

DEMO DAY

December 2020

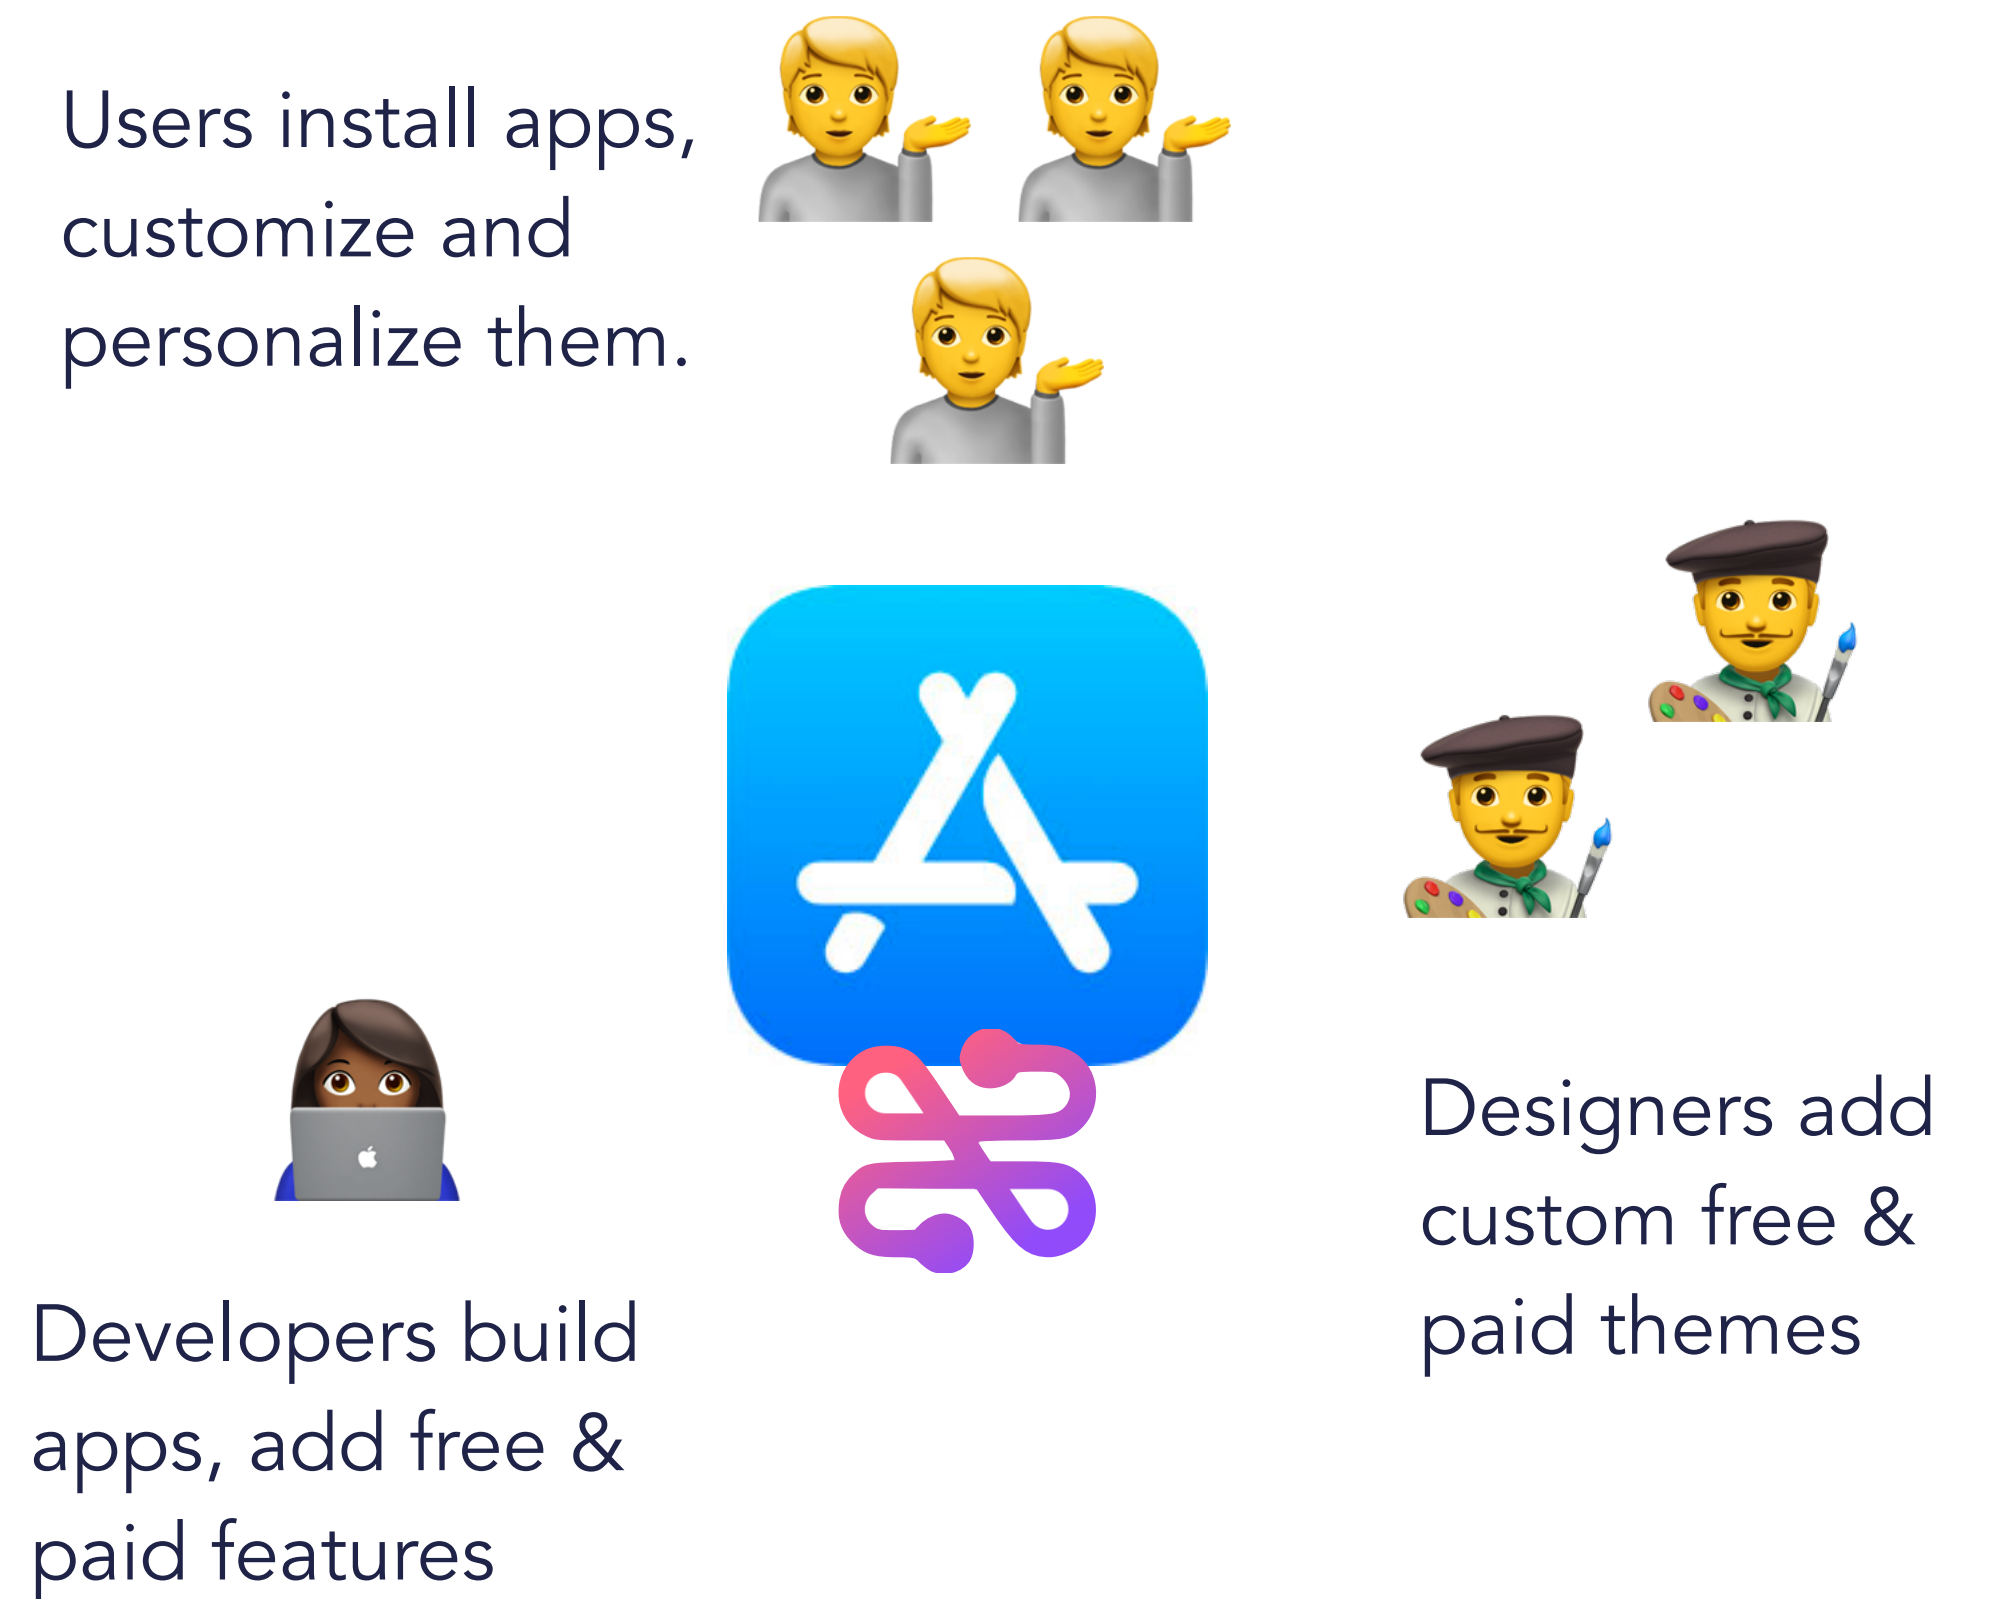

AGENDA

- Intro
 - Meet the Team
- Platform & Product
 - Webnative API & CLI Demo
 - Diffuse Demo
 - Fission Drive
- Technology
 - Building Blocks
 - Roadmap
- What's next?
 - Platform Superpowers
 - Sponsored Apps
- App Demos
 - Moon Forge
 - Photo Gallery
 - Mind Drive
 - Omo Earth

FAST APP PUBLISHING

- Fission is building an app publishing platform that supports developers in building great apps, connects to users, and gets app makers paid.

 Ship Apps  Talk to Users  Make money

THEMES, MOVEMENTS & BELIEFS

- Normalize paying for apps
- Own your data
- YES code
- Connect app users with makers
- Open source as a job, software as a small business
- Security and privacy should be built in
- Enable everyone to be an app builder

MEET THE TEAM

- New!
 - Ben 🇩🇪 @benjaminbollen
 - James 🇨🇦 @walkah
 - Su 🇨🇦 @Majord0m0
- Original flavour!
 - Boris 🇨🇦 @bmann
 - Brooklyn 🇨🇦 @expede
 - Daniel 🇺🇸
 - Steven 🇧🇪 @icidasset
- Thank you Bruno 🇧🇷 & Mariana 🇪🇸 !

