

The background of the slide is a composite image. The central part shows the Clifton Suspension Bridge in Bristol, England, spanning a lush green gorge. To the left, a large sailing ship is docked at a quay, with a crane visible in the background. The entire image is overlaid with a semi-transparent blue filter. On the far right, a portion of a colorful beach ball is visible, featuring the letters 'BR' and 'BAL' in white on a red background.

What's new in CSS

SydCSS 2022

place to live

Technical writer for Chrome.

Content lead web.dev and developer.chrome.com.

CSS Working Group member.

CSS is amazing right now!

New to the web platform

A series of posts to keep you updated with what's landing in web browsers each month.

New to the web platform in October

New to the web platform in September

New to the web platform in August

Use your brand color in form inputs.

accent-color

Checkbox ☒

Radio buttons ☒ ☐

```
input {  
  accent-color: var(--blue-sapphire);  
}
```

Use accent-color now!

New color functions

color-mix()

darkblue

darkblue with 10% white

darkblue with 30% white

darkblue with 50% white

darkblue with 70% white

```
li {  
  background-color: color-mix(in lch, white 10%, darkblue);  
}
```

Try out color-mix()

In Safari Technology Preview enable CSS color-mix() in the develop menu

In Firefox, in about:config enable `layout.css.color-mix.enabled`

Solving font layout shifts

size-adjust, ascent-override, descent-override, line-gap-override

```
@font-face {  
  font-family: "fallback";  
  src: local(Arial);  
  size-adjust: 90%;  
  ascent-override: 110%;  
  descent-override: 110%;  
  line-gap-override: 99%;  
}
```

```
@font-face {  
  font-family: "Webfont";  
  src: url(/path/to/webfont.woff2) format('woff2');  
}
```

```
html {  
  font-family: "Webfont", "fallback";  
}
```

Use size-adjust, ascent-override, descent-override,
and line-gap-override now!

Controlling specificity

@layer

```
@layer base special
```

```
@layer special {  
  .item {  
    color: rebeccapurple;  
  }  
}
```

```
@layer base {  
  .item {  
    color: green;  
  }  
}
```

Use Cascade Layers now!

Small, large, and dynamic viewport units

Units that account for mobile viewports with and without UI elements.

