

Building Components in Harmony

Build with Bit

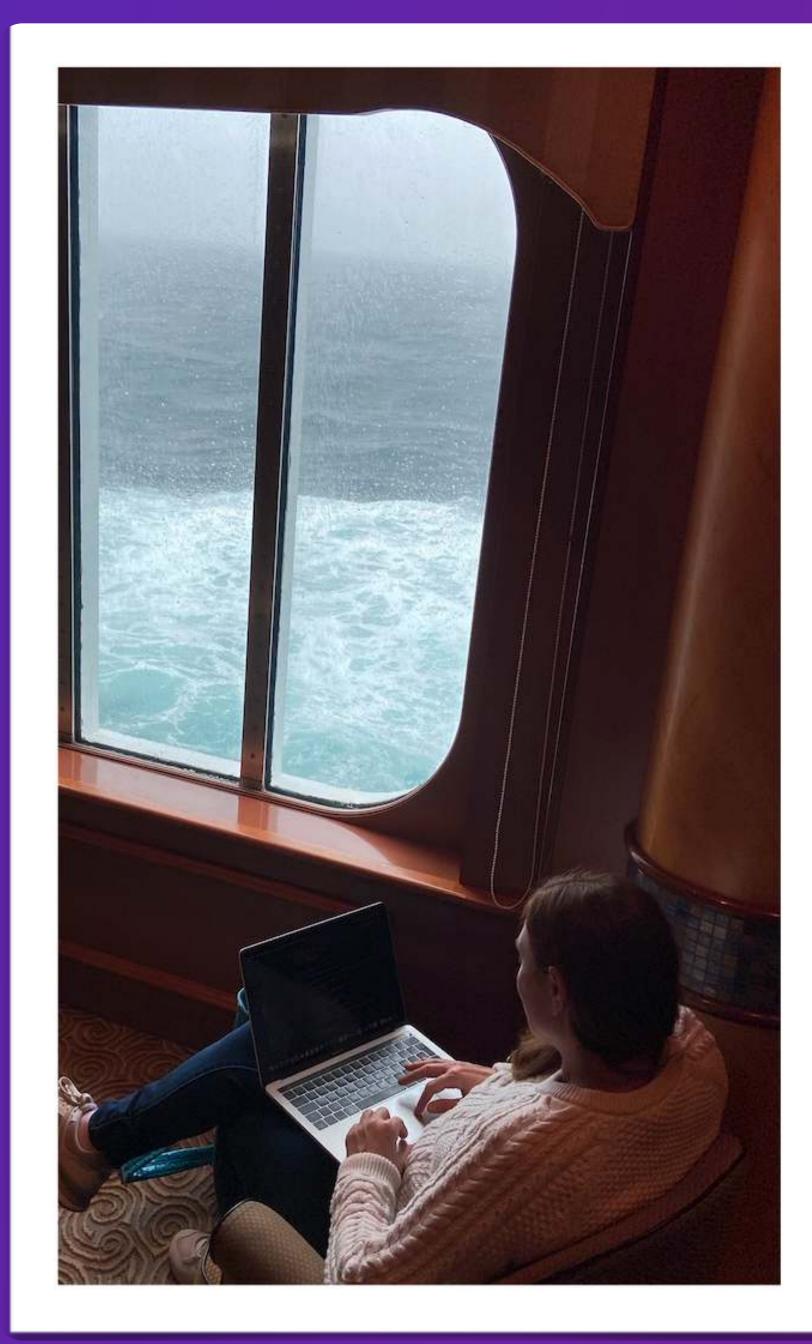

Debbie O'Brien

Head Devleloper Advocate at Bit

What I will cover

Feature Ownership

How different teams manage different scopes

Resuability

How we should build thinking about scaling and resuability

Design Systems

How the design team should be responsible for our design

Thinking Components first

How we should focus on more than one possible end product

Dad

Carpenter

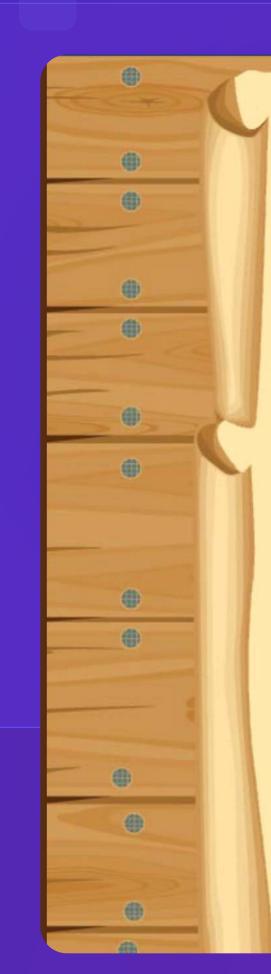

Me Developer

Andy O'Brien Builders - Home

Andy O'Brien Builders and Carpenters - Carpentry, Construction & Maintenance - For all your building and carpentry needs.

We are available for all types of jobs from attic conversions to extensions, new kitchens, renovations, new builds etc.

Call us now for a free quote. We are available to work all over county Wicklow as well as south Dublin and north Wexford.

What's the Problem?

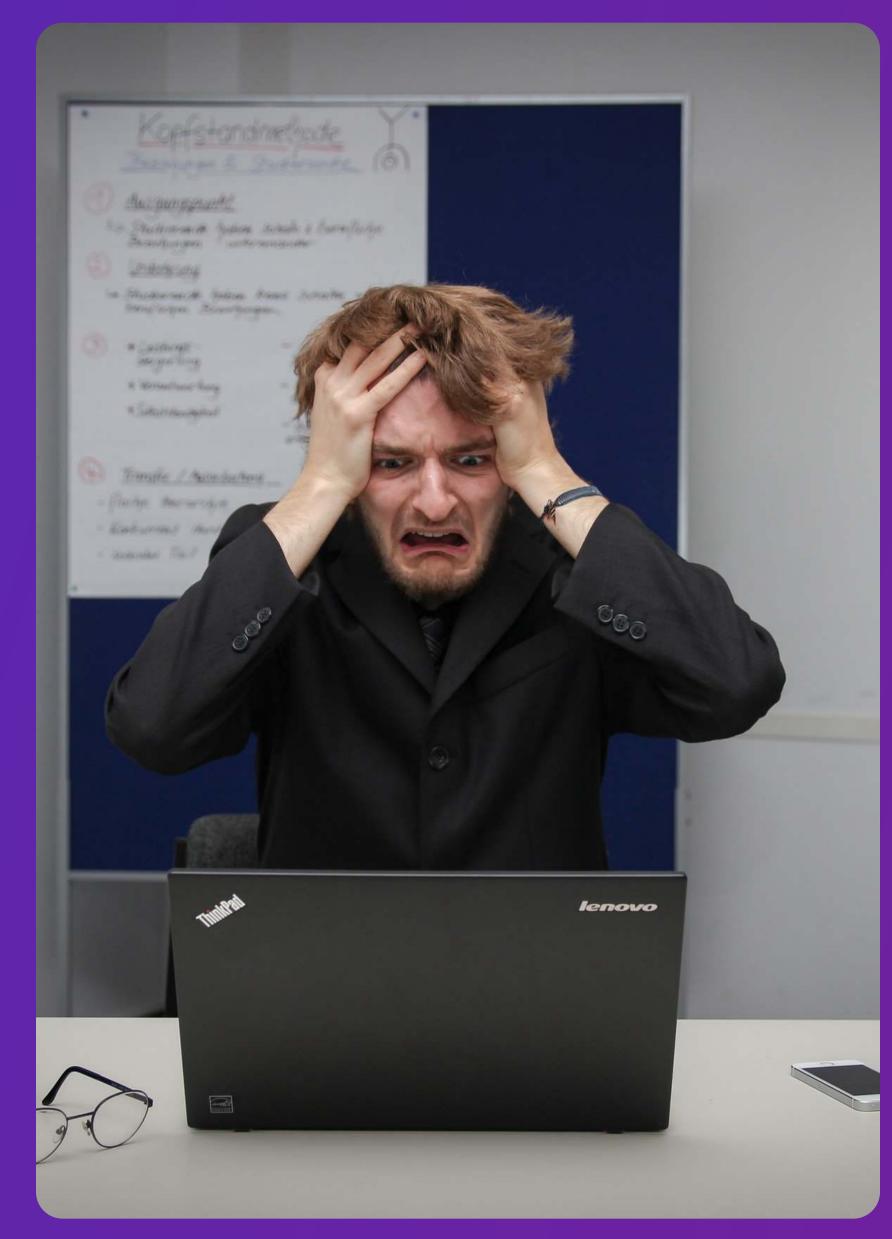

What's the Problem?