PLATFORM & PRODUCT

PLATFORM & PRODUCT

- Fission app publishing platform
 - Modern app publishing - free SSL and subdomain, custom domains
 - Fission accounts across all apps, password-less login
- Webnative SDK that developers use without having to learn back end or manage servers
- Open source product: launch your own federated network with built in identity and apps as a community or company

WEBNATIVE API & CLI DEMO

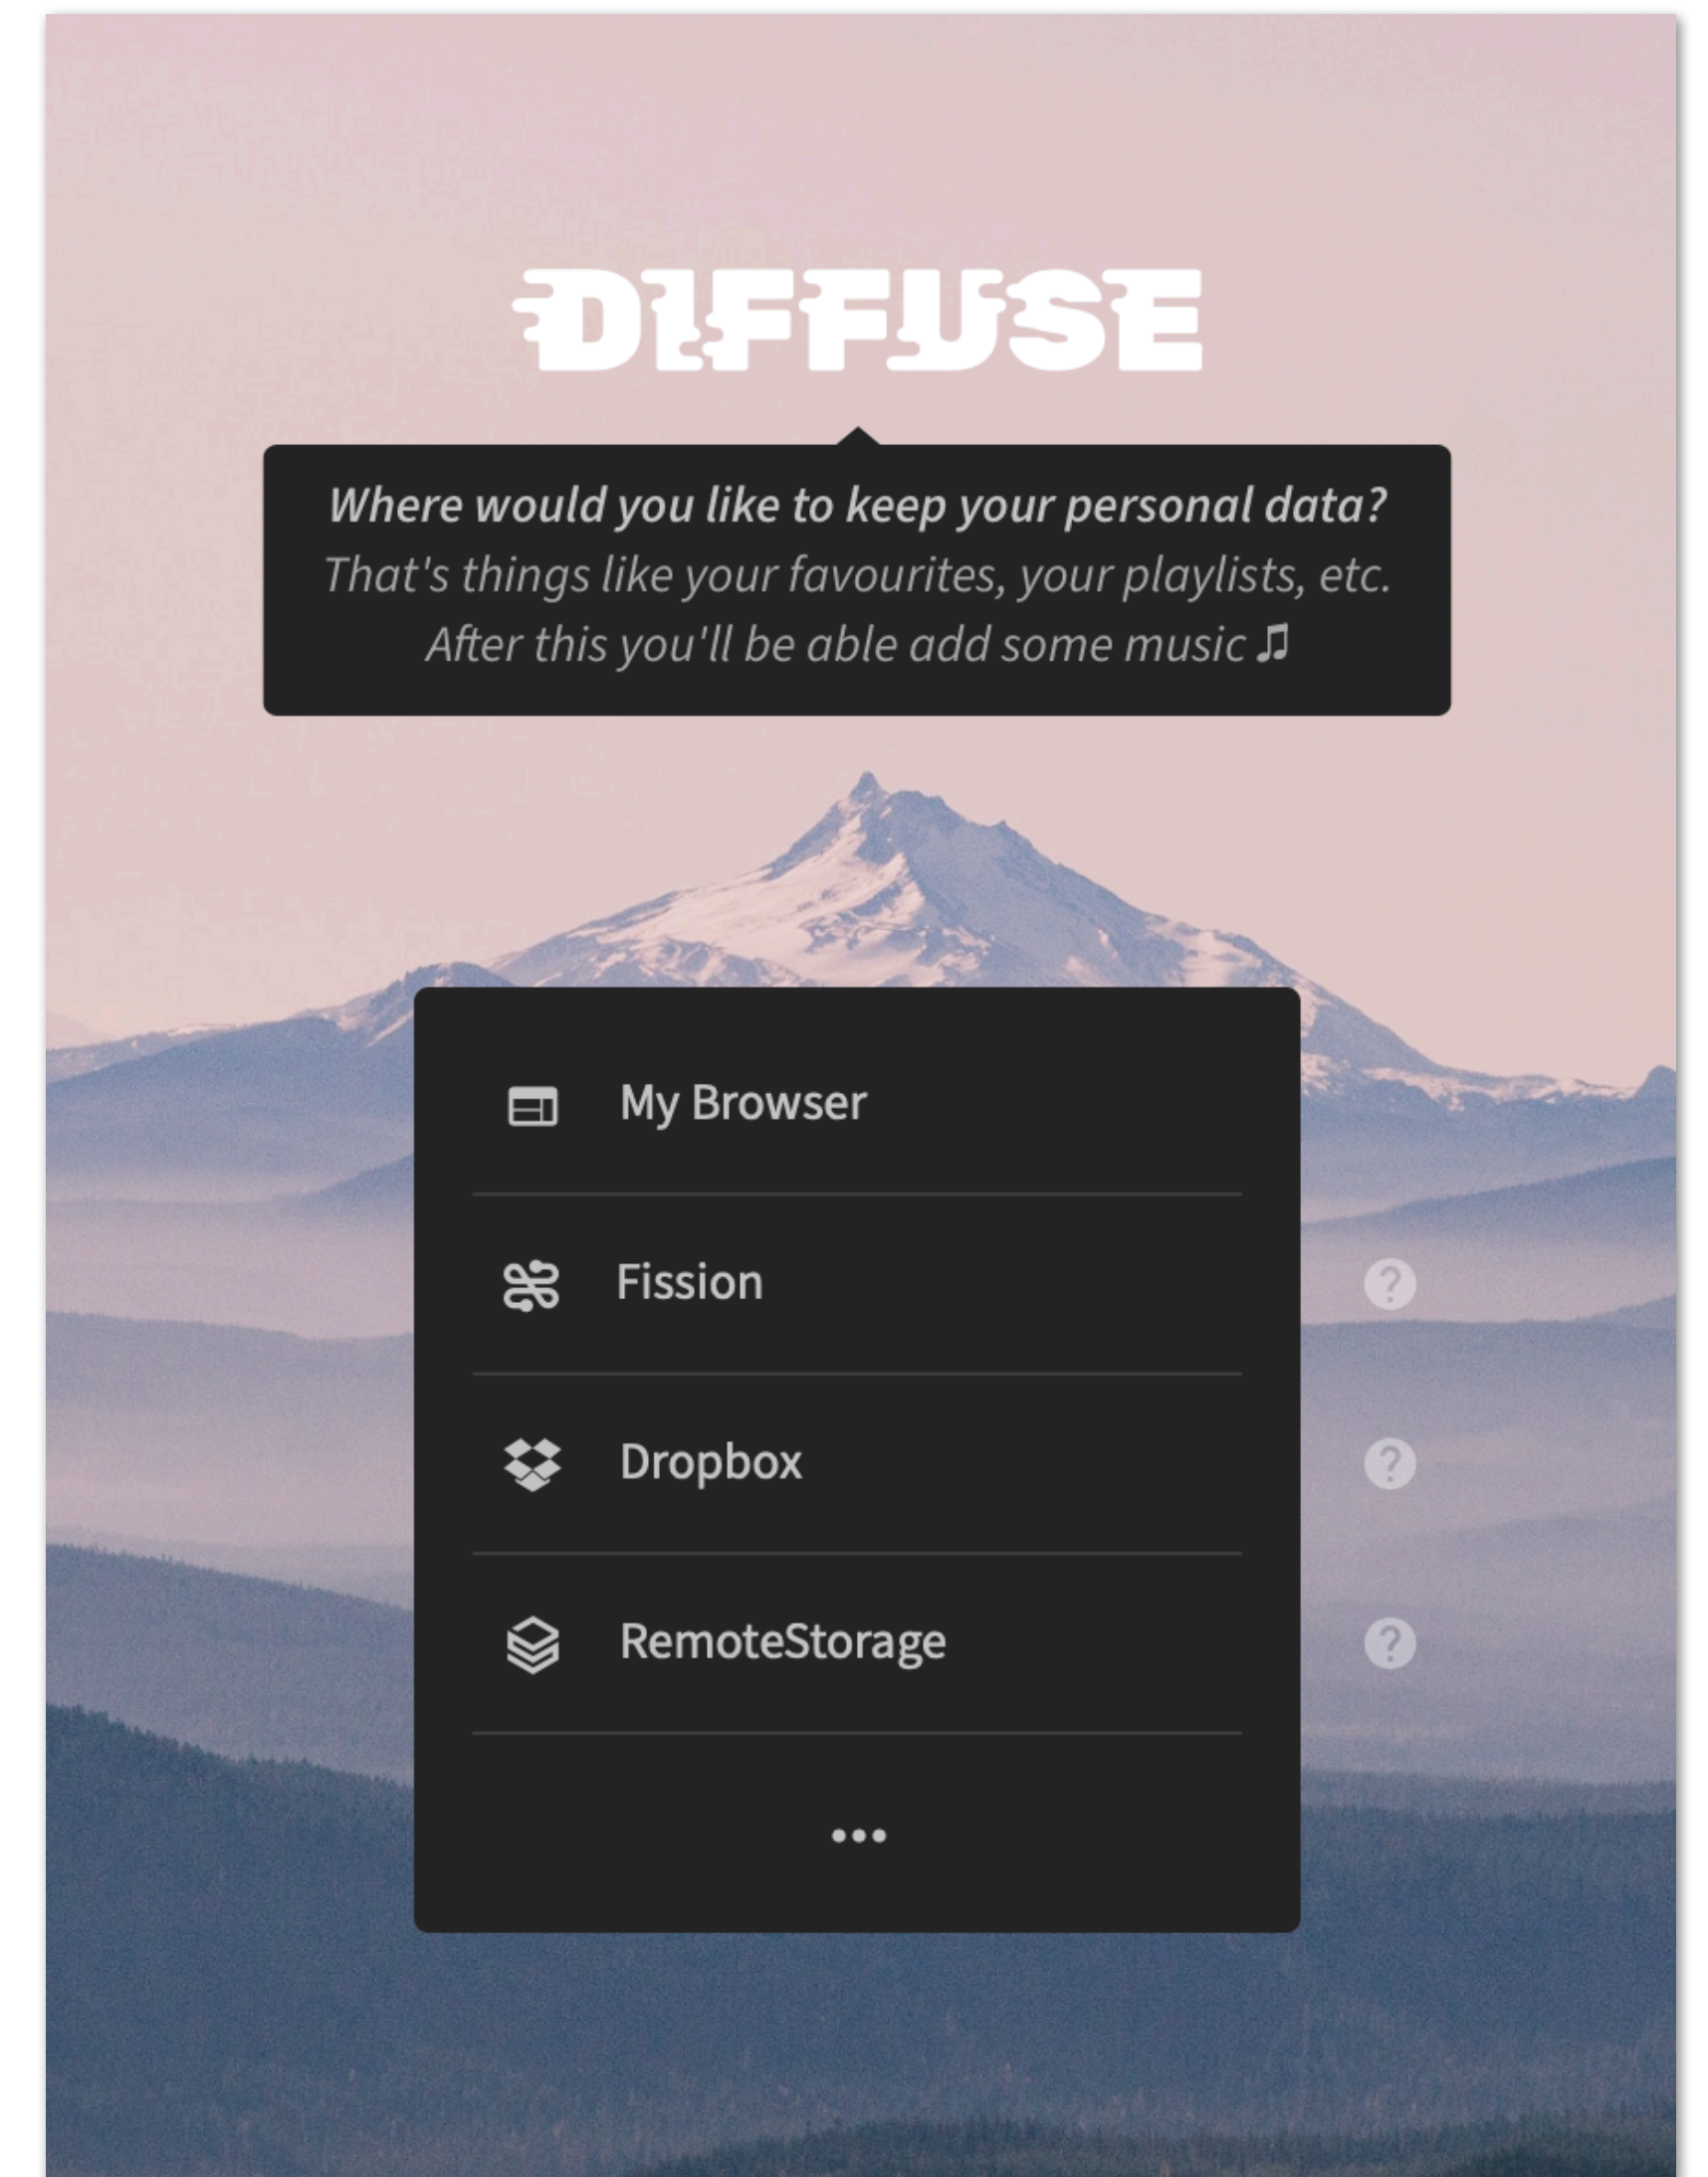

- Presented by James

DEMO: DIFFUSE

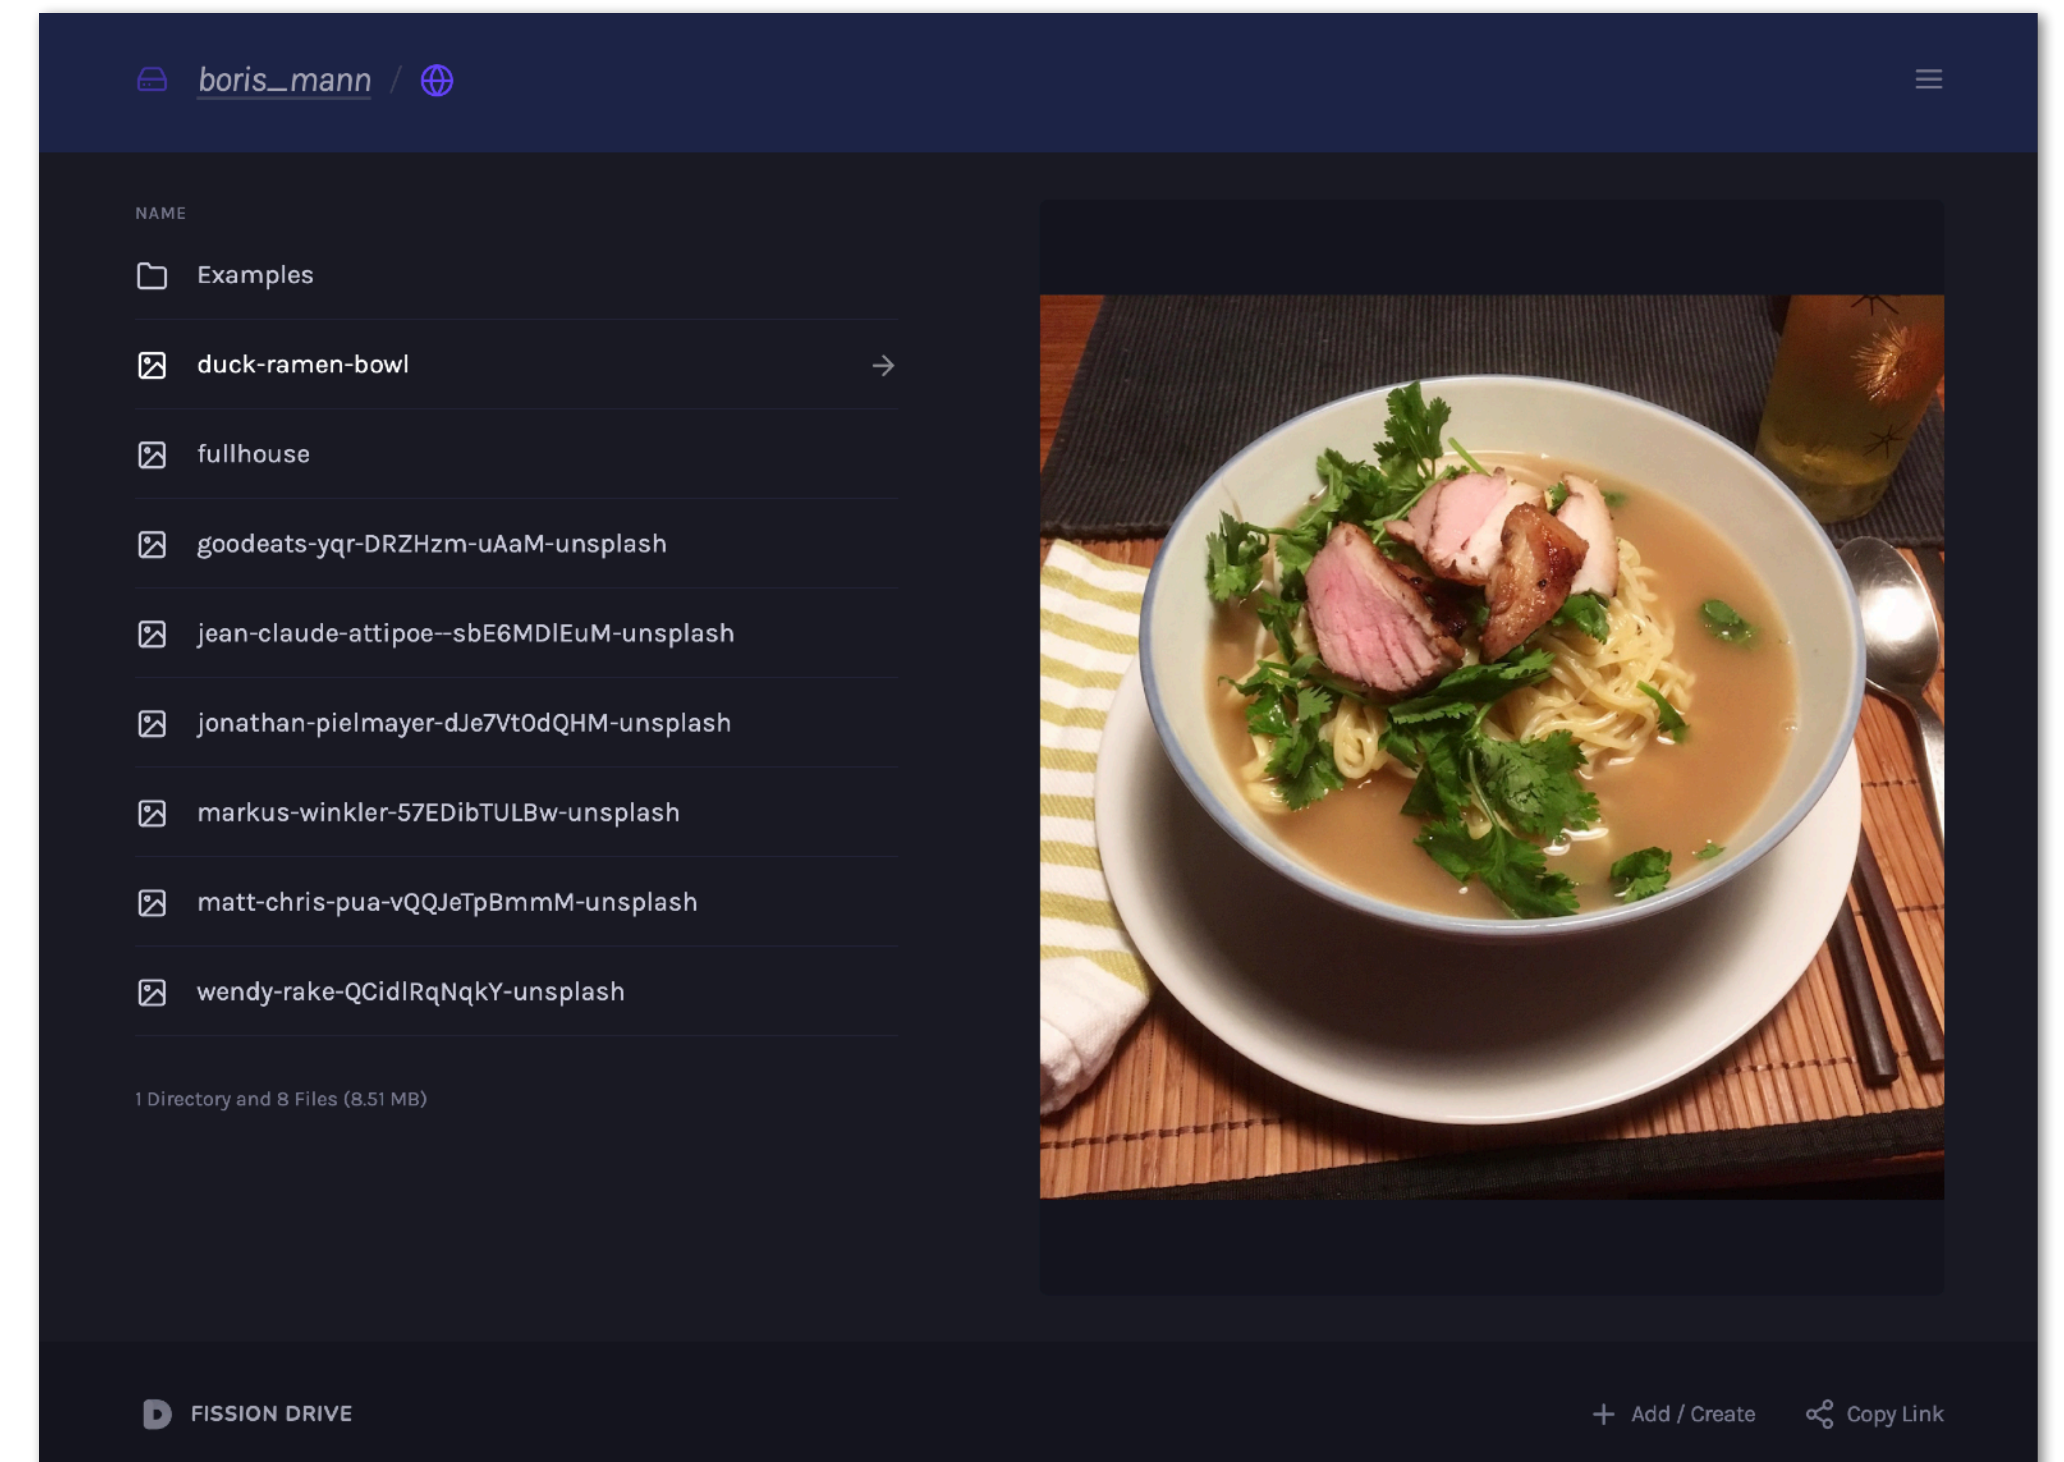