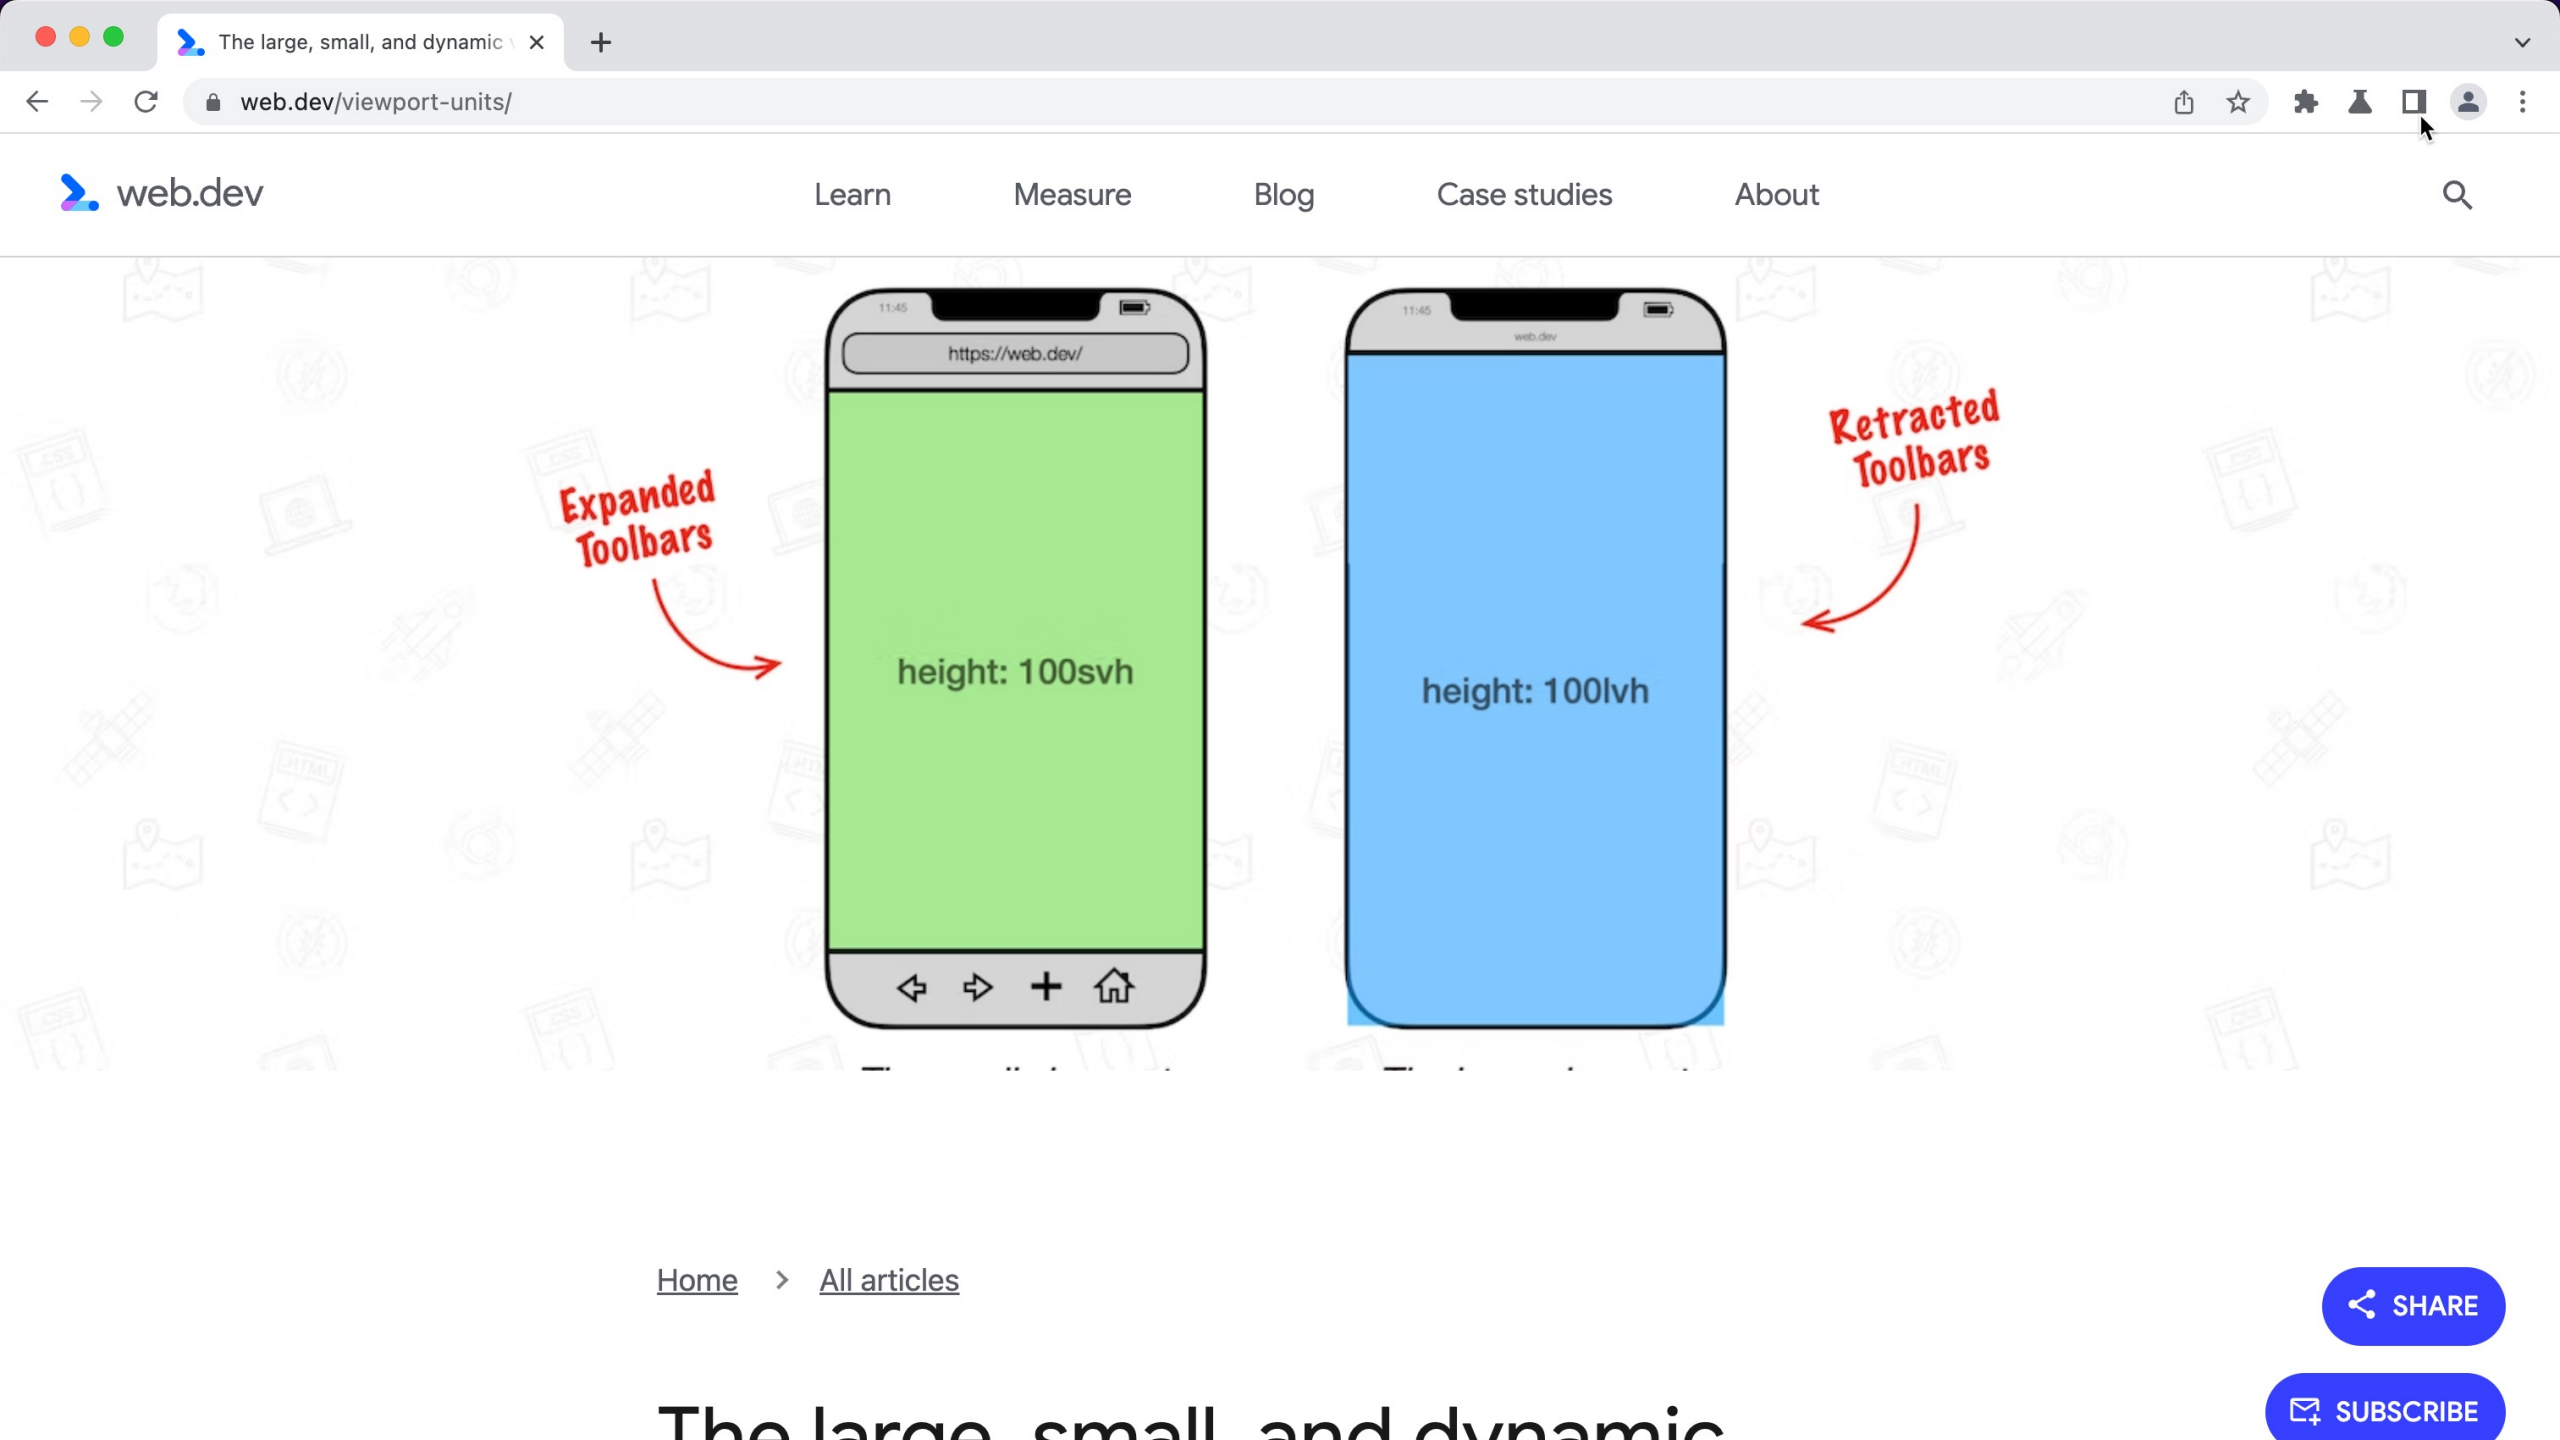

Viewport concepts

- Large viewport: the viewport with no dynamic UI elements visible.
- Small viewport: the viewport with the dynamic UI elements visible.

```
.wrapper {  
  block-size: 100lvh; /* large */  
}
```

```
.wrapper {  
  block-size: 100svh; /* small */  
}
```

```
.wrapper {  
  block-size: 100dvh; /* dynamic */  
}
```

Expanded
Toolbars

height: 100svh

Retracted
Toolbars

height: 100lvh

Use the new viewport units now!

Aspect Ratios

aspect-ratio