Made to Measure

Not Scalable

Not Reusable

Not made with Components

What's the Solution?

What's the Solution?

Not thinking towards one end product Scalable

Reusable

Thinking in Components

What exactly is a Component?

What exactly is a Component?

A part of a larger whole

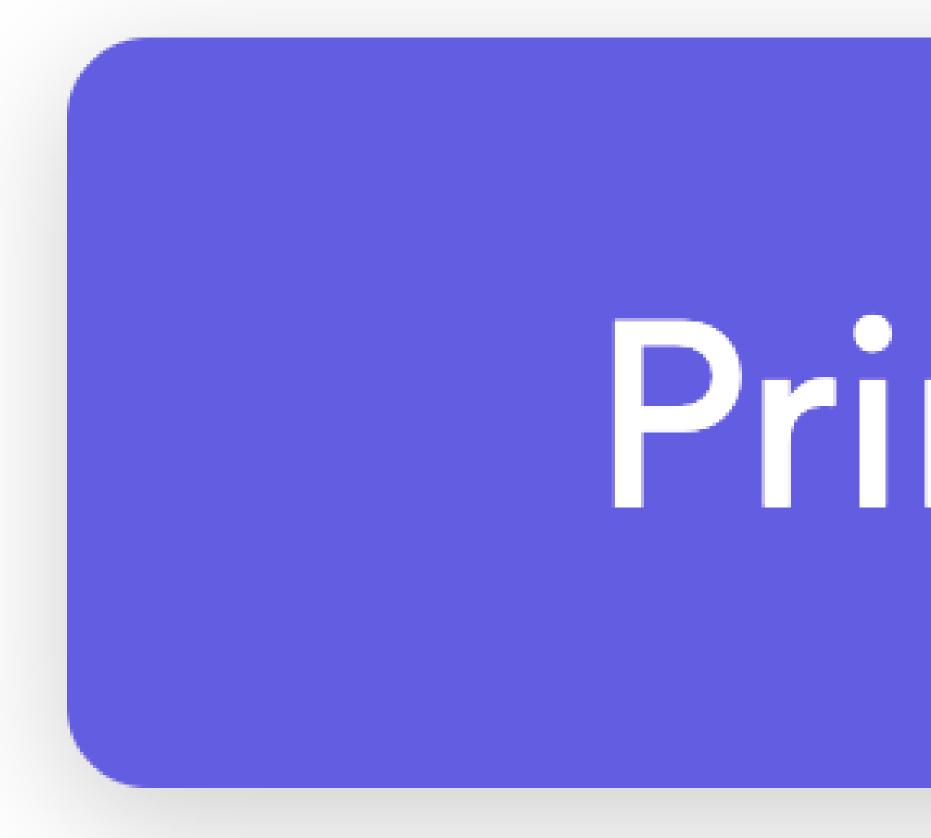

a piece

a bit

an element

a unit

Primary

NOTE A Component is

not just a React / Vue / Angular / Svelte component.

A component can be UI primative, services, micro frontends, backend services, middlewares, sdks, serverless functions, apps.....

Why should Teams own Features?

Why should Teams own Features?

- Helps build mastery and allows autonomy
- **Communication via APIs**
- **Separation of concerns**
- **Build together but stay independant**