- Diffuse is a decentralized music player where both your music and your playlists are stored wherever you like, under your control.
- Try it <https://nightly.diffuse.sh/>
- Github <https://github.com/icidasset/diffuse/>
- Built by Steven V, Twitter @icidasset

DRIVE

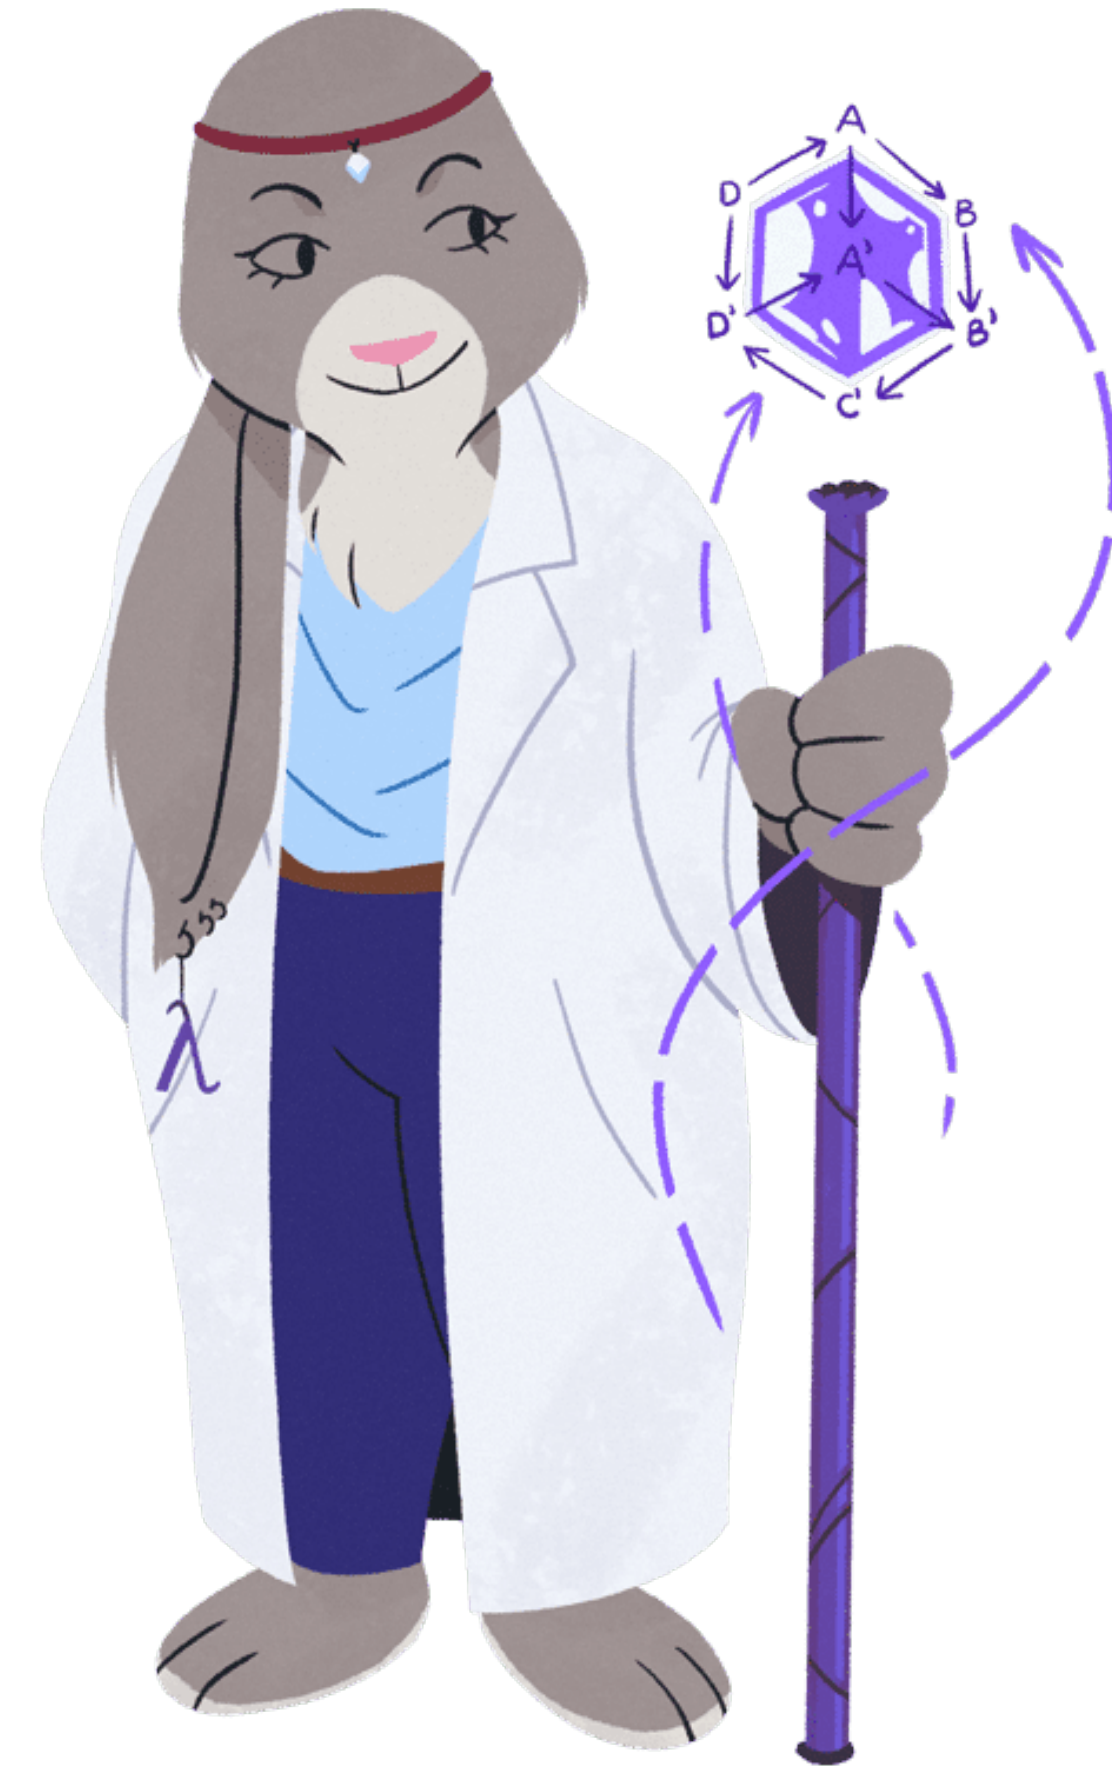

- Every Fission account is like an open source iCloud: login and your files are available from any browser
- **Fission Drive** is our 1st party app to showcase our SDK and browse your account file system
- drive.fission.codes »