The “padding hack”

<https://css-tricks.com/aspect-ratio-boxes/>

aspect-ratio: 16/9;

16x9

4x3

16x9

4x3

```
.wrapper {  
  display: grid;  
  grid-template-columns: 200px 350px;  
}
```

```
.box16x9 {  
  aspect-ratio: 16/9;  
}
```

```
.box4x3 {  
  aspect-ratio: 4/3;  
}
```

Bristol is a pretty nice place to live.

Use aspect-ratio now!

Subgrid

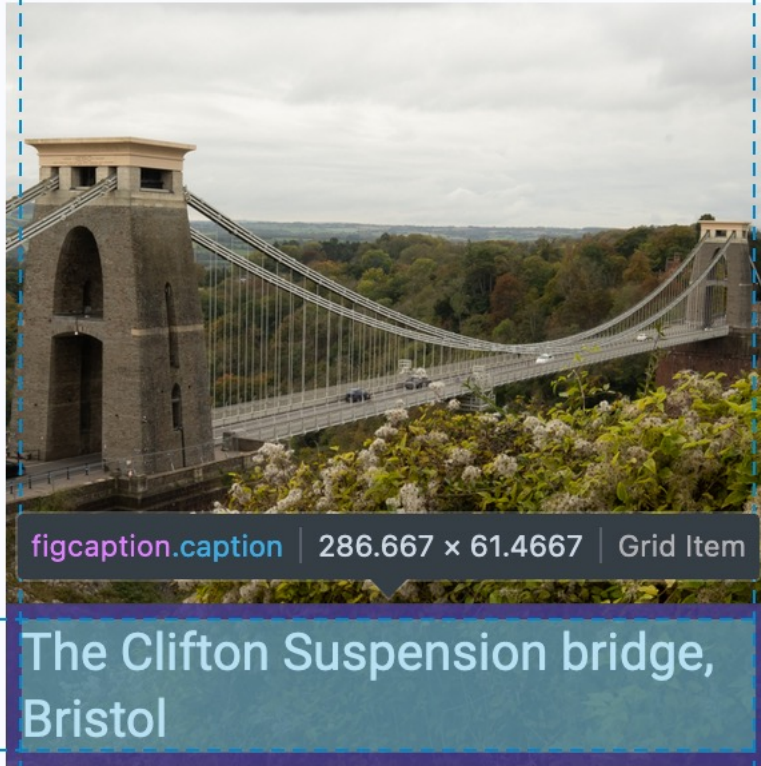

Allow nested grids to inherit the track sizing from the parent.

```
.container {  
  display: grid;  
  grid-template-columns: 1fr 1fr 1fr;  
}
```

```
.container .item {  
  grid-column: 1 / 3;  
  display: grid;  
  grid-template-columns: subgrid;  
}
```

Bristol cranes at sunrise

The Clifton Suspension bridge,
Bristol

Bristol balloons

```
.container figure {  
  display: grid;  
  grid-template-rows: subgrid;  
}  
.caption {  
  grid-row: 2;  
}
```

Subgrid

CSS Containment

This box and children are independent from the rest of the layout.

```
.sidebar {  
  contain: layout;  
}
```

Use the contain property now!