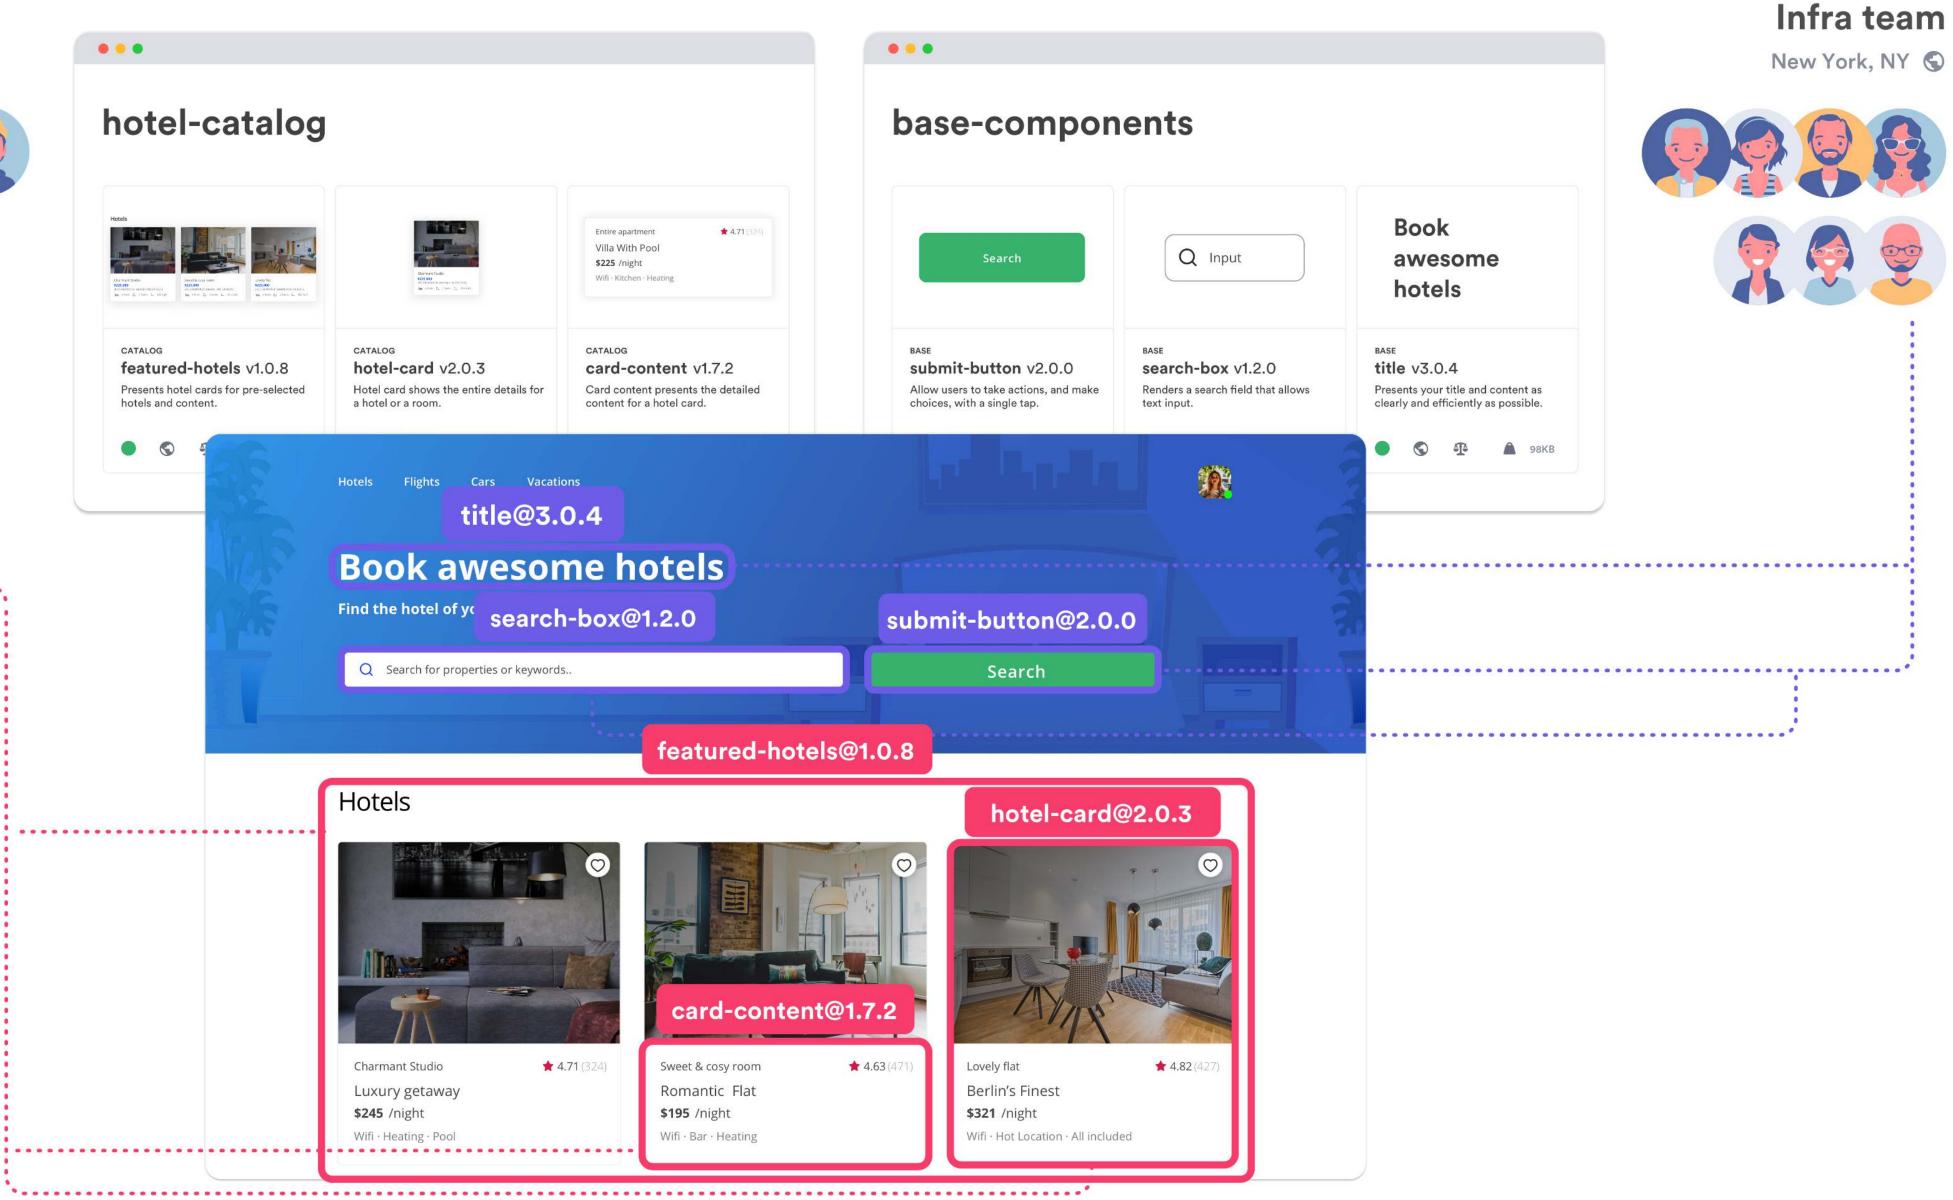

Catalog team

Sydney, Australia

BILLY / OXBERG

New BESTÅ / EKET

- 양의 - 승규가 같은 것은 것을 가장 같은 것 같아요. 이 것 않아요. 이 것 같아요. 이 것 같아요. 이 것 않아요. 이 집 않아요. 이 것 않아요. 이 것 않아요. 이 집 이 집 않아요. 이

Why should Components be Reusable?

Why should Components be Reusable?