TECHNOLOGY

TECHNOLOGY

- Presented by Brooklyn Zelenka

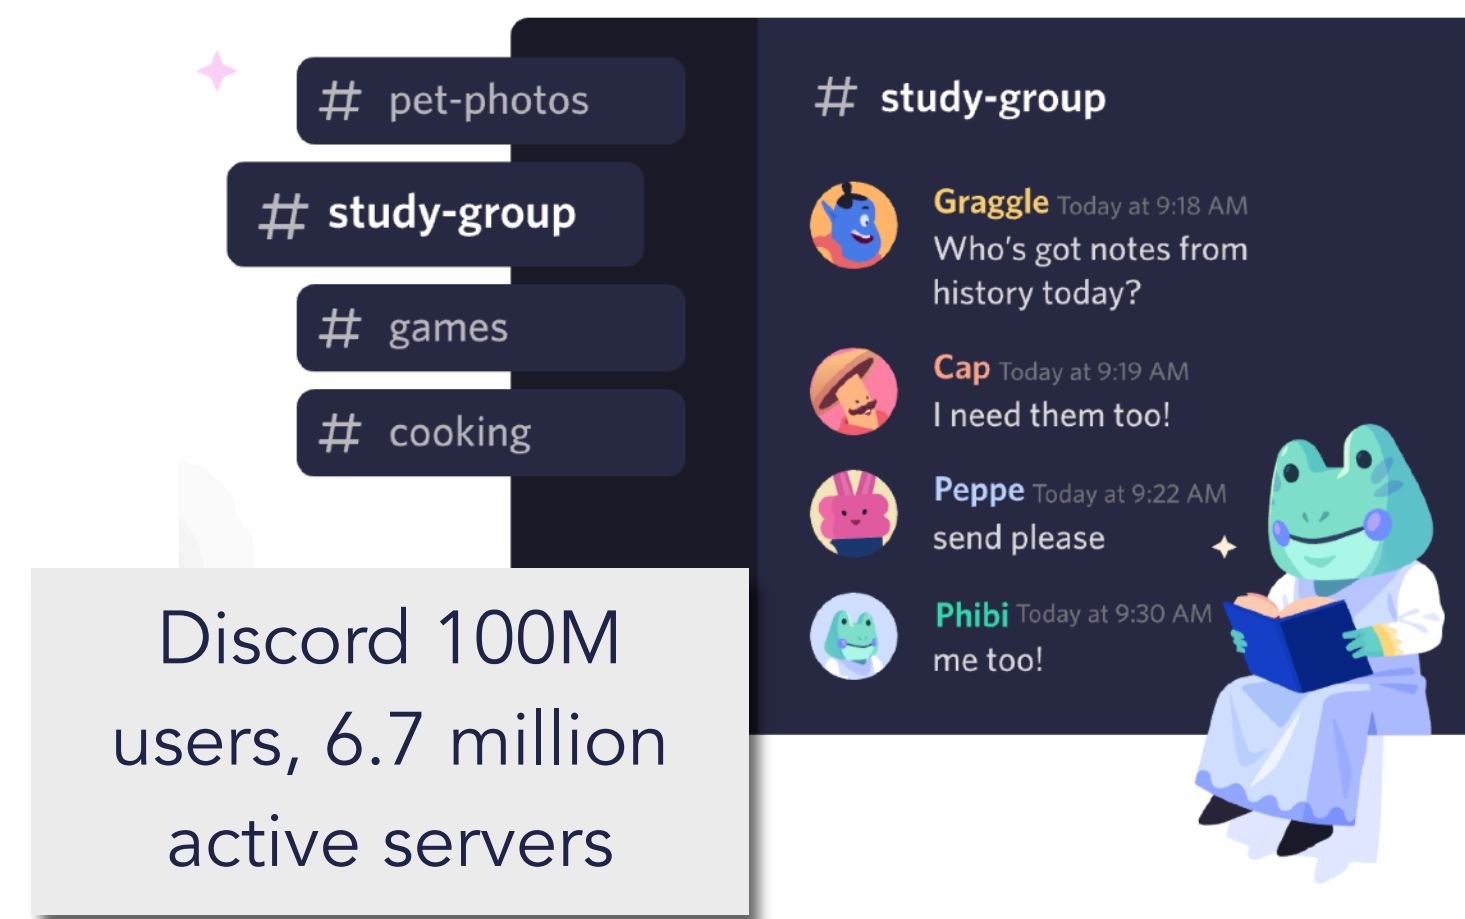

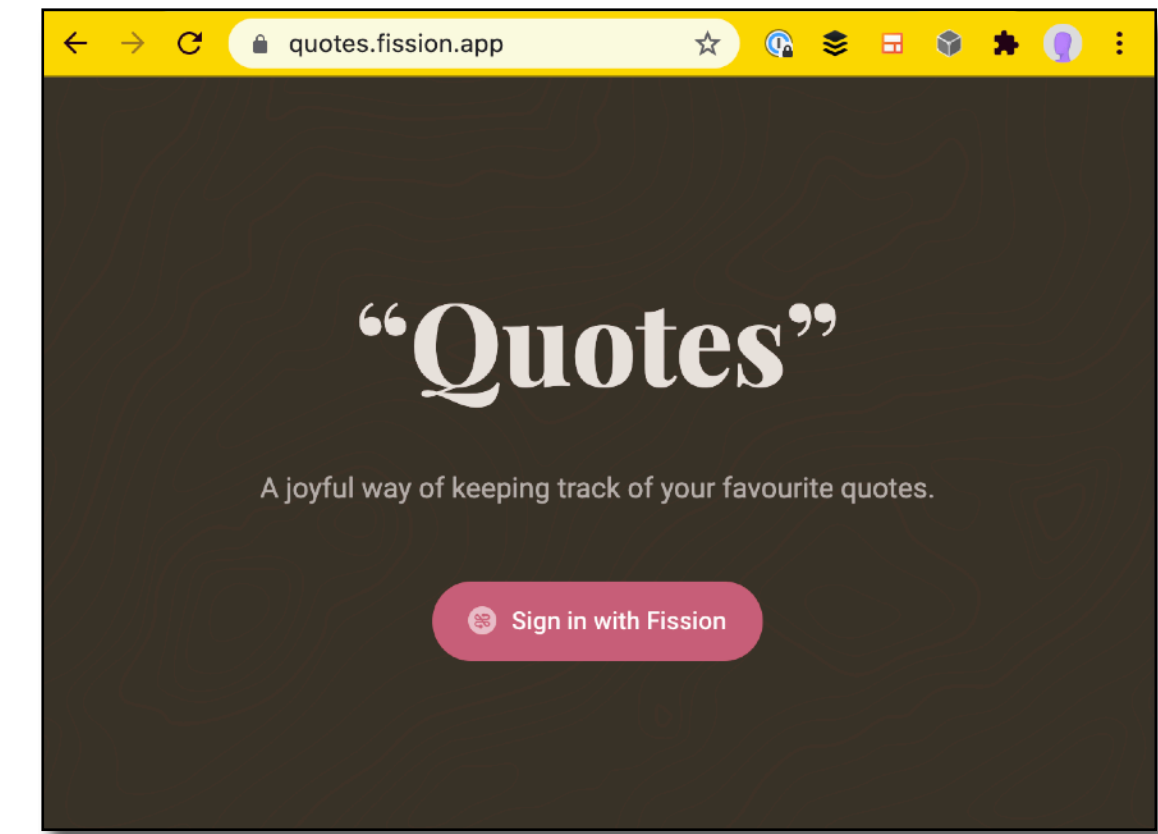

WHAT'S NEXT?

APP CLONING

- Developers build apps → users and designers clone and customize, other developers remix
- Enable 1000s of personalized apps by activating networks — e.g. Discord, Telegram, WhatsApp

