (Comverse), Malam, Cisco, IDI, IDIT, Isracard, Virtual Tweens, Amobee, SolarEdge, Checkpoint, Cadence, Evolgen, ExLibris, Retalix, Schema, Time To Know and others.

- **Senior Developer**

Oct 2004 - Jan 2007 · 2 yrs 4 mos

Working on various projects in BMC Software Israel

As a Linux system administrator, how do I shift my career to DevOps?

Disha Rathod

DevOps Online Trainer (2013–present) · 5y

Hi,

Being a Linux administrator will help you to easily get started with DevOps because it starts with learning Linux fundamentals, DevOps also includes cloud computing concepts like AWS. More importantly DevOps is all about tools, it comes with hundreds of tools **Git**, Chef, Maven, Jenkins, Puppet, Docker are modern and most popular DevOps tools.

So in order to move into DevOps industries you should have prominent knowledge following concepts

1. Linux Fundamental; Shell Scripting
2. Cloud Computing (AWS)
3. DevOps Fundamentals
4. Software Development Life Cycle
5. Continuous Integration, Deployment, and Delivery.
6. DevOps **#DEVOPSDAYSINDIA** ven, Jenkins, Pupp**#DPE**cker etc.

SPEAKING.JBARU.CH

what is platform engineering in a sentence?

Platform engineering is about building and managing scalable infrastructure and services that enable developers to efficiently deploy and run applications.

so, someone who writes all the yaml files for the organization?

@JBARUCH

#DEVOPSDAYSINDY

#DPE

SPEAKING.JBARU.CH

what is platform engineering in a sentence?

Platform engineering is about building and managing scalable infrastructure and services that enable developers to efficiently deploy and run applications.

so, someone who writes all the yaml files for the organization?

Haha, you could say that! They often handle YAML files for Kubernetes, CI/CD pipelines, and config management, but their role goes beyond just "YAML engineering." They set the stage for devs to do their best work.

Development Pains are Widespread

Which of the following challenges or pain points did your organization experience prior to implementing Developer Productivity Engineering?

Too much time spent waiting on build and test feedback either locally or during CI

Inability to easily troubleshoot and determine the root cause of build, test and CI failures including flaky tests

Insufficient observability of analytics on build and test performance and regressions, failure trends, and productivity bottlenecks

DEVOPS? SRE? PE? DPE?

- × DevOps mainly solves Ops' concerns
- × It is is a collaborative methodology
- × It needs engineering implementation
- × Call it SRE or call it PE, someone has to write all those YAML files
- × But what about People Productivity?
- × DPE has the answer and it's another pillar of DevOps Engineering implementation

LEARN MORE AND TRY IT TODAY!

- × Take the Gradle/Maven Speed Challenge