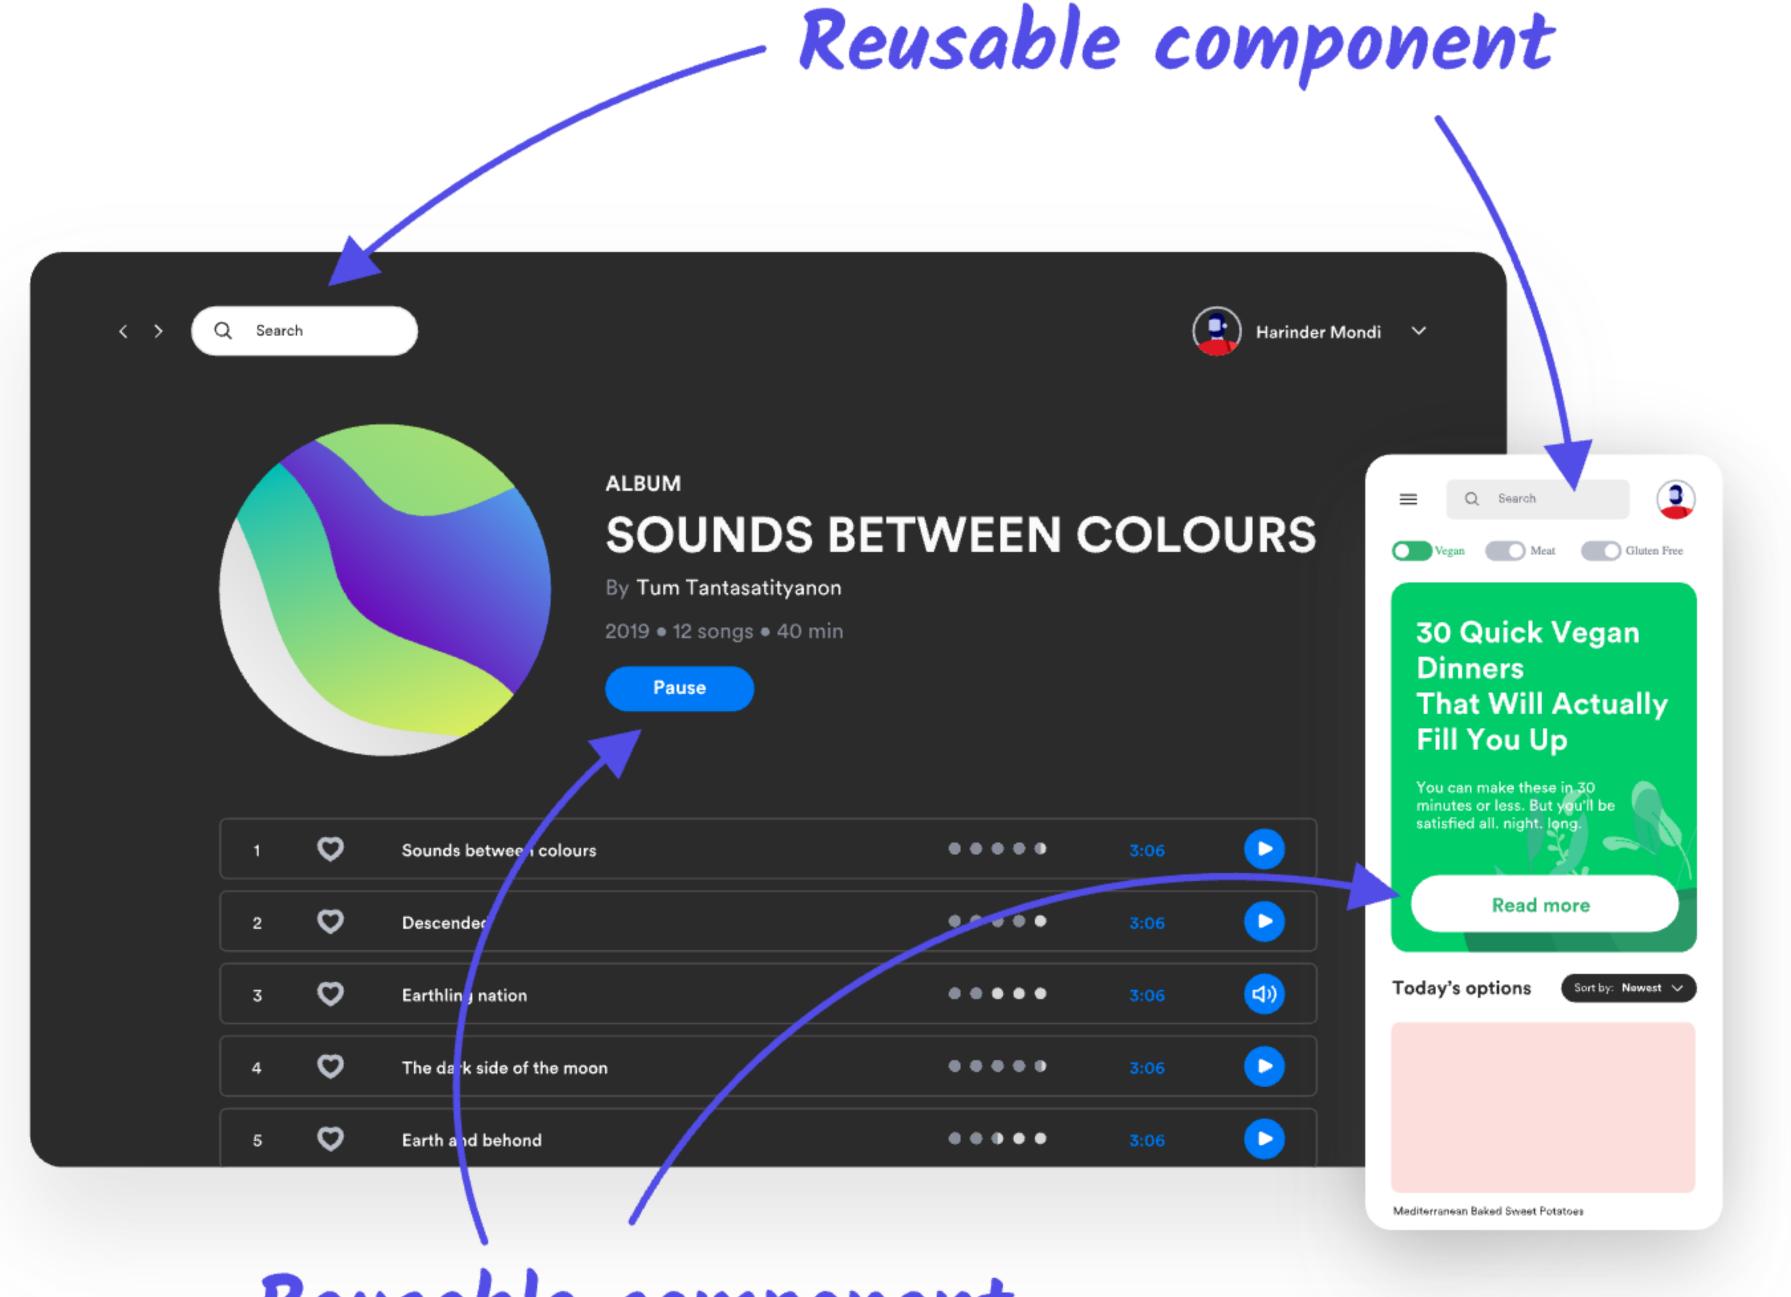

Reduce duplicated code

Easier maintenance

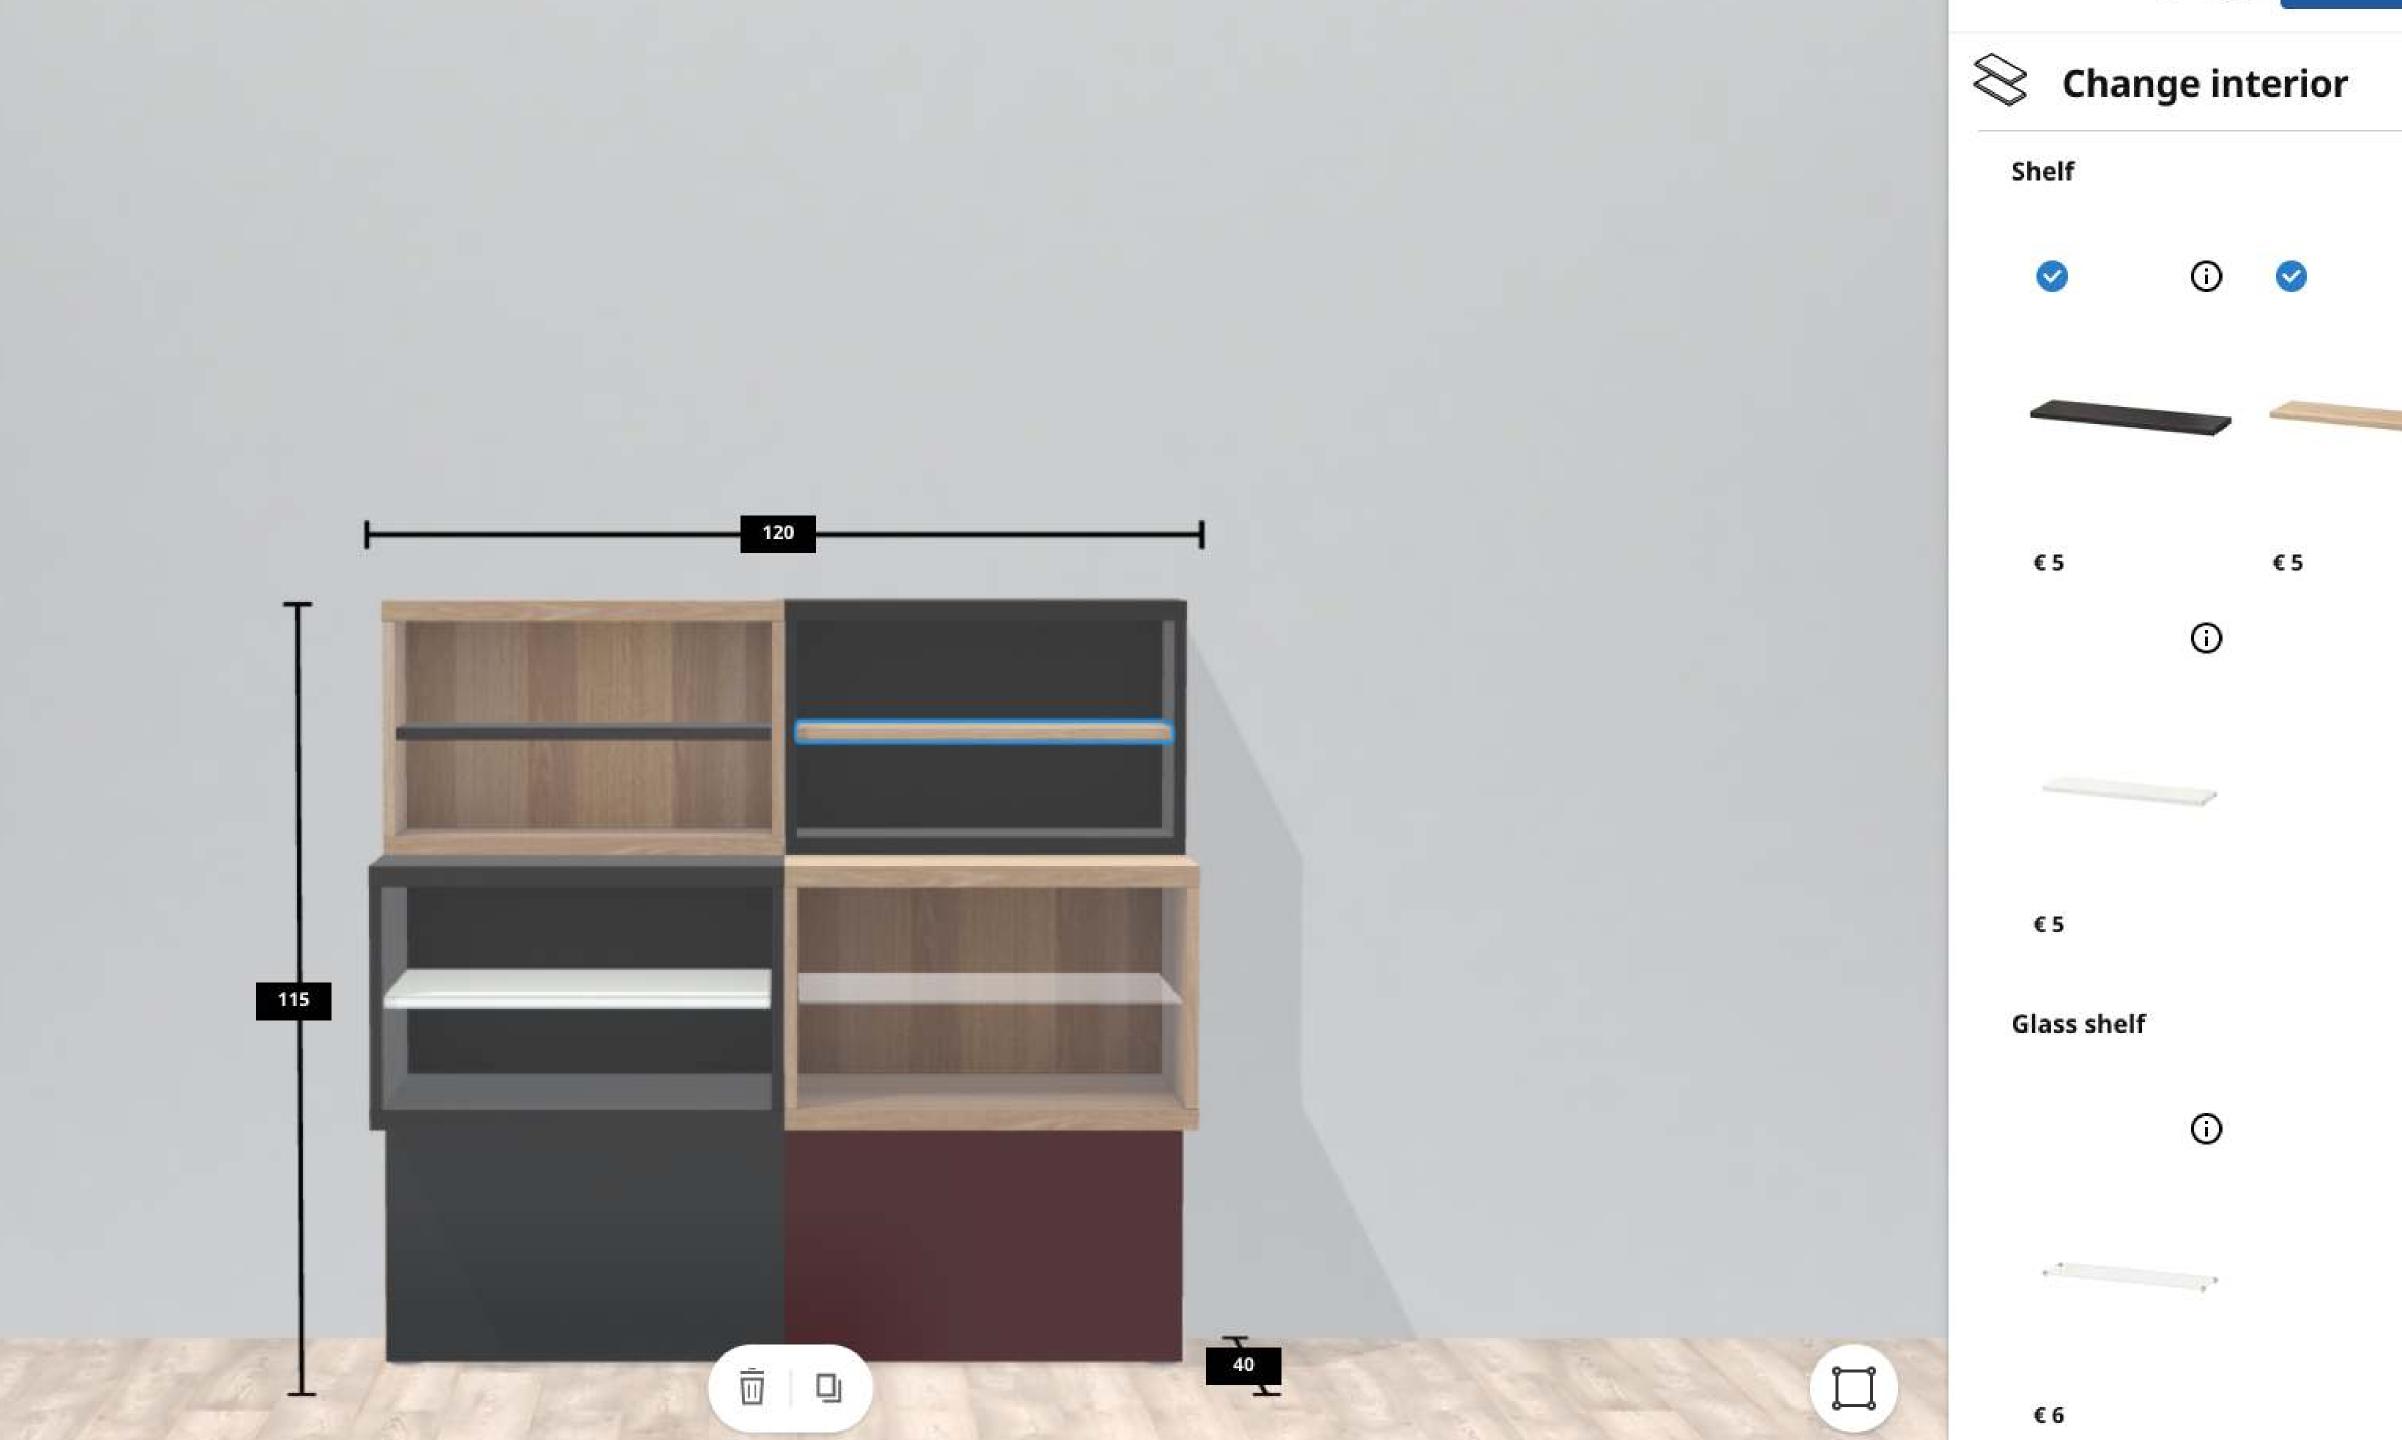

Faster development

Sharing is caring

Reusable component

Why should Components be Themable?

Why should Components be Themable?

Easier to reuse

One component many options

Easily change branding

Support multiple themes: dark / light / high-contrast / multiple brands

How should we reuse Components?

How should we reuse Components?

- Think about components as services Integrate components together to form concrete components
- Share those concrete components for other teams
- By not reinventing the wheel

Styling

A light implementation of a GraphQL react hook, using graphql-request.

```
const server = '/graphql';
const query = gql'
    query {
        countries { name }
    }
';
export const Page = () => {
    const varibales = { cats: 'brown' };
    const { loading, data, error } = useGqlRequest(query, { variables, server });
    return ...;
}
```

could also pass server from context:

Compositions

Data: {"countries":[{"name":"Andorra"},{"name":"United Arab Emirates"},{"name":"Afghanistan"},{"name":"Antigua and Barbuda"},{"name":"Anguilla"},{"name":"Albania"},{"name":"Armenia"},{"name":" Preview

Why Should we think in Components?

Why should we think in Components?