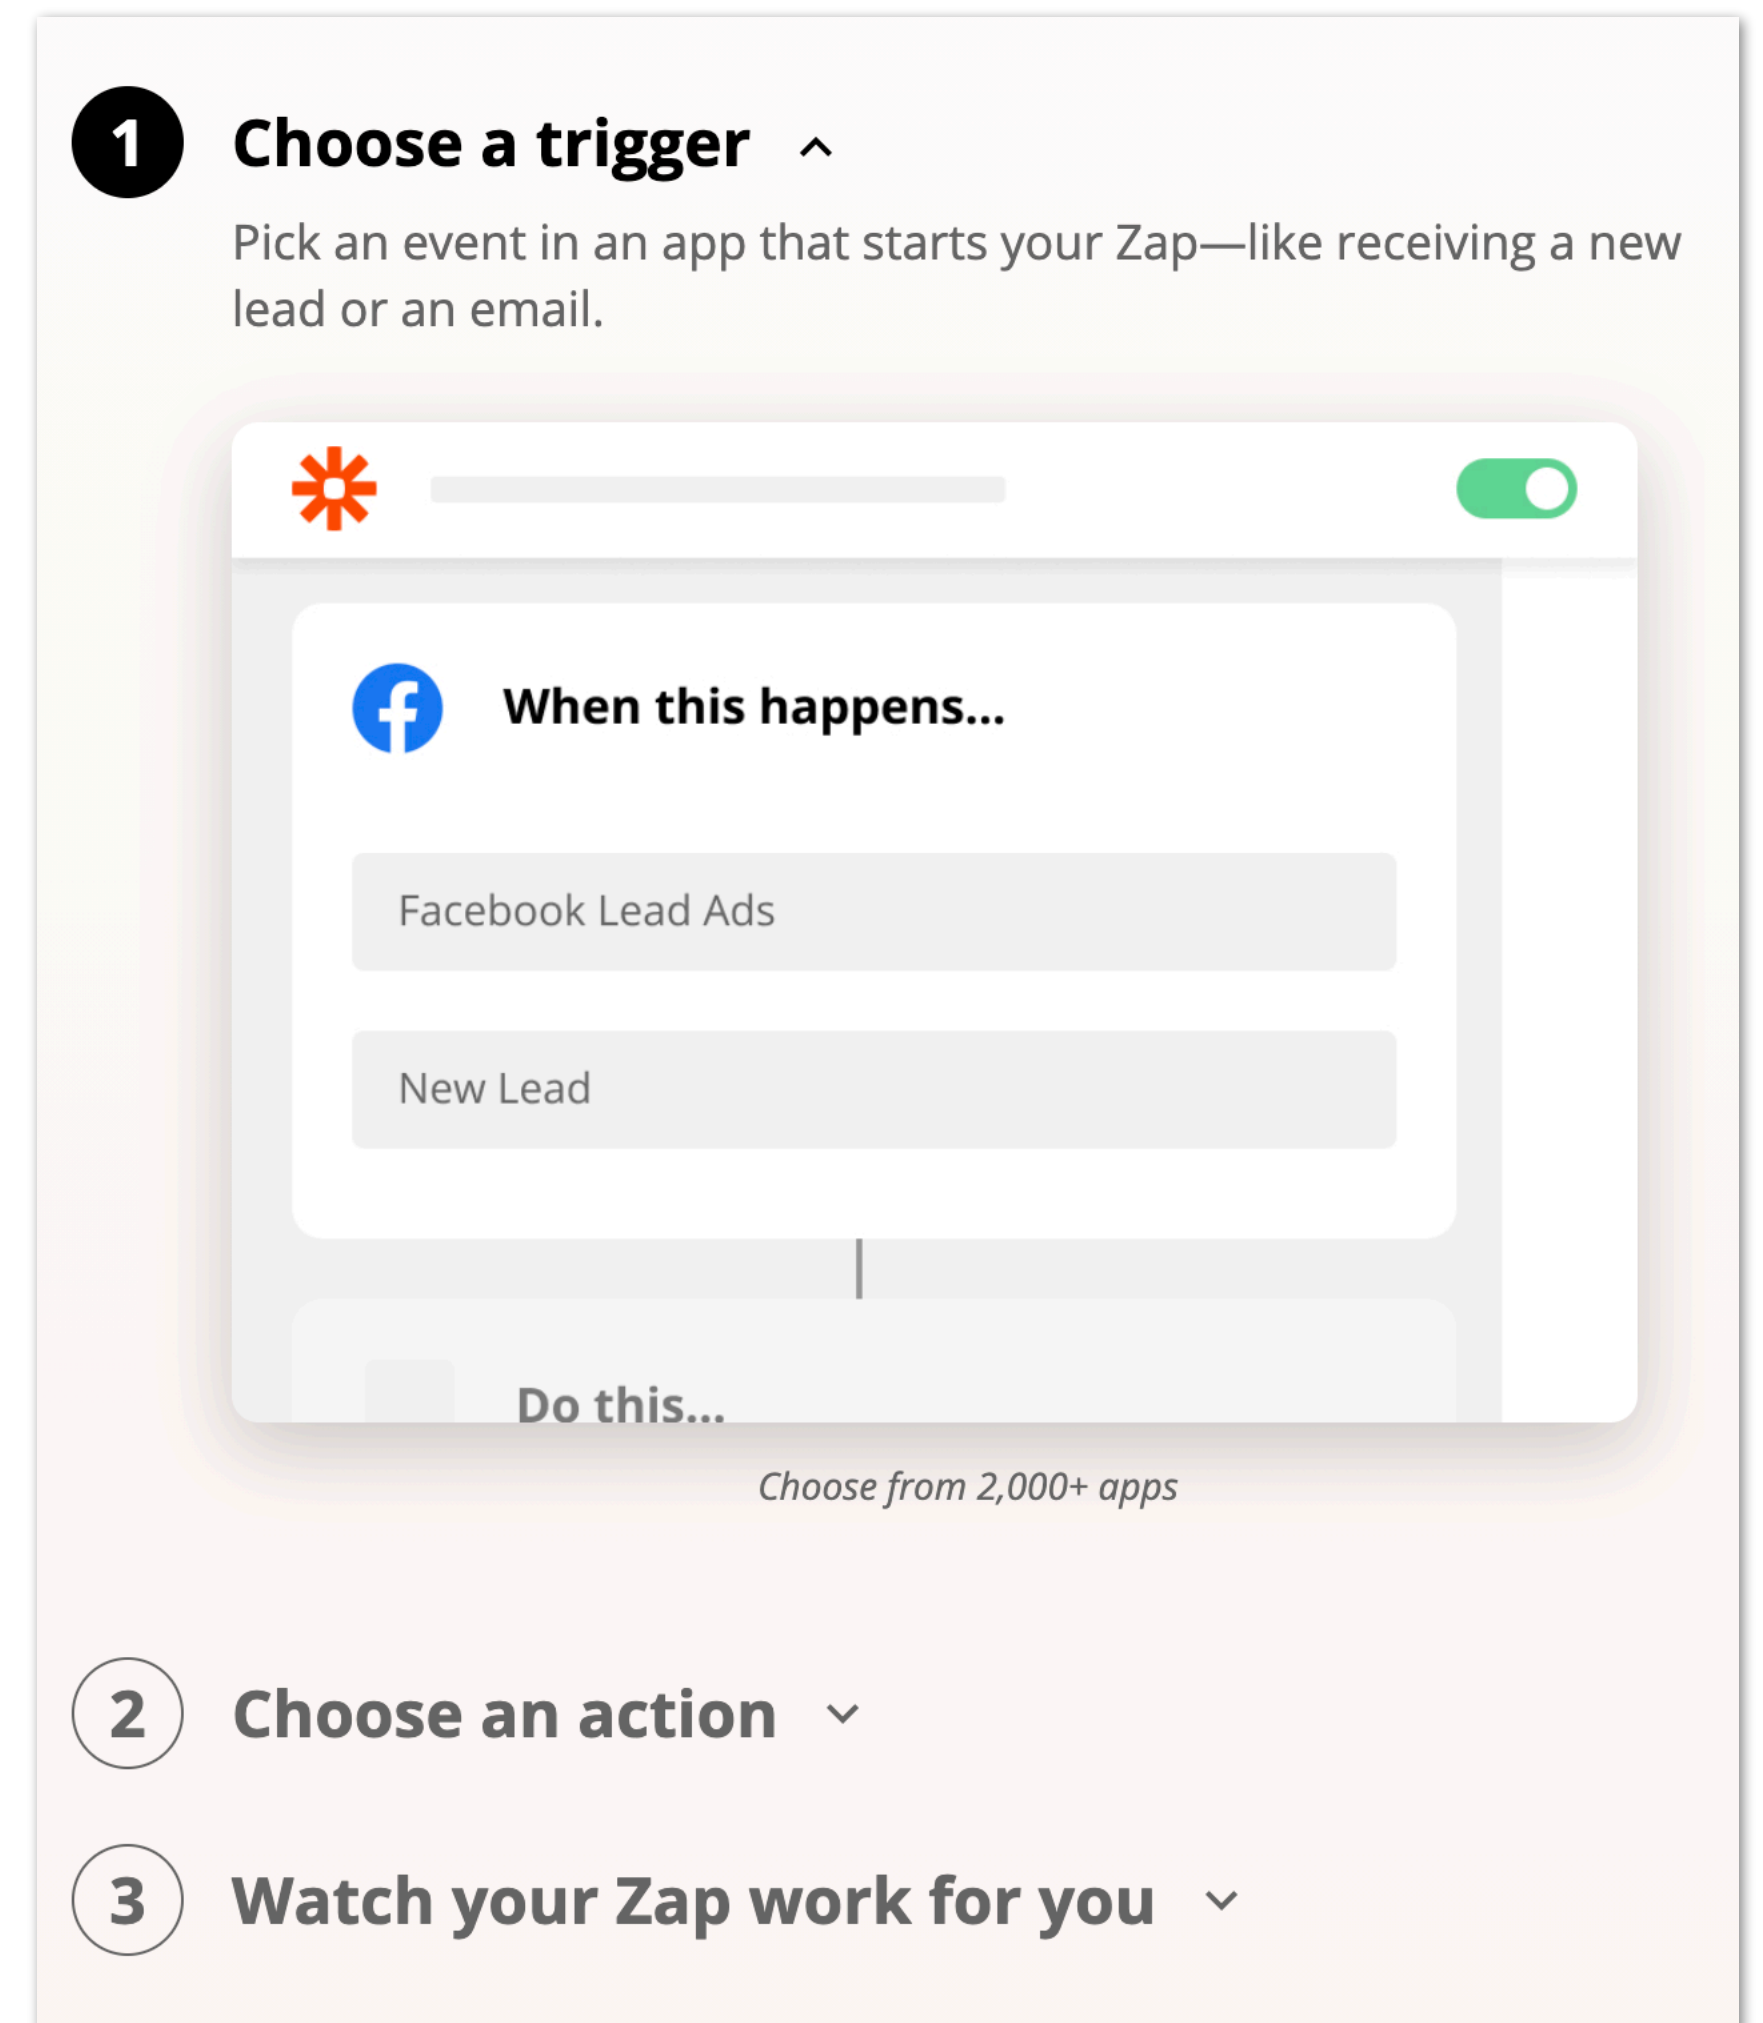

Fission enables app design with cloning built in

Huge messaging communities can run their own apps with 1 click

DATA FROM ANY APP WITH ZAPIER

- Zapier is a platform that lets anyone connect apps and run mini workflows without programming
- By integrating with Zapier at the Fission platform level, we can connect Webnative apps to existing SaaS apps, in and out
- Example: Use Google Sheets or Airtable to maintain some data, and when it changes it gets natively pushed to your app as JSON

1 Choose a trigger ^

Pick an event in an app that starts your Zap—like receiving a new lead or an email.

When this happens...

- Facebook Lead Ads
- New Lead

Do this...