Container Queries

Design components that can react to the available space in their container.

Bristol is a pretty nice place to live.

Bristol is a pretty nice place to live.

```
.sidebar {  
  container-type: inline-size;  
}
```

Using `container-type` creates a
containment context.

This also turns on layout, style, and inline-size containment, in the same way as using the `contain` property does.

```
.sidebar {  
  container-type: inline-size;  
  container-name: sidebar;  
}
```

```
@container (min-width: 400px) {  
  .card {  
    display: grid;  
    grid-template-columns: 1fr 2fr;  
  }  
}
```

```
@container sidebar (min-width: 400px) {  
  .card {  
    display: grid;  
    grid-template-columns: 1fr 2fr;  
  }  
}
```

One

Two

Three

Four

One

Two

Three

Four

```
.wrapper > div {  
  container-type: inline-size;  
}  
  
@container (min-width: 220px) {  
  .box {  
    background-color: var(--blue-sapphire);  
  }  
}
```

Bristol is a pretty nice place to live.

```
.fig-panel {  
  display: grid;  
  grid-template-columns: 1fr 1fr;  
}
```

Bristol is a pretty nice place to live.

```
@container (min-width: 700px) {  
  grid-template-columns: repeat(3,1fr);  
}
```

Container Queries

This seems so simple!
Why did it take so long?

RenderingNG deep-dive: LayoutNG

Published on Friday, October 8, 2021

Ian Kilpatrick
Layout tech lead

Koji Ishi
Layout engineer

This post is a part of a series on the Chromium rendering engine. Check out the rest of the series to learn more about [RenderingNG](#), [the architecture](#), [key data structures](#), and [VideoNG](#).

I'm Ian Kilpatrick, an engineering lead on the Blink layout team, along with Koji Ishii. Before working on the Blink team, I was a front-end engineer (before Google had the role of "front-end engineer"), building features within Google Docs, Drive, and Gmail. After around five years in that role I took a large gamble switching to the Blink team, effectively learning C++ on the job, and attempting to ramp up on the massively complex Blink codebase. Even today, I only understand a relatively small portion of it. I'm grateful for the time given to me during this period. I was comforted by the fact a lot of "recovering front-end engineers" made the transition to being a "browser engineer" before me.

Scott Jehl
@scottjehl

Wow... Okay, so here's something I've been trying to do for at least 10 years!

A CSS-only responsive table with fixed column & row headers, inside a layout, with scroll snapping! 🤖

codepen.io/scottjehl/pen/...

Works in: Firefox, Safari (iOS & Mac), Chrome (Mobile & Desktop), Edge

CSS responsive table with fixed column and row headers and scroll snap

sidebar		Col Header	Col Header	Col Header	Col Header	Col Header	Col Header	Col Header	Col Header	Col Header
	Row Header	Cell Data	Cell Data	Cell Data	Cell Data	Cell Data	Cell Data	Cell Data	Cell Data	Cell Data
	Row Header	Cell Data	Cell Data	Cell Data	Cell Data	Cell Data	Cell Data	Cell Data	Cell Data	Cell Data
	Row Header	Cell Data	Cell Data	Cell Data	Cell Data	Cell Data	Cell Data	Cell Data	Cell Data	Cell Data
	Row Header	Cell Data	Cell Data	Cell Data	Cell Data	Cell Data	Cell Data	Cell Data	Cell Data	Cell Data
	Row Header	Cell Data	Cell Data	Cell Data	Cell Data	Cell Data	Cell Data	Cell Data	Cell Data	Cell Data
	Row Header	Cell Data	Cell Data	Cell Data	Cell Data	Cell Data	Cell Data	Cell Data	Cell Data	Cell Data
	Row Header	Cell Data	Cell Data	Cell Data	Cell Data	Cell Data	Cell Data	Cell Data	Cell Data	Cell Data

Putting it together

Container Queries and subgrid

A nice picture of a balloon.

A nice picture of a
balloon.

```
@container grid (min-width: 600px) {  
  .item {  
    display: grid;  
    grid-template-columns: subgrid;  
  }  
}
```

Thank you!