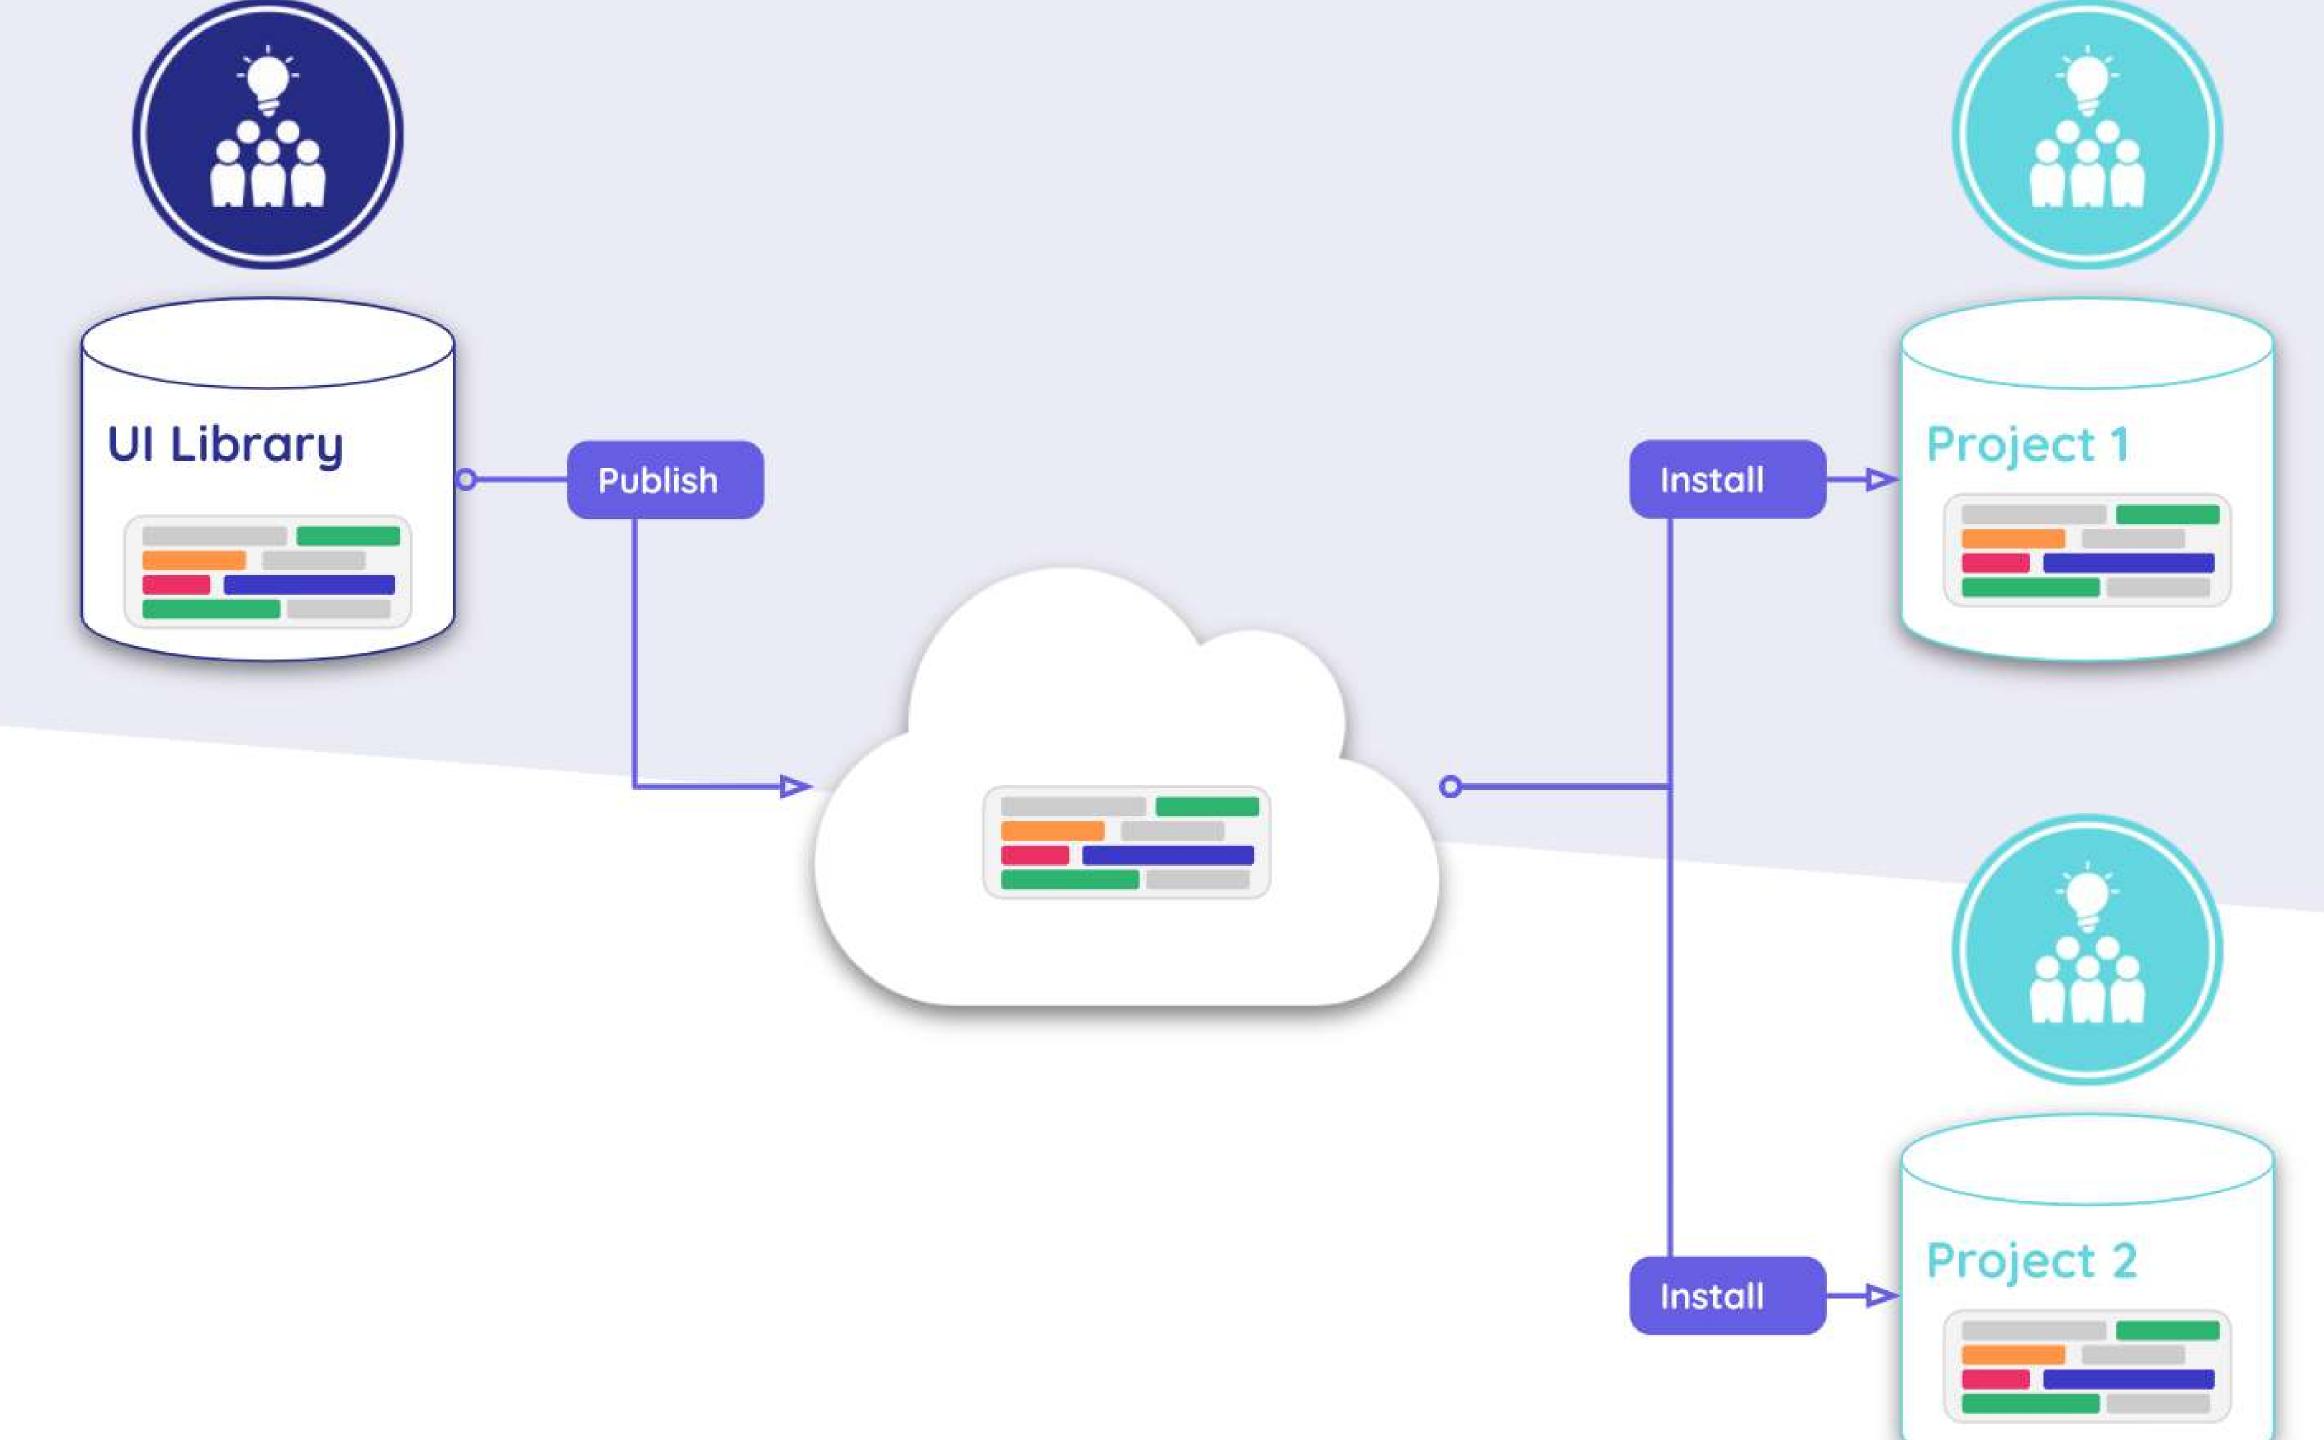

To build scalable products

Reuse components across various projects

Deliver faster in the long term