Choose from 2,000+ apps

2 Choose an action v

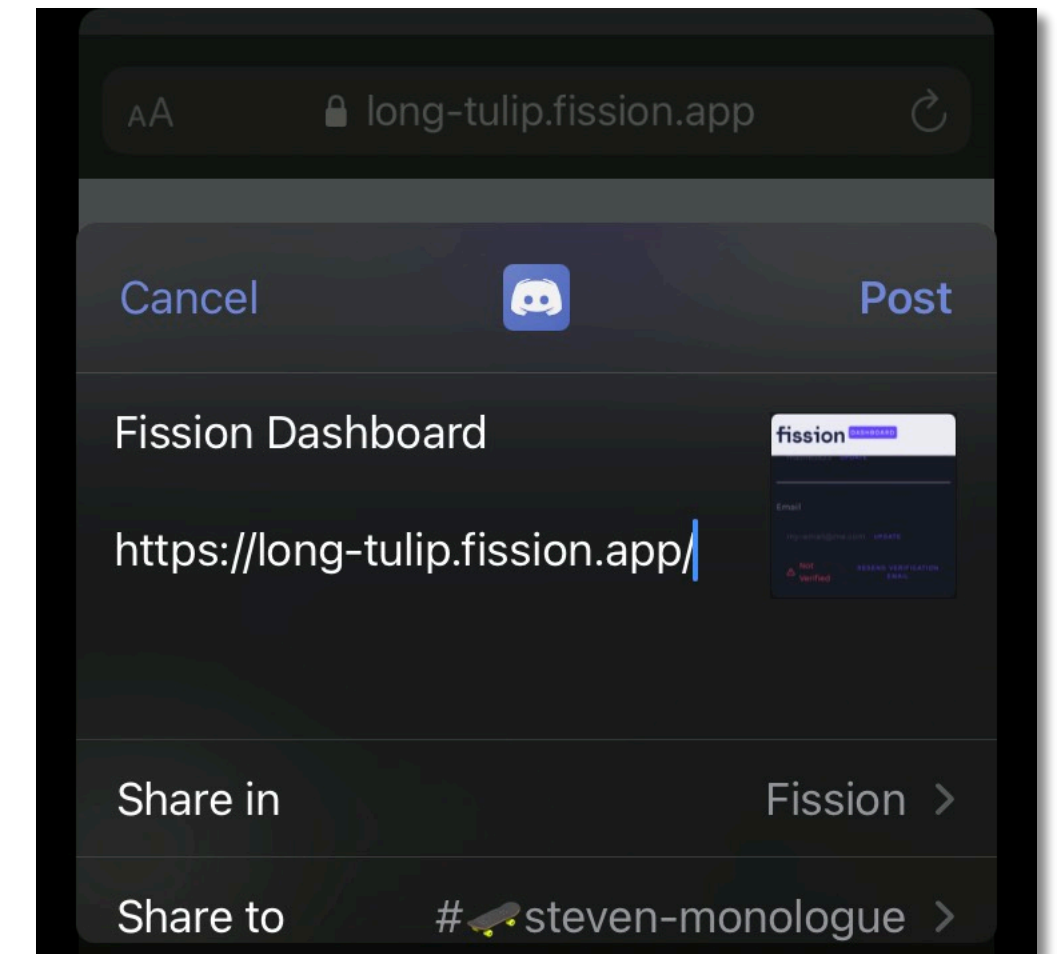

3 Watch your Zap work for you v

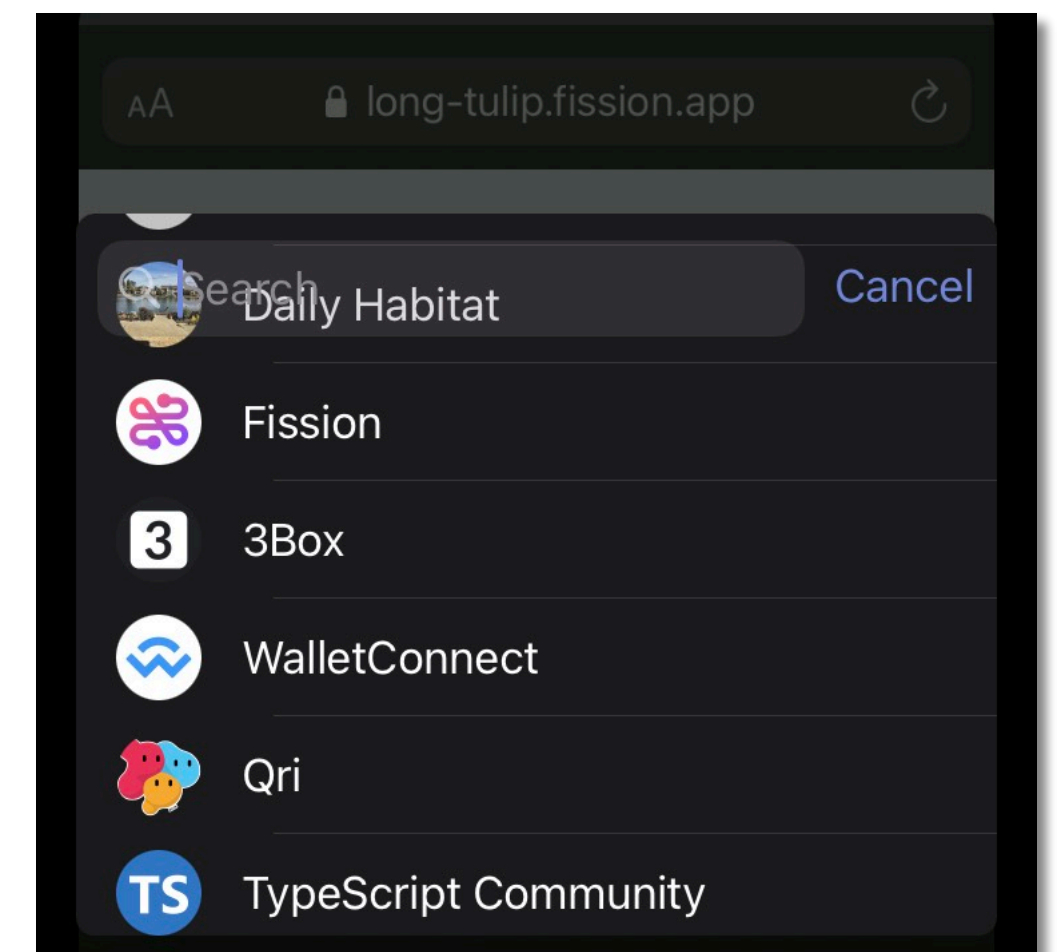

NATIVE MOBILE INTEGRATION

- There are native mobile OS features in iOS and Android that are only available to natively installed apps — e.g. share sheet, push notifications
- By building a native Fission app that users login to, then all of the apps they are connected to can then have access to native features
- Example: send data to your web app from a share sheet

Choose a Server Channel

Choosing Discord Servers

SPONSORED APPS

- For developers who want to build open source apps, supported by a community of users
- Normalize having users connect to the developers who build and maintain apps
- Work with developers to get them set up on Open Collective to accept donations and sponsorships — with Fission as the first sponsor
- Build a community of people who earn a living as app makers