Because we want to develop in Harmony

Design your own

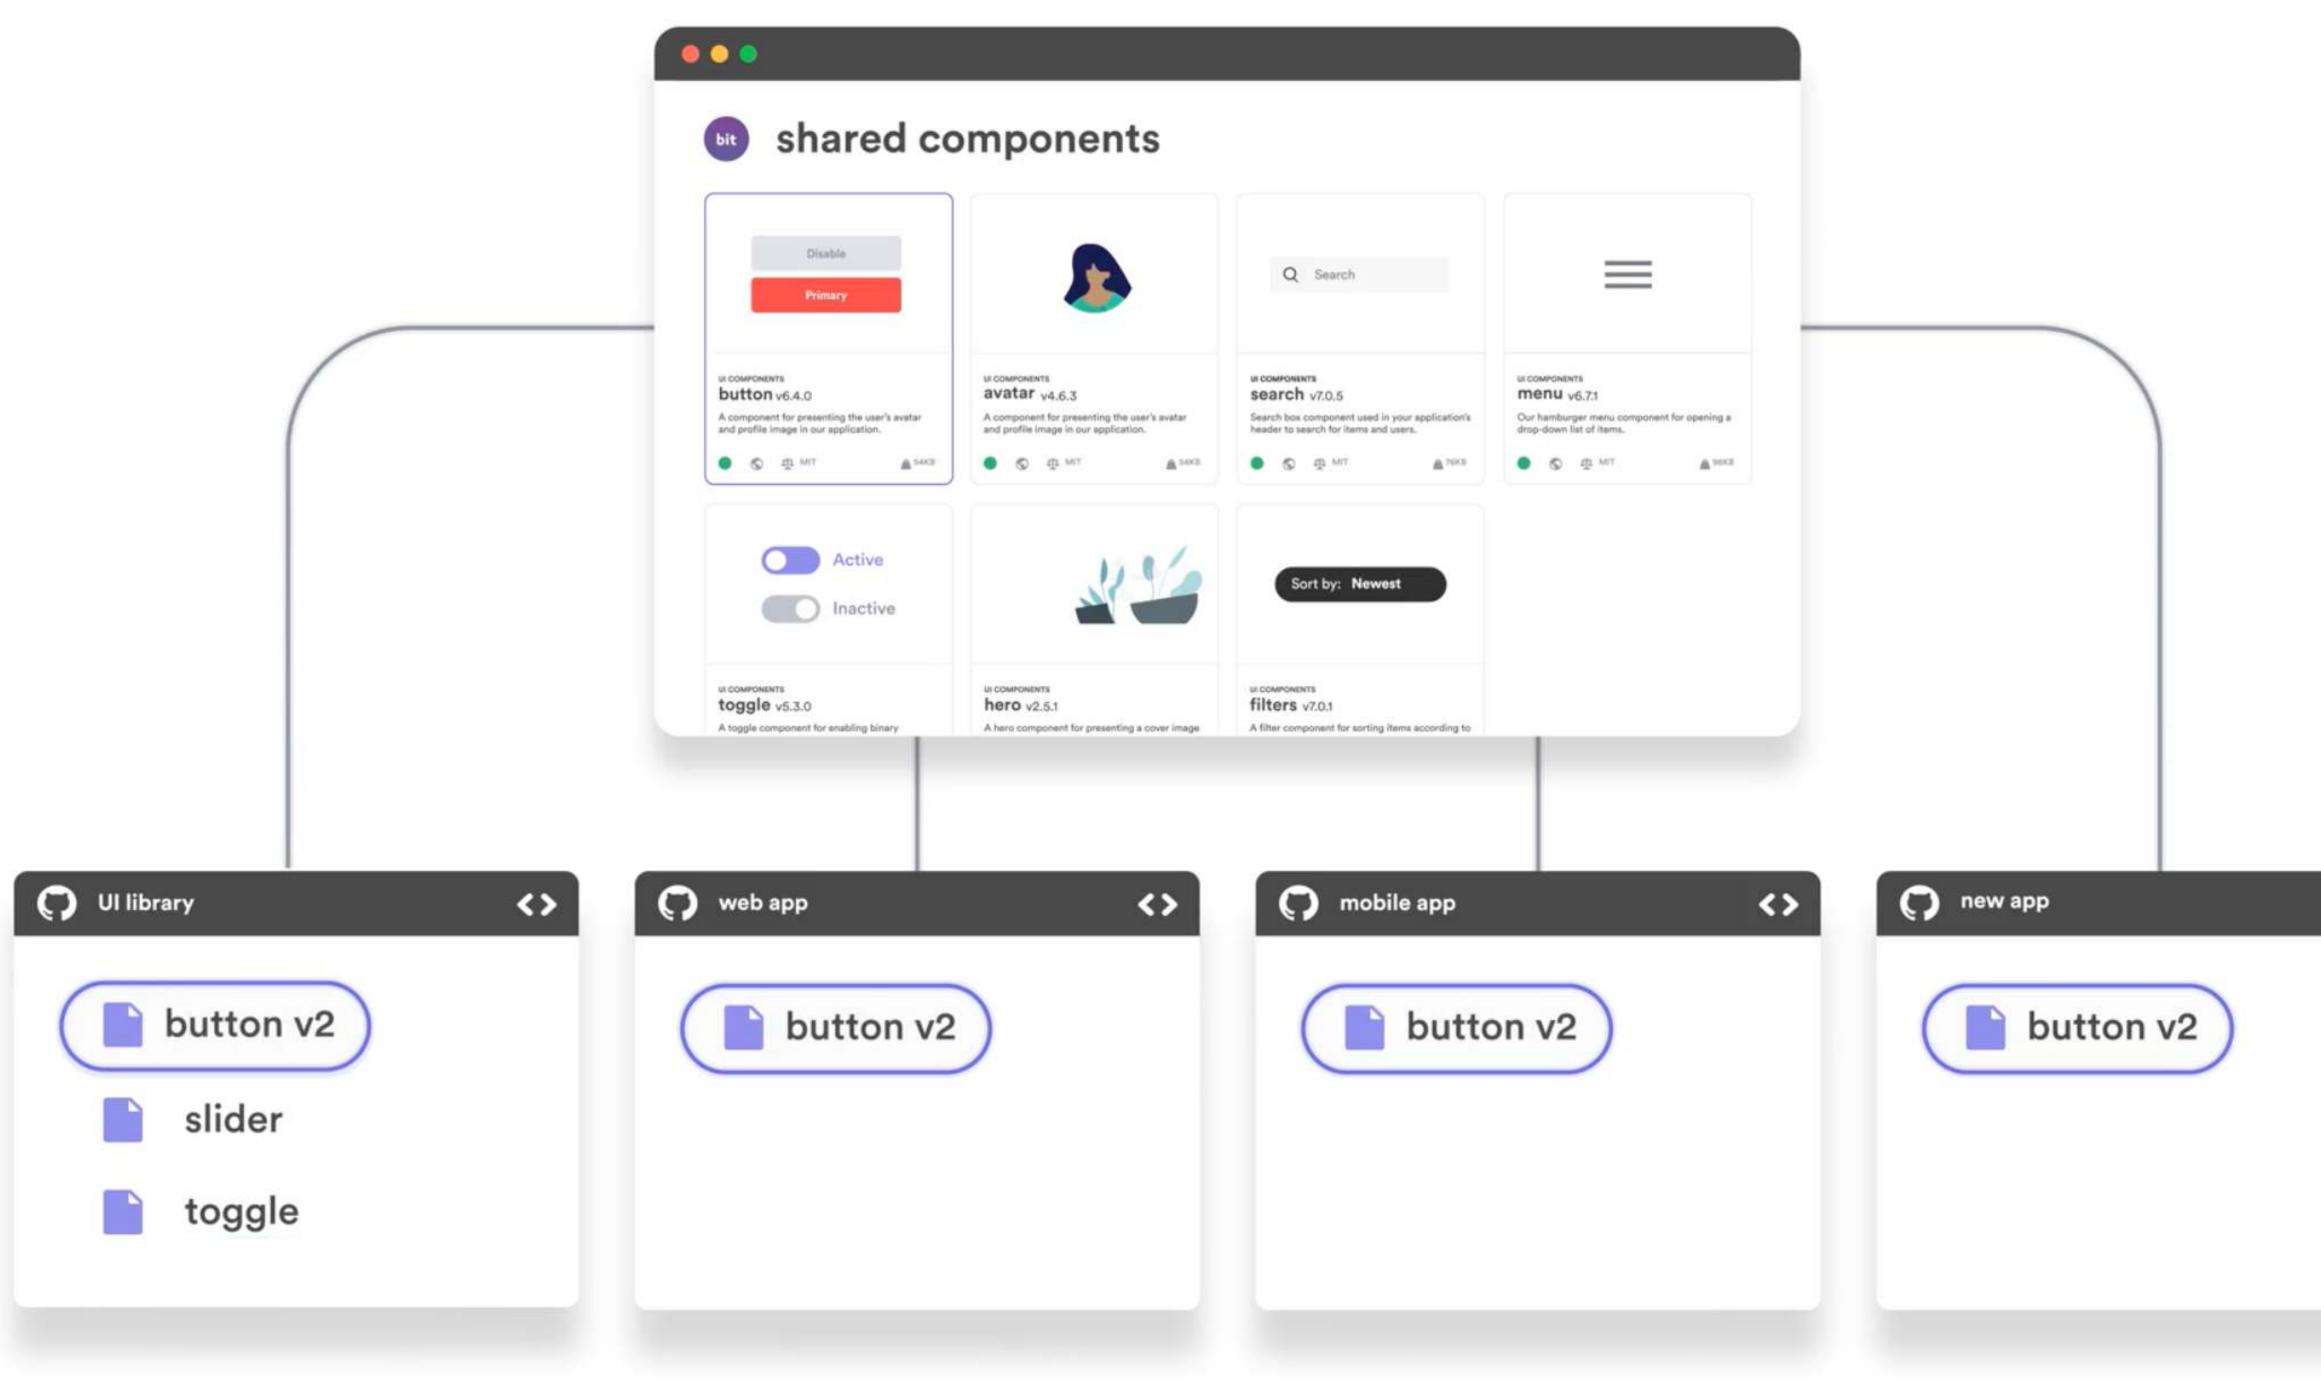

Welcome to Bit Harmony

Share Components across Apps