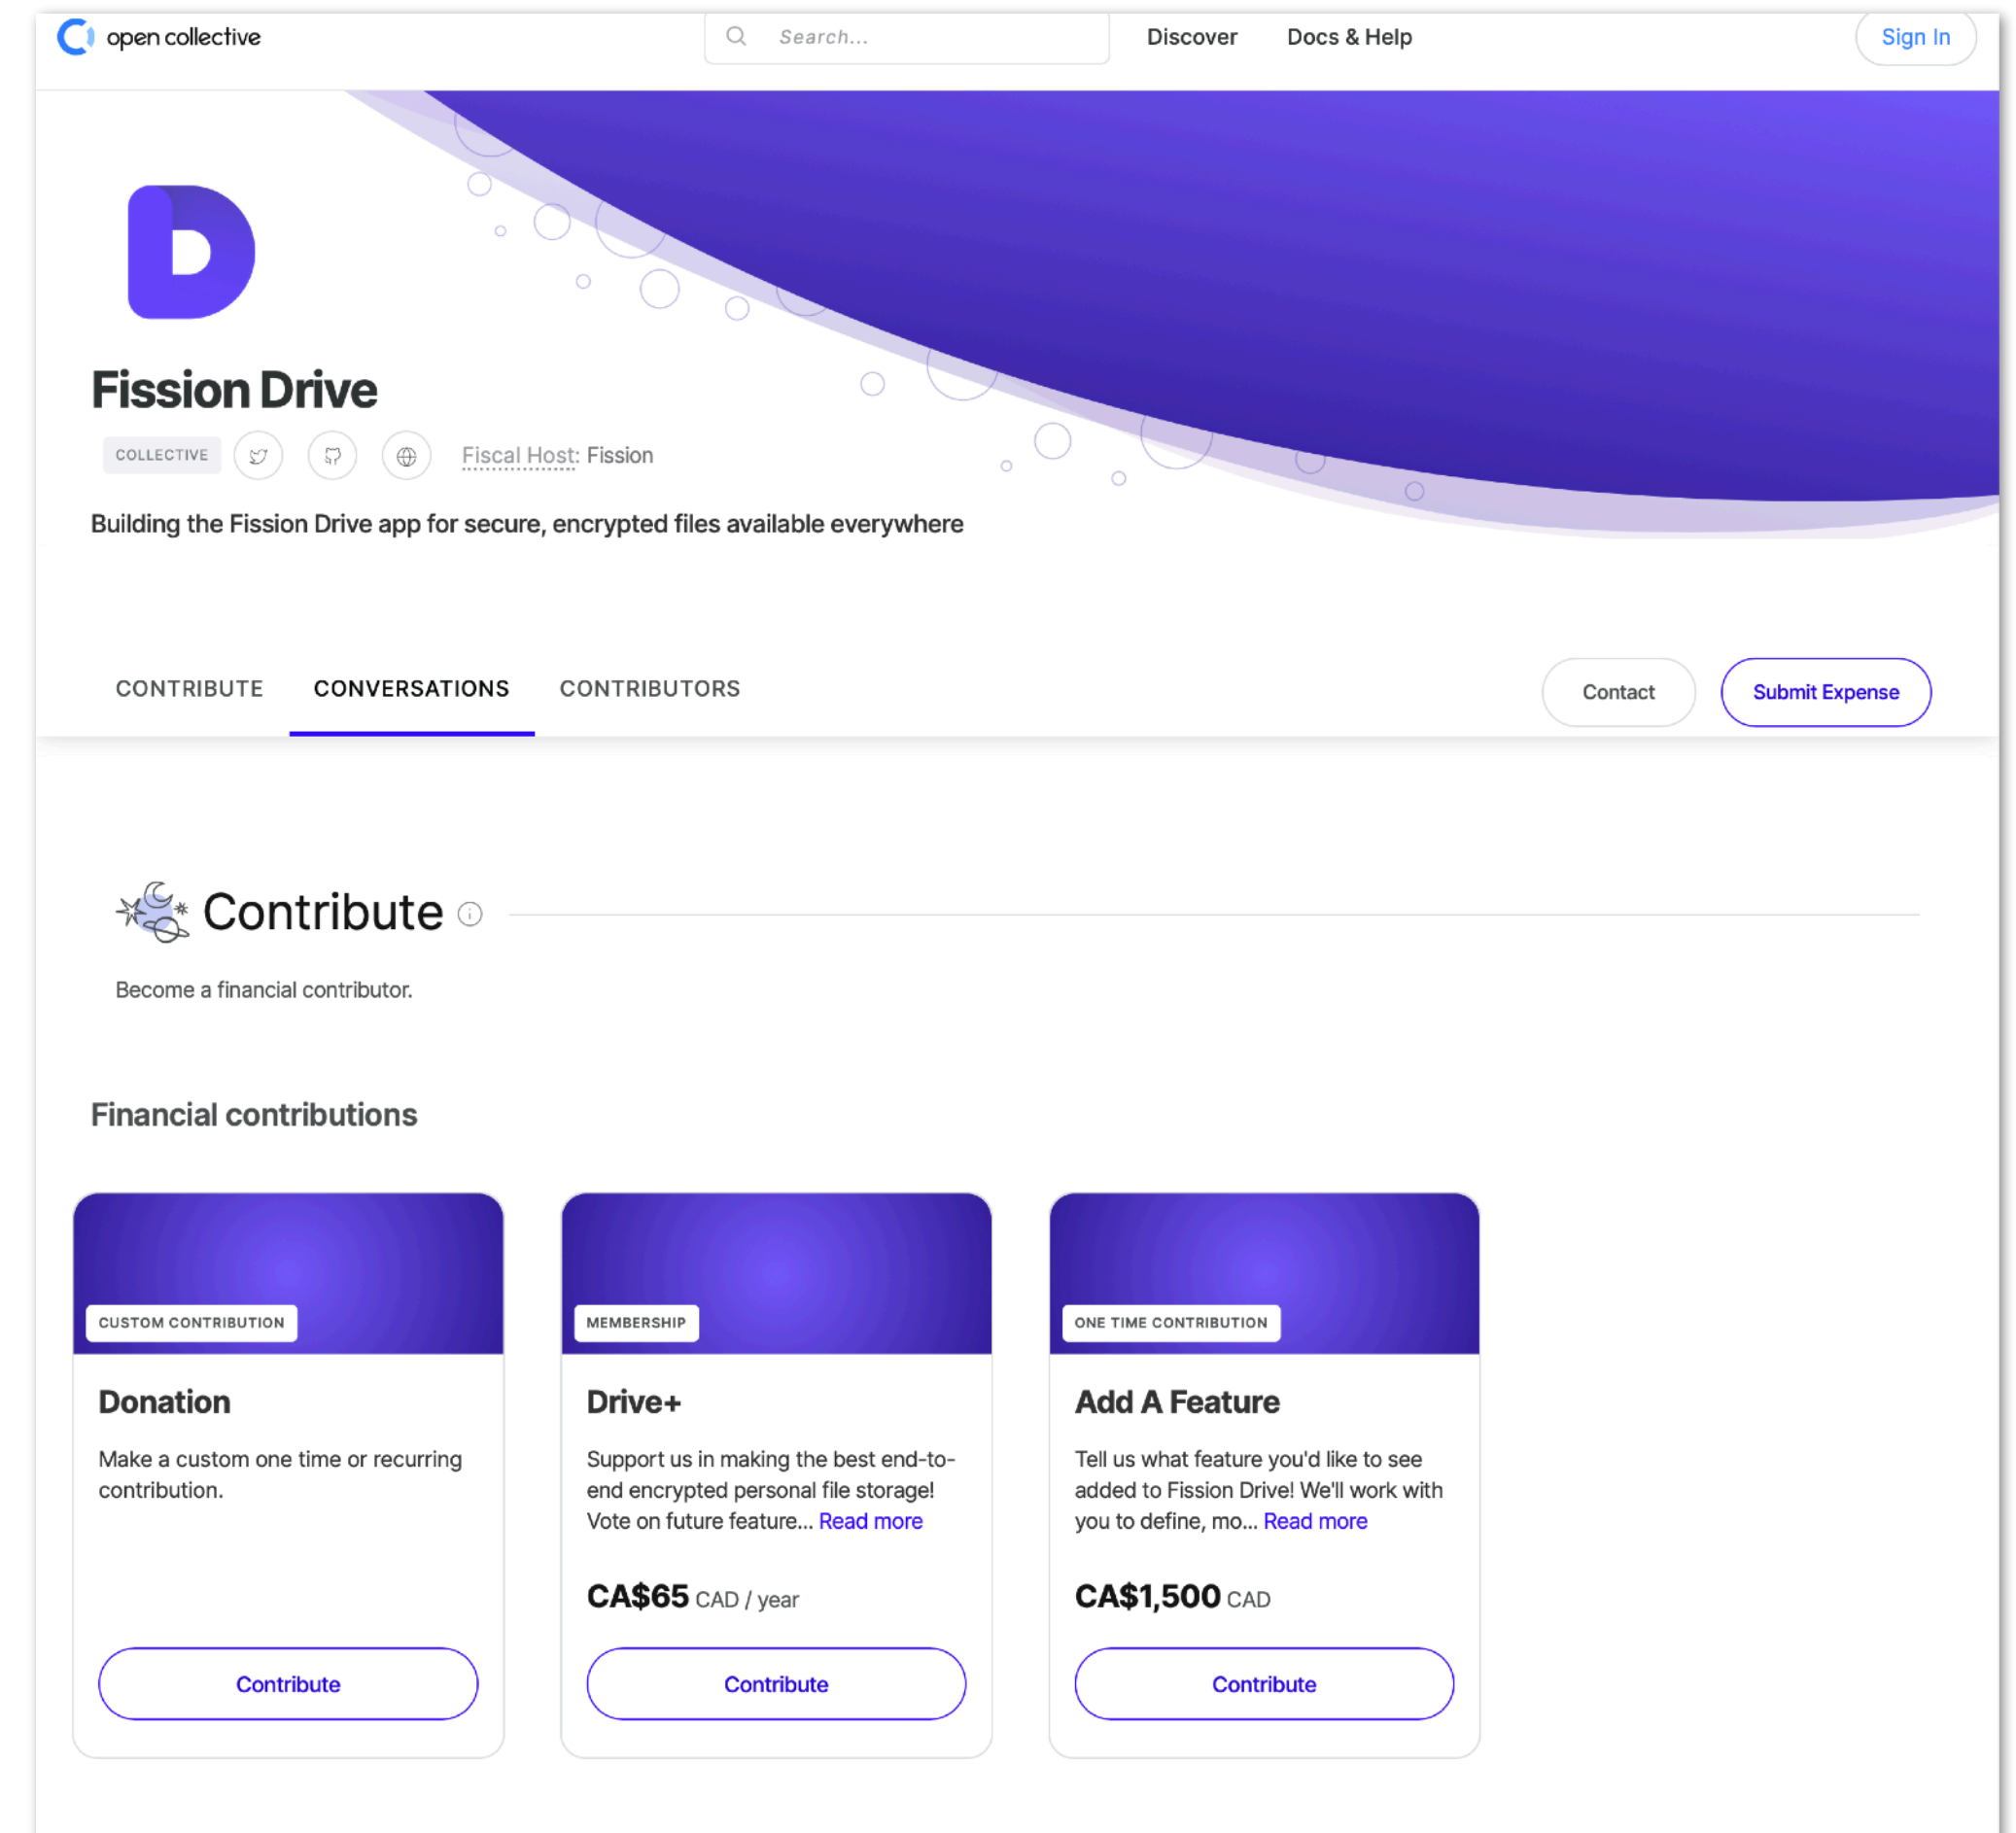

open collective

opencollective.com

DRIVE IS NOW ON OPEN COLLECTIVE

- We'll be putting some of our own apps, starting with Drive, on Open Collective
- You can become a "Drive+" member and you'll be first in line to get a Fission premium account
- Fission is a Fiscal Host, and can host your apps