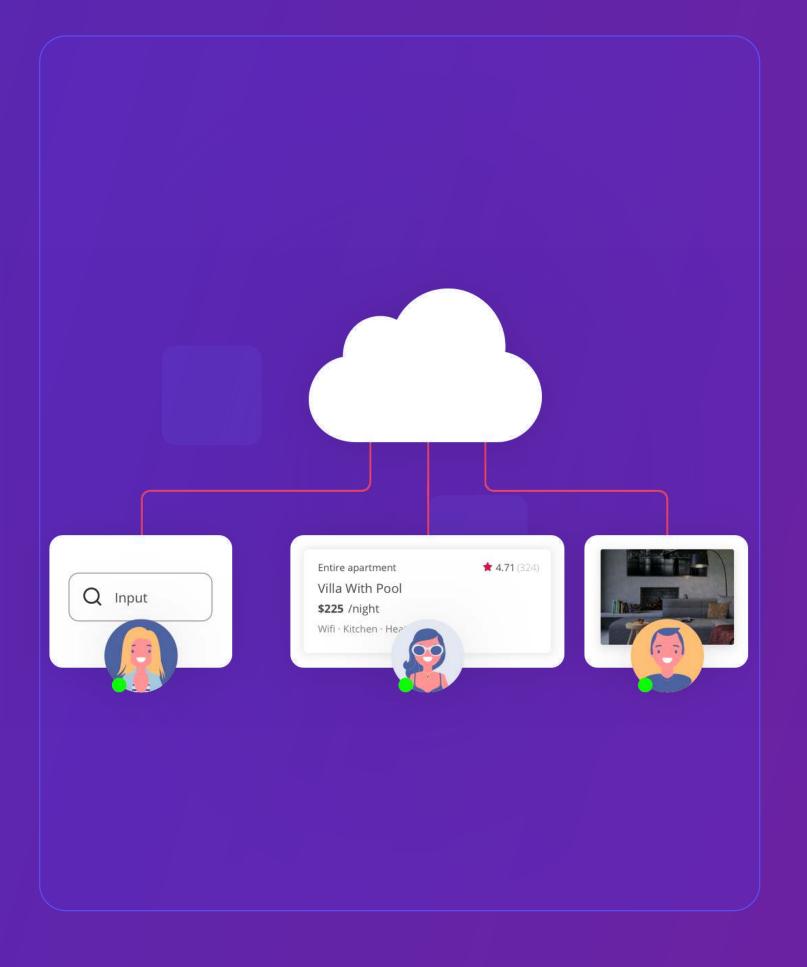

Share Frontend, Backend and Modules with Bit

Are you ready for it?

Lets start building with Bit