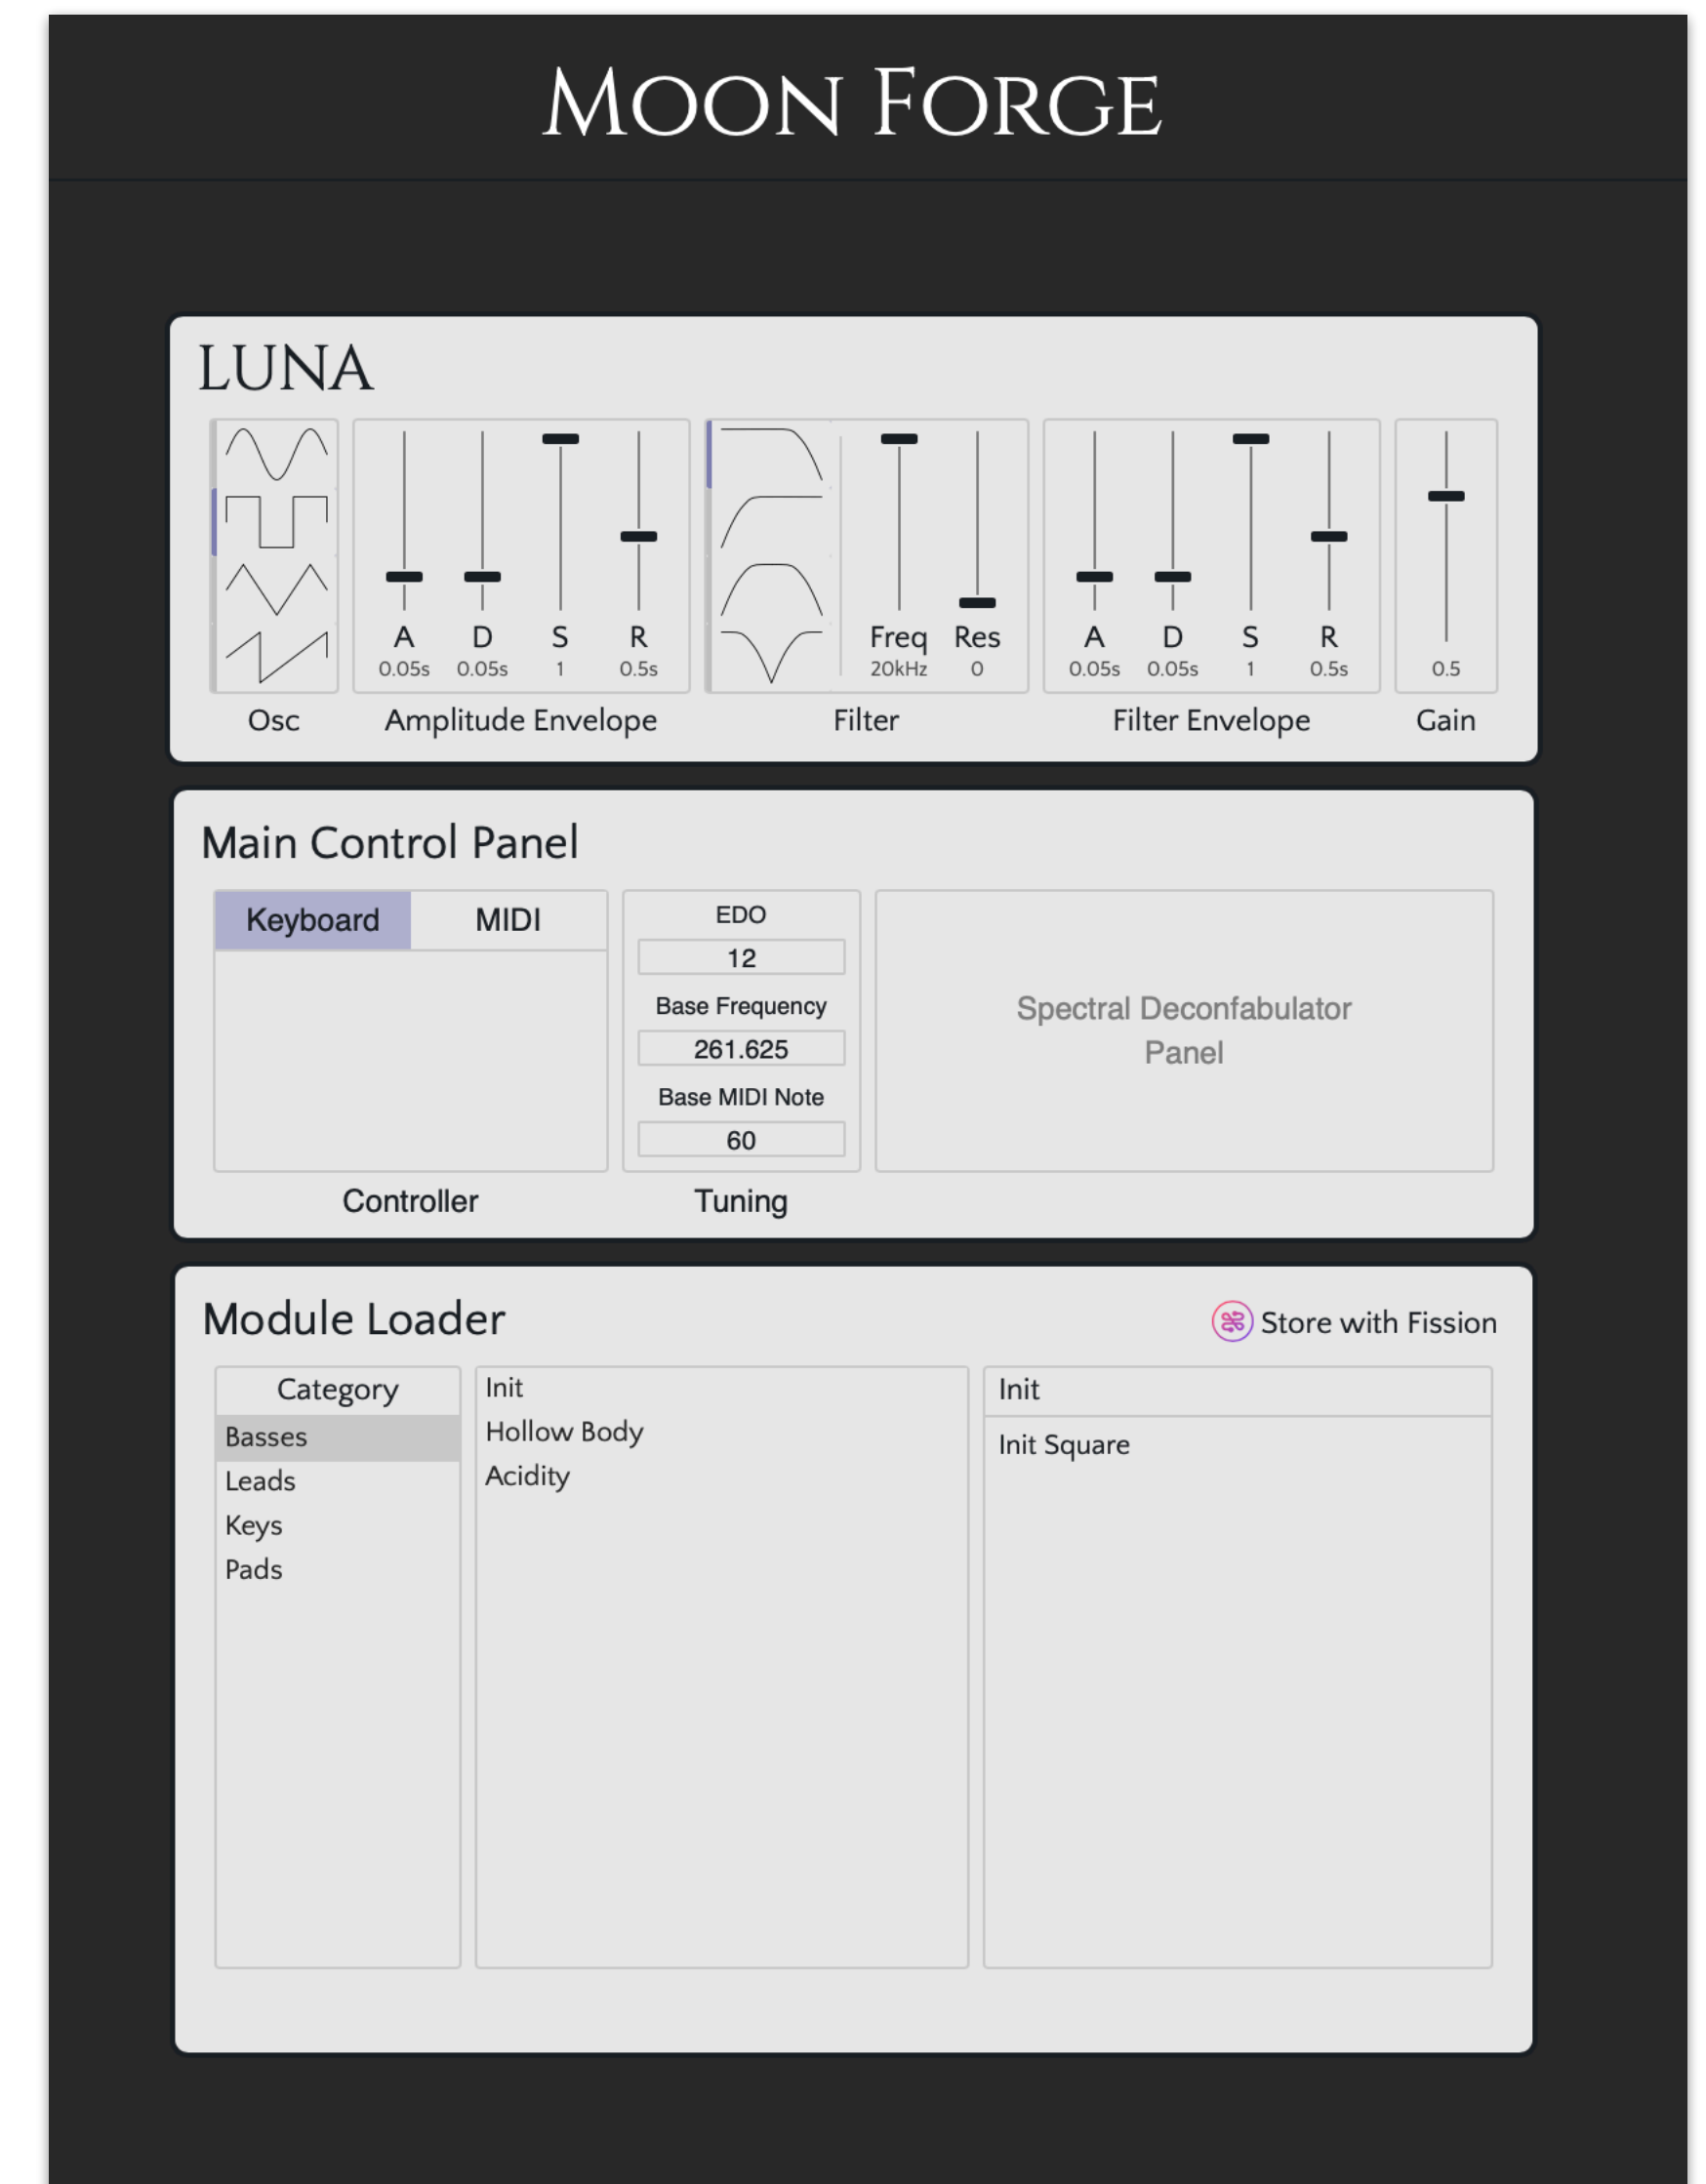

APP DEMOS

MOON FORGE

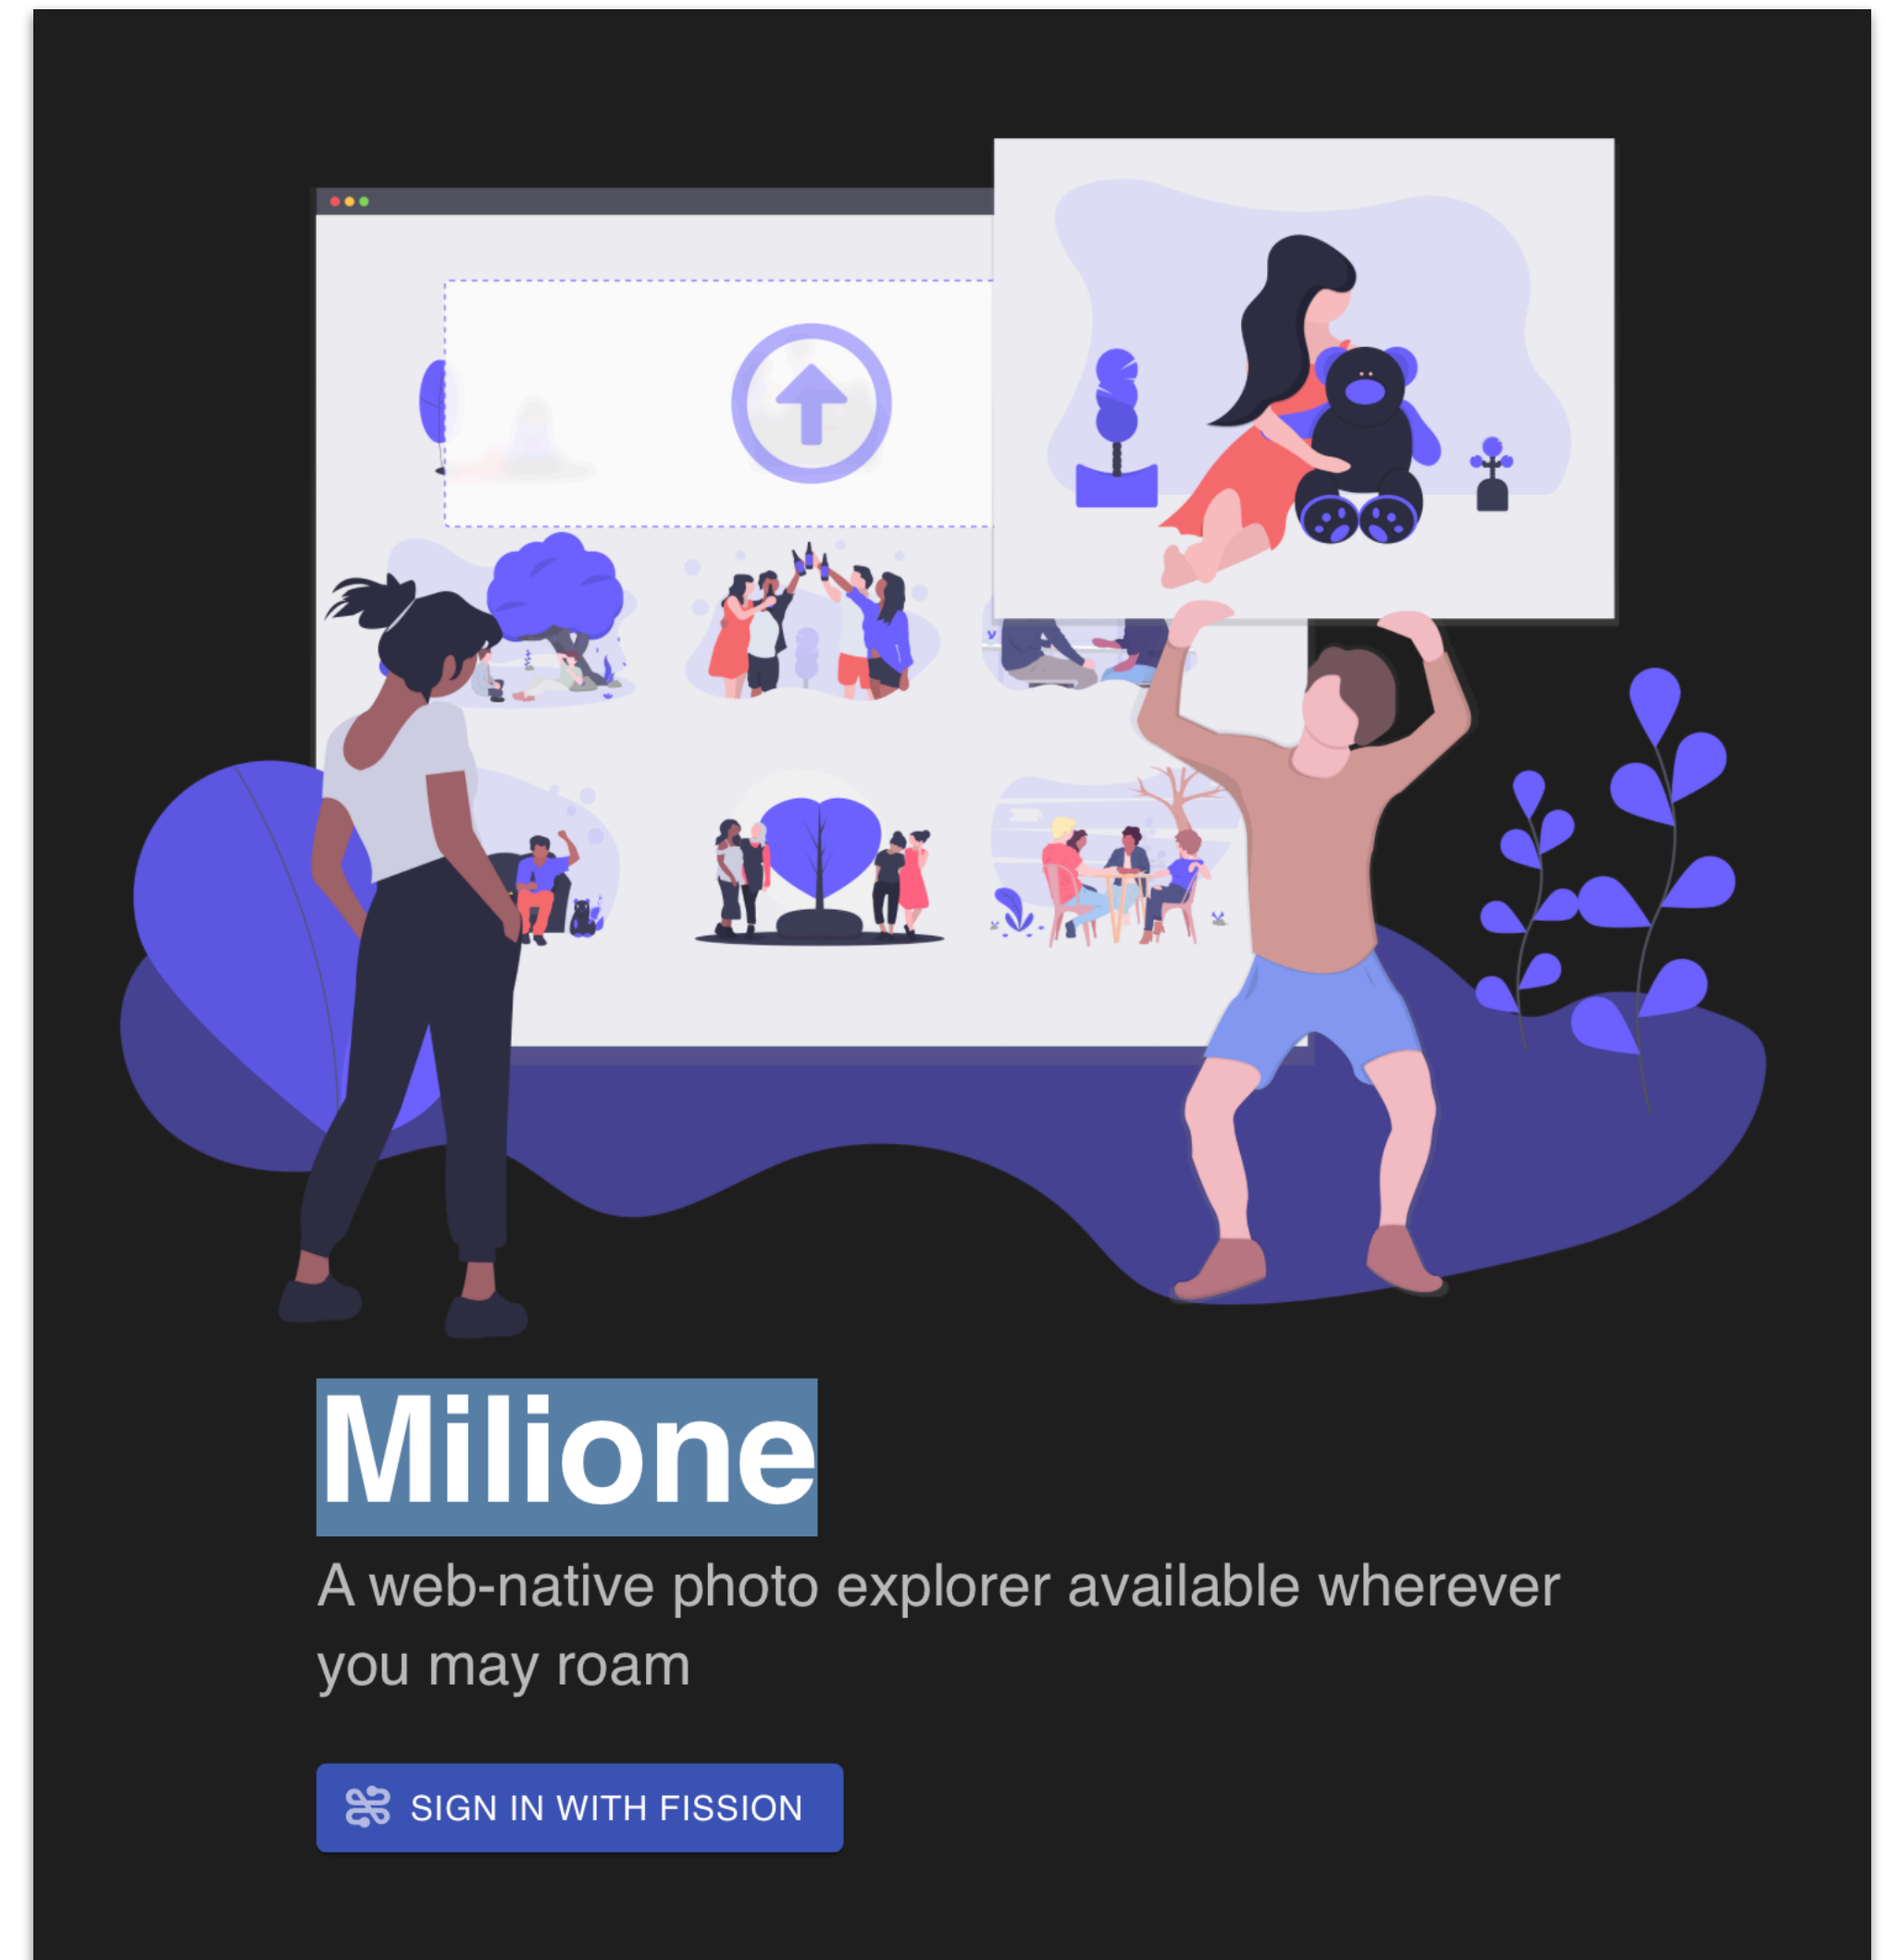

- By Brian Ginsburg
